

Annual Report and Accounts 2013

Serve customers well.
This is our purpose.

RBS is a UK-based banking and financial services company. Headquartered in Edinburgh, RBS operates in the United Kingdom, Europe, the Middle East, the Americas and Asia, serving over 24 million customers worldwide.

RBS provides a wide range of products and services to personal, commercial and large corporate and institutional customers through its two main subsidiaries, The Royal Bank of Scotland and NatWest, as well as through a number of other well-known brands including Citizens, Charter One, Ulster Bank and Coutts.

2013 Financial Results

RBS reports a pre-tax loss for 2013 of £8,243 million, including regulatory and redress provisions of £3,844 million, and impairments and other losses of £4,823 million related to the establishment of RBS Capital Resolution (RCR).

Excluding the impact of the creation of RCR, RBS operating profit (1) was £2,520 million, down 15% from 2012:

- Retail & Commercial down 4% to £4,078 million, with lower income in UK Corporate and International Banking offsetting improved impairments in Ulster Bank and UK Retail;
- Markets down 58% to £638 million, reflecting smaller balance sheet and reduced risk levels; and
- Non-Core losses down 27% to £2,107 million, with the cost base falling in line with run-off.

In 2013 RBS launched a comprehensive business review, aimed at transforming the bank. The results of this review were announced on 27 February 2014 (see pages 8 to 10).

Notes:

- (1) Operating profit/(loss) before tax, own credit adjustments, Payment Protection Insurance costs, Interest Rate Hedging Products redress and related costs, regulatory and legal actions, integration and restructuring costs, gain on redemption of own debt, write-down of goodwill, amortisation of purchased intangible assets, strategic disposals, bank levy, write-down of other intangible assets and RFS Holdings minority interest.
- (2) Ratio calculated under requirements in force at 31 December 2013.
- (3) Ratio calculated under requirements in force from 1 January 2014.
- (4) Net of provisions, including disposal groups and excluding repurchase agreements.

(5) Excludes derivatives collateral.

(6) Eligible assets held for contingent liquidity purposes including cash, Government issued securities and other eligible securities with central banks.

(7) Based on indicative Core attributable profit taxed at standard rates and Core average tangible equity per the average balance sheet (89% of Group tangible equity based on risk-weighted assets at 31 December 2013).

(8) Cost:income ratio is based on total income excluding own credit adjustments, gain on redemption of own debt, strategic disposals and RFS Holdings minority interest, and operating expenses excluding Payment Protection Insurance costs, Interest Rate Hedging Products redress and related costs, regulatory and legal actions, amortisation of purchased intangible assets,

integration and restructuring costs, bank levy, write-down of goodwill and other intangible assets and RFS Holdings minority interest.

(9) Includes the impact of business exits such as Citizens Financial Group and Williams & Glyn; bank levy; restructuring costs; and, from 2015, the EU resolution fund charge.

(10) During the year the Group recognised £4,823 million of impairment and other losses related to the establishment of RCR. This comprises impairment losses of £4,490 million (of which £173 million relate to core Ulster Bank assets which were not transferred to RCR but are subject to the same strategy) and £333 million reduction in income reflecting asset valuation adjustments.

Restructuring our balance sheet

Third party assets were reduced by £130 billion over the course of 2013, with Markets down £72 billion and Non-Core down £29 billion. In the five years since the end of 2008, the funded balance sheet has been reduced by £487 billion and total assets by £1,191 billion.

The Core Tier 1 ratio was 10.9% at 31 December 2013. On a fully loaded Basel III basis, the Common Equity Tier 1 ratio was 8.6%. The impact of the regulatory and redress provisions booked in Q4 2013 was already reflected in our future capital plan, and RBS continues to target a fully loaded Basel III Common Equity Tier 1 ratio of c.11% by the end of 2015 and 12% or above by the end of 2016.

Continued improvement in credit quality, particularly in the UK Retail and Non-Core portfolios, saw risk elements in lending fall by 4%. Reflecting the increased impairments associated with the creation of RCR, provision coverage increased from 52% at end 2012 to 64% at end 2013.

RBS remains highly liquid, with short-term wholesale funding down £10 billion to £32 billion at the end of 2013, covered more than four times by a £146 billion liquidity portfolio.

Building a bank that is trusted by its customers

RBS has announced a refreshed strategic direction with the ambition of building a bank that earns its customers' trust by serving them better than any other bank.

The bank will be structured around the needs of its customers, with seven existing operating divisions realigned into three businesses: Personal & Business Banking, Commercial & Private Banking and Corporate & Institutional Banking.

Ulster Bank in Northern Ireland will benefit from a closer integration with our personal, business and commercial banking franchises in Great Britain. We are continuing to explore further opportunities in the Republic of Ireland with a view to being a challenger to the systemic banks.

To position RBS to deliver a sustainable overall return on tangible equity of 12% plus in the long term, we must achieve a significant reduction in costs and complexity.

This simplification is intended to deliver significant improvements to services delivered to our customers while at the same time helping to bring our cost base down from £13.3 billion in 2013 to £8 billion in the medium term⁽⁹⁾.

Future performance will be reported against customer and financial measures. Further details are set out on page 10.

Operating results

RBS recorded an operating profit⁽¹⁾ of £2,520 million excluding the impact of the creation of RCR which reduced income by £333 million and increased impairments by £4,490 million. Including these RCR-related impairment and other losses of £4,823 million⁽¹⁰⁾, RBS recorded an operating loss of £2,303 million.

Group income, excluding the RCR impact, was down 10% to £19,775 million, principally reflecting a £1,161 million reduction in Markets income, with expenses down 4% to £13,313 million.

Retail & Commercial operating profit, excluding £1,385 million of impairments and other losses related to the creation of RCR, was down 4% to £4,078 million, with lower income in UK Corporate and International Banking offsetting improved impairments in Ulster Bank and UK Retail.

Markets operating profit, excluding £18 million of impairments related to the creation of RCR, was down 58% to £638 million, reflecting its smaller balance sheet and reduced risk levels.

Non-Core losses, excluding £3,420 million of impairments and other losses related to the creation of RCR, were down 27% to £2,107 million, with the cost base falling in line with run-off.

Loss attributable to shareholders was £8,995 million, reflecting the charges relating to the creation of RCR and legacy conduct litigation and redress, the write-down of goodwill and other intangible assets and deferred tax assets.

Tangible net asset value per ordinary and B share was 363p at 31 December 2013.

Delivering our capital plan

To deliver our capital plan RBS has formed the Capital Resolution Group (CRG), which is made up of four pillars: exiting the assets in RCR, delivering the IPOs for both Citizens and Williams & Glyn, and optimising the bank's group-wide shipping business.

RCR was set up from 1 January 2014 and will manage a pool of £29 billion of assets with particularly high capital intensity or potentially volatile outcomes in stressed environments, aiming to accelerate run-down of these exposures to free up capital for the bank. The revised strategy to run down high risk loans faster led to an increased impairment charge. When originally announced, RCR assets were projected to be £38 billion at the end of 2013, but accelerated disposals and increased impairments have reduced this total to £29 billion. Further details about RCR are set out on page 160.

During the course of 2013 RBS sold two tranches of its remaining shares in Direct Line Insurance Group, realising gross proceeds of £1,137 million. At 31 December 2013, RBS held 28.5% of Direct Line Insurance Group. On 26

February 2014, RBS announced that it had entered into a placing agreement to complete the sale of its residual interest (except for 4.2 million shares held to satisfy long term incentive plan awards granted by RBS to Direct Line Group management). Accordingly, on settlement of the placing, the Group will have completed the disposal as required by the European Commission.

On 27 November 2013, RBS announced the sale of its remaining economic interest in the WorldPay global payments business. A gain on sale of £159 million was recognised in Q4 2013.

On 1 November 2013, RBS announced plans to accelerate the divestment of Citizens, its US banking subsidiary. Preparations for a partial initial public offering (IPO) in 2014 remain on track, and the bank intends to fully divest the business by the end of 2016.

Following the conclusion of a £600 million pre-IPO investment by a consortium of investors led by global financial services specialists Corsair Capital and Centerbridge Partners, and including the Church Commissioners for England and RIT Capital Partners plc, the

Williams & Glyn business (formerly known as "Project Rainbow") has made good progress towards its IPO.

Discussions with the UK Government over the retirement of the Dividend Access Share (DAS) are well advanced. A successful restructuring of the DAS will represent a significant step towards the normalisation of RBS's capital structure.

On 16 December 2013, RBS cancelled its £8 billion Contingent Capital Facility with HM Treasury.

Legacy conduct issues

As announced in a trading update on 27 January 2014, RBS has provided £1,910 million in Q4 2013 covering claims and conduct-related matters primarily relating to mortgage-backed and other securities litigation. Regulatory and litigation provisions for the full year amounted to £2,394 million.

An additional £465 million provision for Payment Protection Insurance (PPI) redress and related costs was booked in Q4 2013, making a total of £900 million for the full year

Over time, with steady focus and disciplined delivery, the new RBS will emerge. The businesses we operate will be highly effective and relentless in their pursuit of delivering service that makes us number one for customers.

2013. Out of a cumulative PPI provision of £3.1 billion, £2.2 billion had been utilised by 31 December 2013. The remaining £0.9 billion provision covers approximately 12 months at current levels of redress and administrative expenses.

A further £500 million provision was made in Q4 2013 for interest rate hedging products redress and administration costs, reflecting higher volumes, higher anticipated redress payments and recalibration of our methodology based on more recent trends. The total charge for the full year was £550 million making a total of £1.25 billion of which £0.2 billion had been utilised by 31 December 2013.

Serving our customers

Investment of £700 million has been committed over the next 3-5 years to build the best retail and commercial bank in the UK. Investment in digital channels continued, with 50% of eligible customers now banking online or on mobile.

Mortgage balance growth was affected in H1 2013 by advisor training, but application volumes recovered during the second half, helped by RBS's lead in launching the second

phase of the Help to Buy scheme. Gross new lending in 2013 was £14.3 billion, up 3% from 2012. This represented an 8% market share, slightly in excess of RBS's share of mortgage stock.

UK Corporate will implement all the recommendations of the independent review of its lending standards and practices led by Sir Andrew Large.

Support for SME customers during 2013 included pro-active 'Statements of Appetite' sent to over 12,000 customers, resulting in more than £5.9 billion of new loan offers.

SME demand for credit has picked up over the course of the year, with new and increased lending sanctioned in 2013, up 6% from the prior year to £9.9 billion. SMEs drew down £6.4 billion of new loans in 2013, up 2% from 2012. However, businesses' cash generation remained strong, with SME current account balances up 13% from the end of 2012. Many customers increased their loan repayments and reduced overdraft utilisation, which dropped to 37% at the end of 2013 compared with 42% a year earlier.

Among larger businesses, £12.9 billion of new facilities were made available to new and existing clients. RBS also helped UK companies, universities and housing associations to raise £24.7 billion through bond issues in 2013.

RBS repaid all its borrowings from the Bank of England Funding for Lending Scheme (FLS) in 2013 but continues to participate fully in the scheme. In the period since launch to 31 December 2013, RBS allocated more than £4.7 billion of new FLS-related lending to business customers, with discounts targeted at SMEs and mid-sized manufacturers. We intend to remain in the scheme throughout 2014 (subject to no further changes in the scheme rules).

Total net lending flows reported within the scope of the FLS scheme were minus £2,295 million in Q4 2013, with net lending of plus £349 million to households and minus £2,645 million to private sector non-financial corporations, of which minus £671 million was to SMEs.

We are here to serve our customers. From the end of 2008 we have drastically changed as a business – our balance sheet has reduced by £1,191 billion, our capital ratios strengthened, our conduct and risk management framework overhauled. As a result, we are smaller, safer and stronger with a clearer focus. However, there was a clear need to unite the bank behind a single purpose and common set of values.

Our purpose and values

Our future is not about us, its about our customers. We needed to ensure that this ran through the bank – from boardroom to branch.

We spent time with colleagues across the bank debating what should be at the core of our ambition to build a bank known for its consistent, high quality customer service. We agreed on a single, simple purpose – to serve customers well. We want to be trusted, respected and valued by our customers, shareholders and communities. To do this we have put a common set of values at the heart of how we do business. Our values are not new, but capture what we do when we are at our best.

Our purpose: Serve customers well.

Our vision: We want to be trusted, respected and valued by our customers, shareholders and communities.

Our values:

Serving customers

We exist to serve customers.

We earn their trust by focusing on their needs and delivering excellent service.

Working together

We care for each other and work best as one team.

We bring the best of ourselves to work and support one another to realise our potential.

Doing the right thing

We do the right thing.

We take risk seriously and manage it prudently.

We prize fairness and diversity and exercise judgement with thought and integrity.

Thinking long term

We know we succeed only when our customers and communities succeed.

We do business in an open, direct and sustainable way.

All this comes together in Our Code.

We have a programme of change in place that embeds a working culture which celebrates challenge when business decisions or behaviours are not in line with our values. We have engaged our employees to stimulate ideas and change that ultimately results in material improvements to the customer experience.

At the beginning of 2013, a personalised letter launching the new purpose and values was signed by the members of our Executive Committee and sent to all of our employees. Employees were invited to engage in an open debate online to discuss the new values – 25,000 joined that conversation.

Regional leadership workshops were designed to build understanding and engagement for more than 3,000 of our leaders. Those leaders then engaged locally to help their people understand how the purpose and values were relevant to their business area. By September, 66% of staff had been involved in a

conversation with their leader, and 93% of those have a better understanding of the relevance to their part of the business.

We made fundamental, lasting changes to the way we do business by re-writing our code of conduct and policy framework. Our Code was an important milestone in our focus on the customer and our values. Our Code included a new decision making tool – the YES Check. It is a simple guide to help employees check whether they are making the right decision in line with our purpose and values. Mapped back to regulatory principles, the YES Check was another important recognition that the decisions we take everyday impact our customers and our communities.

We have continued to professionalise our customer facing staff, committing to accredit them against professional standards by the end of 2014.

We also changed the way we recognise the best behaviours in the bank. We

launched Our Values Awards for all our employees and nominations were submitted of examples where people were living the values and serving customers well.

New Leadership Standards were developed to align them directly with our values. These standards support Our Code and provide us with a clear view of what is expected from leaders and is being built into how we recruit, develop and reward them.

We have made progress but we need to continue to have a rigorous focus on how to serve customers well, and work to fully embed our values in everything we do. Our employees believe in the goals of RBS and already 1 in 2 people have seen a change in how their team works.

More information on our progress in 2013 to build an engaged and inclusive workforce will be available in our RBS Sustainability 2013 Report at rbs.com/sustainable.

The RBS business model is that of a UK-focused retail and commercial bank. Our market leading customer franchises in the UK – serving personal, business and corporate customers – form the anchor of the RBS strategy. Our wholesale banking operations in the corporate and institutional business enhance and complement the proposition to our commercial customers.

Our business model and strategy

Our major source of income in our retail and commercial banking businesses is net interest income. This is the difference between the income we earn from the loans and advances we have made to our personal, corporate and institutional customers and on our surplus funds and the interest we pay on deposits placed with us by our customers and our debt securities we have issued. We also earn fees from financial services and other products we provide to our customers as well as rental income from assets we lease to our customers.

Our Markets business earns income from client driven trading activities particularly Rates, Currencies, Asset-Backed Products and Credit.

Our leading customer franchises serve 24 million customers globally, of which more than 70% are in the UK. We aim to provide them with a comprehensive range of products, delivered through a number of channels, which are increasingly digital.

We do business in competitive markets but we have strong franchises and good growth

opportunities, and we aim to target our investment to maximise these opportunities.

Over the period 2009-2013, the RBS strategic approach has focused first and foremost on rebuilding financial resilience:

- reducing total assets, principally through the run-off of Non-Core;
- reducing risk concentrations;
- reducing dependence on short-term wholesale funding while achieving a deposit-led funding model; and
- reducing balance sheet leverage.

This emphasis was necessary in order to correct historical weaknesses and to set RBS on a sound footing, but it left us falling short in our ability to build long-term shareholder value on the foundation of serving our customers and meeting more of their financial needs.

In 2013 we have refocused our Markets and International Banking businesses to deliver a targeted wholesale banking proposition to UK corporates and global financial institutions.

Strategic review

On 1 November 2013 RBS announced a full review of its customer-facing businesses, its IT and operations, and its organisational and decision-making structures. As a result of this review, we have announced a refreshed strategic direction with the ambition of building a bank that earns its customers' trust by serving them better than any other bank.

Business structure

RBS will be structured to deliver this ambition by organising itself around the needs of its customers, so as to combine customer groups with similar needs into business units able to deliver co-ordinated services. The seven existing operating divisions will be realigned into three businesses:

- Personal & Business Banking will serve UK personal and affluent customers together with small businesses (generally reporting up to £2 million turnover), with more business bankers moving back into branches.
- Commercial & Private Banking will serve commercial and mid-corporate customers and high net worth individuals, deepening relationships with commercial clients operating overseas through its market-leading trade and foreign exchange services while connecting our private banking brands more effectively to successful business owners and entrepreneurs.
- Corporate & Institutional Banking will serve our corporate and institutional clients primarily in the UK and Western Europe, as

well as those US and Asian multinationals with substantial trade and investment links in the region, with debt financing, risk management and trade services, focusing on core product capabilities that are of most relevance to our clients.

Ulster Bank in Northern Ireland will benefit from a closer integration with our personal, business and commercial franchises in Great Britain, while continuing to operate under the Ulster Bank brand. We are continuing to review our business in the Republic of Ireland with a view to being a challenger to the systemic banks in Ireland.

The reorganised bank will be a UK-focused retail and corporate bank with an international footprint to drive its corporate business. It will be managed as one bank, with one strategy.

Each of the three businesses is built on franchises that have the potential to be the number one bank for their respective customer groups. Each is designed to:

- Serve customer needs better than the existing operating divisions.
- Help eliminate duplication of costs in front and back offices.
- Position RBS to deliver a sustainable overall return on tangible equity of 12% plus in the long term.

A more detailed review of component business lines continues within each business, and further updates will be provided over the course of the year.

Addressing costs and returns

Key to achieving this is a significant reduction in RBS's costs and complexity. Transforming the bank to deliver this involves rationalising and simplifying systems, based on a target architecture with improved resilience.

Examples of these measures include:

- The number of technology platforms we use will be reduced by over 50%.
- We will move from 50 core banking systems to around 10.
- From 80 payment systems currently maintained we will move to approximately 10.
- Our property portfolio will be reduced from 25 million square feet to 18 million square feet, including significant reductions in central London.
- We will maintain a similar level of investment spending but directed at customer-facing process improvements, instead of maintaining inefficient legacy infrastructure.

This simplification is intended to deliver significant improvements to services delivered to our customers but at the same time serves as the cornerstone of a programme designed to bring our cost base down from £13.3 billion in 2013 to £8 billion in the medium term, including the impact of business exits such as Citizens Financial Group and Williams & Glyn, the bank levy, restructuring costs and, from 2015, the EU resolution fund charge. This plan will take RBS towards a cost:income ratio of around 55%, moving towards 50% in the longer term. Bringing our cost base back into alignment with the reduced scale of our business underpins our potential to deliver improved returns in future years.

The costs to achieve this plan will total approximately £5 billion over 2014 to 2017; of this approximately £1 billion has already been committed to previous plans related primarily to Citizens, Williams & Glyn and the previous restructuring announced for Markets. Approximately £0.6 billion relates to the costs of achieving asset reductions and realisations in Markets as we reshape this business over the next three to five years.

	Personal & Business Banking	Commercial & Private Banking	Corporate & Institutional Banking
CEO	Les Matheson	Alison Rose	Donald Workman
RWAs profile (%) (1)	~35%	~30%	~35%
Operating profit profile (%) (1)	~50%	~30%	~20%
Target RoE (1)	15%+	15%+	~10% (2)

Notes

(1) All business targets refer to steady state performance 2018 – 2020.

(2) 7-8% medium-term.

Measures

Future performance will be reported against both customer and financial measures.

	Measure	2013	Medium term	Long term
Customer	Service (1)	<25% of businesses at #1		All businesses at #1
	Trust			#1 trusted bank in the UK
People	Great place to work			Engagement index ≥ Global Financial Services norm (2)

Capital strength	Common Equity Tier 1 ratio (5)	8.6%	≥12%	≥12%
	Leverage ratio (5)	3.5%	3.5-4%	≥4%

Notes:

- (1) Measured by Net Promoter Score, with the exception of Corporate & Institutional Banking, which will use customer satisfaction. NPS nets the percentage of "promoters" (loyal enthusiasts of the company) and the percentage of "detractors" (unhappy customers) to give a measure of customer advocacy.
- (2) Global Financial Services norm currently stands at 82%.
- (3) Including bank levy, restructuring charges and, from 2015, the EU resolution fund charge.
- (4) Calculated with tangible equity based on CET1 ratio of 12%.
- (5) Fully loaded Basel III.
- (6) This table contains forecasts with significant contingencies. Please refer to 'Forward Looking Statements' and 'Risk Factors'.

Delivery of 2009-2013 Strategic Plan

In 2009 RBS set out a five year strategic plan aimed at restoring RBS to standalone strength. The plan was built on four business objectives:

- To base RBS on enduring customer franchises, with each business capable of generating a sustainable return in excess of its cost of capital;
- To deliver the RBS strategy from a stable risk profile and balance sheet, with each banking business self-funding (100% loan:deposit ratio);
- To deliver an attractive blend of profitability, stability and sustainable growth from the chosen business mix; and
- Management hallmarks to include an open, investor-friendly approach; discipline and proven execution effectiveness; strong risk management; and central focus on serving our customers well.

We set out key measures and have consistently reported on our progress against these over the course of the five year plan. Progress against the risk measures has been strong, with all targets exceeded, in some cases by very large margins. Progress against value drivers, however, has not lived up to our expectations at the time the plan was established, with deterioration in both return on equity and cost:income ratio.

Progress versus Strategic plan

Key Measures	Worst point	2012	2013
Value drivers		Core	Core
Return on equity (1)	(31%)(2)	8.9%	4.6%
Cost:income ratio	97%(3)	59%	64%
Risk measures		Group	Group
Core Tier 1 ratio	4%(4)	10.3%	10.9%
Loan:deposit ratio	154%(5)	100%	94%
Short-term wholesale funding (STWF)	£297bn(6)	£42bn	£32bn
Liquidity portfolio (7)	£90bn(6)	£147bn	£146bn
Leverage ratio (8)	28.7x(9)	15.0x	14.4x

Notes:

- (1) Based on indicative Core attributable profit taxed at standard rates and Core average tangible equity per the average balance sheet (89% of Group tangible equity based on RWAs at 31 December 2013);
- (2) Return on tangible equity for 2008;
- (3) Year ended 31 December 2008;
- (4) As at 1 January 2008;
- (5) As at October 2008;
- (6) As at December 2008;
- (7) Eligible assets held for contingent liquidity purposes including cash, Government issued securities and other eligible securities with central banks;
- (8) Funded tangible assets divided by total Tier 1 capital; and
- (9) As at June 2008.

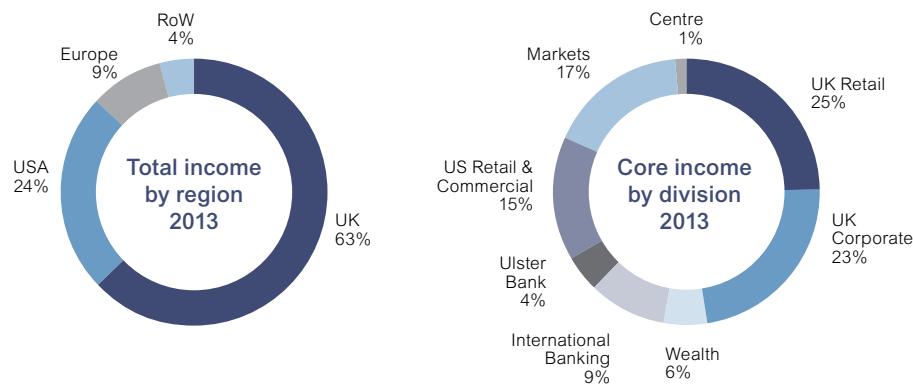

"We must become a company that knows what it means to obsess about our customers. This is a fundamental challenge that will involve the whole organisation."

RBS at a glance

RBS is rooted in the UK, serving personal, business and institutional customers in the UK and many other countries. Our businesses are strong players in the markets in which we choose to compete. The businesses are stronger together than apart, to the benefit of customers and shareholders.

RBS is now safer and the day when we will be able to offer shareholders a decent return is closer. But making RBS a really good bank demands more. That is why we are still investing more effort in all of our businesses to serve customers well.

Customer story

Mobile nation

With over one billion logins since its launch, the RBS mobile banking app helps customers access their money while on the move.

Over £30 million transferred every day

At the swipe of a smartphone customers can check their balance, move money, view their transaction history, pay a contact or even take cash out without a debit card. With over £30 million transferred every day, it's actually the bank's busiest branch: over a 30 day period, we had around 78 million logins which is equal to each customer visiting a physical branch around 30 times a month. By contrast, people tend to visit an actual branch less than once a month.

UK Retail

Les Matheson
Chief Executive

We offer a comprehensive range of banking products and related financial services to the personal market. We serve customers through the RBS and NatWest networks of branches and ATMs, and also through telephone and digital channels.

Performance highlights	2013	2012
Return on equity (%)	26.3	24.4
Cost:income ratio (%)	54	51
Loan:deposit ratio (%)	97	103
Risk-weighted assets (£bn)	43.9	45.7

Performance overview

- Operating profit increased 3% from £1,891 million to £1,943 million, driven by a decline in impairment losses.
- Mortgage balance growth was affected in H1 2013 by advisor training but recovered during H2 2013.
- Customer deposits increased by 7%, above UK market average.
- Net interest margin held steady, despite tightening margins on new mortgages. Lower income was earned on current account balances, but savings margins improved.

Building a better bank that serves customers well

In March 2013 UK Retail announced its strategy to become a simpler and more customer-focused business. Investment of £700 million over the next 3-5 years has been committed to build the best retail bank in the UK. Investment in digital channels continued, with half of all eligible customers now banking online or on mobile. Although branch counter transactions have fallen 30% since 2010 a programme to refurbish our branches has begun.

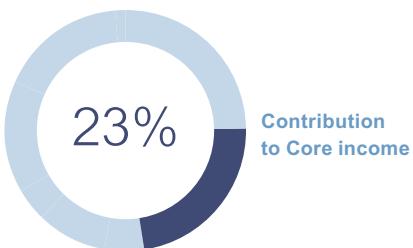

Customer story

Stormy weather

The UK suffered from terrible weather at the end of 2013, which caused serious damage and destruction. Adverse weather can have a dramatic effect on a business – loss of property and stock, failing systems, supply chain failures and halted trading – pushing them into financial difficulty, impacting employees and local communities. To help ease the pressure for businesses who have been directly or indirectly affected, we launched a £250 million UK Storm Business Fund. Interest-free loans can be provided for three months to viable and eligible businesses, whether or not they are existing customers (maximum of £250k per loan). Short-term, interest-free financing can be provided to cover, for example, cost of repairs and replacement stock while businesses wait for insurance claims to be paid.

UK Corporate

Chris Sullivan
Chief Executive

We are a leading provider of banking, finance and risk management services to the corporate and SME (small and medium-sized enterprise) sector in the United Kingdom. We offer a full range of banking products and related financial services.

Performance highlights

	2013	2012
Return on equity (%)	7.9	14.5
Cost:income ratio (%)	50	44
Loan:deposit ratio (%)	80	82
Risk-weighted assets (£bn)	86.1	86.3

Performance overview

- Operating profit was down 41% at £1,060 million. Excluding £410 million impairments related to the creation of RCR, operating profit was down 18%.
- Impairments included an additional £410 million related to the creation of RCR. Excluding this, impairments were 7% lower than in 2012.
- Excluding the impact of increased impairment losses related to the creation of RCR, return on equity was 11%.
- Net interest income fell in a lower interest rate environment.
- Continued run-off of property and shipping, outweighed growth in other sectors, leaving loan balances down 5%.

Building a better bank that serves customers well

To reinforce its commitment to supporting the UK economy, RBS appointed Sir Andrew Large to lead an independent review of its lending standards and practices. UK Corporate has undertaken to implement all the Independent Lending Review's recommendations and is adopting a revised strategy to accomplish this. Support for SME customers included proactive "Statements of Appetite" sent to over 12,000 customers, resulting in approximately £6 billion of new loan offers.

Customer story

Network connection

Every entrepreneur knows the power of networking to build connections and contacts. Taking that network to the next level takes time and effort, things which are often in short supply.

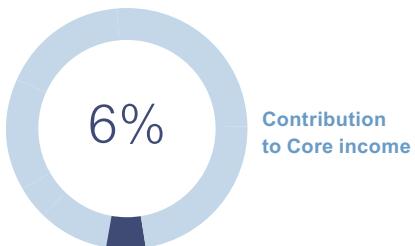

Coutts were able to bring the right people to the table

However, Coutts' focus on adding value to every relationship can also help bring the right people together. When one client was looking to diversify into renewables and food security in the Middle East, Coutts were able to bring the right people to the table, providing a catalyst for the client's growth opportunities and showing the value of our inter-connected world.

Wealth

Rory Tapner
Chief Executive

We provide private banking and investment services in the UK through Coutts & Co and Adam & Company; offshore banking through RBS International, NatWest Offshore and Isle of Man Bank; and international private banking through Coutts & Co Ltd.

Performance highlights

	2013	2012
Return on equity (%)	12.0	13.1
Cost:income ratio (%)	77	75
Loan:deposit ratio (%)	45	44
Risk-weighted assets (£bn)	12.0	12.3

Performance overview

- Operating profit was 9% lower at £221 million.
- Income was 7% lower, with net interest income declining over the year, reflecting tighter deposit spreads. Deposit margins improved in the fourth quarter following a repricing initiative.
- Assets under management rose 3%, but total client assets and liabilities managed by the division declined by 2% following the repricing initiative.
- Expenses were 4% lower, partly reflecting reduced headcount and tight discretionary cost management.

Building a better bank that serves customers well

2013 saw a major shake-up of the UK financial advice landscape with the implementation of the Retail Distribution Review. Clients welcomed Coutts' new fully compliant advice-led model, where advisers must achieve the more stringent Level 6 rating, in excess of the Level 4 minimum required by the Financial Conduct Authority. Work continued to streamline client-facing processes and drive increased technology benefits.

Customer story

Straight ahead

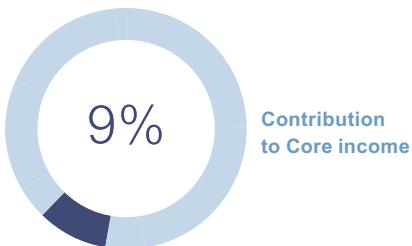

TomTom's navigation and location systems are used by customers in over 35 countries. To comply with finance regulations, they had to implement a standard format for payments across the Single Euro Payments Area.

Used by customers in over 35 countries

They also wanted to use this as an opportunity to make payments more efficient and reduce risk. They worked closely with RBS to make a number of changes to their internal processes and thanks to meticulous planning and communication, the changes were successful. TomTom now has one, single payment process for suppliers across the world.

International Banking

John Owen
Chief Executive

We offer a core banking proposition to multi-national corporates and financial institutions by providing debt financing, risk management and transaction services. We work with clients to find the best product mix to execute their strategy.

Performance highlights

	2013	2012
Return on equity (%)	3.9	9.1
Cost:income ratio (%)	73	66
Loan:deposit ratio (%)	91	91
Risk-weighted assets (£bn)	49.0	51.9

Performance overview

- Operating profit decreased by 53% to £279 million, with cash management income depressed by the decline in LIBOR interest rates. Excluding impairments of £52 million related to the creation of RCR, operating profit was down 44%.
- Expenses were reduced by 5%, as International Banking kept costs under tight control and achieved timely run-off of discontinued businesses.
- Customer deposits declined by 15% in line with a change in Group funding strategy.

Building a better bank that serves customers well

With business conditions still challenging as themes of low interest rates and margin compression continue, International Banking remained focused on cost discipline throughout 2013. The division continued to strengthen its balance sheet, reducing risk-weighted assets by 6%, despite the introduction of more severe credit risk models.

RBS received a number of awards for trade finance and cash management services.

Customer story

Home run

Demand for affordable housing is extremely high across the UK and Apex, one of Northern Ireland's largest housing associations, is working hard to help meet this need. Apex employs 570 people and has over 4,000 units under management, including general needs housing, supported housing, sheltered housing and registered care.

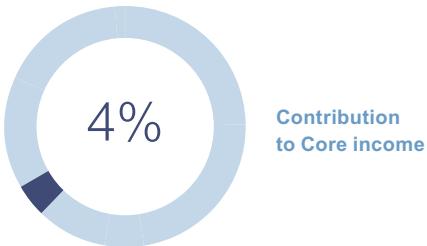

1,000 brand-new social and affordable homes

A £10 million loan from Ulster Bank will help Apex deliver around 1,000 brand-new social and affordable homes, creating much-needed new homes as well as hundreds of construction jobs.

Ulster Bank

Jim Brown
Chief Executive

We are a leading retail and commercial bank in Northern Ireland and the Republic of Ireland. We provide a comprehensive range of financial services through our Retail Markets and Corporate Markets divisions.

Performance highlights	2013	2012
Return on equity (%)	(32.4)	(21.8)
Cost:income ratio (%)	64	62
Loan:deposit ratio (%)	120	130
Risk-weighted assets (£bn)	30.7	36.1

Performance overview

- Operating loss for 2013 was £1,457 million, including increased impairment losses of £892 million relating to the creation of RCR. Excluding the impact of the creation of RCR, operating loss improved by £494 million or 48%.
- Impairment losses improved significantly, excluding the RCR impact, with a 64% reduction in losses in the mortgage portfolio.
- Retail and SME deposit balances increased by 2%, offset by a reduction in wholesale customer balances, resulting in a 2% decline in total deposit balances.

Building a better bank that serves customers well

The creation of RCR will expedite the resolution of underperforming, capital intensive assets and allow Ulster Bank to focus on building a stronger core business for the future. Ulster Bank is committed to supporting the Irish economic recovery and £1.7 billion of funding has been made available to support new lending in 2014, £1 billion for business customers and £700 million for personal customers.

Customer story

System success

Our new Branch Image Capture (BIC) teller system has helped create a much better customer experience. Cheques and documents can now be scanned at the teller window, with transactions being balanced there and then in front of the customer. That means fewer errors and corrections as well as helping to reduce fraud.

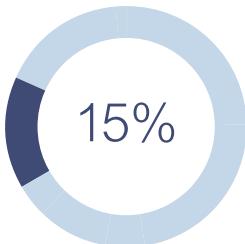

The system helped create a much better customer experience

BIC supports our goal of becoming our customers' primary banking partner through greater convenience, more privacy and fewer errors. Now we have a truly functional tool that delivers efficiency and security for our customers.

US Retail & Commercial

Bruce Van Saun

Chief Executive, RBS Citizens and Head of RBS Americas

We provide financial services primarily in the Northeastern, Mid-Atlantic and Midwest United States through the Citizens Bank, Charter One and RBS Citizens brands. We are engaged in retail and corporate banking activities.

Performance highlights

	2013	2012
Return on equity (%) (1)	7.2	8.9
Cost:income ratio (%) (1)	73	71
Loan:deposit ratio (%)	91	86
Risk-weighted assets (£bn)	56.1	56.5

Note (1) Excludes the litigation settlement and net gain on sale of Visa B Shares in 2012.

Performance overview

- Operating profit of \$1,012 million was down 15%, with low short-term interest rates continuing to limit net interest margin expansion while rising long-term rates slowed mortgage refinance volumes.
- Average loans and advances were flat, with commercial loan growth of 5% partly offset by run-off of long-term fixed rate consumer products.
- Impairment losses increased by \$99 million to \$244 million.

Building a better bank that serves customers well

On 1 November 2013 RBS announced plans to accelerate the initial public offering of RBS Citizens Financial Group (RBSCFG) into the second half of 2014. It is expected that by the end of 2016 RBSCFG will be a standalone regional bank, wholly owned by public shareholders. RBSCFG commenced a number of actions in 2013 aimed at improving financial performance, driving profitable growth by focusing on the customer and delivering an enhanced experience.

Customer story

Weighing anchor

Peel Ports Group, one of the UK's biggest port operators, handles over 65 million tonnes of cargo a year. An RBS backed refinancing programme has enabled the development of Liverpool2, the new deep sea container terminal in the Port of Liverpool, costing in excess of £300 million.

The benefit of this investment is hugely positive.

As one of their most important sites, this investment in growth will assist the UK's shipping industry to remain globally competitive as well as acting as a catalyst for future development. It's believed Liverpool2 will help create around 5,000 jobs in Merseyside, including additional apprenticeships – a great boost for the local economy.

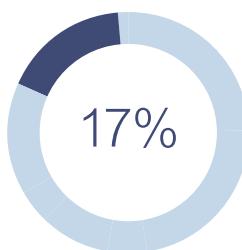

Markets

Peter Neilson

Co-CEO

Suneel Kamlani

Co-CEO

Contribution
to Core income

We provide financing, risk management and advisory services to RBS corporate and institutional clients.

Performance highlights

	2013	2012
Return on equity (%)	5.0	9.6
Cost:income ratio (%)	79	66
Risk-weighted assets (£bn)	64.5	101.3

Performance overview

- Operating profit fell by £889 million, 59% to £620 million with income falling by 26%, partly offset by significant cost reductions. The de-risking of Markets resulted in a 36% reduction in risk-weighted assets.
- Currencies income increased but returns from the Rates business were subdued.
- Costs fell by 11%, reflecting a reduction in headcount of 1,000 evenly split between front and back office – and tightly controlled discretionary expenses.
- Third party assets were reduced by £72 billion (down 25%) and risk-weighted assets by £37 billion (down 36%).

Building a better bank that serves customers well

In 2013, Markets launched and executed a strategy aimed at reducing risk, tightening controls, consolidating the geographic footprint and reducing complexity by refocusing on the franchise's core strengths. The division met or exceeded all internal targets for reducing controllable costs, risk-weighted assets and the balance sheet, while meeting revenue and income expectations. Lower income in 2013 compared with 2012 reflected both the strategic scaling back of the balance sheet and risk reduction in a difficult market environment with client activity limited by uncertainty over monetary policy in the US.

Non-Core

Rory Cullinan

Chief Executive

Performance highlights	2013	2012
Risk-weighted assets (£bn)	29.2	60.4
Third party assets (£bn)	28.0	57.4

Established in 2009 as the principal vehicle of risk reduction. At inception it had £258 billion of third party assets and £171 billion of risk-weighted assets. Non-Core reduced these assets in a capital efficient manner and at a pace the bank could afford.

Performance overview

- Third party assets declined by £29 billion, or 51%, reflecting run-off, disposals and impairments.
- Risk-weighted assets were down £31 billion, driven by disposals and run-off.
- Operating loss of £5,527 million was £2,648 million higher than in 2012, predominantly due to £3,118 million of 2013 impairments related to the creation of RCR.

Building a better bank that serves customers well

Non-Core has successfully achieved and surpassed its five year strategic plan target set in 2009, reducing third party assets by 89% from an initial £258 billion. By the end of 2013 Non-Core represented c.4% of RBS's funded balance sheet, compared with 21% when the division was created.

While the new RCR is similar in size to Non-Core, the assets have been selected on a different criteria and are not directly comparable.

Business Services

Simon McNamara

Group Chief Administrative Officer

In Business Services we keep RBS running, supporting our customers 24 hours a day, 365 days a year. We put money in the ATMs, keep the bank's technology systems operating, help to keep our customers safe from fraud, process billions of pounds worth of payments across the world, and provide call centre and online services to customers.

We work across four business areas: Technology Services, Group Operations, Corporate Services and Strategy & Architecture. Together we connect colleagues and customers, providing the tools and services that help us to serve our customers when and where they need us.

- We issued two million time-saving contactless cards in 2013 allowing customers to make quick and easy payments for everyday items under £20 in less than a second.
- Through our Simplifying Customer Life initiative 4,500 ideas have been submitted improving over four million customer interactions each year.
- Since 2010, when we launched our mobile app, we have had more than a billion logons.
- Our energy initiatives have resulted in an 18% reduction in energy consumption in our flagship buildings during 2013.
- We introduced a funds transfer option on our ATMs, which allows customers to move funds between their accounts.
- IT incidents in recent years have caused inconvenience to our customers. To reduce the impact of any technology outages on our customers, we are investing over £750 million in a three-year period to improve the resilience of our systems, becoming safer and more secure.
- Over two million customers log on to online or mobile banking every day.

Governance at a glance

Board and committee activity increased significantly in 2013, with a number of key strategic issues taking centre stage, and Board committees continued to play a crucial role in our governance framework, undertaking their complex work comprehensively and effectively supporting the work of the Board.

Conduct and culture have been key areas of focus throughout the year and our 2013 results reflect the impact that conduct related matters continue to have on financial and operating performance. The Board fully supports our new values, which were launched in 2013 and focus on serving customers, working together, doing the right thing and thinking long term. It is vital that the Board continues to set the tone from the top to drive essential cultural change and that our governance framework continues to evolve to support this and our key strategic changes. These will be key priorities for the Board and its Committees in 2014.

Philip Hampton

Chairman of the Board of directors

Our Board

The Board has 11 directors comprising the Chairman, two executive directors and eight independent non-executive directors, one of whom is the Senior Independent Director. Biographies for each director and details of which Board Committees they are members of can be found in the Corporate governance report on pages 39 to 42.

There were a number of changes to the Board's composition during 2013, details of which can be found in the Chairman's Statement on pages 22 and 23 and in the Corporate governance report on page 45.

The Board is the main decision making forum for the company. It is collectively responsible for the long-term success of the company and is accountable to shareholders for financial and operational performance.

The Board has overall responsibility for the following areas:

- the establishment of strategy and consideration of strategic challenges;
- the management of the business and affairs of the Group;
- ensuring that risk is managed effectively through the approval and monitoring of risk appetite;

- considering stress scenarios and agreed mitigants and identifying longer term strategic threats to the Group's business operations;
- the allocation and raising of capital; and
- the preparation and approval of the RBS annual report and accounts.

We conducted an internal evaluation of the effectiveness of the Board and its committees in 2013, led by the Group Secretary. The evaluation has concluded that the Board is operating effectively but has identified some areas for improvement which we will focus on during 2014.

Our Board committees

Group Audit Committee

Assists the Board in discharging its responsibilities for monitoring the integrity of the financial statements of the Group. It reviews the accounting policies, financial reporting and regulatory compliance practices of the Group and the Group's system and standards of internal controls, and monitors the Group's processes for internal audit and external audit.

For more detail of the operation of the committee please refer to the full committee report on pages 52 to 57.

Board Risk Committee

Provides oversight and advice to the Board on current and potential future risk exposures of the Group and risk strategy. It reviews the Group's compliance with approved risk appetite and oversees the operation of the Group Policy Framework.

For more detail of the operation of the committee please refer to the full committee report on pages 58 to 63.

Group Performance and Remuneration Committee

Responsible for overseeing performance and the Group's policy on remuneration. It also considers senior executive remuneration and makes recommendations to the Board on the remuneration of executive directors.

For more detail of the operation of the committee please refer to the full committee report on pages 66 to 90.

Group Nominations Committee

Assists the Board in the selection and appointment of directors. It reviews the structure, size and composition of the Board, and membership and chairmanship of Board committees.

For more detail of the operation of the committee please refer to the full committee report on pages 50 and 51.

Group Sustainability Committee

Responsible for overseeing and challenging how management is addressing sustainability and reputation issues relating to all stakeholder groups, except where such issues have already been dealt with by other Board committees.

For more detail of the operation of the committee please refer to the full committee report on pages 64 and 65.

Executive Committee

Supports the Group Chief Executive in managing the Group's businesses. It reviews strategic issues and initiatives, monitors financial performance and capital allocations and considers risk strategy, policy and management.

RBS Capital Resolution (RCR) Board Oversight Committee

Provides oversight of RCR's progress against, and compliance with, its primary objective and asset management principles. It reports to the Board on its own activities and recommends changes, where appropriate, to RCR strategy.

UK Corporate Governance Code

This is the first year that we are reporting under the new narrative reporting requirements which include the new Strategic Report and changes in remuneration reporting. Throughout the year ended 31 December 2013, the company has complied with all of the provisions of the UK Corporate Governance Code except in relation to provision (D.2.2) that the Group Performance and Remuneration Committee should have delegated responsibility for setting remuneration for the Chairman and executive directors. The company considers that this is a matter which should rightly be reserved for the Board. Our statement of compliance with the UK Corporate Governance Code (the "Code") is set out on page 91.

"We are confident that the actions announced will deliver a customer-focused bank."

Chairman's statement

Philip Hampton
Chairman

Five years ago RBS embarked on a strategic restructuring designed to correct the aspects of its business that made it particularly vulnerable to the financial crisis of 2008. The execution of that restructuring has transformed the financial position of the bank: we have reduced our balance sheet by more than £1 trillion, repaid hundreds of billions of Government funding support and removed the imminent threat that our size, risk and complexity posed to the UK economy. In 2013 we took further steps to resolve our remaining legacy balance sheet issues by announcing the creation of RCR, with the aim of accelerating the removal of these legacy assets and releasing the capital they are still tying up.

We have also taken very substantial charges for a variety of conduct-related issues, including LIBOR, PPI, interest rate swaps and RMBS litigation. Almost all of these costs for

RCR and conduct issues can properly be described as legacy costs, arising from events and actions in the run-up to the financial crisis.

As our 2013 results make clear, however, restoring the strength of the bank's balance sheet was only one part of the job. In June the Board announced that Stephen Hester, who had led our financial restructuring since 2008 very effectively, would be stepping down as Group Chief Executive. We selected Ross McEwan to re-energise the task of building a bank that earns its customers' trust, improves operating efficiency and can move down the path back to full private ownership. The Board and I want to thank Stephen Hester for his dedication to RBS and to congratulate him on his success in putting the bank on to a sound footing.

There have been a number of other changes to the Board's composition during the year.

Bruce Van Saun took up his new role as Chairman and Chief Executive of RBS Citizens Financial Group, Inc. on 1 October 2013 and has stepped down from the Board having done an excellent job as our Group Finance Director. He was succeeded by Nathan Bostock, who has since confirmed his resignation; his leaving date has not yet been agreed and the search for his replacement is under way.

Two of our non-executive directors, Joe MacHale and Art Ryan, also retired from the Board in 2013 and Philip Scott will step down from the Board by 31 October 2014. I thank them all for the hard work and wisdom they have brought as directors. In December 2013, we also welcomed Robert Gillespie as a new non-executive director. I would like to take this opportunity to express my appreciation to all of my fellow directors for their commitment and readiness to deal with the unusual challenges of a government-controlled listed company.

Ross McEwan is bringing a fresh perspective to RBS's challenges, and that perspective is now bearing fruit in the results of the strategic review that we are setting out. The Board believes that this was the right time for this review, so as to ensure that we target our future efforts firmly towards serving our customers, shareholders and wider stakeholders in the best possible way.

Regrettably, last year brought further reminders that many of our customers and stakeholders do not trust us to do so. In response to persistent criticism of our performance in lending to SMEs the Board commissioned an independent review by Sir Andrew Large; we expect to adopt all of his recommendations.

We also faced accusations that our Global Restructuring Group had been culpable of "systematic and institutional" behaviour in artificially distressing otherwise viable businesses. No evidence has been provided for that allegation but it has, nevertheless,

done serious damage to RBS's reputation. That is why we instructed the law firm Clifford Chance to conduct an independent review. This is an area where all banks routinely make difficult judgments, and indeed the banking sector has been criticised for excessive forbearance in recent years, charged with supporting unviable "zombie" companies for too long.

Issues like this continue to underscore the important role played by culture and values in enabling us to become the trusted bank we aspire to be. The Board fully supports the new values we launched in 2013, and it is vital that we continue to set the tone from the top in the coming year to drive essential cultural change.

On many of these issues we have engaged closely with HM Treasury (HMT) through UK Financial Investments, which manages HMT's shareholding, and with our two main regulators, the Prudential Regulation Authority and the Financial Conduct Authority. Over the course of the year they have all proposed actions for consideration by the Board.

Ross McEwan has spoken of the need to reset our relationship with HMT and our main regulators. I hope and believe that we have made good progress in this direction. There is a desire on all sides that our relationship with the Government in its role as controlling shareholder should be primarily managed by UKFI on a commercial, arm's length basis. I want to make it clear, however, that the path we have set and decisions we have taken reflect the Board's view of what is in the interests of all RBS's shareholders and other stakeholders.

We are monitoring the debate on Scottish independence but, as I and my colleagues have said many times, we are politically neutral. We don't support political parties or political movements. We will respond to whatever voters decide and governments agree.

Clearly there are issues we are looking at – currency, the application of financial regulation, lender of last resort, credit ratings – which could affect us. But there is real uncertainty about how any of these matters would be settled in the event of a Yes vote and the outcome would depend on negotiations between the two governments. Indeed, there could be a prolonged period of uncertainty over each of the issues so it really is impossible to quantify with any precision what the effects of each might be right now.

We are confident that the actions announced will deliver a customer-focused bank with undoubted capital strength, the potential for attractive returns and an ability to recommence dividends over the medium term.

Philip Hampton
Chairman

“Our focus will be determined by where our customers need us, and where we can serve their needs better than anyone else.”

Chief Executive's review

Ross McEwan
Chief Executive

Since 2009 RBS has cleaned up the world's largest bank balance sheet by removing more than £1 trillion in assets. This was a remarkable achievement, born of absolute necessity, but delivered with exceptional skill.

These skills now need to be deployed on a task of equal magnitude: creating a step-change in the customer service and financial performance of RBS. The hardest part of our financial restructuring is now complete, and we now need to use our strengths and capabilities to make RBS an example for everything that should be right with banking.

Since taking up post in October, I have listened extensively to our customers and our staff. It is clear to me that people have not given up on us. Our customers tell me we have good people with good intentions. But they also tell me they are frustrated by the way we work.

The potential for RBS is tangible, we have points of brilliance, but these are masked by a heavily damaged reputation, very high cost base and a structure that reflects the bank we are leaving behind, not the one we will become.

We hold many excellent market leading positions across the bank and, despite the distractions of our recovery, there are areas where we have started to excel for our customers. But this remains an inconsistent picture and the returns in our strongest businesses can often be diluted by weaker parts of the franchise, the price of past misconduct and an uncompetitive cost base.

We are clear on our purpose as a bank: to serve customers well, but we are yet to operate in a way that means we can really deliver on this. Delivering on our purpose will mean running the bank differently.

To meet more of our customers' needs we must earn more of their trust. This starts with improving the things that matter most to customers, and then rewarding their loyalty. There are too few rewards for customer loyalty in banking and we need to change this. Loyal and rewarded customers are the basis for the higher quality earnings we intend to deliver.

Change won't happen overnight, but we are clear where we can improve and our progress will be evident quarter-by-quarter. We have already started calling out the barriers to our ambition.

The opportunity cost of our current approach is clear. We have an 18% share of the GB main current account market but less than half our customers have a mortgage with us. The same is true in different forms across all our businesses and paints a clear picture of untapped potential. I know this frustrates our people, all of whom want to prove the worth of this bank through better service to customers.

The lack of connectivity for customers is a by-product of our own complexity. Too many customers are forced to bank around us; adapting their behaviour to fit with our processes. It's frustrating for them and value destructive for us.

Our customers rightly demand that we are competitive, in every setting and in every sector. We currently carry the cost base of a global financial services group when in fact we are now largely a UK-based bank. Our operating model means our customers and shareholders end up paying for parts of the business that cost too much and deliver too little in their interests.

This needs to change.

RBS needs a strategy that will address the weakness in our performance for customers, so that we can provide acceptable returns to our shareholders. The business review I have conducted has revealed our key challenges, but it has also given us a clear path to improve the bank.

On every dimension our opportunity to improve the relative and absolute performance of the bank is significant. It is my job to make sure our strategy for customers translates into value for our shareholders.

2013 Financial performance

This bank has had an extraordinary five years. Cleaning up a £2.2 trillion balance sheet whilst addressing the many failings of the past has carried a very heavy cost, which shows in our results.

Even by recent standards, 2013 was a difficult year. Regulatory fines, wide-ranging customer complaints, technology problems and public questioning of our integrity all weighed heavily, and bring into sharp focus the job we have at hand.

For the full year, we reported a pre-tax loss of £8.2 billion. The loss includes £3.8 billion of legacy litigation, conduct and regulatory costs and £4.8 billion of impairments and other losses relating to the establishment of RBS Capital Resolution (RCR).

Looking at underlying performance, total income was down £2.3 billion for the year, primarily reflecting lower revenues from the re-sized Markets business while costs were only down £0.5 billion – pushing the cost:income ratio towards the worse end of our peer group at 67%.

Returns varied across our businesses, but only UK Retail and Wealth delivered returns above the cost of equity. That said, the bank continued to make progress despite our financial performance.

Our business milestones included completing the run-down of another £29 billion of Non-Core assets – ahead of plan and taking the total reduction since Non-Core was established to £230 billion – setting up the RCR unit and reducing risk-weighted assets, and hence our risk profile, by £66 billion, on a fully loaded Basel III basis.

We also cancelled the £8 billion Contingent Capital Facility with HM Treasury, reduced our stake in Direct Line Group to 28.5% – in line with our commitment to the EC – and we are in advanced discussions to restructure the Dividend Access Share.

It is clear that the underlying performance over the last year underlines the need for us to shift the emphasis from restoring the balance sheet to recharging our performance.

Why we must change

Capital: The capital plan we announced in November outlined a number of concrete actions to place the bank on a sure footing. Among them, the creation of RCR and the flotation of Citizens Financial Group will allow us to target a Common Equity Tier 1 capital position of 12% or greater by the end of 2016.

The capital plan has been designed to allow us to focus without distraction on improving our operating performance.

We will do what it takes to reach and maintain a prudent capital position.

Cost and Complexity: There was a necessary complexity to running an organisation with a £2.2 trillion balance sheet, as ours was five years ago, but this need has reduced as we have scaled the bank dramatically down over recent years. We now need to simplify our structure and cost base to match.

RBS remains a complex bank. We can be hard to do business with, costly to operate, and complicated to work in. We have seven customer-facing divisions as well as RCR and central functions, many of which are duplicated across divisions. Across this we have hundreds of internal committees. These are costly barriers to interaction between our people and with our customers, meaning we lose out too many times on the opportunity to serve them with more products and services.

This complexity shows in our cost:income ratio, which reaches 73% when fully loaded to include the bank levy and restructuring costs. Reducing costs and divesting businesses in the bank will inevitably result in reduced staff levels. We do not yet have detailed plans for implementation and as always we will deal with such matters sensitively, talking to our staff before communicating any such changes.

Trust and Reputation: Behaviour and performance influence the perception of worth. RBS carries huge reputational discount due to the extent of bad headlines the bank attracts. This carries through into our customer and investor interaction and can only be solved by a sustained improvement in the quality of our earnings and meaningful change in the way we deal with customers.

Our customers like and trust the people they deal with, but not the bank itself. We can change this by moving more of the appropriate decision making and process management closer to the people who deal with customers.

Performance: Great companies know that quality service goes hand-in-hand with disciplined management; they chase down costs intelligently so they can invest more for their customers. They prioritise and invest with relentless focus on the areas that deliver the strongest, most sustainable returns.

RBS has earned credibility for the execution of our financial restructuring. The same discipline and focus is now needed on our day-to-day operating performance to better deliver for the customer. The costs that subdue our performance need to be intelligently removed and redirected towards activities that enhance our earnings.

Our new strategy

We now have a strategy to deliver a sustainable bank with a clear ambition: we want to be number one for customer service, trust and advocacy, in every one of our chosen business areas by 2020.

Our ambition aims to deliver a bank that is more trusted than others in the UK. We will earn the trust of customers by serving them better than any other bank.

Quality service leads to repeat business and customer advocacy. Repeat business and higher advocacy leads to sustainable income. We won't compromise on this logic.

The bank will be structured to deliver this ambition by organising around the needs of our customers.

We will collapse seven operating divisions into three customer businesses that can understand our customers' needs and provide appropriate, consistent services far better than we can across current silos.

Our support functions will be smaller, more expert and dedicated to helping the businesses succeed for customers. We will run highly disciplined and well managed conduct and risk functions to maintain safety and soundness.

This will be a highly effective bank and in the medium term we will aim to deliver a cost:income ratio (including bank levy, restructuring charges and, from 2015, the EU resolution fund charge) of around 55%, falling in the long term to around 50%.

The frontline of this bank is where we'll stand out. Accountable, trusted professionals will staff the perimeter of the bank and drive it forward. They will be supported by simple, effective processes on a sound technology platform.

Only 30% of our people today deal directly with the customer. By 2017 more than half will deal directly with the customer and all our people will be measured against our success in improving customer advocacy.

Our focus will be determined by where our customers need us, and where we can serve their needs better than anyone else.

The UK is our home market and our strongest market. It is also our biggest advantage. Our corporate customer trade flows mean we need a strong European and US presence, so this is where we will be. Our UK clients rely on inward investment, so we'll retain a presence in Asia.

Our three customer businesses will cover Personal & Business Banking, Commercial & Private Banking, and Corporate & Institutional Banking. Across the businesses we will have one management team, working to one joined-up plan.

The businesses will be built on franchises that can be number one for customers. We have a family of brands across the bank and will use these to deliver on our ambition.

Not every business in our current structure will be best placed to deliver on our strategy. Technology investment will enable some to improve service at a rate that outpaces the market, but others will not.

For those activities where we can't see a clear path to being number one, we will review on the basis of 'fix, close or dispose'. These will become clear as each of our three businesses defines its new customer franchises over the coming months.

The three businesses of the go-forward bank have been designed against a number of goals. Firstly, they will better serve customer needs than the existing operating divisions. Secondly, they will help eradicate duplication of cost in both the front and back office. Thirdly, they will position us to deliver a sustainable return on equity in each business.

Update on capital plan

We announced in November that we will target a fully loaded Basel III Common Equity Tier 1 ratio of 12% or greater by the end of 2016 which will principally be delivered through the Capital Resolution Group.

Ahead of results, we announced that we would take an additional £2.9 billion of charges for litigation and conduct related matters. While these charges were in our future capital plan, provisions were recognised in 2013 and reduced our fully loaded Basel III Common Equity Tier 1 ratio to 8.6% at the end of 2013.

So how do we get to our 12% 2016 target? This will primarily be due to the successful run-down of RCR and the IPO of Citizens, as well as further targeted risk-weighted asset reduction, which will continue to be the main drivers of our plan to deliver our 12% target by the end of 2016.

Citizens Financial Group: The cornerstone of the capital plan is the IPO of Citizens Financial Group in the United States. We have appointed advisers and this is on schedule for later this year.

RCR: The creation of RCR from 1 January 2014 originally identified £38 billion of third party assets that were highly capital intensive. This represented 5% of our funded balance sheet but used up 20% of our capital.

Mainly as a result of the increased impairments we have taken and significantly higher levels of disposals in Non-Core than had been forecast, the opening balance is £29 billion of third party assets and £65 billion of risk-weighted asset equivalents (RWAE). This reduction in assets has also resulted in a corresponding decrease in the bank's funding requirements.

UK branch divestment: To meet our EC-mandated branch divestment, the Williams & Glyn brand will return to the high street via an IPO over the coming years. To achieve this we signed a deal with a consortium of investors led by Corsair Capital and Centerbridge Partners in September 2013. The business will require separation from RBS and this process is well under way.

Ulster Bank: The thinking behind every aspect of our new strategy applies to our business in the island of Ireland.

Consumers and businesses across the island of Ireland deserve a better banking service. To achieve this, however, we must change the way we currently organise our business in the Irish market place. We took the first major step at the end of 2013 when we

announced our intention to remove £9 billion of the worst credit risks from the Ulster Bank balance sheet. Our second step is focused on improving customer experience and shareholder return.

As outlined in November, we are reviewing our business to make it viable and sustainable into the future. In this regard we are accelerating our strategy for the bank to improve service to our customers, reduce costs and simplify our operating model.

Our bank in Northern Ireland will benefit from a closer integration with our personal and business franchises in the rest of the United Kingdom. There are meaningful synergies in terms of investment, costs and customer experience from doing this. It is essential if we are to provide a more appealing and compelling service to our customers in Northern Ireland under the Ulster Bank brand.

In the Republic of Ireland we will continue to explore further opportunities to transform our business. We have a range of options but we are now clear on the goal; we will build on our position to be a compelling challenger bank to the domestic pillar banks.

Our customers in the island of Ireland need to know that we are committed to providing them with a great everyday banking service. We will finalise our plans in the coming months – but this is about a change in business strategy not a withdrawal from the market.

These moves are designed to position the bank to do more for our customers and consequently reward our shareholders for their patience.

Measures that matter

We will only succeed in delivering our goals if everyone who works in the bank is clear on the measures that matter. It is too easy to be distracted by measures that flatter progress on things that ultimately don't count towards our ambition.

The measures we use must have credibility with customers and the wider public if we are to regain trust. And they must focus the bank relentlessly on improving returns for shareholders. It is abundantly clear to me that

we need to reward our existing shareholders for their patience and attract new ones based on our potential and performance.

Measure 1: Customer

We will target the best Net Promoter Score in the market in the long term in each of our chosen business areas. The most trusted bank in the UK in the long term.

Measure 2: Efficiency

We will aim to deliver a cost:income ratio (including bank levy, restructuring charges and, from 2015, the EU resolution fund charge) of approximately 55% in the medium term, falling in the long term to around 50%. On the same basis, we target a reduction in our costs to approximately £8 billion in the medium term.

Measure 3: Returns

Our overall targeted return on tangible equity (RoTE) will be approximately 9-11% in the medium term. Our long-term RoTE target is 12% plus.

Measure 4: Capital strength

We will target a CET1 capital ratio, on a fully loaded Basel III basis, of 12% or greater by the end of 2016. Our targeted leverage ratio, on the same basis, will be 3.5-4% in the medium term and 4% or above in the long term.

These simple measures mean we will strike a permanent balance between the needs of our stakeholders.

How we'll do business

The scale of the challenge we have faced over the last few years taught us a simple fundamental lesson: you cannot succeed at your customers' expense. This is why last year we agreed a very simple purpose for the bank: to serve customers well.

Our future is not about us, it's about our customers. These words greet our employees as they walk into our offices every day. They have come to represent a shorthand for what went wrong, but also what we need to get right.

Although we remain in the shadow of our past conduct failings, we have a clear and universal set of values that bind the bank together.

Serving customers

We exist to serve customers. We earn their trust by focusing on their needs and delivering excellent service.

Working together

We care for each other and work best as one team. We bring the best of ourselves to work and support one another to realise our potential.

Doing the right thing

We do the right thing. We take risk seriously and manage it prudently. We prize fairness and diversity and exercise judgement with thought and integrity.

Thinking long term

We know we succeed only when our customers and communities succeed. We do business in an open, direct and sustainable way.

These values are the basis for how we lead, how we reward, how we make decisions and how we treat our customers and each other. They are not yet etched in stone, but become stronger the more they are tested. They are core to us succeeding as a bank.

Conclusion

RBS isn't just any bank. Few, if any, comparisons do justice to the scale of the turnaround that RBS required.

We've got to a point of safety and soundness through a steady focus and patient determination. There will be more things from our past that come back to haunt us, but they will be fewer in number.

Over time, with steady focus and disciplined delivery, the new RBS will emerge. The businesses we operate will be highly effective and relentless in their pursuit of delivering service that makes us number one for customers.

We will be simple to do business with, free from distractions and supported by a strong capital base.

The outcome will be a bank that is truly trusted by customers.

Ross McEwan

Chief Executive

Economic and monetary environment

It has been noted before that when economies are emerging from recessions rooted in high levels of debt and stresses in the financial system, growth is slower than in the typical recovery. That was the experience again in 2013 in the major markets in which RBS operates.

In the UK, performance improved. Total economic activity, as measured by gross domestic product (GDP), grew by 1.9% compared with growth of 0.3% in 2012. At the start of the year, expectations had been for an increase of only 1.0%. Consumption led the way, despite falling real wages. There were more people in work and households drew down savings to fund spending.

Unemployment fell, from around 7.9% at the start of the year towards 7.0% at its end.

Housing market activity accelerated sharply, prompted in part by measures to encourage house purchases such as Help to Buy. According to the Halifax house price index, the average price of a house in the UK increased by 5.8% during the year. Other indices reported stronger price growth. Prices look to have risen in all parts of the UK but inflation was strongest in London, where prices rose by more than 10%.

Inflation ended the year at the 2.0% target having averaged 2.6% for the year as a whole. The Bank of England continued its ultra-loose monetary policy stance. The Bank Rate remained at 0.5%, although market rates increased towards the end of the year on expectations of tighter monetary policy in the United States. There were no additions to the stock of assets purchased through the quantitative easing programme. In August 2013, the Monetary Policy Committee began offering 'forward guidance' on its intentions. It said that it will not consider changing the Bank Rate or the stock of assets purchased until the unemployment rate reaches 7.0%, unless inflation threatens to take off or there are concerns about financial stability.

The Funding for Lending Scheme was adjusted during the course of the year to

enhance the incentives for banks to lend to small firms and later to withdraw that support for lending to individuals. The Bank of England's Credit Conditions Survey suggested that the supply of credit had expanded towards the end of the year.

In the face of considerable fiscal austerity and continuing disputes about the public finances, which led to a government shutdown in the autumn, GDP growth in the United States was 1.9% compared with 2.8% in 2012. There was encouraging news on the job market, where unemployment had fallen to 6.7% in December 2013, although part of the fall was accounted for by people leaving the job market rather than finding work. The housing market again performed strongly, with prices up 14% in the year to November.

In December, the Federal Reserve took the first formal steps towards tightening monetary policy. It announced that it would reduce the amount of assets purchased under its quantitative easing programme by \$10 billion each month, with the programme likely to be ended in the second half of 2014. It maintained its guidance that the Fed Funds Target Rate would remain at 0.25% until the unemployment rate reaches 6.5%.

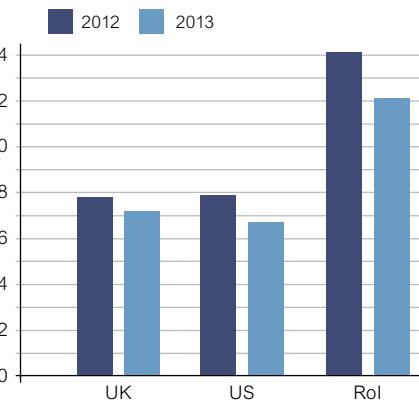

Ireland was able in early 2014 to exit the adjustment programme it had agreed with the European Central Bank, the European Commission and the International Monetary Fund. However, GDP contracted by 0.7% in the four quarters to Q3 2013. The export sector continued to benefit from the boost to competitiveness delivered by falling real wages, although export performance also reflected the decision of companies with limited local activity to domicile in Ireland.

For Ireland, gross national product (GNP) is a better measure of the performance of Ireland's domestic economy and people's material well-being. It reflects the income residents receive rather than the value of the incomes generated in the country, an important distinction where there is a large foreign-owned sector that remits profits overseas. GNP increased by 2.7%.

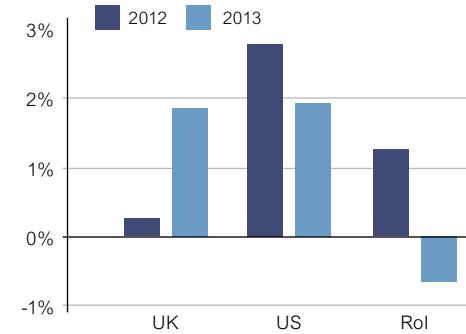

Unemployment averaged 13.2% and finished the year at 12.4%. House prices rose by 6.4%, the first year-on-year increase since 2007. However, rises were confined to Dublin, where prices increased by 16%. Outside the capital, prices fell slightly. Nationally, prices ended the year 45% below their 2007 level.

Entering 2013, the greatest economic concern was how problems related to sovereign debt in the euro zone would be managed. With the exception of Cyprus, there were none of the episodes of concern that had marked previous years. Markets were generally convinced that the European Central Bank would indeed 'do what it takes' to sustain the single currency. Further steps were taken towards a banking union. Nevertheless, the region's economy remained weak. Unemployment averaged 12.1%, a record, and inflation fell to 0.8% at the end of the year.

Unemployment rates, % December

Real GDP growth rates, %

Financial strength and resilience are at the heart of our Strategic Plan.

Risk overview

Key themes of 2013

Safety and soundness

The Group continued to pursue its safety and soundness agenda during 2013, with Non-Core's assets falling to £28 billion and Markets repositioning its business, both resulting in risk reduction and lower RWAs.

Whilst the continued deleveraging led to a significant reduction in RWAs, this was more than offset by the impact of the regulatory and redress provisions and increased impairment losses reflecting the establishment of RCR.

Our Core Tier 1 capital ratio improved over the year, increasing from 10.3% to 10.9%. The fully loaded Basel III Common Equity Tier 1 ratio also improved in the year to 8.6%.

The Group's liquidity position continued to strengthen and at the end of the year, the liquidity portfolio of £146 billion was more than four times greater than its short-term

wholesale funding of £32 billion. The loan:deposit ratio continued to improve and was 94% at the end of the year.

Loan impairment charges were £8.4 billion during 2013 of which £4.5 billion related to the creation of RCR. Underlying impairment losses fell by £1.4 billion and provisions coverage of risk elements in lending increased to 64%, up from 52% a year ago. The Group continued to reduce risk concentrations, notably in commercial real estate. Exposure to eurozone periphery countries also continued to fall, down by 11% to £53 billion at the end of the year. Of this, 70% related to Ireland. The Group still has significant credit risk exposures in absolute terms with credit risk RWAs at £313 billion, following a 16% reduction in the year.

The Group's exposure to market risk continued to fall, with average trading VaR declining to £79 million from £97 million. Market risk RWAs at £30 billion are now less than half their end 2010 level of £80 billion.

Conduct risk is one of the most significant issues facing the bank, and the Group continued to suffer from legacy conduct

issues during 2013, notably in relation to PPI, Interest Rate Hedging Products and mortgage-backed and other securities litigation. During the year, the Group focused on embedding good conduct at the heart of its business, working to complete the development of its conduct risk framework and promoting staff understanding of conduct issues. It also worked to enhance its assessment of operational risk to identify important vulnerabilities.

Strategic review

The Group launched a strategic review in the fourth quarter of 2013 to reshape the business to deliver superior customer service. This involved a wide-ranging review of core activities, resulting in the formulation of a plan to address the business challenges of the next five years. While the Group believes the resulting strategy is appropriate, risks remain; the strategy may prove inadequate or the Group may be unable to execute it successfully. Its successful execution, despite increasing regulatory demands and scrutiny as well as a challenging economic environment, is key to the future success of the Group.

To deliver its capital plan, RBS has formed Capital Resolution Group (CRG), which comprises four pillars: exiting the assets in RCR, delivering the IPOs of both Citizens Financial Group and Williams & Glyn, and optimising the bank's group-wide shipping business. RCR was set up from 1 January 2014 and will manage a pool of funded assets (£29 billion) with particularly high capital intensity or potentially volatile outcomes in stressed environments, aiming to accelerate the run-down of these exposures to free up capital for the Group.

The Group continues to target a fully loaded Basel III Common Equity Tier 1 ratio of approximately 11% by the end of 2015 and 12% or above by the end of 2016. The timely run-down of RCR and the successful divestment of Citizens Financial Group, in particular, are cornerstones of this capital strategy.

Top and emerging risk scenarios

RBS identifies and monitors its top and emerging risk scenarios. A number attracted particular attention from senior management during 2013 which are discussed below.

For further information on these and other risks, see pages 179 to 181.

Macroeconomic risks

- Increased impairments arising from defaults in sectors to which RBS has concentrated exposures, particularly commercial real estate and shipping. Optimisation of the Group's shipping and a significant proportion of commercial real estate portfolios is part of CRG strategy.
- Increased impairments arising from a more severe-than-expected economic downturn. RBS developed business plans to take into account the possibility of slow economic growth and implemented strategies, such as cost reductions, to reduce its earnings vulnerability.
- An increase in RBS obligations to support pension schemes. The trustee is responsible for the investment of the main scheme's assets, which are held separately from the assets of RBS.

Conduct, regulatory and legal risks

- Increased conduct costs and reputational damage arising from a failure to achieve fair customer outcomes. In order to address this risk, during the year RBS continued to embed good conduct at the heart of the business to ensure fair outcomes for customers.
- Increased costs and reputational damage arising from a failure to demonstrate compliance with existing regulatory requirements regarding conduct, particularly with respect to mis-selling. Although more work needs to be done to mitigate this risk, RBS has simplified some products and stopped offering others. Where appropriate, it has compensated purchasers of some products and services, such as payment protection insurance and certain interest rate hedging products.
- Losses or reputational damage arising from litigation. RBS defends claims against it to the best of its ability and co-operates fully with various governmental and regulatory authorities.

Risks related to the Group's operations

- Increased losses arising from cyber attacks. The Group has participated in an industry-wide cyber attack simulation. It has also initiated a program to improve controls over user access, taken steps to rationalise its websites, put anti-virus protection in place and educated staff on information protection.
- Increased losses arising from the failure of information technology systems. RBS has launched a major program to improve resilience, enhanced back-up systems and created a 'shadow bank' capable of providing basic services in the event of need.
- Increased costs arising from a failure to execute successfully major projects. RBS is working to implement change in line with its plans while assessing the risks to implementation and taking steps to mitigate those risks where possible.
- Increased costs due to an inability to recruit or retain suitable staff. RBS has communicated expected changes in its organisational structure to members of staff, implementing plans aimed at minimising unexpected staff losses.

Political risks

- RBSG and the Royal Bank, its principal operating subsidiary, are both headquartered and incorporated in Scotland. The Scottish Government is holding a referendum in September 2014 on the question of Scottish independence from the UK. Although the outcome of such referendum is uncertain, subject to any mitigating factors, the uncertainties resulting from an affirmative vote in favour of independence would be likely to significantly impact the Group's credit ratings and could also impact the fiscal, monetary, legal and regulatory landscape to which the Group is subject.
- Were Scotland to become independent, it may also affect Scotland's status in the EU.
- The occurrence of any of the impacts above could significantly impact the Group's costs and would have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The integral role of risk management

Risk management is essential to making RBS safe and sustainable, and is an activity performed throughout all of RBS operations. A strong culture of risk management and control will provide the foundation for improving performance and deliver future success.

A more detailed discussion of developments in 2013 can be found in the 'Risk and balance sheet management' section on pages 187 to 191.

For information on how we manage Environmental, Social and Ethical (ESE) risks, please see our Sustainability report, available at rbs.com/sustainable.

"The success of a bank depends on two things. A strong financial position; and a reputation for great customer service based on a deep connectivity with the society the bank supports, and is in turn supported by."

Ross McEwan
Chief Executive

Sustainability

Sustainability at RBS means building our future on long term thinking that focuses on our customers and supporting the communities in which they live. We are committed to being open and transparent regarding the challenges faced by our business, so our stakeholders can see what we are doing to become a more sustainable bank. You can read more about the issues raised here, as well as about our wider sustainability agenda, at rbs.com/sustainable.

Governance

The sustainability programme at RBS is built on a robust governance framework that provides direction on our sustainability objectives. The Group Sustainability Committee (the "Committee") is a Committee of the Board and comprises three independent non-executive directors. The Committee is chaired by our Senior Independent Director, Sandy Crombie, and attended by senior

representatives from the customer facing divisions as well as Human Resources, Sustainability, Risk Management, Communications, Legal, Strategy and Corporate Services. The Chairman of the board also regularly attends the meetings. The work of the Committee is essential to ensuring that our approach to issues is managed effectively and debated at the appropriate level.

The Committee has overseen a number of important developments within the company since it was established in 2009. For more information on the work of the Committee in 2013, see the report of the Chair of the Committee on page 64.

Stakeholder engagement

Operating in a sustainable manner is about managing our business in a way that takes account of the impact of our activities on our stakeholders. As such, we work with a number of stakeholder groups to understand their views of our organisation, to help shape the way we do business. As a large company we have many stakeholders and we engage with them in a variety of ways, from focus groups to meetings to online forums. These interactions

inform decision making and ultimately improve our company. More detail about our stakeholder engagement is available at rbs.com/sustainable.

As part of our wider stakeholder engagement programme, the Committee runs its own programme of structured stakeholder engagement sessions. In 2013, the Committee took part in seven of these stakeholder sessions, open forums where advocacy groups can discuss key areas of concern with the most senior decision-makers in RBS.

We will continue to host these sessions to ensure that we understand our stakeholders' priorities. For more detailed information on these sessions see our sustainability pages on rbs.com.

External commitments

RBS is a signatory to a number of voluntary sustainability commitments and standards. We understand that implementing commitments is an ongoing process, and we are continuously working to integrate these into how we run our business. We are a member of the Equator Principle (EP)

Environmental impacts table

Assessment Parameters					
Baseline year	2011

Association Steering Committee. The EPs are a voluntary set of standards adopted by banks for determining, assessing and managing social and environmental responsibilities in project financing. We will not provide project finance where the borrower will not, or cannot, comply with these principles of socially responsible investment.

We have been members of the United Nations Global Compact (UNGC) since 2003, the leading platform for the development, implementation and disclosure of responsible policies and practices in the areas of: human rights, labour, environment and anti-corruption.

Each year RBS receives ratings for its environmental and social performance by external indices. RBS has been included in the Dow Jones Sustainability World Index (DJSI) every year since its launch in 1999, achieving our best ever score in 2013. The Index ranks companies' corporate sustainability performance, based on analysis of economic, environmental and social issues like corporate governance, risk management, branding and climate change.

The CDP is an independent, investor-driven organisation which facilitates the

measurement and disclosure of Green House Gas (GHG) Emissions for 2,500 organisations in over 60 countries. In 2013 RBS received a disclosure score of 88% and a performance score B.

The FTSE4Good Index Series measures the performance of companies that meet globally recognised corporate responsibility standards. RBS has been included in the FTSE4Good since it was launched 10 years ago.

Transparency and disclosure

We are committed to being open and transparent in our reporting of material issues facing our company. Here we present data on our GHG emissions, diversity data, as well as an update on our approach to managing Human Rights issues. To find more sustainability data read our latest Sustainability Report, available at rbs.com/sustainable.

Managing our impact on the environment

We aim to be recognised as a leader among large global financial institutions in managing our own environmental impacts and developing financial services that support sustainable development.

The activities of RBS and those of our clients can present a number of Environmental, Social and Ethical (ESE) risks and it is our responsibility to manage these risks. We have a robust ESE policy framework, with sector specific policies relating to high risk sectors including oil and gas, mining and metals and forestry.

We are reducing the environmental impact of our operations, led by our 2011 Environment Targets that cover our use of energy, water, waste, paper and CO₂ emissions from business travel. In order to ensure our targets continue to be stretching, we have re-examined the baseline on which they are set and adjusted for the decrease in headcount the company has experienced since they were set.

For a full breakdown of our direct environmental impacts, as well as the basis of reporting for the data above, please visit our sustainability pages on rbs.com.

RBS in the Community

We run a number of targeted programmes focused on providing support to the communities where we operate. In addition to this, we have a well established employee volunteering and giving programme in RBS. As well as matching employee donations and fundraising, we also support volunteering during work time. For more information on our community investment please visit rbs.com/sustainable.

Diversity at RBS

We believe it is important that everyone in RBS feels valued and supported. We appreciate the unique perspective and skills that individual staff can bring to the business. Inclusion is more important to RBS than it's ever been. Through 2013, we've taken time to refresh our focus, step back and think about how we support all our colleagues to reach their full potential and better serve our customers. This is delivering a more 'joined up' approach to influencing key organisational processes and practices, achieving better balance and sustainable development. We've continued to progress diversity and inclusion initiatives (including Sexual Orientation, Disability, Race and Gender). Our inclusion policy standard applies to all employees, in every part of the business, in every part of the world and is published online. The strategy for diversity and inclusion sits with the Board and Executive Committee.

As at 31 December 2013, of our global population of 118,079 employees, 54,370 (46%) were male and 63,709 (54%) female. We had 1,071 senior managers (of which 915 (85%) were male and 156 (15%) were female), which encompasses our executive employee

population and individuals who are directors of our subsidiaries. The Company's Board of Directors has 11 members, comprising eight male and three female directors.

Our approach to Human Rights

We recognise our corporate responsibility to respect and uphold human rights, regularly review our policies and procedures to ensure that we avoid infringing on the human rights of others, both in our own operations and throughout our sphere of influence. In 2013, we contributed to the Thun discussion paper on the implications of UN Guiding Principles 16-21 for banks and are committed to the implementation of the Guiding Principles within our operations.

We have adopted and contributed to a number of internationally accepted codes, notably the Equator Principles and the UN Global Compact, which specifically address the management of human rights issues. The RBS Group Code of Conduct sets out the standards we expect our people to work to, including a clear commitment to respecting human rights. We listen to our people in a variety of ways, including through an annual employee survey, enabling our people to raise

issues regarding their working environment. We also have in place an independent whistleblowing facility for employees to raise concerns, without fear of adverse consequence.

Our Sustainable Procurement Code sets out our expectations of the companies that we work with. It clearly states that our suppliers should not engage in breaches of human rights or labour rights, or in discrimination. We are also committed to equal opportunities for suppliers, and we recognise that diversity strengthens our supply chain.

Our ESE risk policies include sector-specific human rights risk screenings and are regularly reviewed and updated to ensure best practice. We conduct due diligence on clients relating to human rights standards, and expect our clients to share our commitment to respecting human rights within their operations.

Approval of Strategic Report

The Strategic Report for the year ended 31 December 2013 set out on pages 1 to 33 was approved by the Board of directors on 26 February 2014.

By order of the Board.

Letter from the Chairman

Dear Shareholder,

I am pleased to introduce our Corporate governance report, which sets out in some detail how our Board and committees have risen to the challenges of another demanding year.

Board and committee activity increased significantly in 2013, with a number of key strategic issues taking centre stage. In late 2013, the Board agreed a number of actions to accelerate the building of our capital strength and enhance our strategic focus on our core UK businesses and international corporate business. This included the outcomes of the Good Bank/Bad Bank review and the subsequent creation of RBS Capital Resolution (RCR). We also launched a full review of our businesses, focused on the needs of our customers, improving our operations and IT systems, and simplifying our organisational and decision-making structures. Over the last five years, we have made substantial progress in restoring our safety and soundness. Building on that important work, the Board felt the timing was right for this review in order to target our future efforts firmly on how we can best serve the needs of our customers, shareholders and wider stakeholders.

Conduct and culture have been key areas of focus throughout the year and our 2013 results reflect the impact that conduct related matters continue to have on financial and operating performance. The Board fully supports our new values, which were launched in 2013 and focus on serving customers, working together, doing the right thing and thinking long term. It is vital that the Board continues to set the tone from the top to drive essential cultural change and that our governance framework continues to evolve to support this and our key strategic changes. These will be key priorities for the Board and its committees in 2014.

Board committees

Board committees continued to play a crucial role in our governance framework during 2013, undertaking their complex work comprehensively and effectively supporting the work of the Board.

The Group Audit Committee has monitored progress on various regulatory investigations and has overseen the remediation of culture and control issues in the Markets division. The Group Audit Committee has also supported the Board in making its assessment that the Annual Report and Accounts, taken as a whole, are fair, balanced and understandable, in accordance with new provisions in the UK Corporate Governance Code.

The Board Risk Committee has continued to oversee the remediation activity following the major IT incident in 2012 and is also providing oversight of the investigations underway in response to various allegations made by Mr Tomlinson, customer and adviser to the Department of Business, Innovation and Skills.

With the launch of our new values and programme of cultural change, the Group Performance and Remuneration Committee has played a vital role in ensuring that our remuneration policy supports the desired behaviours. Remuneration decisions are considered in the context of performance on a range of issues, including customer service, and reward behaviours and outcomes that are aligned with our values.

The Group Sustainability Committee has provided oversight of the introduction and embedding of our new values, including the launch of a new code of conduct for our people, and continued its innovative programme aimed at understanding and engaging more effectively with key stakeholders.

Finally, we have established a new committee to provide board level oversight of RCR.

Board changes

There were a number of changes to the Board's composition during 2013. Stephen Hester stepped down as Group Chief Executive having served for over five years on the Board. Stephen's achievements in stabilising the Group during a particularly turbulent period in its history were considerable, and the Board is immensely grateful for Stephen's outstanding leadership and dedication throughout his tenure. Following an extensive internal and external search, Stephen was succeeded by Ross McEwan on 1 October 2013 and Ross now has his sights firmly set on building a bank focused on our customers and shareholders. Also on 1 October 2013, Bruce Van Saun took up his new role as Chairman and Chief Executive of RBS Citizens Financial Group, Inc and has stepped down from the Board. Bruce's contribution was, again, outstanding. He has been succeeded as Group Finance Director by Nathan Bostock. Nathan has since confirmed his resignation although his leaving date has not yet been agreed and the search for his replacement is underway.

Two of our non-executive directors also retired from the Board in 2013. Joe MacHale stood down in May, having served on the Board for nearly nine years. Joe made a substantial contribution to the Board and the committees he served on, providing valuable continuity throughout a challenging period, and on behalf of the Board I would like to express our sincere thanks for his hard work and commitment. Art Ryan also retired in September after more than five years on the Board. The knowledge, wisdom and experience Art brought to the Board and the Group Performance and Remuneration Committee in particular, were greatly appreciated. Art remains on the board of RBS Citizens Financial Group, Inc.

Letter from the Chairman

In December 2013 we welcomed Robert Gillespie as a new non-executive director and I am delighted to say that the Board is already benefitting from Robert's skills and experience. We are also announcing alongside our 2013 results some further Board and committee changes to ensure that we will continue to have an appropriate balance of skills, experience, independence and knowledge. Philip Scott will step down from the Board by 31 October 2014 and I would like to thank Philip for the significant contribution he has made to the Board and the committees he has served on and especially for his strong leadership of the Board Risk Committee during a particularly challenging period for RBS. Baroness Noakes will succeed Philip Scott as Chairman of the Board Risk Committee with effect from 1 April 2014. Following the 2014 Annual General Meeting, Penny Hughes will become Chair of the Group Sustainability Committee replacing Sandy Crombie and Sandy will become Chairman of the Group Performance and Remuneration Committee. I would like to thank both Penny and Sandy for their outstanding commitment and dedication whilst chairing the Group Performance and Remuneration Committee and Group Sustainability Committee respectively.

Board effectiveness

This year, we conducted an internal evaluation of the effectiveness of the Board and its committees, led by the Group Secretary. The evaluation has concluded that the Board is operating effectively but has identified some areas for improvement which we will focus on during 2014.

The Board also received support from the Group Secretary in a number of other areas related to board effectiveness such as Board process and information flows, continuing professional development and induction for new directors.

Corporate governance

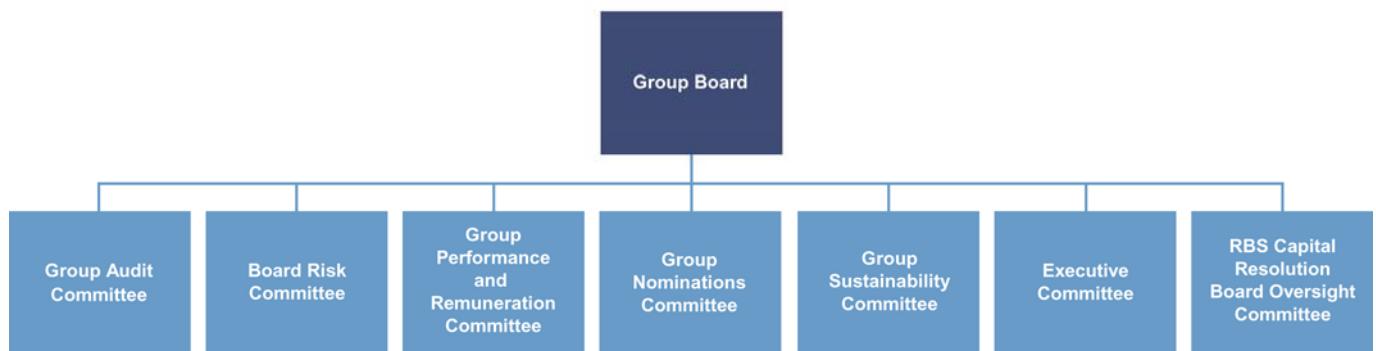

This is the first year that we are required to report under the new narrative reporting requirements, which include the new Strategic report and changes in remuneration reporting. Our statement of compliance with the UK Corporate Governance Code (the "Code") is set out on page 91.

Finally, as we reflect on another challenging year, I would like to conclude this letter by recording my sincere thanks towards my fellow Board members. Being a director of RBS requires extensive time and commitment, and the readiness to deal with the unusual challenges of a government controlled listed company. I remain extremely grateful for their continued support and dedication in working towards the recovery of RBS.

Philip Hampton
Chairman of the Board of directors
26 February 2014

Our governance structure

Group Board and Board committee structure

Group Board

The main decision making forum at Group level, setting the strategic direction of the Group and ensuring that the Group manages risk effectively. The Board is accountable to shareholders for financial and operational performance.

Group Audit Committee

Assists the Board in discharging its responsibilities for monitoring the integrity of the financial statements of the Group. It reviews the accounting policies, financial reporting and regulatory compliance practices of the Group and the Group's system and standards of internal controls, and monitors the Group's processes for internal audit and external audit.

Board Risk Committee

Provides oversight and advice to the Board on current and potential future risk exposures of the Group and future risk strategy. It reviews the Group's compliance with approved risk appetite and oversees the operation of the Group Policy Framework.

Group Performance and Remuneration Committee

Responsible for overseeing performance and the Group's policy on remuneration. It also considers senior executive remuneration and makes recommendations to the Board on the remuneration of executive directors.

Group Nominations Committee

Assists the Board in the selection and appointment of directors. It reviews the structure, size and composition of the Board, and membership and chairmanship of Board committees.

Group Sustainability Committee

Responsible for overseeing and challenging how management is addressing sustainability and reputation issues relating to all stakeholder groups, except where such issues have already been dealt with by other Board committees.

Executive Committee

Supports the Group Chief Executive in managing the Group's businesses. It reviews strategic issues and initiatives, monitors financial performance and capital allocations and considers risk strategy, policy and risk management.

RBS Capital Resolution Board Oversight Committee

Provides oversight of RCR's progress against, and compliance with, its primary objective and asset management principles. It reports to the Board on its own activities and recommends changes, where appropriate, to RCR strategy.

Our Board

Chairman

Philip Hampton (age 60)

Date of appointment: 19 January 2009 (Board)
3 February 2009 (Chairman)

Experience: Previously chairman of J Sainsbury plc and group finance director at Lloyds TSB Group, BT Group plc, BG Group plc, British Gas and British Steel plc, an executive director of Lazard and a non-executive director of RMC Group plc and Belgacom SA. Committee membership(s):

- Board Risk Committee (Chair)
- RCR Board Oversight Committee (Chair)
- Group Audit Committee
- Group Nominations Committee

Group Secretary and Head of Corporate Governance

Aileen Taylor (age 41)

Date of appointment: 1 May 2010

Experience: A qualified solicitor, joined RBS in 2000. She was appointed Deputy Group Secretary and Head of Group Secretariat in 2007, and prior to that held various legal, secretariat and risk roles including Head of External Risk, Retail, Head of Regulatory Risk, Retail Direct and Head of Legal and Compliance at Direct Line Financial Services.

She is a fellow of the Chartered Institute of Bankers in Scotland and a member of the European Corporate Governance Council.

Executive Committee

Ross McEwan, Group Chief Executive

Nathan Bostock, Group Finance Director

For biographies see page 39

Rory Cullinan (age 54)

Chief Executive, RBS Capital Resolution Group

Rory Cullinan became CEO of the RBS Capital Resolution Group (CRG) on 1 January 2014. CRG was set up to deliver, transform, optimise or exit the businesses and assets which will be the primary driver of the RBS capital build. CRG includes RBS Capital Resolution (RCR) and the divestments of both RBS Citizens Financial Group, Inc and Williams & Glyn. He previously served as CEO of the Group's Non-Core Division and also led the negotiation and establishment of RBS's entry into the UK Government's Asset Protection Scheme. Rory previously worked at RBS as Head of Equity Finance (2002-2005). Before rejoining RBS he was Co-Managing Partner and Group Board Member at Renaissance Group. Prior to 2002, he worked for a variety of banks and active financial investment companies in the Americas, Africa and Europe including Permira Advisors, Verdooso Investments (a company he co-founded), Pembridge Investments and Citibank.

Suneel Kamlani (age 52)

Co -Chief Executive, Markets

Suneel Kamlani joined the Group in 2010 and is currently Co-Chief Executive Officer of Markets with responsibility for global trading, sales, research and origination across interest rate products, foreign exchange, asset backed securities, emerging markets, credit fixed income and debt capital markets. In this capacity, he oversees businesses which provide financing, risk management and advisory services to major corporations, financial institutions and public sector clients around the world. Based in the Group's offices in Stamford, Connecticut, Suneel also serves in a regional capacity as Chairman of Markets and International Banking, Americas and Deputy Head of RBS Americas. Suneel has over 30 years of experience in investment banking, having previously served as Chief Operating Officer for UBS's Investment Bank and as a member of the UBS Group managing board. He has worked in New York, London, Hong Kong and Stamford, leading investment banking and capital markets businesses globally.

Les Matheson (age 54)

Chief Executive, UK Retail

Les Matheson was appointed Chief Executive of UK Retail on 11 February 2014. He joined RBS in January 2010 as Managing Director of Products, assumed additional responsibility for Marketing in October 2011 and then served as interim Chief Executive for UK Retail before assuming the role on a permanent basis. Prior to joining RBS, Les was Group Executive Retail for St George Bank (part of the Westpac Group of companies) and before that was with Citigroup for eleven years, where he was CEO Citibank Australia, Citigroup Country Officer for Australia and a member of the Citigroup Global Management Committee. Prior to Citigroup Les worked for a number of consumer marketing companies. He began his career with Procter & Gamble in Brand Management in the UK. Les is a member of the Board of Visa Europe and is a member of the Edinburgh University Court.

Simon McNamara (age 54)

Group Chief Administrative Officer

Simon McNamara was appointed Group Chief Administrative Officer in September 2013. Prior to joining the Group, Simon was Chief Information Officer of Standard Chartered's Consumer Bank based in Singapore and has previously held a number of senior Information Technology and Operations positions in the global financial services industry including with Westpac Banking Corporation, Deutsche Bank, BNP Paribas and Midland Bank. He was also a founding partner in a successful software start-up company, CATS INC, in Silicon Valley. Simon holds a Bachelor of Science (Hons) in Economics and Statistics from University College Swansea and a Post Graduate Diploma in Computer Science from the University of Hertfordshire. He has also completed the Executive Programme at Stanford University.

Jon Pain (age 56)

Group Head of Conduct & Regulatory Affairs

Jon Pain joined the Group on 15 August 2013 as Head of Conduct & Regulatory affairs, from KPMG where he was a partner and Head of the Financial Services Risk Consultancy practice. Jon has over 30 years' experience in Financial Services including three years as Managing Director of Supervision at the Financial Services Authority (FSA) during the financial crisis (2008 - 2011). Prior to the FSA, Jon's executive career was with the Lloyds Banking Group (LBG) where he held a range of senior roles including Managing Director of LBG's C&G mortgage business, the General Insurance Business and the Private Banking Business.

David Stephen (age 49)

Group Chief Risk Officer

David Stephen joined RBS in July 2010 as Deputy Group Chief Risk Officer, and became Group Chief Risk Officer on 1 October 2013. He is responsible for risk globally across all divisions including credit risk, market risk and operational risk functions and enterprise risk management. Spanning a 28 year career in the finance industry across London, New York, Hong Kong and Melbourne, he has worked for both full service and investment banks. These included Credit Suisse Financial Products where he was Chief Credit Officer and ANZ Bank where he was Group Chief Risk Officer and was a member of ANZ Bank's Management Board. David is a graduate of Melbourne's Monash University.

Executive Committee

Chris Sullivan (age 56)

Chief Executive, Corporate Banking

Chris Sullivan was appointed Chief Executive of the Corporate Banking Division in August 2009 and also has responsibility for Ulster Bank Group. Chris' previous role was as Chief Executive of RBS Insurance. Prior to this, Chris was Chief Executive of Retail and Deputy Chief Executive of Retail Markets. Chris is the Group sponsor for Gender Diversity and the Group's internal Women's Networks and was recognised as the European Diversity Champion of the Year in 2011. He is an active sponsor of professional and leadership development and is a member of the Chartered Banker Professional Standards Board and Governor of Ashridge College. Chris holds a number of positions outside the Group including Chairman of the Global Banking Alliance for women and is a member of the Westminster Abbey Investment Committee. Chris earned his Fellowship of the Chartered Institute of Bankers in Scotland for his services to Scottish Banking.

Bruce Van Saun (age 56)

Chairman & Chief Executive, RBS Citizens Financial Group, Inc. and Head of RBS Americas

Bruce Van Saun was appointed Chairman and Chief Executive Officer of RBS Citizens Financial Group, Inc. and Head of RBS Americas in October 2013. Prior to taking up his current role, Bruce was Group Finance Director and a director of the Company, RBS and NatWest having been appointed to those positions in 2009. Bruce has more than 30 years of financial services experience and has previously held senior positions with Bank of New York, Bank of New York Mellon, Deutsche Bank, Wasserstein Perella Group and Kidder Peabody & Co. Bruce is currently a Director of Lloyd's of London and is a member of the Financial Services Roundtable and The Clearing House supervisory board and is active in several community organisations.

These are the biographies of Executive Committee members as at the date of the signing of the Annual Report and Accounts.

Corporate governance

The Board

The Board has eleven directors comprising the Chairman, two executive directors and eight independent non-executive directors, one of whom is the Senior Independent Director.

Name	Position	Nationality
Philip Hampton	Chairman	British
Ross McEwan	Group Chief Executive	New Zealand
Nathan Bostock	Group Finance Director	British
Sandy Crombie	Senior Independent Director	British
Alison Davis	Independent non-executive director	British/USA
Tony Di Iorio	Independent non-executive director	USA
Robert Gillespie	Independent non-executive director	British
Penny Hughes	Independent non-executive director	British
Brendan Nelson	Independent non-executive director	British
Baroness Noakes	Independent non-executive director	British
Philip Scott	Independent non-executive director	British

Biographies for each director and details of which Board Committees they are members of can be found on pages 39 to 42. The Board considers that the Chairman was independent on appointment and that all non-executive directors are independent for the purposes of the Code.

Board Changes

Joe MacHale retired from the Board on 14 May 2013 and Stephen Hester, Art Ryan and Bruce Van Saun all retired from the Board on 30 September 2013. Ross McEwan and Nathan Bostock were appointed to the Board on 1 October 2013 and Robert Gillespie was appointed to the Board on 2 December 2013. Mr Bostock has since confirmed his resignation although his leaving date is still to be agreed.

Roles and responsibilities

The Board

The Board is the main decision-making forum for the company. It is collectively responsible for the long-term success of the company and is accountable to shareholders for financial and operational performance.

The Board has overall responsibility for:

- the establishment of Group strategy and consideration of strategic challenges;
- the management of the business and affairs of the Group;
- ensuring the Group manages risk effectively through the approval and monitoring of the Group's risk appetite;
- considering stress scenarios and agreed mitigants and identifying longer term strategic threats to the Group's business operations;
- the allocation and raising of capital; and
- the preparation and approval of the Group's annual report and accounts.

The Board's terms of reference include key aspects of the company's affairs reserved for the Board's decision and are reviewed at least annually. The terms of reference are available on [rbs.com>about us](http://rbs.com/about-us).

Chairman

The role of Chairman is distinct and separate from that of the Group Chief Executive and there is a clear division of responsibilities with the Chairman leading the Board and the Group Chief Executive managing the Group's businesses on a day to day basis.

The Chairman's key responsibilities are to:

- provide strong and effective leadership to the Board;
- ensure the Board is structured effectively and observes the highest standards of integrity and corporate governance;
- manage the business of the Board and set the agenda, style and tone of Board discussions to promote effective decision-making and constructive debate;
- facilitate the effective contribution and encourage active engagement by all members of the Board;
- in conjunction with the Group Chief Executive and Group Secretary, ensure that members of the Board receive accurate, timely and clear information, to enable the Board to lead the Group, take sound decisions and monitor effectively the performance of executive management;
- ensure that the performance of individual directors and of the Board as a whole and its committees is evaluated regularly; and
- ensure the Group maintains effective communication with shareholders and other stakeholders.

Group Chief Executive

The Group Chief Executive has responsibility for all Group businesses and acts in accordance with the authority delegated by the Board.

The Group Chief Executive's key responsibilities are to:

- exercise executive responsibility for the Group's businesses;
- develop and implement strategy approved by the Board;
- act in accordance with authority delegated by the Board;
- consult regularly with the Chairman and Board on matters which may have a material impact on the Group;
- lead the senior executive team and ensure there are clear accountabilities for managing the Group's business and managing risk; and
- in conjunction with the Group Chairman and Group Secretary, ensure the Board receives accurate, timely and clear information.

Corporate governance

Senior Independent Director

Sandy Crombie, as Senior Independent Director, acts as a sounding board for the Chairman and as an intermediary for other directors when necessary. He is also available to shareholders to discuss any concerns they may have, as appropriate.

Non-executive directors

Along with the Chairman and executive directors, the non-executive directors are responsible for ensuring the Board fulfils its responsibilities under its terms of reference. The non-executive directors combine broad business and commercial experience with independent and objective judgement and they provide independent challenge to the executive directors and the leadership team. The balance between non-executive and executive directors enables the Board to provide clear and effective leadership across the Group's business activities.

The standard terms and conditions of appointment of non-executive directors are available on rbs.com or from RBS Secretariat.

Board Committees

In order to provide effective oversight and leadership, the Board has established a number of Board committees with particular responsibilities. Please see the corporate governance framework on page 38 for more details. The work of the Board committees are also discussed in their individual reports as follows

Nominations Committee - pages 50 and 51.

Group Audit Committee - pages 52 to 57.

Board Risk Committee - pages 58 to 63.

Group Sustainability Committee - pages 64 and 65.

Group Performance and Remuneration Committee - pages 66 to 90.

The terms of reference for each of these committees is available on rbs.com and copies are also available on request from RBS Secretariat.

Group Secretary

Aileen Taylor is the Group Secretary and Head of Corporate Governance. She is responsible for advising the Board on all governance matters and for ensuring that Board procedures are followed. In conjunction with the Chairman and the Group Chief Executive, she is also responsible for ensuring that the Board receive accurate, timely and clear information, particularly on the Group's performance and matters reserved to the Board; facilitating good information flows between Board members; leading on the implementation of the recommendations from the annual Board Evaluation and developing and maintaining the induction and continuing professional development programme for directors. A key element of the role is to ensure alignment between the Board and Executive Management to ensure the appropriate escalation of issues to the Board. Aileen also leads on all aspects of corporate governance across the Group.

Conflicts of interests

The company has procedures in place to ensure that the Board's powers for authorising actual or potential conflicts of interest are operating effectively. On appointment, each director is provided with the Group's guidelines for referring conflicts of interest to the Board. Each director is required to notify any actual or potential conflicts of interest to the Board for consideration and to update the Board on an ongoing basis when he or she becomes aware of any changes.

The Board considers each director's notification separately on the facts and can impose conditions or limitations as part of the authorisation process. Actual and potential conflicts of interest can be authorised by the Board in accordance with the company's Articles of Association. Details of all conflicts of interest are recorded in a register which is maintained by the Group Secretary and reviewed annually by the Board.

Board meetings

In 2013, nine Board meetings were scheduled and individual attendance by directors at these meetings is shown in the table below. One of the Board meetings took place overseas during the Board's visit to the Group's US businesses.

In addition to the nine scheduled meetings, 35 additional meetings of the Board and committees of the Board were held, including meetings to consider and approve financial statements. The Chairman and the non-executive directors meet at least once per year without executive directors present.

Bruce Van Saun (3)	7/7

Notes:

(1) Appointed to the Board on 1 October 2013. Nathan Bostock has since confirmed his resignation although his leaving date is still to be agreed.

(2) Appointed to the Board on 2 December 2013

(3) Retired from the Board on 30 September 2013.

(4) Retired from the Board on 14 May 2013.

Corporate governance

Principal activities of the Board during 2013

In advance of each Board meeting, the directors are supplied with comprehensive papers in hard copy and/or electronic form. During 2013 there has been an enhanced focus on culture and values, conduct and customers. These have been recurring themes underpinning Board discussions during the year and the Board received regular updates on the cultural change programme. An overview of the principal activities of the Board during 2013 is shown below.

Each meeting	
• Chairman's Report	• Risk Report (including updates on conduct matters)
• Group Chief Executive's Report	• Reports from committee Chairs
• Monthly Results	• Secretary's Report (routine matters for approval / noting)
• Capital, Funding & Liquidity	
1st Quarter	2nd Quarter
• UK Retail Deep Dive	• Non-Core Deep Dive
• Budget Update	• AGM Preparations
• Markets Strategy Updates	• Q1 Results
• Remuneration Proposals	• Markets Strategy Updates
• Lending Updates	• Lending Updates
• Risk Appetite Framework	• Recovery and Resolution Planning
• Annual Results & AGM Notice	• Board Session with the Financial Conduct Authority
• Board and committee Evaluations	• Good Bank/Bad Bank Review
• Group Internal Audit Evaluation	• Board Strategy Offsite
• External Auditor Evaluation	• Succession Planning
3rd Quarter	4th Quarter
• Good Bank/Bad Bank Review	• Launch of Strategic Review
• Parliamentary Commission on Banking Standards Recommendations	• Review of Capital Position
• Interim Results	• Independent Lending Review
• Lending Updates	• Board Session with the Prudential Regulatory Authority
• Board Evaluation Update	• Corporate Banking Deep Dive
• RBS Citizens Deep Dive	• Q3 Results
• Board Session with the Federal Bank of Boston	• Markets Deep Dive

Other senior executives, such as the Group Chief Risk Officer and the Head of Conduct and Regulatory Affairs, also attend Board meetings as required to present reports. Divisional Chief Executives, accompanied where appropriate by other senior executives from the division, attend Board meetings to present the divisional deep dives. This provides the Board with an opportunity to engage directly with divisional management on key issues and supports the Board's succession planning activity.

Board effectiveness

Skills and experience on the Board

The Board is structured to ensure that the directors provide the Group with the appropriate balance of skills, experience and knowledge as well as independence. Given the nature of the Group's businesses, experience of banking and financial services is clearly of benefit, and we have a number of directors with substantial experience in that area, but the Board also benefits from directors with experience in other fields.

The table below illustrates the breadth of experience on the Board.

• Retail Banking	• Government & Public Sector
• Risk	• Consulting
• Finance & Accountancy	• Chief Executive
• Private Equity	• Technology
• Investment Banking	• Retailing
• Insurance & Actuarial	• Utilities
• Manufacturing	

Board committees also comprise directors with a variety of skills and experience so that no undue reliance is placed on any individual.

Induction and professional development

Each new director receives a formal induction on joining the Board, which is co-ordinated by the Group Secretary. This includes visits to the Group's major divisions and meetings with directors and senior management. Each induction programme has a core element that the director is required to complete with the remainder of the programme tailored to the new director's specific requirements. An example of an induction programme for a new non-executive director is set out below:

Core meetings	Tailored elements
Group Chairman	Divisional Chief Executives
Group Chief Executive	Divisional visits (UK and overseas)
Group Finance Director	Group Finance
Senior Independent Director	Group Risk
Board committee Chairs	Group Internal Audit
Group Secretary	Group Tax
Group Chief Risk Officer	Investor Relations
Head of Conduct and Regulatory Affairs	Group Strategy
Group Treasurer	Group Communications
General Counsel	Institutional Investors
External Auditor	
External Counsel	

Ross McEwan and Nathan Bostock joined the Board on 1 October 2013. Mr Bostock has since confirmed his resignation, although his leaving date is still to be agreed. Robert Gillespie joined the Board on 2 December 2013. Both Mr McEwan and Mr Bostock were serving executives in the Group prior to their appointment to the Board and as such their induction has been focussed on enhancing their knowledge of Board matters and continuing to build relationships with Board members. A comprehensive induction programme was prepared for Mr Gillespie and is underway.

Corporate governance

The Group Secretary advises directors of appropriate external training and professional development opportunities and internal training is also provided which is relevant to the business of the Group. Business visits are also arranged as part of the Group Audit Committee and Board Risk Committee schedule (details of which can be found on pages 53 and 60) and all non-executive directors are invited to attend. Directors undertake the training they consider necessary to assist them in carrying out their duties and responsibilities as directors.

During 2013, the directors received updates on a range of subjects to enhance their knowledge, including:

- Parliamentary Commission on Banking Standards - Recommendations;
- Banking Reform Bill;
- Department for Business, Innovation and Skills (BIS) Proposals on Transparency and Trust;
- BIS review of Voluntary Code of Conduct for Executive Search Firms;
- Fourth Capital Requirements Directive (CRD IV);
- Competition Commission's investigation into statutory audit services;
- Government reforms on executive remuneration and reporting; and
- Developments in European company law and corporate governance.

The Group Secretary maintains continuing professional development logs. These are reviewed regularly with directors to assist in identifying future training and development opportunities that are specific to the individual director's requirements.

Information

All directors receive accurate, timely and clear information on all relevant matters and have access to the advice and services of the Group Secretary. In addition, all directors are able, if necessary, to obtain independent professional advice at the company's expense.

Time commitment

There is an anticipated time commitment in line with the recommendations of the Walker Review in respect of general Board duties and additional time as necessary in respect of committee duties. However, as stated in the Chairman's introductory letter to his Corporate governance report, the time commitment currently required of our non-executive directors is significant. Each director is required to seek the agreement of the Chairman before accepting additional commitments that might affect the time the director is able to devote to his or her role as a non-executive director. The Board is aware of the other commitments of the Chairman and the other directors are able to allocate sufficient time to enable them to discharge their duties and responsibilities effectively.

Election and re-election of directors

In accordance with the provisions of the Code, all directors of the company are required to stand for election or re-election annually by shareholders at the company's Annual General Meeting. The notice of Annual General Meeting sent to shareholders separately includes details of the proposed resolutions for the election and re-election of directors.

Performance evaluation

In accordance with the Code, an external evaluation of the Board takes place every three years. An internal evaluation takes place in the intervening years.

The 2012 evaluation was conducted externally by a specialist board evaluation consultancy, and a number of initiatives were implemented aimed at improving the overall performance and effectiveness of the Board. These included keeping Board and committee composition under review; reviewing board and executive succession planning; introducing further enhancements to Board information packs; and implementing an expanded remit for the Group Sustainability Committee. These topics will be kept under regular review as a matter of good practice. However, the 2013 evaluation concluded that the recommendations from the 2012 evaluation were being appropriately addressed.

In 2013, the Board and committee evaluation process was conducted internally by the Group Secretary.

Performance evaluation process

The Group Secretary undertook a formal and rigorous evaluation by:

- preparing a detailed framework of key themes for discussion and questions which was used to structure individual meetings held with each director;
- discussing the outcomes and recommendations with the Chairman; and
- recommending the outcomes and areas for improvement to the Board.

Amongst the areas reviewed were Board composition (including diversity), strategy, risk management, Board meetings and processes, external relationships, and the quality of support and information provided to the Board.

Corporate governance

Outcomes of the 2013 performance evaluation

The 2013 performance evaluation concluded that the Board was strong and operated effectively and within its terms of reference throughout 2013. Key strengths identified included the following:

- the Board performed strongly during a challenging 2013, both as individuals and collectively;
- the dynamic between Board members was good, the Chairman successfully steered the Board through a very difficult and complex agenda, and the directors dedicated a significant amount of time and effort to their role; and
- the Board's committees undertook their complex work well throughout the year, providing strong support to the Board.

A summary of the key themes arising from the 2013 performance evaluation is set out below, together with an overview of the proposed actions:

Key themes included	Proposed action
Board and Board committee composition	Keep Board and Board committee composition under review during 2014, to ensure balance of skills, experience, independence, knowledge and diversity remains appropriate.
Strategic oversight	Ensure that Board agendas for 2014 allocate sufficient time for Board oversight of key areas of strategic focus.
Risk reporting	Consideration to be given to the Board Risk Committee leading a review of risk reporting at Board and Board committee level to further enhance the format and content of risk reports.
External relationships	Ensure regular contact with key external stakeholders in order to maintain effective working relationships at Board level.

Individual director and Chairman effectiveness reviews

The Chairman met with each director individually to discuss their own performance and ongoing professional development and also shared peer feedback that had been provided as part of the evaluation process. Separately, the Senior Independent Director sought feedback on the Chairman's performance and canvassed views on the Chairman's performance from the non-executive directors collectively. The results of the Chairman's effectiveness review were then discussed by the Chairman and the Senior Independent Director.

Relations with investors

The Chairman is responsible for ensuring effective communication with shareholders. The company communicates with shareholders through the Annual Report and Accounts and by providing information in advance of the Annual General Meeting. Individual shareholders can raise matters relating to their shareholdings and the business of the Group at any time throughout the year by letter, telephone or email via rbs.com/ir

Shareholders are given the opportunity to ask questions at the Annual General Meeting or can submit written questions in advance. Directors including the chairs of the Board Committees are available to answer questions at the Annual General Meeting. The Senior Independent Director is also available.

Communication with the company's largest institutional shareholders is undertaken as part of the Investor Relations programme:

- the Group Chief Executive and Group Finance Director meet regularly with UKFI, the organisation set up to manage the Government's investments in financial institutions, to discuss the strategy and financial performance of the business. The Group Chief Executive and Group Finance Director also undertake an extensive annual programme of meetings with the company's largest institutional shareholders.
- the Chairman independently meets with the Group's largest institutional shareholders annually to hear their feedback on management, strategy, business performance and corporate governance. Additionally, the Chairman, Senior Independent Director and chairs of the Board committees met with the governance representatives of a number of institutional shareholders during the year.
- the Senior Independent Director is available if any shareholder has concerns that they feel are not being addressed through the normal channels.
- the Chair of the Group Performance and Remuneration Committee consults extensively with major shareholders in respect of the Group's remuneration policy.

In 2013, the Group introduced a programme of UK based events aimed at individual shareholders. These events provided an opportunity for shareholders to meet with directors and senior management to learn more about the business.

Throughout the year, the Chairman, Group Chief Executive, Group Finance Director and Chair of the Group Performance and Remuneration Committee communicate shareholder feedback to the Board. The directors also receive independent analyst notes and reports reviewing share price movements and performance against the sector. Detailed market and shareholder feedback is provided to the Board after major public announcements such as a results release. The arrangements in place are to ensure that directors develop an understanding of the views of major shareholders and that these are considered as part of the annual Board evaluation.

The Group's Investor Relations programme also includes communications aimed specifically at its fixed income (debt) investors. The Group Finance Director and/or Group Treasurer give regular presentations to fixed income investors to discuss strategy and financial performance. There is also a separate section on the Group's website for fixed income investors which includes information on credit ratings, securitisation programmes and securities documentation. Further information is available at rbs.com/ir.

Report of the Group Nominations Committee

Dear Shareholder,

As Chairman of the Board, I also chair the Group Nominations Committee and I am pleased to present our report on the committee's activity during 2013.

Role and responsibilities

The Group Nominations Committee is responsible for:

- reviewing the structure, size and composition of the Board and making recommendations to the Board on any appropriate changes;
- assisting the Board in the formal selection and appointment of directors (executive and non-executive) having regard to the overall balance of skills, knowledge, experience and diversity on the Board;
- reviewing membership and chairmanship of Board committees;
- considering succession planning for the Chairman and the executive and non-executive directors, taking into account the skills and expertise which will be needed on the Board in the future. No director is involved in decisions regarding his or her own succession; and
- making recommendations to the Board concerning the election and re-election by shareholders of directors under the provisions of the Code. In so doing, they will have due regard to their performance and ability to continue to contribute to the Board in light of the knowledge, skills and experience required and the need for progressive refreshing of the Board.

The Group Nominations Committee engages with external consultants, considers potential candidates and recommends appointments of new directors to the Board. The terms of reference of the Group Nominations Committee are reviewed annually and approved by the Board and are available at rbs.com.

Membership and meetings

All non-executive directors are members of the Group Nominations Committee which is chaired by the Chairman of the Board. The Group Chief Executive is invited to attend meetings.

The Group Nominations Committee holds at least two scheduled meetings per year, and also meets on an ad hoc basis as required. In 2013, five meetings of the Group Nominations Committee were held and the following table illustrates members' attendance at these meetings.

	Attended/ scheduled
Philip Hampton (Chairman)	5/5
Sandy Crombie	5/5
Alison Davis	5/5
Tony Di Iorio	5/5
Robert Gillespie (1)	1/1
Penny Hughes	5/5
Brendan Nelson	5/5
Baroness Noakes	5/5
Philip Scott	5/5
Former members	
Joe MacHale (2)	1/1
Art Ryan (3)	4/4

Notes:

- (1) Appointed to the Board on 2 December 2013.
- (2) Retired from the Board on 14 May 2013.
- (3) Retired from the Board on 30 September 2013.

Principal activity during 2013

The Committee continues to monitor succession planning on an ongoing basis taking into account business requirements and industry developments. In 2013 discussions focused principally on executive director succession and the search for new non-executive directors. The Board also held a separate session on succession planning for the Executive Committee in June 2013.

Group Chief Executive succession

On 12 June 2013, it was announced that Stephen Hester would step down as Group Chief Executive and the search for his successor commenced immediately, led by the Chairman on behalf of the Board. MWM Consulting was engaged to support the recruitment process for the new Group Chief Executive and conducted a global search for potential external candidates as well as engaging fully with internal candidates. This enabled the internal candidates to be benchmarked against the very best in the market. The Committee held a number of discussions on potential candidates (internal and external) and agreed that Ross McEwan was the strongest candidate on the basis of his extensive experience in banking, the leadership he had already demonstrated during his time as CEO Retail at RBS and his strong focus on serving our customers. Ross McEwan was announced as the new Group Chief Executive on 2 August 2013 and took over from Stephen Hester on 1 October 2013. MWM Consulting does not provide services to any other part of the Group.

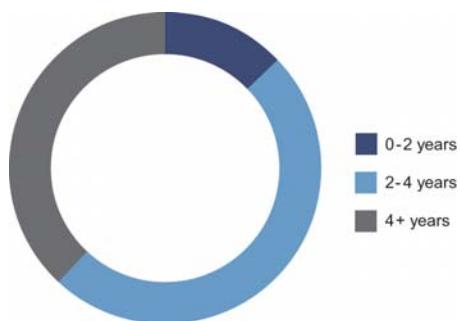

Consideration of new non-executive directors

Egon Zehnder International continued to support the search for new non-executive directors during 2013. Egon Zehnder International were tasked with identifying suitable candidates both to fill existing vacancies (e.g. replacements for Joe McHale and Art Ryan who both retired from the Board during 2013) and to support future Board succession planning. The Committee considered a number of potential candidates during 2013 and Robert Gillespie was appointed to the Board on 2 December 2013. Robert was appointed on the basis of his strong background in finance and banking and his experience of business and regulatory environments in the UK, US and Europe. The search for future potential candidates is continuing. Egon Zehnder International does not provide services to any other part of the Group.

Report of the Group Nominations Committee

Tenure of non-executive directors

The chart below sets out the tenure of non-executive directors.

The chart below details the gender diversity of the Board.

Board and committee membership

The Committee reviewed the membership of the Group Sustainability Committee during 2013 following feedback from the 2012 evaluation. It was agreed that an additional non-executive director should be appointed to the Group Sustainability Committee and Penny Hughes was appointed as a member in July 2013.

Boardroom diversity

The Board remains supportive of Lord Davies' recommendations and currently meets the target of 25 per cent female board representation as set out in Lord Davies' report.

In accordance with the recommendations contained within Lord Davies' report, the Board operates a boardroom diversity policy and a copy of the Board's diversity statement is available on [rbs.com>about us](http://rbs.com/about-us).

The Group understands the importance of diversity and, with regard to gender diversity, recognises the importance of women having greater representation at key decision making points in organisations. The search for Board candidates will continue to be conducted, and nominations/appointments made, with due regard to the benefits of diversity on the Board, however, all appointments to the Board are ultimately based on merit, measured against objective criteria, and the skills and experience the individual can bring to the Board.

The balance of skills, experience, independence, knowledge and diversity (including gender diversity) on the Board, and how the Board operates together as a unit is reviewed annually as part of the Board evaluation. Where appropriate, findings from the evaluation will be considered in the search, nomination and appointment process. If appropriate, additional targets on diversity will be developed in due course.

Further details on the Group's approach to diversity can be found on page 95.

Philip Hampton
Chairman of the Group Nominations Committee
26 February 2014

Report of the Group Audit Committee

**Letter from Brendan Nelson,
Chairman of the Group Audit Committee**

Dear Shareholder,

2013 has been a year of significant change for the Group, presenting a number of challenges to the Group Audit Committee. The priority of the Committee has been to ensure the quality and transparency of disclosure and the integrity of the Group's financial statements. Most notably the Committee supported the Board in its decision to release a trading statement in advance of announcing the Group's full year results prompted by the recognition of further provisions relating to conduct and litigation, primarily relating to mortgage-backed securities litigation and past conduct issues. These provisions are substantial and have had a significant impact on the Group's performance for the year.

During 2013, the Committee also scrutinised the disclosures relating to management actions to accelerate the rebuild of capital strength and to focus on core businesses (including the creation of RCR), included in the Group's Q3 2013 Interim Management Statement.

A key aspect of the Committee's responsibilities is to satisfy itself that the key accounting decisions, risks and significant management judgements that underlie the financial statements are appropriate through discussion and deliberation with management. The Committee reviewed the conclusions of the External Auditor and, where applicable, other experts and has concluded that disclosures in the financial statements about these judgements and estimates are transparent and appropriate.

Progress on remediating known control issues has remained a focus of the Committee during 2013. On behalf of the Board, the Committee has overseen the Controls and Culture Remediation Programmes within the Markets division and has questioned management in relation to the prioritisation of issues, delivery of remediation, quality assurance and contingency plans. The Committee received reports from Risk Management and Internal Audit and commissioned independent assurance that the programmes were progressing according to plan; that issues were being remediated to industry standard; and that internal reporting accurately reflected progress. On behalf of the Committee I discussed progress and prioritisation with the Prudential Regulatory Authority (PRA). The progress made by management during the course of 2013 was encouraging. However, we will continue to exercise oversight of the areas remediated to ensure improvements are sustained and that further progress is made during 2014.

The Markets Controls and Culture Remediation Programmes have served to underline the importance of an effective three lines of defence model. This was a priority in 2013 and the Committee received regular reports on embedding the model within divisions and functions and articulating the responsibilities and capabilities of the business. Embedding the model and maintaining standards of internal control will continue to be a key priority for the Group during 2014 as the organisational changes announced following the strategic review are implemented. The Committee will monitor this closely.

The Committee has also monitored the progress of various regulatory investigations and claims based on allegations that the Group had inappropriately tried to influence benchmark interest rates. Working closely with the Group Performance and Remuneration Committee, recommendations were made in relation to individual accountability. The Committee continues to consider the output of the review of certain high-risk rates which were not subject to investigation by external authorities.

The annual programme of joint visits by the Group Audit and Board Risk Committees to the Group's business divisions and control functions continued in 2013. The programme allows members of the Committees to spend additional time with areas of the business which the Committees judge would benefit from a more detailed review. Invitations to attend are extended to all non-executive directors. During 2013, the Committees undertook a total of eight visits, including a week long visit to the Group's operations in Asia and a two-day visit to Ulster Bank. During these visits I took the opportunity to meet with local regulators to gain a better understanding of their perspectives and concerns on our business and key control issues.

In all our work we seek to strike the right balance between on the one hand providing independent oversight and on the other encouragement and support to management. It has been another demanding year for the Group Audit Committee and I would like to extend my thanks to my fellow Committee members for their continued dedication and support throughout 2013.

Brendan Nelson
Chairman of the Group Audit Committee
26 February 2014

Report of the Group Audit Committee

Report of the Group Audit Committee

Meetings and visits

A total of seven scheduled meetings of the Group Audit Committee were held in 2013, including meetings held immediately before the annual and interim financial statements and the quarterly Interim Management Statements were considered by the Board. The Group Audit Committee also held two ad hoc meetings. Group Audit Committee meetings are attended by relevant executive directors, the Internal and External Auditor and Finance and Risk Management executives. Other executives, subject matter experts and external advisers are also invited to attend, as required, to present and advise on reports commissioned by the Committee. At least twice a year the Group Audit Committee meets privately with the External Auditor. The Committee also meets privately with Internal Audit management.

As in previous years, the Committee has undertaken a programme of visits to those business areas which it considers merit additional focus. During 2013, the Committee spent a week in Asia to review the Markets, International Banking, Wealth, Business Services and Group Finance operations in the region. Internal Audit management made presentations to the Committee at two separate visits, covering functional strategy, bench-strength and capability. Internal Audit Technology resources and capability were discussed during these meetings and over the course of the year the Committee has monitored progress in strengthening capability through recruitment and co-sourcing strategies. The Committee also spent time in Ireland to gain better insight into the issues facing Ulster Bank and held additional in depth meetings with the Markets, International Banking and Wealth divisions in the UK.

Membership of the Group Audit Committee

The Group Audit Committee comprises four independent non-executive directors. The Chairman and members of the Committee, together with their attendance at scheduled meetings, are shown below.

	Attended/ scheduled
Brendan Nelson (Chairman)	7/7
Tony Di Iorio	7/7
Baroness Noakes	7/7
Philip Scott	7/7

All members of the Group Audit Committee are also members of the Board Risk Committee facilitating effective governance of finance and risk issues. The Group Audit and Board Risk Committees have strong links with the Group Performance and Remuneration Committee ensuring that compensation decisions reflect relevant finance and risk considerations.

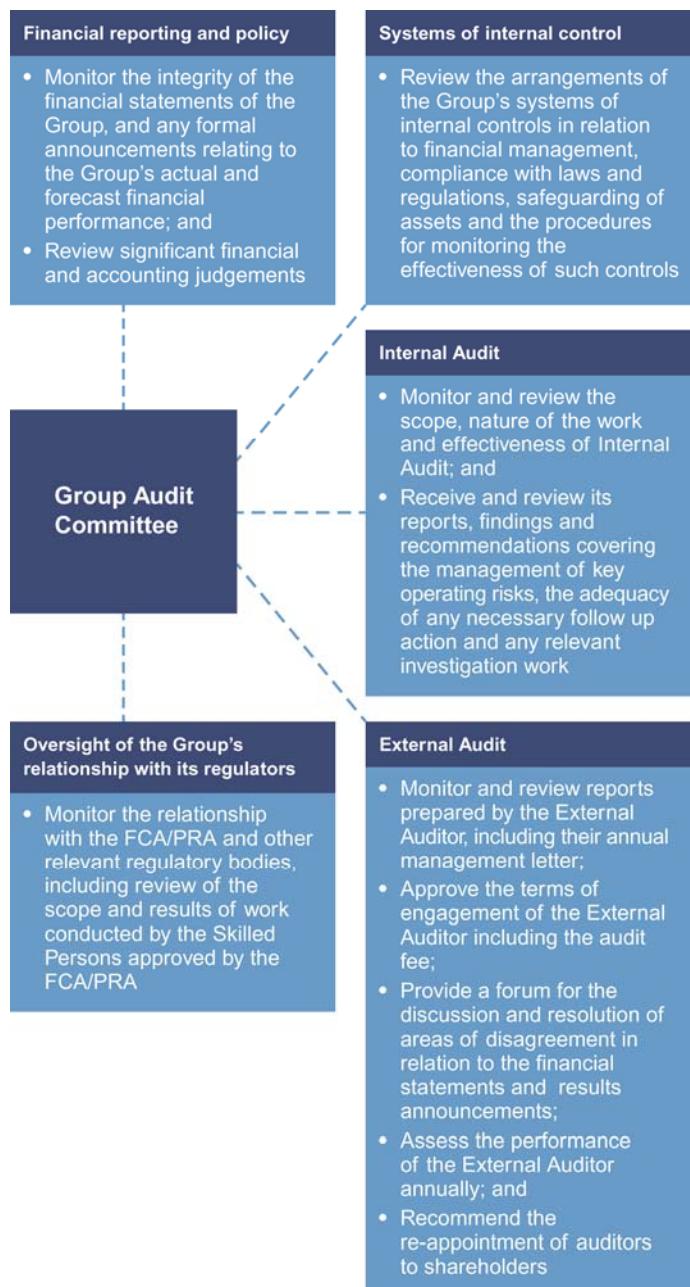

The members of the Group Audit Committee are selected with a view to the expertise and experience of the Committee as a whole. The Board is satisfied that all Group Audit Committee members have recent and relevant financial experience, and that each member of the Group Audit Committee is an 'Audit Committee Financial Expert' and is independent, each as defined in the SEC rules under the US Securities Exchange Act of 1934 ("Exchange Act") and related guidance. Full biographical details of the Committee members are set out on pages 39 to 42.

Performance evaluation

An external evaluation of the effectiveness of the Group Audit Committee takes place every three to five years with internal reviews by the Board in the intervening years. An internal review of the Board and its senior committees took place during 2013 following an external review in 2012. Overall, the review concluded that the Group Audit Committee continued to operate effectively.

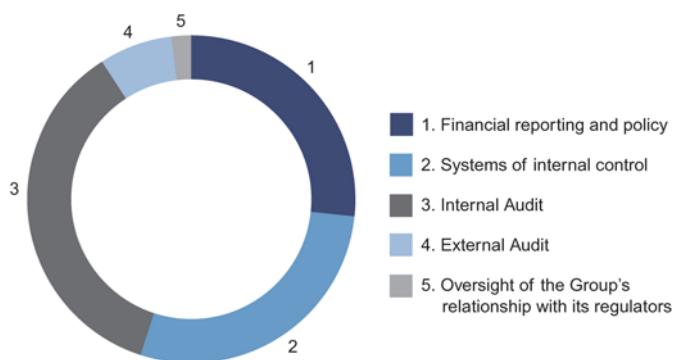

The role and responsibilities of the Group Audit Committee

The Group Audit Committee's primary responsibilities are shown below and are set out in its terms of reference which are reviewed annually by the Committee and approved by the Board. These terms of reference are available on the Group's website rbs.com.

Report of the Group Audit Committee

Group Audit Committee allocation of agenda time

Financial reporting and policy

The Group Audit Committee focused on a number of salient judgements and reporting issues in the preparation of the 2013 accounts. In particular, the Committee considered:

- the evidence (including in relation to the Group's capital, liquidity and funding position) to support the directors' going concern conclusion. Further information is set out on page 96;
- the adequacy of loan impairment provisions, with special emphasis on exposures in Global Restructuring Group (GRG) and Ulster Bank in light of the creation of RCR which resulted in increased impairment provisions being recognised in the fourth quarter of 2013. The Committee was satisfied that the Group loan impairment provisions and underlying assumptions and methodologies are robust;
- the level of provisions held for outstanding litigation and regulatory investigations, including Payment Protection Insurance redress, LIBOR, Interest Rate Hedging Products and US RMBS litigation. Following review, the Committee was satisfied that overall the level of provision held is appropriate and that disclosure is sufficiently transparent. However, these issues will be kept under close review by the Committee in 2014, as matters develop;
- valuation methodologies and assumptions for financial instruments carried at fair value including the Group's credit market exposures;
- the appropriateness of the carrying value of goodwill and other intangible assets, placing particular focus on International Banking and RBS Citizens Financial Group, Inc. Following an impairment review at year end, goodwill allocated to International Banking of £1.1 billion was impaired in full;

- the judgements that had been made by management in assessing the recoverability of the Group's deferred tax assets. The deferred tax asset relating to tax losses recognised in The Royal Bank of Scotland plc has been written down by £0.7 billion;
- valuation of the Group's main defined benefit pension scheme. The Committee considered the assumptions that had been set in valuing the fund and the sensitivities of those assumptions;
- the accounting treatment of businesses that the Group has committed to sell, in particular the classification of Direct Line Insurance Group plc in light of the sale of tranches of shares in 2013 and the loss of control by the Group;
- the assessment by management of the adequacy and effectiveness of internal controls over financial reporting which had identified weaknesses in the Group's privileged access and user entitlement controls within Technology Services. The Committee considered the potential impact of those issues upon financial reporting systems and requested assurance directly from management regarding prioritisation of remediation and compensating controls. The Committee will continue to monitor delivery of the required remediation programme in 2014;
- the form and content of the newly introduced Strategic Report contained within the Annual Report and Accounts. As part of its overall assessment of the Annual Report and Accounts, the Committee assisted the Board in determining that the Annual Report and Accounts taken as a whole was fair, balanced and understandable, providing the information necessary for shareholders to assess the company's performance, business model and strategy. A comprehensive review process supports both the Group Audit Committee and ultimately the Board in reaching their conclusion:-
 - the production of the Annual Report and Accounts is co-ordinated centrally by the Group Chief Accountant with guidance on requirements being provided to individual contributors;
 - The Annual Report and Accounts are reviewed by the Group Disclosure Committee prior to consideration by the Group Audit Committee;
 - A management certification process requires members of the Executive Committee and other senior executives to provide confirmation following their review of the Annual Report and Accounts that they consider them to be fair, balanced and understandable; and
 - Directors are given sufficient time to consider the Annual Report and Accounts.

This process is also undertaken in respect of quarterly results announcements. In addition, the External Auditor considers the Board's statement as part of its audit requirements.

Report of the Group Audit Committee

Systems of internal control

In addition to the Markets Control and Culture Remediation Programmes, oversight of the three lines of defence model and consideration of accountability in relation to inappropriate rate setting activity (all as more fully described in the letter from the Committee Chairman), the Committee reviewed the progress of the Finance and Risk Transformation Programme. The Committee challenged management on the pace of delivery, cost, prioritisation and benefits. Management is considering the delivery and direction of the programme in light of the organisational changes announced following the strategic review and the Committee will exercise close oversight of the revised programme in 2014.

The Committee has also tracked progress in relation to other mandatory and remedial projects and has challenged individual business areas on the ability to meet regulatory expectations, responsibilities and required resource. The Committee has considered ongoing regulatory reviews and investigations and has monitored the Group's relationship with its principal regulators. It has received reports from the Sensitive Investigations Unit and has considered the appropriateness of action being taken by management in relation to identified issues. The Committee has considered the Group's compliance with the requirements of the Sarbanes-Oxley Act of 2002 and was advised of whistle-blowing events which occurred within the Group. The Committee has requested that Internal Audit consider how whistle-blowing processes can be audited and will seek to identify enhancements to the process.

The Committee also reviewed the effectiveness of the internal Notifiable Event Process during the year; alerts on each event are received by the Chairman of the Committee, and the Chairman of the Board Risk Committee.

Regular reports were received by the Committee on wholesale credit quality assurance testing and consumer credit quality assurance testing. The Committee reviewed the Group's various pension obligations and discussed the status of funding and triennial valuation discussions underway with the RBS Group Pension Fund. The Committee will monitor the investment strategy, capital impact and funding of the scheme during 2014, as negotiations progress.

As discussed in the report of the Board Risk Committee, changes to the Divisional Risk and Audit Committee structure, designed to enhance the effectiveness and transparency of the consideration of risk and audit issues at a divisional level are currently under consideration. Detailed proposals will be presented to the Committee in the first quarter of 2014.

Internal audit

The Group Audit Committee oversaw the work of Internal Audit throughout 2013. Through regular reports and opinions, the Committee obtained insights into Internal Audit's assessment of the control environment across all divisions and of management's level of awareness. The reports from Internal Audit enabled the Committee to monitor internal control within the Group by reporting on areas where improvements to the control environment were needed.

In response to Internal Audit findings during the latter half of 2013, the Committee received at its request a presentation from executives of the Markets division on controls relating to trade and transaction reporting and actions underway to address identified weaknesses. The Committee has asked for regular updates on remediation progress to be provided during 2014.

Internal Audit also highlighted that the volume of change underway across the organisation and some specific regulatory remediation efforts, are key risk areas for the Group. The Committee will focus on these areas in 2014, particularly as the recently announced strategic changes are executed.

During bi-annual visits with Internal Audit, the Committee considered the bench-strength and capability of the function and areas where enhancement was required, including Technology and Markets. Plans in place to make improvements, including strategies to externally co-source certain activities and to accelerate recruitment were discussed to ensure that risks were appropriately covered. The Committee also reviewed Internal Audit's budget and succession-planning.

The Head of Internal Audit continues to report to the Chairman of the Group Audit Committee. In 2013, his secondary reporting line was changed and he now also reports directly to the Group Chief Executive (previously the Group Finance Director). Consideration was given to the presence of the Head of Internal Audit and divisional Heads of Audit at Executive Committee and other senior meetings. The Committee will continue to monitor the participation and influence of Internal Audit at senior level meetings during 2014.

The Committee considered and approved enhancements to the reporting methodology in Internal Audit reports and agreed that the changes to the criteria underlying ratings would improve transparency and provide additional evidence about culture and attitude. These improvements to reporting will be introduced in 2014. Proposed improvements to the evaluation of risk and enhancement to the audit universe, that will enable scoping and prioritisation of the work of Internal Audit that better reflects the scale and complexity of the business, were also considered by the Committee. The impact of assurance work initiated by the Group's regulators on risk coverage was discussed and the annual plan of audit activity was approved.

An external review of the effectiveness of Internal Audit takes place every three to five years, with internal reviews continuing in intervening years. In December 2013, the Group Audit Committee undertook an internal evaluation of Group Internal Audit. The evaluation concluded that Group Internal Audit had operated effectively throughout 2013. Minor observations and recommendations will be progressed. Benchmarking of Internal Audit against the Chartered Institute of Internal Auditors "Effective Internal Audit in the Financial Services Sector" guidance recommendations was explicitly included in the evaluation of effectiveness. Internal Audit currently meets these recommendations in the majority of areas and has incorporated actions within its strategic plan to address identified shortcomings.

Report of the Group Audit Committee

Oversight of the Group's relationship with its regulators

The Group Audit Committee has a responsibility to monitor the Group's relationship with the Prudential Regulatory Authority (PRA), Financial Conduct Authority (FCA) and other regulators. During 2013, it received regular reports on the Group's relationship with all its regulators highlighting significant developments. It received reports on regulatory actions and investigations. Over the course of the year the Chairmen of the Group's senior Board committees met with the PRA and the FCA on an individual basis and also participated in Regulatory College meetings with the Group's primary regulators. The Chairman of the Group Audit Committee also met with the PRA and with the External Auditor on a trilateral basis.

The Committee closely monitored the Group's relationship with its international regulators and significant time was dedicated in particular to understanding the regulatory requirements in the US and their implications for the Group's US operations and structure. The Committee Chairman also met with the Japanese Financial Services Authority, the Central Bank of Ireland and the Federal Reserve Bank of Boston during local visits.

External audit

During 2013, the External Auditor provided the Group Audit Committee with reports summarising their main observations and conclusions arising from their year end audit, half year review and work in connection with the first and third quarters' financial results and their recommendations for enhancements to the Group's reporting and controls. The External Auditor also presented for approval to the Committee their audit plan and audit fee proposal and engagement letter, as well as confirmation of their independence and a comprehensive report of all non-audit fees.

The Group Audit Committee undertakes an annual evaluation to assess the independence and objectivity of the External Auditor and the effectiveness of the audit process, taking into consideration relevant professional and regulatory requirements. The annual evaluation is carried out in two stages. An initial review was carried out in early 2014. In assessing the effectiveness of the Group's External Auditor, the Group Audit Committee had regard to:

- the experience and expertise of the senior members of the engagement team;
- the proposed scope of the audit work planned and executed;
- the quality of dialogue between the External Auditor, the Committee and senior management;
- the clarity, quality and robustness of written reports presented to the Committee setting out the External Auditor' findings arising from the audit;
- the quality of observations provided by the External Auditor on the Group's systems of internal control;
- the views of management on the performance of the External Auditor; and
- the findings of any reviews of the work of the External Auditor by relevant regulators and the actions taken, where appropriate, to address any matters raised.

The second phase of the review will be conducted following completion of the 2013 audit and will involve targeted interviews with individuals based on outputs from the initial phase and their level of interaction with the External Auditor.

In addition to the annual evaluation performed by the Group Audit Committee, the External Auditor will also conduct their own annual review of audit quality. Twelve service criteria for the audit have been defined by them to measure their performance against the quality commitments set out in their annual audit plan. Feedback will be obtained and discussed with relevant internal stakeholders. The results of this exercise will be presented to the Group Audit Committee, with actions defined and agreed to address any areas where performance has fallen below expected standards.

The Group Audit Committee is responsible for making recommendations to the Board in relation to the appointment, re-appointment and removal of the External Auditor. In order to make a recommendation to the Board, the Group Audit Committee considers and discusses the performance of the External Auditor, taking account of the outcomes of the annual evaluation carried out. The Board submits the Group Audit Committee's recommendations to shareholders for their approval at the Annual General Meeting.

Deloitte LLP has been the company's auditor since March 2000. There are no contractual obligations restricting the company's choice of External Auditor. The revised UK Corporate Governance Code, issued by the Financial Reporting Council in September 2012 provides that companies should put the external audit contract out to tender at least every ten years. The Competition Commission following their investigation into the supply of statutory audit services also concluded that FTSE 350 companies should tender the audit engagement every ten years. The Group Audit Committee has considered the requirements and emerging developments in the EU and currently intends to put the contract for the 2016 (and future periods) audit of the Group out to tender later this year. In the interim, the Board has endorsed the Group Audit Committee's recommendation that shareholders be requested to approve the reappointment of Deloitte LLP as External Auditor at the Annual General Meeting in 2014.

The Group Audit Committee approves the terms of engagement of the External Auditor and also fixes their remuneration as authorised by shareholders at the Annual General Meeting.

Audit and non-audit services

The Group Audit Committee has adopted a policy on the engagement of the External Auditor to supply audit and non-audit services, which takes into account relevant legislation regarding the provision of such services by an external audit firm.

In particular, the Group does not engage the External Auditor to provide any of the following non-audit services:

- bookkeeping or other services related to the accounting records or financial statements;
- financial information systems design and implementation;
- appraisal or valuation services, fairness opinions or contribution-in-kind reports;

Report of the Group Audit Committee

- actuarial services;
- internal audit outsourcing services;
- management functions or human resources;
- broker or dealer, investment adviser, or investment banking services;
- legal services and expert services unrelated to the audit; and
- other services determined to be impermissible by the US Public Company Accounting Oversight Board.

The Group Audit Committee reviews the policy annually and prospectively approves the provision of audit services and certain non-audit services by the External Auditor. Annual audit services include all services detailed in the annual engagement letter including the annual audit and interim reviews (including US reporting requirements) and periodic profit verifications.

Annual audit services also include statutory or non-statutory audits required by Group companies that are not incorporated in the UK. Terms of engagement for these audits are agreed separately with management, and are consistent with those set out in the audit engagement letter to the extent permitted by local regulations. During 2013, prospectively approved non-audit services included the following classes of service:

- capital raising, including consents, comfort letters, reviews of registration statements and similar services in respect of documents that incorporate or include the audited financial statements of the Group;
- accounting opinions, including accounting consultations and support related to generally accepted accounting principles and financial reporting matters relating to the financial statements of the Group and its subsidiaries;
- any reports that, according to law or regulation in the relevant jurisdiction, must be (and may only be) rendered by the External Auditor;
- reports providing assurance to third parties over certain of the Group's internal controls prepared under US Statement of Auditing Standards 70 "Service Organisations" or similar auditing standards in other jurisdictions; and
- reports and letters providing assurance to the Group in relation to a third party company where the Group is acting as equity/ debt underwriter in a transaction, in the ordinary course of business.

For all other permitted non-audit services, Group Audit Committee approval must be sought, on a case-by-case basis, in advance. The Group Audit Committee reviews and monitors the independence and objectivity of the External Auditor when it approves non-audit work, taking into consideration relevant legislation, ethical guidance and the level of non-audit services relative to audit services. The approval process is rigorously applied to prevent the External Auditor from functioning as management, auditing their own work, or serving in an advocacy role.

A competitive tender process is required for all proposed non-audit services engagements where the fees are expected to exceed £100,000. Engagements below £100,000 may be approved by the Chairman of the Group Audit Committee; as an additional governance control all engagements have to be approved by the Group Chief Accountant and Group Procurement. Where the engagement is tax related, approval must also be obtained from the Head of Group Taxation. Ad hoc approvals of non-audit services are ratified by the Group Audit Committee each quarter. During 2013, the External Auditor were approved to undertake certain significant engagements which are categorised and explained more fully below:

Regulatory requests and attestations (three engagements)

Regulators, both UK-based and overseas, requested certain work be undertaken by the Group during 2013 to provide assurances and meet certain requirements. In all three such engagements undertaken by the External Auditor, their existing knowledge of the Group was highlighted as a strong benefit. It allowed the work to commence quickly and with minimal disruption in all instances. The benefits of maintaining consistency between similar engagements was also highlighted.

Tax advisory and compliance services (one engagement)

Tax advisory services were provided to a subsidiary established by RBS and Blackstone. The External Auditor had been involved in establishing the subsidiary company and so had an in-depth understanding of its structure and tax liabilities.

Membership of a company acquired by Deloitte (one engagement)

Bersin has provided an annual membership to the RBS Group since 2010. This has allowed our HR and Learning & Talent Practitioners to access extensive online research libraries. Bersin was acquired by Deloitte in December 2012 and so at the point the Group's Bersin membership was due for renewal ad hoc approval by the Group Audit Committee was sought.

Non-statutory audit of full year accounts (one engagement)

As part of the disposal of certain UK branches, it has been necessary to prepare audited accounts for the business for 2012 and 2013. The External Auditor was selected to provide audit services based on its extensive experience of the Group's systems and process, as well as its specific knowledge of the project. In addition, following the completion of the banking licence application for the business, the new legal entity would be a wholly-owned subsidiary of the Group; it is the Group's policy to use the Group's External Auditor to audit the accounts of all subsidiaries except in exceptional circumstances.

In addition, the External Auditor is engaged from time to time by the Group to perform services in relation to the restructuring of loans and other financing. The Group is not liable for these fees, and often has a limited role in the selection process. As an additional governance control, these engagements are subject to the ad hoc approval process. Information on fees paid in respect of audit and non-audit services carried out by the External Auditor can be found in Note 5 to the consolidated accounts on page 403.

Brendan Nelson
Chairman of the Group Audit Committee
26 February 2014

Report of the Board Risk Committee

**Letter from Philip Scott,
Chairman of the Board Risk Committee**

Dear Shareholder,

Throughout 2013, the Board Risk Committee has sought to continue to provide assurance that the Group is operating in a safe and controlled manner and within the agreed risk appetite framework approved by the Board. This has been done against a backdrop of difficult external market conditions and increased regulatory scrutiny by the Prudential Regulatory Authority (PRA) and Financial Conduct Authority (FCA) and the Group's overseas regulators.

In particular, the Committee has focussed on market risk, operational risk, credit risk, conduct and regulatory risk and reputational risk. In its consideration of each area of risk, culture has been the priority and the Committee has emphasised the importance of instilling the correct behaviours within the organisation, alongside processes and tools designed with the customer at the fore. It is vital that the business is able to get these things right in order to meet its target of becoming a 'really great bank'. The Committee is working hard to drive cultural change and increase accountability throughout the organisation.

Oversight of risk has been enhanced in the period, through the separation of the Risk Management and Conduct and Regulatory Affairs functions. The restructure of the Risk function has enabled the Committee to achieve clearer and more effective oversight of conduct and regulatory issues, which will have long-lasting benefits. The Committee dedicates substantial time each year to the oversight of the risk operating model and succession planning and will continue to monitor these changes during 2014 as the respective functions continue to strengthen and embed.

Conduct risk standards continue to be communicated to employees using the four pillars of conduct risk: employee conduct; market conduct; corporate conduct; and conduct towards customers. These standards have been applied in the Committee's consideration of issues including the review of the sale of interest rate hedging products to SME customers. The Committee has also placed renewed focus on the quality of advice provided to customers, particularly in relation to mortgages, investment products and private client products.

In response to the allegations set out in the Tomlinson Report that the Group's restructuring division systemically set out to make profit at the expense of distressed customers, an independent review by the law firm Clifford Chance was commissioned to investigate these claims fully. The Group's regulators will also undertake their own review. While no evidence has been produced that supports the claims set out in the Tomlinson Report, the allegations have damaged our reputation and threaten to undermine our ability to build trust with customers and to increase lending to businesses in the UK economy. Therefore it is essential that the Group verifies the facts as quickly as possible. The Board Risk Committee has undertaken to review the outputs of both investigations, in depth, on behalf of the Board and make recommendations as to action required.

During 2013, the Board Risk Committee has continued to oversee the remediation activity following the major IT incident in 2012 and the ongoing effort to ensure the Group is more resilient in this respect in future. The Committee has also considered other potential single points of failure and how these can be identified and prevented or mitigated. This focus will continue in 2014 and the Committee will continue to liaise with its principal regulators during the first quarter of the year as the investigation of the IT incident concludes.

The Committee has considered reports on data quality, information security and corporate security with a particular focus on cyber security. This continues to be a significant issue for the banking industry as a whole and will remain a priority for the Committee in 2014.

Consideration of the case for RCR and substantiation of the capital plan was a major undertaking for the Group in the latter half of 2013. Given the fundamental strategic importance of this review, consideration, analysis and approval was undertaken collectively by the Group Board rather than at Committee level, which I consider to be appropriate. As a priority in 2014, the Board Risk Committee will monitor the risks in execution of this plan and also execution of the measures announced following the strategic review.

While 2013 has presented significant challenges, there has also been significant progress in the oversight of risk and control in many areas. In particular I would highlight the following:

- the Committee has continued to enhance its relationship with other Committees, in particular the Group Performance and Remuneration Committee. It has advised on matters such as assessing risk performance of both divisions and individuals, reviewing the risk objectives of members of the Executive Committee and considering the accountability of individuals in relation to specific matters;
- the role of Divisional Risk and Audit Committees has been reviewed in conjunction with the Group Audit Committee to ensure that they provide more transparency and more effective consideration of risk at a divisional level. Proposed changes to the existing model will be considered by the Committee in Q1 2014;

Report of the Board Risk Committee

- the Committee has overseen the refinement and further embedding of the Group's risk appetite framework into the business divisions;
- the Committee considered the outputs of stress testing and approved a reverse stress test trigger framework to further assist the risk management team in assessing how the business is positioned to respond to various potential scenarios; and
- an economic capital framework was presented and the Committee considered how this would be transitioned into business as usual.

More detailed information on each of these areas is set out in the Board Risk Committee report that follows.

2013 was a challenging year for the Board Risk Committee and I would like to extend my gratitude to my fellow members and to the Group's senior leadership team for the additional time that they have dedicated to the business of the Committee.

Philip Scott,
Chairman of the Board Risk Committee
26 February 2014

Report of the Board Risk Committee

Report of the Board Risk Committee

Meetings and visits

The Board Risk Committee held seven scheduled meetings in 2013. Meetings are held alongside Group Audit Committee meetings to ensure that the work of the two Committees is coordinated and consistent. Board Risk Committee meetings are attended by relevant executive directors, risk management, finance and internal audit executives. External advice may be sought by the Board Risk Committee where considered appropriate. During 2013, the members of Board Risk Committee, in conjunction with the members of the Group Audit Committee, took part in an annual programme of visits to the Group's business divisions and control functions. This programme included two in depth sessions with the Risk Management function to consider key risk areas and the risk strategy and operating model. Full details about the programme of visits is set out in the Report of the Group Audit Committee on page 53.

Membership of the Board Risk Committee

The Board Risk Committee comprises at least three independent non-executive directors. The Chairman and members of the Committee, together with their attendance at meetings, are shown below.

	Attended/ scheduled
Philip Scott (Chairman)	7/7
Sandy Crombie	7/7
Tony Di Iorio (1)	6/7
Brendan Nelson	7/7
Baroness Noakes	7/7
 Former director	
Joe MacHale (2)	2/4

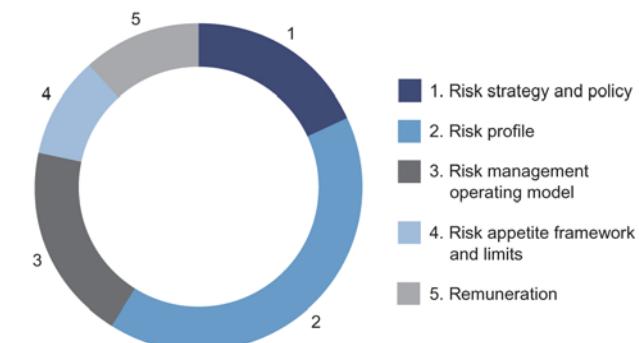

Notes:

(1) Missed one meeting due to travel disruption.

(2) Retired from the Board on 14 May 2013.

Philip Scott, Tony Di Iorio, Brendan Nelson and Baroness Noakes are also members of the Group Audit Committee. Sandy Crombie is also a member of the Group Performance and Remuneration Committee. This common membership ensures effective governance across all finance, risk and remuneration issues, and that agendas are aligned and overlap is avoided, where possible.

Board Risk Committee allocation of agenda time

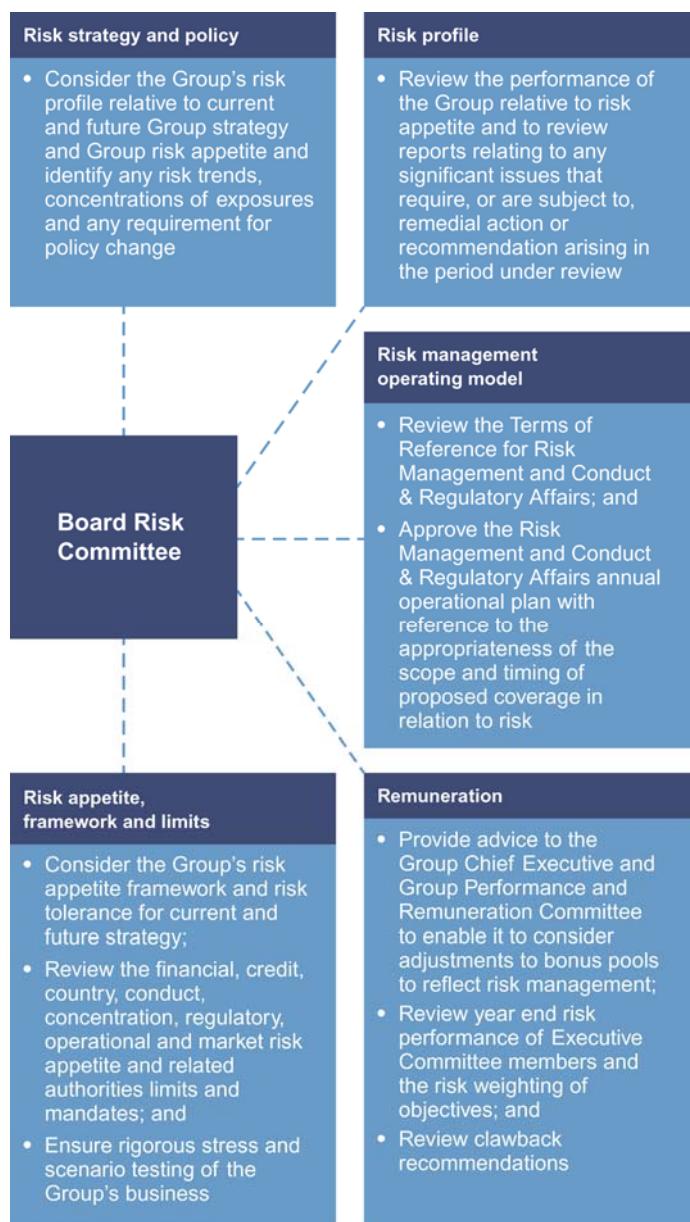

Performance evaluation

A review of the effectiveness of the Board and senior committees, including the Board Risk Committee, during 2013 was conducted internally. The Committee has considered and discussed the report on the outcomes of the evaluation and is satisfied with the way in which the evaluation has been conducted, the conclusions and the recommendations for action. Overall, the review concluded that the Board Risk Committee continued to operate effectively but some areas where further enhancements could be made, were identified. The outcomes of the evaluation have been reported to the Board, and during 2014, the Committee will place focus on driving further improvements to risk reporting and prioritisation of Committee time.

The role and responsibilities of the Board Risk Committee

The Board Risk Committee's primary responsibilities are shown below and are set out in its terms of reference which are reviewed annually by the Committee and approved by the Board. These are available on rbs.com.

Report of the Board Risk Committee

Risk strategy and policy

RBS has a clear risk strategy supported by well defined strategic risk objectives. The members of the Board Risk Committee provide input to the overarching strategy for the business on an ongoing basis.

During 2013, the Board Risk Committee reviewed the implementation of the Group Policy Framework across the organisation. It also reviewed the output of control environment certifications which provided the Committee with an assessment of the effectiveness of the Group's internal control environment. Particular focus was placed on how the operational risk framework was structured to identify single points of failure and "black swan" events, being those events that were difficult to predict but would have a high impact. The Committee agreed that Risk Management should reinforce with divisions that risk assessments and scenario analysis should extend to these events and that consideration should also be given to resilience.

Together with the Group Audit Committee, throughout 2013, the members placed particular focus on the implementation and embedding of the three lines of defence model across divisions. While progress has been made, the Committee recognises that additional work is required to fully delineate responsibilities across front line management, risk and internal audit. The Committee has emphasised that it considers effective operation of the model to be a priority and will closely monitor progress in 2014 alongside strategic and organisational change.

The Committee also considered management's plans to deliver a holistic Enterprise Risk Management (ERM) framework, intended to deliver an increase in effectiveness and make risk more relevant to the operation of the business. This would involve rationalising existing risk management tools and making them integral to business as usual. The Committee noted its emphatic support to the accelerated programme of work planned for 2013/2014 which including the development of outcome-focused principles of business and the use of tools such as the "yes check" to align values with customer outcomes based on integrity, safety, soundness, reputation and standards.

The members closely reviewed implementation plans and delivery of solutions to meet the requirements of the Single European Payments Area. The Committee in particular has monitored the relationship with the Central Bank of Ireland in this regard.

The Committee has received reports on plans underway to enhance data quality across the organisation. It has also considered information security, corporate security and cyber risk.

Risk profile

Reporting

The Committee received a detailed report on key risks and metrics at each meeting and the Group Chief Risk Officer provided a verbal update on the key risks to the organisation. Following his appointment, the Head of Conduct and Regulatory Affairs also provided a verbal update on current pertinent matters to the Committee at each meeting. These reports enabled the Committee to identify the key risk areas where additional focus was required.

During 2013, the Committee has continued to focus on enhancing risk reporting and some improvements have been made, including the creation of a risk report at entity level of National Westminster Bank Plc. However, the annual Committee performance evaluation has highlighted that more work is required to rationalise the reports that are received by the Committee; to ensure that key risks are conveyed succinctly and prominently; and to standardise and simplify presentations. This will be taken forward in 2014.

The Committee reported to the Board following each meeting on its consideration of the risk profile of the business and made recommendations as appropriate.

Risk Incidents and Regulatory reviews and investigations

As in previous years, regulatory risk featured highly on the agenda of the Committee during 2013. Most significantly, as highlighted above, in the letter from the Committee Chairman, the Committee continued to play a central role in the oversight and remediation of the Group's 2012 IT incident. It received regular reports on the work being undertaken to enhance resilience and address root causes of the issue and has challenged management on the robustness of plans and in relation to capability across the three lines of defence. Significant progress has been made to address the deficiencies highlighted by the incident. However, longer term investment in further enhancement to the Group's infrastructure is ongoing. The Committee will continue to oversee the remediation activity and wider enhancement required to systems and resilience during 2014. The Committee will also work with its regulators to address findings as their investigation of the incident concludes and will ensure accountability is fully considered and learnings are adopted, across the organisation.

The Committee was dismayed to learn of the most recent system outage in late 2013 and will ensure that this matter and any correlation with the earlier IT incident is fully understood.

The allegations set out in the Tomlinson Report have been taken very seriously by the Group and while there is no evidence of systemic wrongdoing in the way distressed customers were treated by the Group's restructuring division, an independent review by Clifford Chance has been commissioned. The FCA has separately appointed a skilled person to undertake a review under section 166 of the Financial Services and Markets Act. The Board Risk Committee will review the outputs of these investigations and will liaise with its regulators as required.

Report of the Board Risk Committee

A number of other internal and regulatory investigations arose or continued throughout 2013. During the period, the Committee received reports on:

- the investigation of the alleged mis-selling of interest rate hedging products to small and medium sized enterprises and considered the appropriateness of remediation activity;
- the investigation of allegations of inappropriate rate setting activity in particular foreign exchange rates;
- anti-money laundering remediation including divisional remediation plans, prioritisation and resource requirements;
- the sale of complex products and the quality of investment advice to customers. In particular, it received reports on required enhancements to the mortgage sales process. The sales and product design and approvals process were also reviewed;
- the status of key litigation cases, in particular the US residential mortgage-backed securities litigation claims; and
- the remediation of known regulatory issues in the RBS Americas region.

Where appropriate, the Committee oversaw liaison with regulators; made recommendations regarding required remediation, training and process controls and enhancements; and made recommendations to the Group Performance and Remuneration Committee in relation to accountability. Progress to address identified weaknesses will be closely monitored throughout 2014.

In 2013, the Balcony Oversight Committee was established in acknowledgment of the volume of ongoing conduct issues, particularly in the Markets division. The aim of the Balcony Oversight Committee chaired by the Head of Conduct and Regulatory Affairs, is to provide independent oversight, identify common themes and to share lessons learned. The Balcony Oversight Committee reports to the Board Risk Committee and regular updates were provided on the status of ongoing investigations and emerging themes.

Capital and liquidity

The Committee reviewed the capital and liquidity position of the business regularly in light of external conditions.

The Committee made recommendations to the Board concerning the Individual Liquidity Adequacy Assessment, the Internal Capital Adequacy Assessment Process (ICAAP) and the Contingency Funding Plan, in line with the Group's commitments to its regulators.

Risk appetite framework and limits

The risk appetite framework for the Group was reviewed in 2013 to ensure it remained fit for purpose in light of internal restructuring, market positioning and changes to regulation. Consideration was given to how risk appetite linked to strategic objectives and how quantitative risk appetite targets had been set. The Committee discussed earnings volatility, including the impact of diversification benefit on the targets. Following detailed discussion, the Committee recommended the framework to the Board for approval and noted its support to management as the framework was embedded across the Group at divisional level. The Board Risk Committee separately reviewed the country risk appetite and Group Market Risk Control Framework and noted new market risk caps and changes to the existing limits.

In the second half of 2013 the Committee reviewed proposed changes to the Single Name Concentration framework for Banks and a new Single Name Concentration grid for Large Corporates.

The Committee also considered the Economic Capital model, which had been under delivery since 2010. It was noted that the model was now being transitioned to business as usual activity and had been used to assess credit concentration risk for Pillar 2 capital as part of the 2011 ICAAP, resulting in a more accurate capital calculation. The Committee is confident that the model will provide management with a clearer understanding of risk.

The Committee continued to review the output of stress testing and discussed the stress scenarios and underlying assumptions. In the second half of 2013, the Committee noted the output of a reverse stress testing exercise and recommended it for approval to the Board.

Risk management operating model

During the course of two separate visits to Risk Management, the Committee reviewed the risk management operating model to ensure the function had the appropriate structure and resources in place to deliver its strategic plan. Bench-strength of the risk function was reviewed and consideration was given to succession-planning, resource and budget.

The strengthening of the Conduct and Regulatory Affairs function during the second half of the year resulted in various changes to the risk management operating model which were discussed in detail with the Committee. Further developments to Risk Management, Conduct and Regulatory Affairs and the risk committee framework that underpins the Board Risk Committee will continue to be progressed in 2014 and the Committee will remain involved in the discussions and changes as appropriate.

As referenced in the Group Audit Committee report on pages 52 to 57, a framework of Divisional Risk and Audit Committees is responsible for reviewing the business of each division and reporting to the Group Audit Committee and Board Risk Committee. During 2013, the Committee reviewed the operation of the committees and requested that management consider alternative mechanisms that could more effectively provide a line of sight into divisional risk issues and activity. The output of that review, will be more fully discussed in Q1 2014.

Report of the Board Risk Committee

Risk architecture

The Committee reviewed the preparations underway to ensure compliance with the new best practice principles that had been defined by the Basel Committee of Banking Supervision (BCBS) for internal risk reporting and data aggregation practices, which would be effective in 2016. Consideration was given to how these requirements reaffirmed priorities and direction of travel with the Finance and Risk Transformation (FIRST) Programme and it was noted that work was in progress to both accelerate usage of the FIRST strategic solution by Risk and enhance existing capabilities. In conjunction with the Group Audit Committee, the Board Risk Committee will closely monitor delivery of the FIRST programme in 2014 and any required changes as a result of the strategic review.

Remuneration

The Committee recognises that embedding the correct conduct and culture in the organisation requires an emphasis on performance management and conduct standards. The Board Risk Committee has continued to work closely with the Group Chief Executive and Group Performance and Remuneration Committee to consider the risk aspects of Executive Committee members' objectives and remuneration arrangements as appropriate.

The Committee considered the risk performance of divisions in light of known risk and control issues and under advice from Risk Management and Internal Audit. It made recommendations regarding appropriate adjustments, to the Group Chief Executive and Group Performance and Remuneration Committee.

The Committee has reviewed specific accountability cases as required and made recommendations accordingly.

Philip Scott
Chairman of the Board Risk Committee
26 February 2014

Report of the Group Sustainability Committee

**Letter from Sandy Crombie
Chairman of the Group Sustainability Committee**

Dear Shareholder,

Early in 2013 the remit of the Group Sustainability Committee was increased to include broader sustainability issues including conduct, culture, reputation and most importantly, how the Group serves its customers.

Membership was strengthened with an additional non-executive director and meeting frequency was also increased, all underlining our commitment to the sustainability agenda.

While 2013 presented significant challenges, progress was made by the Committee in overseeing and challenging how management was addressing sustainability and reputation issues relating to all stakeholder groups. Key areas of work during the year included:

- oversight of the introduction and embedding of the purpose, vision and values work intended to promote behavioural change and strengthen our culture Group-wide. This included the introduction of the Code of Conduct which lays out the standard of conduct that supports the Group's values of serving customers, working together, doing the right thing and thinking long term;
- oversight of how the Group is balancing the needs of all its stakeholder groups including customers, investors, employees, regulators and communities/society and alignment with the Group's strategic intent;
- ongoing commitment to the stakeholder engagement programme through regular face to face sessions with advocacy groups on key issues of concern. This has been a key area of progress for the Committee allowing for challenge and debate in an open and collaborative environment (more details on next page);
- oversight of development of Environmental, Social and Ethical (ESE) policies to ensure increased transparency and disclosure and more responsible management of risks in sensitive and high risk sectors. ESE policies reviewed in 2013 included Mining and Metals, Oil and Gas and Gambling;

- receiving reports on the sustainability activities across the company including supporting enterprise, employee engagement, citizenship, environment, safety and security;
- improved reporting through the annual Sustainability Report which provides a review of our activities and details future commitments, goals and priorities. We adhere to best practice standards for our reporting, following a principles framework of inclusivity, materiality and responsiveness. Deloitte LLP undertake independent assurance of our reporting and were able to provide an unqualified assurance statement in respect of the 2012 Sustainability Report which was published in May 2013;
- receiving reports on people issues including health and safety, diversity and inclusion, employee wellbeing and employee opinion; and
- receiving reports on legal issues and legislative changes that impact the sustainability agenda.

Other areas supported by the Committee included the adoption of a number of internationally accepted voluntary codes notably the Equator Principles, United Nations Global Compact and Natural Capital Declaration (see pages 31 to 33 for more detail).

Although much still has to be done, it is pleasing that the efforts to build a sustainable and responsible business have been recognised through independent and external measures such as inclusion in the Dow Jones Sustainability World Index with our highest score to date in 2013. We have also been included in the FTSE4Good Index Series which measures the performance of companies that meet globally recognised corporate responsibility standards (see pages 31 to 33 for more information on these external commitments).

To continue the progress made in 2013, a priority for the Committee will be to ensure that its strategic direction is aligned with business priorities and that sustainability is embedded in everything that we do.

Finally I would like to thank my fellow Committee members for their expertise and guidance and all those who have supported us, whether inside or outside RBS, for their contribution to our work.

More detailed information on the Committee and the Group's approach to sustainability is found on pages 31 to 33.

Sandy Crombie
Chairman of the Group Sustainability Committee
26 February 2014

Report of the Group Sustainability Committee

Report of the Group Sustainability Committee

Meetings

The Group Sustainability Committee held six Committee meetings in 2013 in addition to seven stakeholder engagements sessions. Both were attended by senior representatives from the customer facing divisions as well as Human Resources, Sustainability, Risk Management, Communications, Legal, Strategy and Corporate Services. The Chairman of the Board regularly attends the meeting as well as internal and external specialists who may be requested to attend for specific items.

Stakeholder Engagement Sessions

Balancing the needs of stakeholders means understanding the views of all those who have an interest in our business. In addition to ongoing engagement throughout RBS with internal and external stakeholders, during the year, the Group Sustainability Committee participated in seven stakeholder engagement sessions covering the following topics:

- Fair Banking;
- Safety and Security;
- Citizenship;
- Supporting Enterprise;
- Sustainability priorities in the USA;
- Investor Perspective; and
- Employee Engagement.

These stakeholder engagement discussions help inform decision making across the Group, shape future policies and influence strategic priorities and will continue to play a key role. For more information see pages 31 to 33.

In 2013, a programme of UK based events aimed at individual shareholders was introduced. These events provided an opportunity for shareholders to meet directors and senior management to learn more about the business.

Membership

The Group Sustainability Committee comprises three independent non-executive directors. The Chairman and members of the Committee, together with their attendance at meetings, are shown below.

	Attended/ scheduled
Sandy Crombie (Chairman)	6/6
Alison Davis (1)	5/6
Penny Hughes (2)	3/3

Notes:

(1) One meeting missed due to time zone differences.

(2) Appointed to the Committee with effect from 30 July 2013.

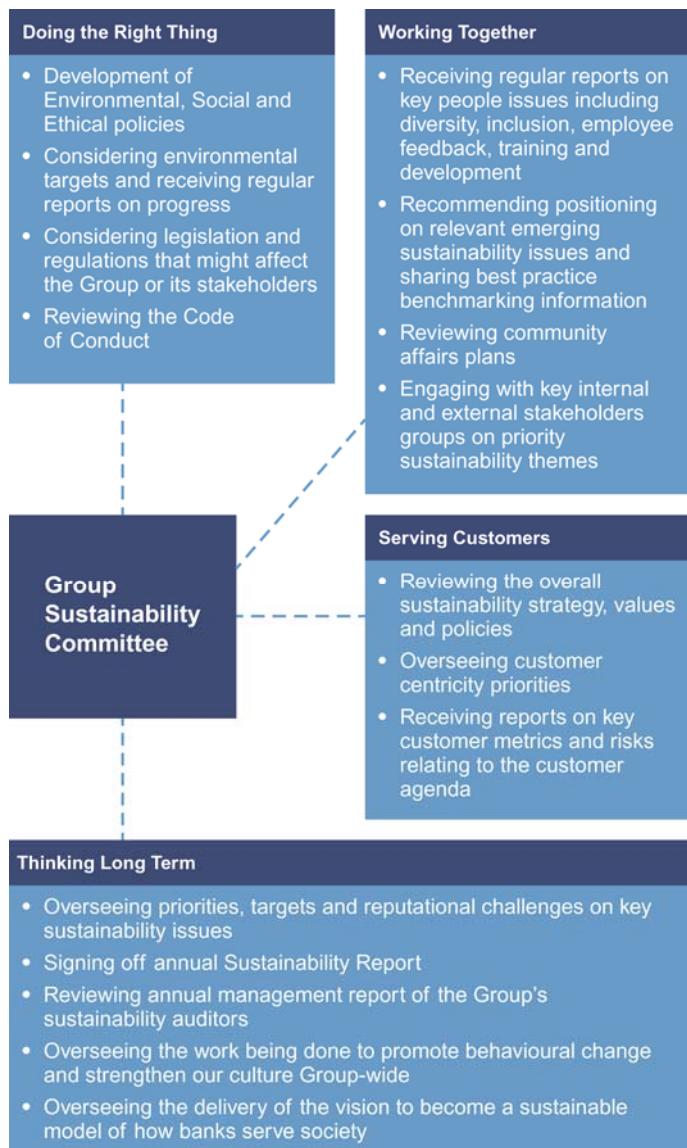

Performance evaluation

An internal review of the effectiveness of the Group Sustainability Committee took place in 2013. Overall the review concluded that the Group Sustainability Committee continued to operate effectively. An ongoing challenge will be to ensure that the Group's strategy covers the long term needs of all stakeholders and that the work of the Group Sustainability Committee is fully aligned with that strategy.

Role and responsibilities of the Group Sustainability Committee

The Group Sustainability Committee is responsible for overseeing and challenging how management is addressing sustainability and reputation issues relating to all stakeholder groups, except where such issues have already been dealt with by another Board committee.

Authority is delegated to the Group Sustainability Committee by the Board and the Committee will report and make recommendations to the Board as required. The terms of reference of the Group Sustainability Committee are available on the Group's website rbs.com and these are considered annually by the Group Sustainability Committee and approved by the Board. A report on the activities of the Group Sustainability Committee in fulfilling its responsibilities is provided to the Board following each Committee meeting. The principal responsibilities of the Group Sustainability Committee are shown below aligned to the Group's values.

Directors' Remuneration Report

Annual Statement from the Chair of the Group Performance and Remuneration Committee Penny Hughes

Dear Shareholder,

This year's remuneration report is published at an important moment for RBS. Five years on from the company's rescue, RBS is substantially safer and smaller, has a new Group Chief Executive, and has embarked on a new strategy positioning customers at its centre. In this changing environment, the complex challenges surrounding remuneration that I have written about in this space for the last few years, have not gone away.

The Committee is tasked with making decisions on pay that encourage good service to our customers, are fair to all of our employees, and are in the interests of all of our shareholders. These decisions are never easy and are rarely popular in all quarters. Sometimes it would be easier for the Committee to make different decisions, prioritising the needs of one stakeholder group over another. We understand why RBS is subject to public and political scrutiny and has an obligation to the public that goes beyond that of our competitors. But truly living up to our responsibilities means we have to reject easy options which are not in the long-term interests of our stakeholders.

2013 performance – a challenging year

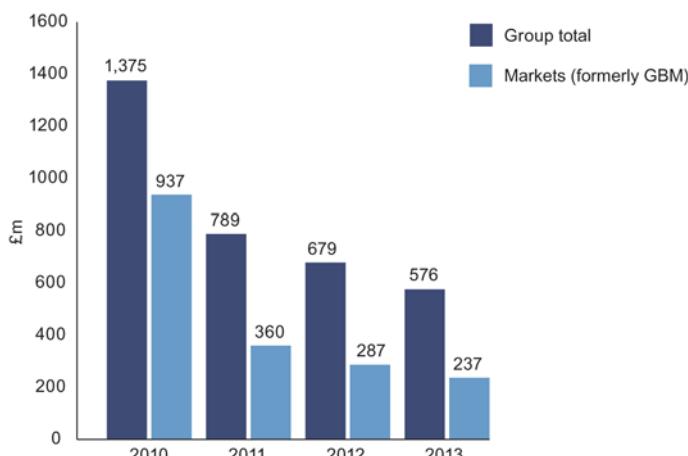

Although now safer and more secure than it was five years ago, RBS is still beset by issues that have their roots in the past. Our substantial loss for 2013 arises primarily from the decision to remove more of the bad assets from our balance sheet and make additional provisions for conduct and litigation issues. It is a matter of great regret that it is against this background that I have to make this report. I know shareholders had hoped that losses like this would have been well behind RBS by now. Those who served on the Executive Committee during the year did not receive any bonus for 2013. Most of this team is relatively new, but this was an important leadership issue.

Continuing pay reform

There has been a fundamental cultural shift in our approach to pay:

- Over the last four years alone, bonus pools have fallen by 58% at a Group level and by 75% within the Markets division.

Bonus pool reductions - 2010 to 2013

- The Group bonus pool has fallen between 2012 and 2013 in line with the fall in pre-RCR operating profit.
- The underlying reduction is significantly greater when taking account of the deduction made last year for LIBOR.
- The percentage of staff receiving no bonuses has increased over the last year from 40% to 43% as we continue to target high performers.
- In our UK retail business, incentive schemes for customer facing staff have minimum standards relating to customer and risk measures which must be met before any payments can be considered.
- Performance related pay is linked to a combination of performance measures covering financial and non-financial metrics.

Operating in markets where absolute and relative levels of pay are still high, RBS has been a back-marker. But we do not and cannot operate in a vacuum. Many of our employees have done good work this year to help rebuild the company for the future. While pay in aggregate will continue to remain at the lower end of current market practice, I firmly believe our pay levels must remain competitive to attract and retain a high calibre of staff. This is essential if we are to build a business of value for our customers and our shareholders.

It is worth noting that bonuses and other variable pay arrangements are standard practice for FTSE100 companies, not just banks. Research indicates that 99% of executives in the FTSE100 at Executive Committee level or above have a variable to fixed pay ratio that exceeds 1:1.

I know it is not always easy to accept, but if RBS is to thrive we must do what it takes to attract and keep the people who will help us achieve our goals. We think that the right positioning of the business is to be commercial. While we are sensitive to public opinion, particularly given our ownership structure, the ability to pay competitively is fundamental to getting RBS to where we need it to be.

Directors' Remuneration Report

There is an understandable public focus on the highest paid specialist talent at RBS. However, as a Committee, we are equally concerned about pay for staff at all levels. We provide oversight and guidance on all RBS remuneration arrangements. In 2014 we are directing a greater proportion of our salary budget to our lower paid employees. We continue to pay our permanent employees in the UK at or above the "Living Wage" benchmarks (National and London) and intend to apply for full accreditation.

Our remuneration policy promotes transparency and accountability; pay is clawed back when things go wrong, and awards are suspended when investigations are ongoing. Clawback is a powerful tool and we have put it to use. This year we have suspended awards pending investigations triggered by serious allegations of misconduct. It is important for the company and the executives involved that discretionary awards are put on hold until all the facts are clear.

CRD IV

Many of you will be aware that a "bonus cap" has been introduced under the fourth European Capital Requirements Directive (CRD IV). Whilst the actual regulation and setting of a hard cap is not what we would have wished for, it is essentially aligned to our own actions to moderate pay levels and reduce pay leverage. We will therefore seek to comply with the spirit as well as the letter of the regulations.

We are considering whether to ask shareholders to approve a maximum ratio of variable to fixed pay at 2:1, rather than the default ratio of 1:1, at the 2014 AGM. As the legislation is now in force, we are reviewing how best to structure remuneration arrangements that are both compliant and aligned with shareholders' interests. The Board will agree its final position in light of emerging market practice and details of any proposals will be contained in the Letter to Shareholders prior to the AGM.

New Share Plan

At the 2014 AGM we will seek approval for the RBS 2014 Employee Share Plan. This will replace the Deferral Plan which expires in December 2014 and the Long Term Incentive Plan. Further details will be set out in the Letter to Shareholders.

Review of year and Group performance

Further progress was made in the run down of Non-Core during 2013. Our balance sheet and capital levels indicate how far RBS has come in building a safe and sustainable foundation. From a strategic point of view, progress was also made in re-shaping the Markets business, selling a further stake in Direct Line Group, agreeing a pre-IPO investment of the Williams and Glyn branches and bringing forward the IPO of Citizens. However, I won't shy away from the fact that overall it's been a tough year for RBS in terms of financial performance. Results in certain divisions have been disappointing and revenue growth is not what we would like it to be at this point in our recovery.

The regulatory landscape and increasing capital requirements have an impact on our returns to shareholders and, in turn, this must be reflected in our returns to employees. The Committee considers all these factors when determining appropriate reward levels.

Performance considerations for 2013

- Group Operating Profit, excluding the impact of RBS Capital Resolution (RCR) of £2,520 million, a reduction of 15% on 2012.
- Loss before tax of £8,243 million, due in part to the impact of RCR which will help to remove uncertainty associated with legacy issues.
- Markets division making strategic progress, staff costs are down 19% and RWAs are down 36%.
- Core Tier 1 capital ratio improved to 10.9% from 10.3% at the end of 2012.
- Reduction in Non-Core assets to £28 billion.
- RBS offered £58.5 billion of loans and facilities to UK businesses in 2013 of which £31.5 billion was to SMEs. RBS also helped UK companies, universities and housing associations to raise £24.7 billion through bond issues in 2013.
- Employee engagement is strong and clear evidence that key values are being embedded across the Group.

Decisions made on pay

- Full details of decisions for both current and former directors are set out in this report.
- Ross McEwan's salary on appointment as Group Chief Executive represented a 17% reduction to his predecessor.
- In line with existing policy, Ross McEwan will receive a long-term incentive award in March 2014.
- Nathan Bostock has announced his departure and all outstanding share awards will lapse.
- Total compensation, both on an overall and per employee level, has been reduced for 2013.
- Total variable compensation reduced again for 2013, down 15% at a Group level and 17% for Markets compared to 2012. This includes a £25 million reduction as part of the committed LIBOR related actions.
- Total Group variable compensation as a percentage of operating profit (pre-RCR and before variable compensation), a key ratio, has remained at 19%.
- The proportion of deferred variable compensation delivered in shares has increased significantly for 2013, representing 63% for Group and 81% for Markets. Further details on the bonus pool can be found in Note 3 to the accounts on page 397.
- Incentive awards continue to be targeted towards high performers. 43% of employees who are eligible will not receive a bonus.

Directors' Remuneration Report

- Of those employees who do receive an award, 47% will receive £2,000 or less and 70% will receive less than £5,000.
- Any awards above £25,000 will be delivered 100% in shares and deferred over a three year period.
- Average salary increases made across the business in 2014 will be less than 2%.

In conclusion, I believe our decisions on pay take account of performance while giving us the flexibility to attract and retain the expertise needed to build for the future. The Committee continues to receive valuable and independent advice from PwC and I would like to thank my fellow Committee members and those who support the Committee for their insight and guidance during another eventful year. I am also greatly encouraged by the willingness of shareholders to engage constructively in the pay debate and grateful for their support.

Following the publication of the Parliamentary Commission on Banking Standards report in June 2013 and the announcement from the Prudential Regulation Authority (PRA) that they intend to consult on a revised Remuneration Code in 2014, it is likely that remuneration will continue to be an important part of the agenda facing banks in the year ahead. We welcome any developments that help to make banks safer and ensure fair returns for both shareholders and employees.

RBS is a major UK employer and, as a bank playing a key role in the economic recovery, we understand the importance of getting our pay decisions right. We are committed to a high level of transparency and I believe the new reporting and voting requirements that apply to this year's remuneration report can add to this process.

My closing message is simple. Pay must align with the long-term strategy and be cut when performance disappoints. This is what RBS is doing. I hope shareholders find this year's report helpful and feel able to support the proposals at the AGM.

Penny Hughes
Chair of the Group Performance and Remuneration Committee
26 February 2014

Directors' Remuneration Policy

Directors' Remuneration Policy

Future policy table for executive directors (EDs)

Fixed pay elements

To provide a level of competitive remuneration for performing the role with less reliance on variable pay in order to discourage excessive risk-taking and with partial delivery in shares to align with long-term shareholder value.

Element of pay	Purpose and link to strategy	Operation	Maximum potential value	Performance metrics and period
Base salary	To aid recruitment and retention of high performing individuals whilst paying no more than is necessary. To provide a competitive level of fixed cash remuneration, reflecting the skills and experience required, and to discourage excessive risk-taking.	Paid monthly and reviewed annually. The rates for 2014 are as follows: Group Chief Executive - £1,000,000 Group Finance Director - £765,000 Further details on remuneration arrangements for the year ahead are set out on pages 82 to 84 of the annual report on remuneration.	Determined annually. Any future salary increases will be considered against peer companies and will not normally be greater than the average salary increase for RBS employees over the period of the policy.	No performance conditions are directly applicable although any future salary increases will take into account performance rating during the year.
Fixed share allowance	To provide fixed pay that reflects the skills and experience required for the role. This will be delivered in shares and held for the long term.	A fixed allowance, paid entirely in shares. Individuals will receive shares that vest immediately subject to any deductions required for tax purposes and a retention period will apply. Shares will be released in equal tranches over a five year period. The fixed share allowance will be paid in arrears, initially at six monthly intervals, and in the event of termination, only in respect of service completed ⁽¹⁾ .	An award of shares with an annual value of up to 100% of salary at the time of award. The fixed share allowance is not pensionable.	N/A
Benefits	To provide a range of flexible and market competitive benefits to further aid recruitment and retention of key individuals.	A set level of funding is provided and EDs can select from a range of benefits including: <ul style="list-style-type: none">• Company car• Private medical insurance• Life assurance• Ill health income protection Also entitled to use of a car and driver on company business and standard benefits such as holiday and sick pay.	Set level of funding for benefits (currently £26,250) which is subject to review. Further benefits such as relocation allowances and other benefits (e.g. tax advice, housing and flight allowances and payment of legal fees) may be offered in line with market.	N/A
Pension	To encourage planning for retirement and long-term savings.	Provision of a monthly cash pension allowance based on a multiple of salary. Opportunity to participate in a defined contribution pension scheme.	Pension allowance of 35% of salary.	N/A

Note:

(1) The company believes that delivery in shares is the most appropriate construct for a fixed allowance to executive directors, qualifying as fixed remuneration for the requirements imposed under CRD IV. If regulatory requirements emerge that prohibit any such allowances being delivered in shares, then the company reserves the right to provide the value of the allowance in cash instead in order to comply.

Directors' Remuneration Policy

Variable pay

To further incentivise superior long-term performance, with rewards aligned with shareholders and adjusted for risk, based on the achievement of stretching performance measures.

Element of pay	Purpose and link to strategy	Operation	Maximum potential value	Performance metrics and period
Variable pay award (long-term incentive)	<p>To support a culture where good performance against a full range of measures will be rewarded. To incentivise the delivery of stretching targets in line with the Strategic Plan. The selection of performance metrics will be closely aligned with Key Performance Indicators.</p> <p>Performance is assessed against a range of financial and non-financial measures to encourage superior long-term value creation for shareholders.</p> <p>Delivery in shares with the ability to clawback further supports longer-term alignment with shareholders.</p>	<p>Any variable pay award made will be delivered in the form of a long-term incentive, paid in shares (or in other instruments if required by regulators) and subject to a combination of time deferral and performance-based requirements. A minimum three year performance period will apply.</p> <p>As a minimum, shares will be subject to deferral and retention periods as required under the PRA Remuneration Code.</p> <p>The award will have an overall five year vest period, vesting in equal tranches in years four and five.</p> <p>Provision for clawback prior to and post vesting of awards.</p> <p>The award will be delivered under the RBS 2014 Employee Share Plan, subject to shareholder approval at the 2014 AGM.</p>	<p>The maximum level of award is subject to any limit on the ratio of variable to fixed pay as required by regulators. If shareholder approval is sought and obtained at the 2014 AGM, this will be 200% of fixed pay (i.e. base salary, fixed share allowance, benefits and pension). For these purposes awards will be valued in line with the European Banking Authority rules, including any available discount for long-term deferral.</p> <p>Our intention is that awards for executive directors will be maintained at a maximum of 300% of base salary in line with past practice⁽¹⁾.</p> <p>The vesting level of the award could vary between 0% and 100% dependent on the achievement of performance conditions. Between 20% - 25% will vest at threshold for each performance measure.</p>	<p>Any award made will be subject to future performance conditions over a minimum three year period.</p> <p>Typical measures may fall under the following categories (weighted 25% each):</p> <ul style="list-style-type: none"> • Economic Profit • Relative Total Shareholder Return (TSR) • Safe and Secure Bank • Customers and People <p>A financial and risk performance underpin provides discretion to vary the vesting outcome if the Committee considers this does not reflect underlying performance.</p> <p>These or similar measures and weightings will be applied to reflect the strategy going forward.</p> <p>Details of the award and performance measures for each year will be set out in the annual report on remuneration.</p>

Note:

(1) In the event that shareholder approval is not sought or obtained for the 2:1 cap, corresponding adjustments will be made to ensure that executive directors remain within the variable to fixed limit.

Directors' Remuneration Policy

Other pay elements

Element of pay	Purpose and link to strategy	Operation	Maximum potential value	Performance metrics and period
Shareholding requirements	To ensure EDs build and continue to hold a significant shareholding to align interests with shareholders.	A period of five years is allowed in which to build up shareholdings to meet the required levels. Any unvested share awards are excluded in the calculation.	Group Chief Executive - 250% of salary. Other EDs - 125% of salary.	N/A
All-employee share plans	An opportunity to acquire RBS shares.	Opportunity to contribute from salary to the RBS Sharesave and Buy As You Earn Plan.	Statutory limits imposed by HMRC.	N/A
Legacy arrangements	To ensure RBS can continue to honour payments due to EDs.	In approving this policy, authority is given to honour any previous commitments or arrangements entered into with current or former directors, including share awards granted under the 2010 Deferral Plan and 2010 Long Term Incentive Plan (LTIP) and awards granted prior to appointment as an executive director that may have different performance conditions aligned with divisional performance.	In line with existing commitments.	In line with existing commitments.

Notes to policy table

- The Committee sets performance targets taking into account the Group's Strategic Plan, financial forecasts and wider non-financial metrics. The performance conditions for variable pay awards made to EDs have been chosen to promote the building of a safer, stronger and more sustainable business. The Committee selects the measures each year after consultation with major shareholders.
- Clawback - An accountability review process is operated that allows the Committee to respond in instances where new information would change the variable pay decisions made in previous years and/or the decisions to be made in the current year. As a result, clawback can be applied to reduce or lapse any unvested awards as well as reducing any current year's variable pay. The Committee will also consider its approach to the operation of post vesting clawback in light of emerging market practice and regulatory requirements. Further details can be found on page 89.
- Remuneration for EDs broadly follows the policy for all employees but with greater emphasis on delivery in shares and a significant element of variable performance-related pay. This is to ensure that total remuneration to EDs is more aligned with the long-term interests of shareholders and dependent on specific performance measures being met. Further details on the remuneration policy for all employees can be found on page 88 and 89.

Changes for Executive Directors

- EDs will no longer be eligible to receive annual bonuses.
- The new structure outlined in the policy table introduces a fixed share allowance for EDs which will be released in equal tranches over a five year period. However, the Group Chief Executive will not receive a fixed share allowance for 2014.
- Future long-term incentive awards will be subject to an overall five year vest period, with a three year performance period and vesting in equal tranches in years four and five.
- The new structure results in a reduction of 16% of maximum remuneration opportunity, maintaining significant exposure to shares and clawback but with increased holding periods.
- The policy reflects our objective of moderating total remuneration while providing strong alignment with shareholders over the longer-term.

Directors' Remuneration Policy

Fees for non-executive directors

Element of pay	Purpose and link to strategy	Operation	Maximum potential value	Performance metrics and period
Fees	<p>To provide a competitive level of fixed remuneration that reflects the skills, experience and time commitment required for the role.</p> <p>No variable pay is provided so that non-executive directors can maintain appropriate independence, focus on long-term decision making and constructively challenge performance of the executive directors.</p>	<p>Fees are paid monthly.</p> <p>The level of remuneration for non-executive directors reflects their responsibility and time commitment and the level of fees paid to directors of comparable major UK companies. Non-executive directors do not participate in any incentive or performance plan. Non-executive directors' fees are reviewed regularly.</p>	<p>The rates for the year ahead are set out in the annual report on remuneration on page 82.</p> <p>Any future increases to fees will be considered against non-executive directors at comparable companies and will not normally be greater than the average inflation rate over the period under review, taking into account that any change in responsibilities, role or time commitment may merit a larger increase.</p> <p>Fees have not yet been set for the recently established RCR Board Oversight Committee. Our policy is that additional fees may be paid for new Board Committees provided these are not greater than fees payable for the existing Board Committees as detailed in the annual report on remuneration.</p>	N/A
Benefits	Any benefits offered would be in line with market practice.	Reimbursement of reasonable out-of-pocket expenses incurred in performance of duties. The Chairman also receives private medical cover in line with the scheme rules.	The value of the private medical cover provided to the Chairman will be in line with market rates and disclosed in the annual report on remuneration.	N/A

Directors' Remuneration Policy

Policy start date

The remuneration policy will be effective from the date of the 2014 AGM, subject to shareholder approval. It is intended that the policy will apply for three years unless changes are required in which case a revised policy will be submitted to shareholders for approval.

Recruitment remuneration policy

- The approach to recruitment of directors is to consider both internal and external candidates and to pay no more than is required to attract the most suitable candidate for the role.
- The policy on the recruitment of new directors aims to structure pay in line with the framework and quantum applicable to current directors, competitive in a market context and including the components detailed in the policy table, taking into account that some variation may be necessary to secure the preferred candidate.
- Consideration will be given to the skills and experience held by the individual being recruited as well as the incumbent's position. The present circumstances of the company will also be taken into account.
- In the event of an internal promotion, existing contractual commitments can continue to be honoured.
- Any awards granted on recruitment may be made as part of the company's share plans from time to time or under the provisions provided by Section 9.4.2 of the Listing Rules and will need to comply with the requirements of the PRA Remuneration Code. No sign-on awards or payments will be offered over and above the normal buy-out policy to replace awards forfeited or payments foregone. The Committee will seek to minimise buy-outs wherever possible and will seek to ensure they are no more generous than, and on substantially similar terms to, the original awards or payments they are replacing.
- The maximum level of variable pay which may be granted to new executive directors is the same as that applicable to existing executive directors, excluding any buy-out arrangements. Non-executive directors do not receive variable pay. Full details will be disclosed in the next remuneration report following recruitment.

Discretion

The Committee has certain discretions that allow it, in appropriate circumstances, to vary the remuneration provided to directors. For example, under the LTIP rules and also the proposed RBS 2014 Employee Share Plan, the Committee can determine: whether a leaver would fall into circumstances that would allow awards to vest following leaving; to decide to vest earlier than the normal vesting date; and to vary the pro-rating for time elapsed that would normally apply. Such discretions would only be used in exceptional circumstances to ensure a fair outcome for the director and for shareholders, taking into account the circumstances of departure, the performance of the director and the need to ensure an orderly transition. If discretion is applied in these circumstances then it will be disclosed.

Further discretions include the ability to: treat awards in a range of ways in the event of a change of control; change measures, targets, and adjust awards if major events occur (for example transaction and capital raisings); and make administrative changes to the plan rules.

In addition, the Committee retains discretion to apply clawback to awards and also adjust the vesting outcome in relation to certain long-term incentive awards through the application of a risk underpin. This allows the Committee to reduce or lapse awards if it considers that the vesting outcome does not reflect underlying financial results or if it considers that the results have been achieved with excessive risk.

Consideration of employment conditions elsewhere in the company

The Committee retains oversight of remuneration policy for all employees to ensure there is a fair and consistent approach throughout the organisation. This includes the use of deferral and clawback to promote effective risk management and alignment with shareholders. Further details on our remuneration policy for all employees are set out on pages 88 and 89.

While employees are not directly consulted on setting directors' remuneration, consultation on remuneration generally takes place with our social partners, including representatives from UNITE. We continue to pay our permanent employees in the UK at or above the "Living Wage" benchmarks (National and London), and intend to apply for full accreditation. An annual employee opinion survey takes place which includes a number of questions on pay and culture. This includes questions as to whether employees believe they are paid fairly for the work they do, how remuneration at RBS compares to other financial services organisations and how good a job the organisation is doing in matching reward to performance.

Around 34,000 of our employees are shareholders through incentive and all-employee share plans and have the ability to express their views through voting on the Directors' Remuneration Report.

Directors' Remuneration Policy

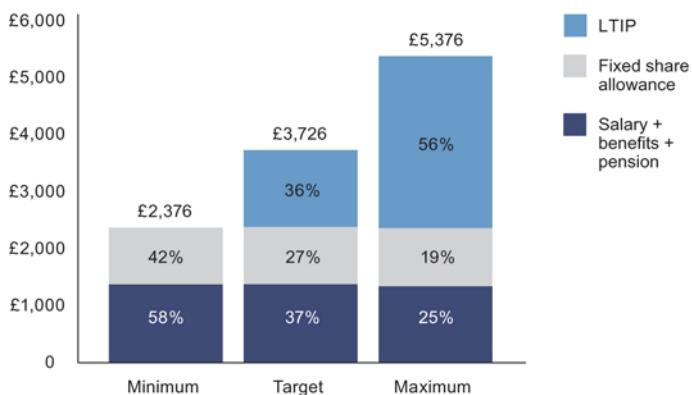

Service contracts and policy on payments for loss of office – directors		
Provision	Policy	Details
Payments for loss of office	Payment in lieu of notice only	<p>If either party wishes to terminate an executive director's service contract they are required to give 12 months' notice to the other party.</p> <p>The service contracts do not contain any pre-determined provisions for compensation on termination. The service contracts give RBS the discretion to make a payment in lieu of notice, which is on base salary only (with no payment in respect of any other benefits, including pension) and is released in monthly instalments. During the period when instalments are being paid, the executive director must take all reasonable steps to find alternative work and any remaining instalments will be reduced as appropriate to offset income from any such work.</p>
Treatment of annual and long-term incentives on termination	Treatment in line with the relevant plan rules as approved by shareholders	<p>Existing annual incentive awards under the Deferral Plan will not normally lapse on termination, unless termination is for Cause (as defined in the rules of the Deferral Plan). The awards will normally continue to vest on the original vesting dates, subject to provisions regarding clawback, competitive activity and detrimental activity.</p> <p>Existing long-term incentive awards normally lapse on leaving unless the termination is for one of a limited number of specified 'good leaver' reasons or the Committee exercises its discretion to prevent lapsing. The Committee may exercise this discretion where it believes this is an appropriate outcome in light of the contribution of the participant and shareholders' interests. Where awards do not lapse on termination, any vesting will normally take place on the original vesting dates, subject to the performance conditions being met and pro-rating to reflect the proportion of the period that has elapsed at the date of termination. Clawback provisions will also apply. These provisions will also apply to variable remuneration delivered under the RBS 2014 Employee Share Plan, subject to shareholder approval at the 2014 AGM.</p>
Fixed share allowances	Treatment in line with the plan rules as approved by shareholders	Any shares already received under fixed share allowances will not be forfeited on termination but must continue to be held for the original retention periods. In leaver circumstances executive directors will also be eligible to receive a pro-rated fixed share allowance.
Other provisions	Standard contractual terms in line with market practice	Contracts include standard clauses covering remuneration arrangements and discretionary incentive plans (as set out in the main policy table above), reimbursement of reasonable out-of-pocket expenses incurred in performance of duties, redundancy terms and sickness absence, the performance review process, the disciplinary procedure and terms for dismissal in the event of personal underperformance or breaches of RBS policies.
Other payments	Discretionary	The Committee retains the discretion to make payments (including but not limited to professional and outplacement fees) to mitigate against legal claims, subject to any payments being made pursuant to a settlement or release agreement.
Provisions for non-executive directors (NEDs) and the Group Chairman	<p>NEDs do not have service contracts or notice periods although they have letters of engagement reflecting their responsibilities and time commitments. No compensation would be paid to any NED in the event of termination of appointment.</p> <p>Arrangements for the Chairman</p> <p>Philip Hampton is entitled to receive a cash payment in lieu of notice of 12 months' fees in the event that his appointment is terminated as a result of the majority shareholder seeking to effect the termination of his appointment, or if RBS terminates his appointment without good reason, or if his re-election is not approved by shareholders in General Meeting resulting in the termination of his appointment.</p>	

In accordance with the provisions of the UK Corporate Governance Code, all directors of the company stand for annual election or re-election by shareholders at the company's Annual General Meetings.

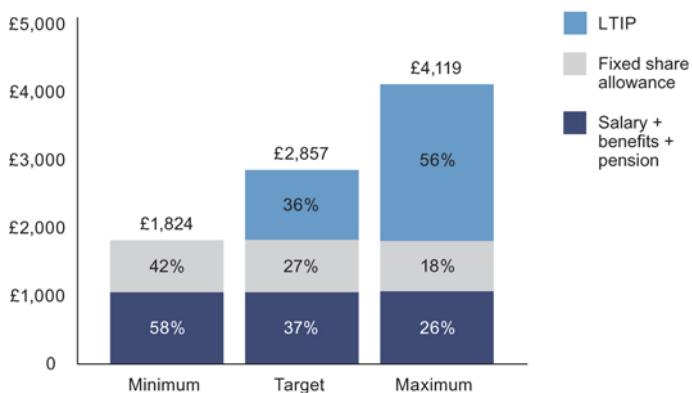

Directors' Remuneration Policy

Illustration of the potential application of the remuneration policy

Group Chief Executive - Remuneration Opportunity £'000s

Group Finance Director - Remuneration Opportunity £'000s

- Salary + Benefits + Pensions delivered in cash. The benefits include standard benefit funding as outlined in the policy but exclude exceptional items such as relocation allowances, the value of which will be disclosed in the total remuneration table each year.
- Fixed share allowance = an allowance of 100% of salary, paid in shares and released in equal tranches over a five year period.
- Target = Fixed remuneration and assuming payout of long-term incentive vesting at 45% of maximum (135% of salary).
- Maximum = Fixed remuneration and assuming full payout of long-term incentive vesting at 300% of salary.
- The graphs above illustrate the application of policy to executive directors for the first full year as the Group Chief Executive will not receive a fixed share allowance in 2014.

The charts shown above are for illustration only and do not take into account any share price movement. Any value receivable in respect of long-term incentive awards will depend on performance over the period and the share price when the holding period comes to an end.

Shareholders views and their impact on remuneration policy

An extensive consultation is undertaken every year with major shareholders including UKFI and other stakeholders on our remuneration approach. The consultation process typically involves inviting our largest shareholders to attend either one-to-one meetings or roundtable sessions with relevant shareholder bodies. A range of topics are discussed including intended remuneration policy for the year ahead and any significant changes. The process takes place in sufficient time for shareholder views to be considered prior to the Committee making any final decisions on remuneration and variable pay awards. Details of shareholder voting on the resolution to approve the last remuneration report can be found in the annual report on remuneration.

In late 2013 and early 2014, meetings took place involving around 20 institutional shareholders and shareholder bodies representing a substantial portion of the non-UKFI shareholding. The topics discussed during the latest consultation included financial performance, determination of pay outcomes for the 2013 performance year, the Board changes, the impact of CRD IV and possible pay arrangements going forward. Shareholders asked wide-ranging questions including the ability to remain market competitive, the accountability review process, retaining and motivating employees through periods of change and the use of performance measures for long-term incentive awards.

The reaction to the consultation process was positive and allowed the Committee to gain valuable insight into areas that shareholders were likely to support and those areas of concern. There was general support for the possible use of role-based allowances for the small number of employees impacted by the cap imposed under CRD IV. Payment of any allowances in arrears, with delivery in shares for more senior roles and with deferral, were viewed as positive features. Many shareholders also welcomed the discontinuation of annual bonus arrangements for executive directors but stressed the need to ensure sufficient variable pay was available for performance adjustment and clawback. The move to a five year overall timeframe for future long-term incentive awards was also viewed favourably. Overall, there was continuing support for simple and transparent pay structures.

A number of shareholders cautioned that legal advice should be obtained to confirm that the proposed pay arrangements complied with the requirements of CRD IV. The Committee responded to these concerns by obtaining independent legal advice. Another theme from shareholders was that there should be a demonstrable reduction in remuneration to reflect the benefits of pay certainty for the participants.

Some shareholders asked for the level of reduction in total compensation opportunity and rationale to be clearly explained. As set out in this report, annual bonus awards have been discontinued for executive directors. A fixed share allowance will be introduced that will deliver up to 100% of salary in shares to be released in equal tranches over a five year period. The new structure results in a reduction of 16% of maximum remuneration opportunity and still maintains alignment in shares and with longer holding periods.

Shareholders continue to play a vital role in developing remuneration practices that support the long-term interests of the business and the Committee is grateful and greatly encouraged by their involvement in the process.

Total remuneration	1,235	1,646	992	2,300	378	—	—	265	—	—

Notes:

- (1) Stephen Hester stepped down from the Board on 30 September 2013 and did not receive any annual bonus entitlement for the 2013 performance year. See page 79 for details of termination arrangements and payment in lieu of notice.
- (2) Bruce Van Saun stepped down from the Board on 30 September 2013 to become CEO and Chairman of RBS Citizens Financial Group and Head of RBS Americas. Mr Van Saun also stepped down as a non-executive director of Direct Line Insurance Group plc and Worldpay (Ship Midco Limited), for which he did not receive any fees. He is a non-executive director of Lloyd's of London Franchise Board for which he received fees of £51,750 for the period to 30 September 2013. The amounts included in the table in respect of Mr Van Saun's pension relates to contributions that would have been made to his Unfunded Unapproved Retirement Benefit Scheme ("UURBS") (if it had been funded) comprising a pension allowance of 35% of salary, together with additional amounts through a salary sacrifice arrangement plus an investment return at a rate of 4.7% for 2013 (6.2% for 2012).
- (3) Ross McEwan and Nathan Bostock were appointed to the Board on 1 October 2013 and the table reflects their pay for the period as Group Chief Executive and Group Finance Director respectively since appointment.
- (4) Benefits figure includes standard benefit funding of £26,250 per annum with the remainder being relocation expenses provided to Bruce Van Saun (housing allowance) and Ross McEwan (housing and flight allowances).
- (5) The zero value reflects awards granted to executive directors under the Long-term Incentive Plan in 2010 that did not vest in May 2013. See page 78 for details of subsequent LTIP assessments.

Chairman and non-executive directors' remuneration (£000s) (audited)

Remuneration of non-executive directors, excluding the Chairman, was reviewed in 2013. Basic board fees were last increased in 2008 and Committee fees were last increased in 2010. It was recognised that time commitment at RBS had increased significantly over the period. This increased time commitment was due to a number of factors including an intense regulatory agenda, the extended remit of Board Committees, wider engagement with the business and the executive team and efforts to drive cultural change. Consideration was also given to evidence of market increases in Board fees over the period. For the current non-executive directors, the Board, excluding non-executive directors, approved a revised fee structure applicable from 1 April 2013 as set out on page 82.

	Board and Committee fees	Benefits and other fees	2013 Total	2012 Total
Philip Hampton (1)	750	1	751	750
Sandy Crombie	186	—	186	150
Alison Davis	132	—	132	114
Tony Di Iorio (2)	136	—	136	128
Robert Gillespie (3)	7	—	7	n/a
Penny Hughes	154	—	154	150
Brendan Nelson	164	—	164	150
Baroness Noakes	136	—	136	124
Philip Scott	164	—	164	150
Former non-executive directors				
Joe MacHale (4)	49	—	49	133
Art Ryan (5)	80	—	80	93

Notes

- (1) Philip Hampton is entitled to private medical cover and the value is shown in the benefits column.
- (2) Tony Di Iorio became a non-executive director of RBS Citizens Financial Group, Inc on 15 January 2014, the fees for which will be reported in future years.
- (3) Robert Gillespie was appointed to the Board with effect from 2 December 2013.
- (4) Joe MacHale retired from the Board with effect from 14 May 2013. Board Committee fee included membership of the Asset Protection Scheme Senior Oversight Committee.
- (5) Art Ryan is a non-executive director of RBS Citizens Financial Group, Inc. for which he received fees of US\$131,000 for the period to 30 September 2013, the date he retired from the Group Board.

There have been no payments made to non-executive directors for loss of office.

Annual report on remuneration

Total Pension Entitlements – Bruce Van Saun (audited)

Mr Van Saun's UURBS operates as a cash balance plan. The rate of return on the accrued fund is determined annually by the Committee to reflect a long-term low risk investment return on an unsecured basis. For 2013 this rate was 4.7%. His accrued entitlement at the year end is shown below. There is no provision for any additional benefit on early retirement.

	2013 £000s	2012 £000s
Balance at 1 January 2013	682	246
Aggregate contributions that would have been made if funded	306	408
Investment return	42	28
Total value of fund at 31 December 2013	1,030	682

Executive directors' annual bonus for 2013 (audited)

The normal maximum that could be paid to executive directors under the annual bonus arrangements for 2013 is 200% of salary. The table below sets out the outcome for the 2013 performance year.

Stephen Hester

As part of the exit arrangements detailed on page 79, no annual bonus award is payable to Stephen Hester for 2013.

Bruce Van Saun

As announced on 27 January 2014, no bonus award will be payable to executive directors or members of the 2013 Executive Committee in respect of 2013 performance.

Ross McEwan

Ross McEwan indicated he did not wish to be considered for an annual bonus in respect of his Group Chief Executive role in 2013 or 2014. As announced on 27 January 2014, no bonus award will be payable in respect of the UK Retail role that Mr McEwan undertook during 2013.

Nathan Bostock

Following announcement of his departure, no annual bonus is payable to Nathan Bostock.

Executive directors' LTIP awards granted in 2010 – final assessment of performance outcome (audited)

Performance measure	Performance requirements	Vesting outcome
Economic profit (50%)	Maximum vesting triggered by early delivery of Core business profitability, well ahead of the range implied by the published Strategic Plan targets and also in excess of the cost of capital.	The LTIP awarded in 2010 was due to vest in May 2013. The number of shares under award is set out in the table on page 80.
Relative TSR (25%)	20% vesting if TSR is at the median rising to 100% vesting if TSR is at the upper quartile of the companies in the comparator group.	Awards did not vest in May 2013 as a result of the threshold performance requirements not being met and the awards lapsed.
Absolute TSR (25%)	20% vesting if RBS share price reaches £5.75. 100% vesting if RBS share price reaches £7.75.	

Share plan interests awarded under the LTIP during 2013 (audited)

	Grant date	Face value of award (£000)	Number of shares awarded	% that would vest at threshold and maximum	Performance requirements
Stephen Hester	8 March 2013	3,600	1,164,295	Vesting between 0% - 100% with 20% - 25%	Conditional share awards subject to stretching performance conditions over a three year period ending on the third anniversary of the grant date, as detailed below.
Bruce Van Saun	8 March 2013	2,250	727,685	vesting at threshold	The LTIP award granted to Ross McEwan will be assessed based on 12 months against the targets applicable as CEO UK Retail and 24 months against the targets applicable as Group Chief Executive.
Ross McEwan	8 March 2013	2,153	696,152		
Nathan Bostock	8 March 2013	2,500	808,539		

Notes:

The number of shares awarded is based on a multiple of salary and the award price is calculated based on the average share price over five business days prior to the grant date of £3.092. In addition to performance conditions, all awards are subject to clawback provisions prior to vesting and a six month retention period post vesting in line with the PRA Remuneration Code. The treatment of outstanding LTIP awards held by Stephen Hester is detailed under the Payments for loss of office section. The LTIP award held by Nathan Bostock has been lapsed following notification that he will be leaving the Group.

Annual report on remuneration

Performance conditions for outstanding LTIP awards granted to executive directors in 2011, 2012 and 2013 – current assessment

Awards are due to vest in 2014 to 2016. An assessment of performance of each relevant element is provided by the control functions and PwC assesses relative TSR performance. The Committee determines overall vesting based on these assessments including consideration of the drivers of performance and the context against which it was delivered. The assessment is analytical and if any discretion is used in the final assessment, it will be explained. The table below represents an early indication of potential vesting outcomes only.

Performance measure	Weighting	Rationale	Vesting	2011 LTIP Current assessment of performance	2012 and 2013 LTIP Current assessment of performance
Core Bank economic profit	25%	Ensures that performance reflects risk adjusted enduring earnings.	Threshold: 25% vesting for meeting minimum economic profit targets. Maximum: 100% vesting for performance ahead of the Strategic Plan.	Continued difficult conditions mean that the economic profit target has not been met.	Excluding the impact of the 2013 RCR action performance is currently broadly in line with expectations. The Committee notes the impact of the RCR impairment and will determine at the point of vesting how this should be taken into account.
Relative TSR	25%	Ensure alignment with shareholders.	Threshold: 20% vesting if TSR is at median of the comparator group. Maximum: 100% vesting if TSR is at upper quartile of the comparator group. Pro rata vesting in between.	Based on share price performance up to 31 December 2013, the threshold target is unlikely to be met by the vesting date.	Based on share price performance up to 31 December 2013, the threshold targets have not yet been met.
Balance sheet and risk	25%	Ensure alignment with the advancement of the strategic position and capability of the organisation and the building of a sustainable business.	Vesting will be qualified by Committee discretion. Indicative vesting levels are: <ul style="list-style-type: none"> • Over half of objectives not met: 0%; • Half of objectives met: 25%; • Two-thirds of objectives met: 62.5%; and • Objectives met or exceeded in all material respects: 100%. 	All targets – including Non-Core run down, Core Tier 1 capital, wholesale funding, liquidity, leverage ratio, loan to deposit ratio and funded assets - have been met or exceeded. Credit rating condition was not met, but given over-achievement on other measures, the Committee determined that the Balance Sheet and Risk element would vest in full.	Majority of Balance Sheet and Risk measures are currently on track or ahead of target.
Strategic Scorecard	25%			For the Strategic Scorecard, the cost:income ratio target has been missed driven by income shortfall. Overall the Committee determined that fewer than half of the objectives have been met and also took into account the extent of the shortfall on cost:income ratio and determined that this element should not vest.	Cost:income ratio remains challenging to achieve largely due to market-driven income pressures. Positive performance to date on some of the other Strategic Scorecard measures would result in some level of vesting for this element if continued over the performance period.

In respect of the 2011 LTIP award which is due to vest on 7 March 2014, the latest performance assessment by the Committee indicates a vesting level for executive directors of 27% of the original number of shares under award. The Committee also received advice that BRC and the Group's risk management function is satisfied that risk performance of the Group has adversely impacted the Economic Profit and TSR outcomes and consequently no further adjustment is required to the proposed vesting level.

Annual report on remuneration

Payments to past directors (audited)

No payments were made to former directors during the year ended 31 December 2013.

Payments for loss of office (audited)

Stephen Hester

Stephen Hester stepped down from the Board on 30 September 2013 and, in line with his contractual arrangements, he received the following payments in lieu of 12 months' notice.

Salary	£1,200,000
Benefits	£26,244
Pension	£420,000
Total	£1,646,244

Stephen Hester also received payment in lieu of five days accrued holiday, a nominal amount (£100) in respect of an undertaking to provide ongoing assistance to RBS with any investigations or claims and a commitment to pay directly to his lawyers legal fees of £23,000 + VAT incurred in connection with his departure. He did not receive any annual bonus award for 2013.

The Committee exercised discretion under the LTIP rules to allow unvested awards to continue subject to time pro-rating and performance assessment. The Committee believed this was an appropriate use of discretion in the circumstances recognising the significant contribution made by Stephen Hester over the period and his willingness to assist in an orderly handover period. The performance conditions will be assessed by the Committee at the end of the relevant performance periods in line with the LTIP rules. Stephen Hester and the Committee agreed that the maximum number of shares available for vesting under outstanding LTIP awards would be capped at 65% after the application of time pro-rating. The maximum number of shares available for vesting is therefore as follows:

Unvested LTIP shares at departure	3,461,886
Shares remaining after time pro-rating	2,064,638
Max number of time pro-rated shares capped at 65% (1)	1,342,014

Note:

(1) The actual number of shares will depend on performance assessment and may be less.

Bruce Van Saun

Bruce Van Saun stepped down from the Board on 30 September 2013 and became CEO and Chairman of RBS Citizens Financial Group and Head of RBS Americas. He continues to be employed within RBS and therefore no termination payment was made in connection with this change of role.

Directors' interests in shares and shareholding requirements (audited)

The target shareholding level for the Group Chief Executive is 250% of salary and 125% of salary for other executive directors and members of the Executive Committee, in each case excluding any unvested share awards in the calculation. A period of five years is allowed in which to build up shareholdings to meet the required levels.

	Shares beneficially owned	As at 31 December 2013 (or date of cessation if earlier)			
		Value(1) (£)	% of shareholding requirement met	Unvested LTIP awards (subject to performance conditions)	Unvested Deferral Plan awards
Stephen Hester	761,218	2,740,385	91%	2,064,638	—
Bruce Van Saun	148,421	501,663	49%	2,163,680	466,947
Ross McEwan	516,336	1,745,216	70%	1,259,081	56,395
Nathan Bostock	375,969	1,270,775	133%	2,151,234	289,536
Philip Hampton	27,630		n/a		
Sandy Crombie	20,000		n/a		
Alison Davis	20,000		n/a		
Tony Di Iorio (2)	30,000		n/a		
Robert Gillespie	nil		n/a		
Penny Hughes	562		n/a		
Joe MacHale	28,431		n/a		
Brendan Nelson	12,001		n/a		
Baroness Noakes	21,000		n/a		
Art Ryan	5,000		n/a		
Philip Scott	50,000		n/a		

Notes:

(1) Value is based on the share price at 31 December 2013, which was £3.38 other than for Stephen Hester where the value is based on the share price of £3.60 at 30 September 2013, the date he stepped down from the Board. During the year ended 31 December 2013, the share price ranged from £2.66 to £3.85.

(2) Tony Di Iorio's interests in the company's shares are held in the form of American Depository Receipts (ADRs). Each ADR represents 2 ordinary shares of £1.00 each in the company. Tony Di Iorio has interests in 15,000 ADRs representing 30,000 ordinary shares.

In line with the requirements of the PRA Remuneration Code and the RBS Staff Dealing Rules, executive directors must not engage in any personal hedging strategies to lessen the impact of a reduction in value of unvested share awards, for example if the RBS share price goes down. No other current director had an interest in the company's ordinary shares during the year or held a non-beneficial interest in the shares of the company at 31 December 2013, at 1 January 2013 or date of appointment if later. The interests shown above include connected persons of the directors. As at 26 February 2014, there were no changes to the directors' interests in shares shown in the table above.

	135,834		3.09				135,834	08.03.14 - 08.03.16
		289,536					289,536	

Notes:

- (1) Stephen Hester and the Committee agreed that the maximum number of shares available for vesting would be capped at 65% (a total of 1,342,014 shares). The actual number of shares will depend on the performance assessment and may be less.
- (2) Stephen Hester and Bruce Van Saun stepped down from the Board on 30 September 2013.
- (3) Ross McEwan and Nathan Bostock were appointed to the Board on 1 October 2013.
- (4) This relates to an award made to Ross McEwan on joining RBS as CEO UK Retail in September 2012, in recognition of awards forfeited on leaving Commonwealth Bank of Australia.
- (5) In accordance with the plan rules, Nathan Bostock's outstanding LTIP, Deferred awards and MPP award have subsequently been lapsed and the Executive Share Option will lapse on his final date of employment.
- (6) This relates to a bonus award in respect of the 2012 performance year, awarded in March 2013.

Total Shareholder Return (TSR) performance

The graph below shows the performance of RBS over the past five years in terms of TSR compared with that of the companies comprising the FTSE 100 Index. This index has been selected because it represents a cross-section of leading UK companies. The TSR for FTSE UK banks for the same period has been added for comparison. The TSR for the company and the indices have been rebased to 100 at 1 January 2009. Source: Datastream

Historic Group Chief Executive pay over same period

	2009	2010	2011	2012	2013(1)
Group Chief Executive single figure of total remuneration (£000s)	1,647	3,687	1,646	1,646	1,235 (SH) 378 (RM)
Annual variable award against max opportunity	0%	85%	0%	0%	0% (SH) 0% (RM)
LTIP vesting rates against max opportunity	0%	0%	0%	0%	0% (SH) 0% (RM)

Note:

(1) Stephen Hester (SH) stepped down from the Board on 30 September 2013 and Ross McEwan (RM) became Group Chief Executive with effect from 1 October 2013.

Change in Group Chief Executive pay compared to employees

The table below shows the percentage change in remuneration for the Group Chief Executive between 2013 and 2012 compared with the percentage change in the average remuneration of RBS employees on a global basis. In each case, remuneration is based on salary, benefits and annual bonus. The Group Chief Executive remuneration reflects the change in remuneration arrangements for the new Group Chief Executive with effect from 1 October 2013 compared to the previous Group Chief Executive.

	Salary 2013 to 2012 change	Benefits 2013 to 2012 change	Annual Bonus 2013 to 2012 change
Group Chief Executive	(16.7%)	—	—
All employees	2.1%	2.1%	(16.6%)

Note:

(1) No bonus was paid to the Group Chief Executive in respect of 2012 or 2013 performance. Standard benefit funding for executive directors remained unchanged between 2012 and 2013. The benefits for the Group Chief Executive excludes the relocation expenses provided to Ross McEwan as part of his recruitment as CEO UK Retail in 2012 and which will last for a set three year period other than an entitlement to two return business class flights which applies from year three onwards. The value of relocation benefits will be disclosed each year in the total remuneration table.

Annual report on remuneration

Relative importance of spend on pay

The table below shows a comparison of remuneration expenditure against other disbursements.

	2013 £m	2012 £m	change
Remuneration paid to all employees (1)	6,371	7,231	(12%)
Distributions to holders of ordinary shares	—	—	—
Distributions to holders of preference shares	398	301	32%
Taxation and other charges recognised in the income statement:			
- Social security and other payments (2)	486	562	(14%)
- Bank levy	200	175	14%
- Corporation tax	382	441	(13%)
Other payments made by the Group			
- Irrecoverable VAT and other indirect taxes suffered by the Group (3)	714	830	(14%)

These measures have been included as they reflect the key stakeholders for the Group and the major categories of disbursements made by the Group to its key stakeholders, including its ordinary and preference shareholders and Governments in the Group's operational territories.

The amounts included above have been calculated in accordance with applicable accounting standards and reflect the amounts included in the Group Income statement and related Notes.

Notes:
(1) Remuneration paid to all employees represents total staff expenses per Note 3 to the Financial statements, exclusive of social security and other staff costs.
(2) Income statement charge for social security costs per Note 3 to the Financial Statements.
(3) Input VAT and other indirect taxes unable to be recovered by the Group due to it being partially exempt.

Implementation of remuneration policy in 2014

The information below sets out how RBS intends to implement the policy in 2014.

Executive directors

	Salary	Benefits	Pension	Fixed Share Allowance (1)	LTIP award
Group Chief Executive	£1,000,000	£26,250 + relocation benefits (3)	35% of salary	No award in 2014	300% of salary
Group Finance Director (2)	£765,000	£26,250	35% of salary	100% of salary	300% of salary

Notes:

(1) Fixed Share Allowance will be payable in arrears and the shares will be released in equal tranches over a five year period.
(2) The search for a new Group Finance Director is underway and the remuneration package will be consistent with the recruitment policy as set out on page 73.
(3) Relocation benefits include housing and flight allowances, the value of which will be disclosed each year in the total remuneration table.

Chairman and non-executive directors' fees

Chairman	£750,000
Non-executive Director Group Board	£72,500
Senior Independent Director	£30,000
Membership of Group Audit Committee, Board Risk Committee, Group Performance and Remuneration Committee or Group Sustainability Committee	£30,000
Additional fee to Chair the Group Audit Committee, Board Risk Committee, Group Performance and Remuneration Committee or Group Sustainability Committee	£30,000
Membership of Group Nominations Committee	£5,500

The non-executive directors do not receive any annual bonus payments or variable remuneration.

Annual report on remuneration

2014 Annual objectives for the Group Chief Executive and Group Finance Director

The executive directors' annual objectives, as set out below, are approved by the Committee and reflect the Group's key strategic priorities. The Board Risk Committee has approved the risk and control issues. Note that, as described in the Remuneration Policy section of the report, no annual bonus awards will be payable to executive directors. Nevertheless, the Committee believes that annual objectives are an important part of driving the business strategy and meeting agreed targets.

Core objectives	Summary of objectives and targets (1)
Customer & Stakeholder (25%)	<ul style="list-style-type: none">● Customer Strategy and Experience - clearly articulate customer strategy; effective customer experience framework and measurement approach.● Customer Relationships - develop stronger and deeper customer relationships.● Corporate reputation - enhance and support the company's reputation with all stakeholders.
Financial & Business Delivery (25%)	<ul style="list-style-type: none">● Common Equity Tier 1 Ratio - deliver fully loaded Common Equity Tier 1 ratio in line with strategic targets, including successful execution of RCR reduction.● Return on Equity (2) - improve return on equity in line with strategic targets.● Cost:Income Ratio (2) - reduce cost:income ratio in line with strategic targets.
People & Culture (25%)	<ul style="list-style-type: none">● Operating Model - deliver first phase of efficient and effective bank-wide operating model.● Values & Engagement - embed and role model the Group's values, setting the tone from the top, and building the pride and engagement of our people.● Diversity - promote gender diversity in senior talent pools.
Risk & Control (25%)	<ul style="list-style-type: none">● Risk Appetite - further progress on embedding enhanced risk appetite and risk frameworks.● Governance & Control - maintain an effective governance and control environment and deliver key systems and processes.● Conduct - embed the agreed conduct risk framework across the business.● End to End Risk Management Framework - maintain an effective risk management framework across the business.

Notes:

(1) Details of targets that are deemed to be commercially sensitive will be disclosed retrospectively.

(2) Excluding RBS Capital Resolution.

Annual report on remuneration

LTIP awards granted in 2014 – Performance criteria

In line with previous practice, awards granted to executive directors in March 2014 will be subject to four equally weighted performance categories, each of which can vest up to 100% of base salary subject to an overall cap of 300% of salary. The performance targets have been reviewed by the Committee and reflect the outcome of the Group's strategic review. In future years, long-term incentive awards will be made under the RBS 2014 Employee Share Plan on the basis of equally stretching measures following consultation with major shareholders and disclosed in the annual report on remuneration. A minimum three year performance period will apply. Any awards that vest will be subject to a minimum six month retention period in line with the PRA Remuneration Code.

Economic profit (25%)

The Economic Profit measure will be based on the 'go-forward' RBS business to align with the long-term future and earnings for the business. Economic Profit, being a risk-adjusted financial measure, is consistent with the PRA Code and also provides a balance between measuring growth and the cost of capital employed in delivering that growth. Economic Profit is defined as Operating Profit after Tax and preference share charges less attributed equity multiplied by the cost of equity, where

- Operating Profit after Tax is Operating Profit taxed at a standard tax rate.
- Attributed Equity is defined as equity allocated to the businesses, calculated as a function of the businesses risk-weighted asset base.
- Current Cost of Equity is 11.0%, which is subject to review at least annually.

Details of the actual targets, and performance against these, will be disclosed retrospectively once the awards vest.

Relative Total Shareholder Return (25%)

The relative TSR measure provides a direct connection between executive directors' awards and relative performance delivered to shareholders. The measure compares performance against a group of comparator banks. The comparator group has been changed for the 2014 awards to be more in line with the new strategic direction of RBS. This has involved removing from the comparator group non-European firms, which in particular reduces the exposure of the peer group to US and Markets activity.

Relative TSR Comparator Group

		Weighting
1	Barclays	200%
2	Lloyds Banking Group	
3	HSBC	100%
4	Standard Chartered	
	BBVA, BNP Paribas, Credit Agricole, Credit Suisse	
5 to 13	Group, Deutsche Bank, Santander, Societe Generale, UBS, Unicredito	50%

- 20% of the award will vest if TSR is at the median of the companies in the comparator group
- 100% of the award will vest if TSR is at the upper quartile of the companies in the comparator group

Safe & Secure Bank (25%)

The Safe & Secure Bank measures have a particular focus on risk reduction and the building of a safer, sustainable franchise. The key measures in this category are Core Tier 1 ratio and Cost Income ratio.

Customers & People (25%)

These measures reward management for building a customer-focussed franchise with strength in terms of efficiency, reputation and the engagement of employees. Net Promoter Score will be used as the primary bank-wide measure for the improvement in customer service, measured versus each segment's defined peer group. Employee engagement will be measured against the Global Financial Services norm.

Performance measures and weightings

Safe & Secure Bank measures (25%)	Core Tier 1 ratio (12.5%)
	Cost:Income ratio (12.5%)
Customers & People measures (25%)	Net Promoter Score (12.5%)
	Employee Engagement Index (12.5%)

Commentary will be provided on an annual basis in relation to progress against the targets, where these are not commercially sensitive.

Target ranges will be set for each measure, and will determine vesting, although the overall vesting under the Safe & Secure Bank and Customers & People categories will be qualified by Group Performance and Remuneration Committee discretion taking into account changes in circumstances over the performance period, the margin by which individual targets have been missed or exceeded, and any other relevant factors.

Risk underpin and clawback

The Committee will also review financial and operational performance against the business strategy and risk performance prior to agreeing vesting of awards. In assessing this, the Committee will be advised independently by the Board Risk Committee. If the Committee considers that the vesting outcome calibrated in line with the performance conditions outlined above does not reflect underlying financial results or if the Committee is not satisfied that conduct and risk management during the performance period has been effective, then the terms of the awards allow for an underpin to be used to reduce vesting of an award, or to allow the award to lapse in its entirety. All awards are subject to clawback.

Annual report on remuneration

Consideration of matters relating to directors' remuneration

The role and responsibilities of the Committee

The Committee is responsible for setting the policy on remuneration and overseeing its implementation. It reviews performance and makes recommendations to the Board in respect of variable incentive pools and the remuneration arrangements of the executive directors. No director is involved in decisions regarding his or her own remuneration.

The Committee is also responsible for approving remuneration and severance arrangements for members of the Group's Executive and Management Committees and overseeing arrangements for PRA 'Code Staff'. Details of the PRA Remuneration Code can be found at www.bankofengland.co.uk/pras. A definition of RBS Code Staff along with details of how risk is taken into account in the remuneration process is provided on pages 88 and 89.

The terms of reference of the Group Performance and Remuneration Committee are available on www.rbs.com and these are reviewed at least annually by the Committee and approved by the Board.

Summary of the principal activity of the Committee during 2013

The Committee considered issues under the accountability review process at every meeting held in 2013 and CRD IV implementation at the majority of meetings held in 2013. Set out below is a summary of other key activities considered by the Committee.

First quarter

- 2012 performance reviews and arrangements for members of the Group's Executive and Management Committees, APS in scope employees, Code Staff and high earners. 2013 objectives for the Group's Executive and Management Committee members.
- Approval of Group and Divisional variable pay pools and Directors' Remuneration Report.
- Outcomes of the annual performance evaluation of the Committee.
- Assessment of the performance to date of unvested LTIP awards and performance targets for 2013 awards.
- Consideration of long-term incentive and deferral structure.

Second quarter

- Group Chief Executive departure terms and consideration of appointment and remuneration terms for various senior positions.
- Presentations from Markets, Corporate and Ulster Bank on business and strategic priorities and people plans.
- Review of the implementation of the remuneration policy.
- Review of the Committee's agenda planner, Terms of Reference and delegated authorities for individual remuneration governance.
- Terms of Reference for Group Sales and Service Incentives Committee – which considers short term incentive design principles.

Third quarter

- Half year performance reviews for members of the Group's Executive and Management Committees.
- Presentation from Retail on business and strategic priorities and people plans.
- Areas of focus for remuneration strategy.
- Purpose, Vision & Values and reward issues presentation.
- Consideration of the future shape of pay.

Fourth quarter

- 2013 preliminary variable pay pool discussions for Group and Divisions.
- Remuneration Policy Statement for the PRA.
- Update on Group Internal Audit's review of Code Staff processes.
- Share plan rules review update and AGM considerations.
- Update on shareholder consultation undertaken in December 2013 and planned for January 2014.

Performance evaluation process

A thorough internal review of the effectiveness of the Group Performance and Remuneration Committee was conducted during 2013 involving questionnaires and follow-up interviews. The Committee considered the outcomes of the evaluation and is satisfied with the way in which the evaluation has been conducted.

The review concluded that the Committee continued to operate effectively. Themes that emerged from the evaluation included recognition of the Committee workload and time spent outside of meetings, the ongoing importance of independence, management support and interaction with other Board Committees. Priorities that were identified for 2014 included recruiting an additional member of the Committee and considering how to streamline the agenda to maintain rigorous scrutiny and challenge on key issues. The outcomes of the evaluation have been reported to the Board.

Membership of the Group Performance and Remuneration Committee

All members of the Committee are independent non-executive directors. The Committee held nine scheduled meetings in 2013 and a further seven unscheduled meetings.

	Attended/ scheduled
Penny Hughes (Chair)	9/9
Sandy Crombie	9/9
Alison Davis	9/9
Art Ryan (1)	7/7

Note:

(1) Art Ryan stepped down from the Committee on 30 September 2013

Annual report on remuneration

Advisers to the Group Performance and Remuneration Committee

The advisers are appointed independently by the Committee, which reviews its selection of advisers annually. The Committee Chair oversees the fees for the advisers. PricewaterhouseCoopers LLP (PwC) were appointed as the Committee's remuneration advisers on 14 September 2010 following a review of potential advisers, and their appointment was reconfirmed by the Committee in July 2013 after an annual review of the quality of the advice received and fees charged. PwC are signatories to the voluntary code of conduct in relation to remuneration consulting in the UK.

PwC also provide professional services in the ordinary course of business including assurance, advisory, tax and legal advice to RBS subsidiaries. The Committee Chair is notified of other work that is being undertaken by PwC and is satisfied that there are processes in place to ensure that the advice the Committee receives is independent. As well as receiving advice from PwC in 2013, the Committee took account at meetings of the views of the Chairman, Group Chief Executive, Group Finance Director, Human Resources Director, Head of Reward, the Group Secretary and the Chief Risk Officer. The fees paid to PwC for advising the Committee in relation to directors' remuneration are charged on a time/cost basis and in 2013 amounted to £190,465.

Statement of Shareholding Voting

The table below sets out the voting by shareholders on the advisory resolution to approve the Directors' 2012 Remuneration Report at the AGM held in May 2013.

For	Against	Total votes cast	Withheld
20,058,440,088 (99.32%)	138,246,040 (0.68%)	20,196,686,128	148,371,848

Shareholder dilution

During the ten year period to 31 December 2013, awards made that could require new issue shares under the company's share plans represented 4.2% of the company's issued ordinary share capital (including the B share capital), leaving an available dilution headroom of 5.8%. The company meets its employee share plan obligations through a combination of new issue shares and market purchase shares.

Penny Hughes

Chair of the Group Performance and Remuneration Committee
26 February 2014

Other Remuneration Disclosures

Remuneration of eight highest paid senior executives below Board (1)

All figures shown below are in GBP.

(£000s)	Executive 1	Executive 2	Executive 3	Executive 4	Executive 5	Executive 6	Executive 7	Executive 8
Fixed remuneration	639	1,352	700	199	463	415	189	350
Annual incentives	—	—	—	—	—	—	—	—
Long-term incentive awards (vested value)	983	978	407	—	—	56	—	114
Total remuneration (2)	1,622	2,330	1,107	199	463	471	189	464

Notes

(1) Remuneration earned for period worked in 2013 at RBS for members of Group Executive Committee plus Group HR Director.

(2) Disclosure includes prior year long-term incentive awards which vested during 2013. The amounts shown reflect the value of vested awards using the share price on the day the awards vested.

Other Remuneration Disclosures

Our Group-wide Remuneration Policy

The remuneration policy supports the business strategy and is designed to:

- Attract, retain, motivate and reward high-calibre employees to deliver long-term business performance within acceptable risk parameters; and
- Provide clear alignment between annual and long-term targets for individuals and strategic plans

The remuneration policy applies the same principles to all employees including Code Staff (1). The current key principles underpinning the remuneration policy for all employees are set out below.

Element of pay	Objective	Operation
Base salary	To attract and retain employees by being competitive in the specific market in which the individual works.	Base salaries are reviewed annually and should reflect the talents, skills and competencies that the individual brings to the business.
Role-based allowance	To provide fixed pay that reflects the skills and experience required for, and the responsibilities of, the role.	From 2014 onwards, allowances will be provided to certain employees in key roles and reviewed at appropriate intervals, to reflect the skills, experience and competencies required for the role. They will be delivered in cash and/or shares depending on the level of the allowance and the seniority of the recipient. Shares will be subject to an appropriate retention period, not less than six months.
Benefits (including pension)	To provide a range of benefits and give employees an opportunity to provide for their retirement.	In most jurisdictions, employee benefits or a cash equivalent are provided from a flexible benefits account.
Annual incentives	To support a culture where employees recognise the importance of serving customers well and are rewarded for superior performance.	<p>The annual incentive pool is based on a balanced scorecard of measures including customer, financial, risk and people measures. Allocation from the pool depends on divisional, functional and individual performance. Individual performance assessment is supported by a structured performance management framework.</p> <p>Guaranteed awards are only used in very limited circumstances in accordance with the PRA Remuneration Code. Immediate cash awards are limited to a maximum of £2,000. Under the deferral arrangements a significant proportion of annual incentive awards for our more senior employees are deferred over a three year period. Deferred awards are subject to clawback. For Code Staff, a minimum 50% of any annual incentive is delivered in the form of RBS shares and subject to an additional six month retention period post vesting. Under the deferral arrangements for the 2013 performance year, the vast majority of any annual incentive award to Code Staff is delivered in shares.</p> <p>In certain circumstances, formulaic short-term incentive arrangements are used to align the objectives of employees with the strategy of the relevant division in which they work.</p>
Long-term incentive awards	To encourage the creation of value over the long term and to align further the rewards of the participants with the returns to shareholders.	<p>RBS provides certain employees in senior roles with long-term incentive awards. Awards are structured as performance-vesting shares. Vesting may occur after a three year period and will typically be based partly on divisional or functional performance and partly on performance across the business.</p> <p>The amount of the award that vests may vary between 0-100% depending on the performance achieved. All awards are subject to clawback and an additional six month retention period applies to Code Staff post vesting.</p>
Other share plans	To offer employees in certain jurisdictions the opportunity to acquire RBS shares.	Employees in certain countries are eligible to contribute to share plans which are not subject to performance conditions.

Note:

- (1) The following groups of employees have been identified as meeting the PRA's criteria for Code Staff:
- Members of the Board and Executive and Management Committees
 - Staff performing a Significant Influence Function within RBS
 - Employees who have approval authorities such that their decision-making could have a material impact on the income statement
 - Employees who are responsible for a business or businesses whose performance could have a material impact on the income statement; and
 - Key control function roles

The RBS Staff Dealing Rules and the conditions attaching to discretionary share-based awards prohibit the use of any personal hedging strategies to lessen the impact of a reduction in value of such awards.

Other Remuneration Disclosures

How risk is reflected in our remuneration process

The RBS remuneration policy explicitly aligns remuneration with effective risk management. Focus on risk is achieved through clear risk input into objectives, performance reviews, the determination of variable pools and incentive plan design as well as the application of clawback. The Committee is supported in this by the Group Audit Committee, the Board Risk Committee and the Group's risk management function.

A robust process is used to assess risk performance. A range of measures are considered, specifically the overall Risk Profile, Credit, Regulatory Risk & Conduct Risk, Operational Risk, Enterprise Risk and Market Risk. The steps we take to ensure appropriate and thorough risk adjustment are also fully disclosed and discussed with the PRA and the FCA.

Variable pay pool determination

The process for determining variable pools is discretionary, to avoid the unintended consequences of formulaic systems. However, the Committee's discretion is applied within a structured framework which starts with an assessment of risk adjusted financial performance measured against budget, prior year capital position and long-term strategic plans. This analysis is used to adjust for performance and then consider outcomes in the context of competitive variable pay funding levels.

Risk is taken into account in the performance assessment through a thorough risk analysis carried out by the Group's risk management function to a pre-agreed framework. Performance assessments may be adjusted in situations where risk performance is outside risk appetite or strategic plans. Financial and non-financial performance factors (including risk) are taken into account in developing a final variable pay proposal. This decision also allows for considerations of market competitiveness and franchise protection.

Variable pay proposals are reviewed in the context of key compensation framework ratios including total compensation to revenue, total compensation to pre-compensation profit, variable pay to pre-variable pay profit and variable pool to pre-variable pool economic profit. These ratios help to ensure appropriate sharing of value between employees and shareholders and aim to provide transparency.

Finally, variable pay proposals are reviewed against our capital adequacy framework to ensure that regulatory requirements are met.

Accountability review process

Our Accountability Review process is an important tool in how we manage remuneration and manage adjustments to remuneration.

A summary of the accountability review process is as follows:

- Exists to enable RBS to respond in instances where current and/or new information would change the annual bonus and/or LTIP decisions made in previous years, and/or the decisions to be made in the current year.
- The process for review assessments (which consider material risk management, control and general policy breach failures, accountability for those events and appropriate action against individuals) is operated across divisions and functions.
- Divisional reviews are undertaken on a quarterly basis.
- Decisions must take into account not only any financial losses, but also behavioural issues and reputational or internal costs.
- Clawback may be up to 100% of unvested awards and can be applied regardless of whether or not disciplinary action has been undertaken.
- A key principle is that clawback quantum should not be formulaic.
- Collective responsibility may be considered where a committee or group of employees are deemed to have not appropriately discharged their duties.

How have we applied this in practice?

Variable pay is subject to deferral allowing the Committee scope to apply clawback. The accountability review process is fully embedded and is operated throughout the year. During 2013 a number of issues and events were considered under the accountability review framework.

The outcomes for the 2013 performance year cover a range of actions and have included: forfeiture of unvested awards through clawback; reduction of current year variable pay awards; dismissal; and suspended vesting pending further investigation. The Board Risk Committee concluded that all known key material events had been considered.

The RBS 2014 Employee Share Plan, subject to approval at the 2014 AGM, will allow RBS to apply post-vesting clawback to future awards. The policy for any post-vesting clawback will be considered in light of emerging regulatory requirements and shareholder best practice.

Remuneration Code

As part of the annual remuneration governance process we provide details of our approach to pay and how we comply with the Remuneration Code to the PRA and FCA. As in previous years we have received the required regulatory confirmation in order to conclude our year end remuneration process.

Other Remuneration Disclosures

Code Staff Remuneration Disclosure

These disclosures are in accordance with the Prudential sourcebook for banks, building societies and investment firms (BIPRU) 11.5.18 (6) and (7).

1. Aggregate remuneration expenditure

During the year, there were 342 Code Staff. Aggregate remuneration expenditure was as follows:

Markets £m	Rest of RBS Group £m
78.5	135.0

2. Amounts and form of fixed and variable remuneration

Fixed remuneration

Consisted of salaries, pensions and benefits paid during the year.

Senior management £m	Others £m
56.9	42.9

Variable remuneration for 2013 performance

Consisted of deferred awards payable over a three year period. Cash awards were limited to a maximum of £2,000 per employee.

Form of remuneration	Senior management £m	Others £m
Variable remuneration (cash)	0.2	0.2
Deferred remuneration (bonds)	2.4	2.6
Deferred remuneration (shares)	31.1	51.7

Long-term incentives

Long-term incentive awards made each year are paid three years after the date of award based on the extent to which performance conditions are met and can result in zero payment.

Senior management £m	Others £m
18.5	6.9

3. Outstanding deferred remuneration through 2013

The table below includes deferred remuneration awarded or paid out in 2013. Deferred remuneration reduced during the year relates to long-term incentives lapsing when performance conditions are not met, long-term incentives and deferred awards forfeited on leaving and clawback of prior year deferred awards and long-term incentives.

Category of deferred remuneration	Senior management £m	Others £m
Unvested from prior year	110.0	131.7
Awarded during the financial year	47.9	57.6
Paid out	33.0	59.4
Reduced from prior years	16.8	28.6
Unvested at year end	107.8	98.2

4. Sign-on and severance payments

Sign-on awards for guaranteed variable remuneration of £2.6 million are included in the tables above. These relate to commitments on recruitment made in respect of three new employees. No severance payments were made outside of contractual payments related to termination of employment such as pay in lieu of notice and benefits.

Notes on the presentation of remuneration

In the relevant tables above, assumptions have been made for the notional value of LTIP (verified by external advisors), forfeitures through resignation for deferred awards and the share price relevant to the date of the event or valuation point has been used.

All staff total remuneration

Total remuneration comprises; fixed pay, pension and benefit funding, variable remuneration and long-term incentives.

- The average salary for all employees is £34,000.
- 21,609 employees earn total remuneration between £50,000 and £100,000.
- 9,151 employees earn total remuneration between £100,000 and £250,000.
- 1,730 employees earn total remuneration over £250,000.

Total remuneration by band for all employees earning >£1 million

	Number of employees
£1,000,000 - £1,500,000	46
£1,500,001 - £2,000,000	14
£2,000,001 - £2,500,000	4
£2,500,001 - £3,000,000	4
£3,000,001 - £3,500,000	—
£3,500,001 - £4,000,000	4
£4,000,001 - £4,500,000	1
£4,500,001 - £5,000,000	1
£5,000,001 - £5,500,000	—
£5,500,001 - £6,000,000	1

Notes:

(1) Total remuneration includes fixed pay, pension and benefit funding and variable pay (including actual value of LTIP vesting in respect of the performance period ending 2013) after the application of clawback.

(2) Excludes executive directors.

75 employees earn total remuneration of over £1 million which represent just 0.06% of our employees. This number reduces to 68 employees if we exclude pension and benefit funding.

These employees include those who manage major businesses and functions with responsibility for significant assets, earnings or areas of strategic activity and can be grouped as follows:

- The CEOs responsible for each division.
- Employees directly reporting to the CEO including those managing our functions and other activities of strategic importance.
- Employees managing large businesses within a division such as our Retail and Commercial Businesses in the US or our UK Corporate and Institutional Banking clients.
- Income generators responsible for high levels of income including those involved in managing trading activity and supporting clients with more complex financial transactions, including financial restructuring.
- Those responsible for managing our balance sheet and liquidity and funding positions across the business.
- Employees managing the successful disposal of Non-Core assets and reducing RBS's capital requirements.

Compliance report

Statement of compliance

The company is committed to high standards of corporate governance, business integrity and professionalism in all its activities.

Throughout the year ended 31 December 2013, the company has complied with all of the provisions of the UK Corporate Governance Code issued by the Financial Reporting Council dated September 2012 (the "Code") except in relation to provision (D.2.2) that the Group Performance and Remuneration Committee should have delegated responsibility for setting remuneration for the Chairman and executive directors. The company considers that this is a matter which should rightly be reserved for the Board and this is an approach the company has adopted for a number of years. Remuneration for the Chairman and executive directors is first considered by the Group Performance and Remuneration Committee which then makes recommendations to the Board for consideration. This approach allows all non-executive directors, and not just those who are members of the Group Performance and Remuneration Committee, to participate in decisions on the executive directors' and the Chairman's remuneration and also allows the executive directors to input to the decision on the Chairman's remuneration. The Board believes this approach is very much in line with the spirit of the Code and no director is involved in decisions regarding his or her own remuneration. We do not anticipate any changes to our approach on this aspect of the Code. Information on how the company has applied the main principles of the Code can be found in the Corporate governance report on pages 35 to 90. A copy of the Code can be found at www.frc.org.uk

The company has also implemented the recommendations arising from the Walker Review. The company has also complied in all material respects with the Financial Reporting Council Guidance on Audit Committees issued in September 2012.

Under the US Sarbanes-Oxley Act of 2002, specific standards of corporate governance and business and financial disclosures apply to companies with securities registered in the US. The company complies with all applicable sections of the US Sarbanes-Oxley Act of 2002.

Internal control

The Board of directors is responsible for the Group's system of internal control that is designed to facilitate effective and efficient operations and to ensure the quality of internal and external reporting and compliance with applicable laws and regulations. In devising internal controls, the Group has regard to the nature and extent of the risk, the likelihood of it crystallising and the cost of controls. A system of internal control is designed to manage, but not eliminate, the risk of failure to achieve business objectives and can only provide reasonable, and not absolute, assurance against the risk of material misstatement, fraud or losses.

The Board has established a process for the identification, evaluation and management of the significant risks faced by the Group, which operated throughout the year ended 31 December 2013 and to 26 February 2014, the date the directors approved the Report and Accounts. This is confirmed by a semi-annual Control Environment Certification process which requires senior members of the executive and management to assess the adequacy and effectiveness of their internal control framework and the compliance of their business with Group policies and associated standards (in accordance with the Group Policy Framework), and they meet the requirements of Sarbanes-Oxley Section 404 and the Code Section C2. The policies that govern these processes, and reports on internal controls arising from them, are regularly reviewed by the Board and meet the requirements of the guidance 'Internal Control: Revised Guidance for Directors on the Combined Code' issued by the Financial Reporting Council in October 2005. Enhancements have been made to the Risk Management framework throughout 2013 and further improvements will be made in 2014.

The effectiveness of the Group's internal controls is reviewed regularly by the Board, the Group Audit Committee and the Board Risk Committee. Group Internal Audit provides independent assurance to the Board and executive management on the quality and effectiveness of governance, risk management and internal controls to monitor, manage and mitigate risks in achieving the Group's objectives. Executive management committees or boards of directors in each of the Group's businesses also receive regular reports on significant risks facing their business and how they are being controlled. In addition, the Board receives monthly risk management reports. Details of the Group's approach to risk management are given on pages 29 and 30 of the Strategic Report. The Group Audit Committee has received confirmation that management has taken, or is taking, the necessary action to remedy any material failings or weaknesses identified through the operation of the Group framework of controls.

The Group's independent auditors present to the Group Audit Committee reports that include details of any significant internal control matters which they have identified. The system of internal controls of the authorised institutions and other regulated entities in the Group is also subject to regulatory oversight in the UK and overseas. Additional details of the Group's regulatory oversight are given in the Supervision section on page 520.

Compliance report

Internal control over financial reporting

The Group is required to comply with Section 404 of the US Sarbanes-Oxley Act of 2002 and assess the effectiveness of internal control over financial reporting as of 31 December 2013.

The Group assessed the effectiveness of its internal control over financial reporting as of 31 December 2013 based on the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in 'Internal Control - Integrated Framework'.

Based on its assessment, management has concluded that, as of 31 December 2013, the Group's internal control over financial reporting is effective.

The Group's auditors have audited the effectiveness of the Group's internal control over financial reporting and have given an unqualified opinion.

Management's report on the Group's internal control over financial reporting will be filed with the Securities and Exchange Commission at the same time as the Annual Report on Form 20-F.

Disclosure controls and procedures

As required by US regulations, management have conducted an evaluation of the effectiveness and design of the Group's disclosure controls and procedures (as defined in the Exchange Act rules) as at 31 December 2013. Based on this evaluation, management concluded that the Group's disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Changes in internal control

There was no change in the company's internal control over financial reporting that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

The New York Stock Exchange

As a foreign issuer with American Depository Shares representing ordinary shares, preference shares and debt securities listed on the New York Stock Exchange (the "NYSE"), the company is not required to comply with all the NYSE standards applicable to US domestic companies (the "NYSE Standards") provided that it follows home country practice in lieu of the NYSE Standards and discloses any significant ways in which its corporate governance practices differ from the NYSE Standards. As a foreign private issuer, the company must, however, comply fully with the provisions of the NYSE Standards that relate to the composition, responsibilities and operation of audit committees. These provisions incorporate the relevant rules concerning audit committees of the Exchange Act.

The company has reviewed its corporate governance arrangements and is satisfied that these are consistent with the NYSE Standards, with the exception that the Chairman of the Board is also the Chairman of the Group Nominations Committee, which is permitted under the Code (since the Chairman was considered independent on appointment). In addition, although the members of the Group Performance and Remuneration Committee are deemed independent in compliance with the provisions of the Code, the Group Board has not assessed the independence of the members of the Group Performance and Remuneration Committee and of its compensation committee advisers in accordance with the independence tests prescribed by the NYSE standards. The company's Group Audit, Board Risk, Group Sustainability and Group Nominations Committees are otherwise composed solely of non-executive directors deemed by the Group Board to be independent. In addition, the NYSE Standards require that a compensation committee has direct responsibility to review and approve the Group Chief Executive's remuneration. As stated at the start of this Compliance report, in the case of the company, the Group Board, rather than the Group Performance and Remuneration Committee, reserves the authority to make the final determination of the remuneration of the Group Chief Executive.

The Group Audit Committee complies with the provisions of the NYSE Standards that relate to the composition, responsibilities and operation of audit committees. In April 2013, the company submitted its required annual written affirmation to the NYSE confirming its full compliance with those and other applicable provisions. More detailed information about the Group Audit Committee and its work during 2013 is set out in the Group Audit Committee report on pages 52 to 57.

This Compliance report forms part of the Corporate governance report and the Report of the directors.

Report of the directors

The directors present their report together with the audited accounts for the year ended 31 December 2013.

Group structure

The company is a holding company owning the entire issued ordinary share capital of The Royal Bank of Scotland plc, the principal direct operating subsidiary undertaking of the company. The Group comprises the company and all its subsidiary and associates, including the Royal Bank and NatWest. Details of the principal subsidiary undertakings of the company are shown in Note 8 on page 505.

Following placing and open offers in December 2008 and in April 2009, HM Treasury (HMT) owned approximately 70.3% of the enlarged ordinary share capital of the company. In December 2009, the company issued a further £25.5 billion of new capital to HMT. This new capital took the form of B shares, which do not generally carry voting rights at general meetings of ordinary shareholders but are convertible into ordinary shares and qualify as Core Tier 1 capital. Following the issuance of the B shares, HMT's holding of ordinary shares of the company remained at 70.3%, although its economic interest rose to 84.4%.

At 31 December 2013, HMT's holding in the company's ordinary shares was 63.9% and its economic interest was 80.2%.

Results and dividends

The loss attributable to the ordinary and B shareholders of the company for the year ended 31 December 2013 amounted to £8,995 million compared with a loss of £6,055 million for the year ended 31 December 2012, as set out in the consolidated income statement on page 370.

The company did not pay a dividend on ordinary shares in 2012 or 2013.

On 26 November 2009, RBS entered into a State Aid Commitment Deed with HMT containing commitments and undertakings that were designed to ensure that HMT was able to comply with the commitments to be given by it to the European Commission for the purposes of obtaining approval for the State aid provided to RBS. As part of these commitments and undertakings, RBS agreed not to pay discretionary coupons and dividends on its existing hybrid capital instruments for a period of two years. This period commenced on 30 April 2010 for RBS Group instruments and ended on 30 April 2012; the two year deferral period for RBS Holdings N.V. instruments commenced on 1 April 2011 and ended on 1 April 2013.

The Group has now resumed payments on all discretionary non-equity capital instruments. Future coupons and dividends on hybrid capital instruments will only be paid subject to, and in accordance with, the terms of the relevant instruments.

In the context of prior macro-prudential policy discussions, the Board decided to partially neutralise any impact on Core Tier 1 capital of coupon and dividend payments in respect of 2013 Group hybrid capital instruments through equity issuances of c.£300 million. Consequently during the year, approximately £255 million was raised through the issue of new ordinary shares and a further £44 million was raised in connection with equity funding of employee incentive awards through the sale of surplus shares held by the Group's Employee Benefit Trust.

For 2014, the Board has decided to continue partially neutralising the Core Tier 1 impact of Group hybrid capital instruments. It is expected that £300 million of new equity will be issued during the course of 2014 to achieve this aim.

Business review

Activities

The Group is engaged principally in providing a wide range of banking and other financial services. Further details of the organisational structure and business overview of the Group, including the products and services provided by each of its divisions and the competitive markets in which they operate, are contained in the Business review on pages 104 to 106. Details of the strategy for delivering the company's objectives can be found in the Strategic report.

Risk factors

The Group's future performance and results could be materially different from expected results depending on the outcome of certain potential risks and uncertainties. Certain risk factors the Group faces are summarised in the Business review on pages 107 and 108. Fuller details of these and other risk factors are set out on pages 523 to 536.

The reported results of the Group are also sensitive to the accounting policies, assumptions and estimates that underlie the preparation of its financial statements. Details of the Group's critical accounting policies and key sources of accounting judgments are included in Accounting policies on pages 386 to 389.

The Group's approach to risk management, including its financial risk management objectives and policies and information on the Group's exposure to price, credit, liquidity and cash flow risk, is discussed in the Business review: risk and balance sheet management.

Financial performance

A review of the Group's performance during the year ended 31 December 2013, including details of each division, and the Group's financial position as at that date is contained in the Business review on pages 109 to 168.

RBS Holdings N.V. (formerly ABN AMRO Holding N.V.)

In 2007, RFS Holdings B.V., which was jointly owned by the Group, the Dutch State (successor to Fortis) and Santander (together, the "Consortium Members") completed the acquisition of ABN AMRO Holding N.V.

On 1 April 2010, the businesses acquired by the Dutch State were transferred to ABN AMRO Group N.V., itself owned by the Dutch State. In connection with the transfer ABN AMRO Holding N.V. was renamed RBS Holdings N.V. and its banking subsidiary was renamed The Royal Bank of Scotland N.V. ("RBS N.V.").

In October 2011, the Group completed the transfer of a substantial part of the UK activities of RBS N.V. to the Royal Bank. Substantially all of the Netherlands and EMEA businesses were transferred to the Royal Bank in September 2012. Russia, Korea and the North American businesses were transferred to the Royal Bank in 2013. Certain assets of RBS N.V. continue to be shared by the Consortium Members.

Report of the directors

Business divestments

To comply with the European Commission State Aid requirements the Group agreed a series of restructuring measures to be implemented over a four year period from December 2009. These include the divestment of Direct Line Insurance Group plc (DLG), the sale of 80.01% of the Group's Global Merchant Services business (completed in 2010) and the sale of substantially all of the RBS Sempra Commodities joint venture business (largely completed in 2010), as well as the divestment of the RBS branch-based business in England and Wales and the NatWest branches in Scotland, along with the direct SME customers across the UK ("UK branch-based businesses").

In October 2012, Santander UK plc withdrew from its agreed purchase of the UK branch-based businesses. In September 2013, the Group reached an agreement with an investor consortium led by Corsair Capital and Centerbridge Partners for an investment in these businesses ahead of a stock market flotation. This includes 308 RBS branches in England and Wales and 6 NatWest branches in Scotland. The new bank will be called Williams & Glyn, the brand RBS used for its branches in England and Wales before 1985.

The Group sold a first tranche of ordinary shares representing 34.7% of the ordinary issued share capital of Direct Line Group (DLG) in October 2012 through an initial public offering. On 13 March 2013, the Group sold a further 16.8% of the ordinary issued share capital in DLG and ceded control. This fulfilled the Group's plan to cede control of DLG by the end of 2013. On 20 September 2013, the Group sold a further 20% of the ordinary issued share capital in DLG.

On 26 February 2014 the Group announced that it had entered into a placing agreement to complete the sale of its remaining interest in DLG (except for 4.2 million shares held to satisfy long term incentive plan awards granted by the Group to DLG management). Accordingly, on settlement of the placing, the Group will have completed the disposal of DLG as required by the European Commission.

Strategic plan

Citizens Financial Group

In February 2013, the Group announced that it would commence work on a partial flotation of RBS Citizens Financial Group, Inc and in November 2013 confirmed that a partial initial public offering is now planned for 2014. The Group intends to fully divest the business by the end of 2016. The sale of RBS Citizens Financial Group, Inc is the cornerstone of the Group's new capital plan. The Group has appointed advisers and this is on schedule for later this year.

RBS Capital Resolution

In November 2013, the Group announced the creation of RBS Capital Resolution (RCR), to manage a pool of assets with particularly high long term capital intensity and/or potentially volatile outcomes in stressed environments. RCR became operational on 1 January 2014 with a portfolio of £29 billion assets. The RCR Board Oversight Committee has been established to provide oversight of RCR's progress against, and compliance with, its primary objective and asset management principles. It reports to the Board on its own activities and recommends changes, where appropriate, to RCR strategy.

Strategic review

In November 2013, the Group announced that it was undertaking a comprehensive business review of its customer-facing businesses, IT and operations and organisational and decision making structures. As described on pages 8 and 9, the Group has announced the results of its Strategic review, resulting in it being realigned into three businesses: Personal & Business Banking, Commercial & Private Banking, and Corporate & institutional Banking. In addition, the Group will be rationalising and simplifying its systems, based on a target architecture with improved resilience.

Employees

As at 31 December 2013, the Group employed 118,600 (full-time equivalent basis) throughout the world. Details of employee related costs are included in Note 3 on the consolidated accounts.

The Group operates certain employee share plans in which eligible employees are able to participate and which align the interests of employees with those of shareholders.

Employee learning and development

The Group maintains a strong commitment to providing all its employees with the opportunity to grow through learning and development, which in turn helps to achieve business objectives and drive excellent customer service. Supporting the professionalisation of our front line staff, just over 18,000 customer facing employees are now part of accreditation programmes aligned to the Chartered Banker professional standards. This helps our employees deliver the best service to our customers whilst working towards a recognised professional standard.

Employee communication

Employee engagement is encouraged through a range of communication channels, at both local and Group level. These channels provide access to news and information in a number of ways, including the intranet, magazines, video, team meetings led by line managers, briefings held by senior managers and regular dialogue with employees and employee representatives.

The Group Chief Executive and other senior Group executives regularly communicate with, and encourage feedback from, employees across a range of channels.

Employee feedback

Every year since 1999, through the Your Feedback survey, employees in all our businesses have shared their thoughts about what it's like working for RBS. In 2013, we renamed the survey Our View, reflecting the emphasis we place on a shared responsibility to build a better bank. The survey enables the business to monitor levels of employee satisfaction and engagement and how these compare with other companies. It also provides a further mechanism for RBS to track employee perception of the progress we are making in strengthening our culture. Insights from Our View inform what the business needs to do to improve the way it works, whether it's a local issue or something that affects everyone.

Report of the directors

Employee consultation

The Group recognises employee representatives such as trade unions and work councils in a number of businesses and countries.

The Group has a European Employee Council that provides an opportunity for elected representatives and management to discuss developments in the Group's European operations.

Diversity and inclusion

During 2013, the Group executive continued its commitment to making workplace policies, processes and experiences inclusive for staff, customers and stakeholders.

Inclusion is built into various policy areas and people management processes. For example: the business continues to support disabled persons, ensuring there are equal opportunities in recruitment, employment, promotion and training.

The business also supports employee-led networks, with three being introduced this year relating to the areas of disability, multi-culturalism and carers. These new networks run alongside existing ones, such as Focused Women and Rainbow, who provide personal and career development opportunities through networking and training events.

This commitment to inclusion extends to supporting and participating in positive action programmes outside of the Group aimed at cultivating future leaders, including 'An Inspirational Journey' and FTSE-100 cross-company mentoring programmes. The Group continues to maintain its involvement with external charitable networks and events such as Manchester Pride.

This approach to inclusion also extends to the marketplace with the RBS Women in Business specialists supporting and guiding more and more women to take the step of starting their own business.

Performance on gender diversity is monitored and reviewed at Group and local level and RBS remains supportive of the recommendations of Lord Davies' Report. There are currently three female directors on the Board out of a total of eleven, which exceeds Lord Davies' aspirational target of 25 per cent female Board representation. Further information on male/female representation at various levels of employment in the Group is included in the Strategic report on page 33.

Further details on the Board diversity policy can be found at [rbs.com>about us](http://rbs.com/about-us).

This year the business has been recognised for its work on Equality, Diversity and Inclusion by achieving platinum ranking from Opportunity Now (gender), one of only a few organisations to achieve this; achieving Silver for Race for Opportunity (race); and securing a position in the Working Families Top 10.

Wellbeing

Ensuring the wellbeing of employees is an important responsibility for the Group.

A wide range of health benefits and services is in place to help employees maintain good physical and psychological health, and support them if they do become unwell. We continue to enhance and promote these services, targeting those issues that we know affect our employee's ability to bring the best of themselves to work. In 2013, we made Lifematters, the Group's Employee Assistance Programme, even more accessible with the introduction of our Lifematters mobile App.

Code of conduct

The code of conduct was fundamentally revised in 2013. How we behave forms the character of our company and dictates how others see us. "Our Code" reflects our values and applies to everyone who works for RBS. It lets everyone know what to expect of each other, what to do when unsure of a decision, and where to go for advice when needed.

The code of conduct is available at rbs.com>sustainability>governance> reporting and engagement. It will also be provided to any person without charge, upon request, by contacting RBS Secretariat at the telephone number listed on page 561.

Sustainability

Sustainability at RBS means building our future on long term thinking that focuses on our customers and supporting the communities in which they live. Our core duty is to be safe and strong. This underpins everything that RBS does and enables people to run their daily lives and businesses. This, in turn, supports economic growth and brings wider benefits to society. The final strand to building a sustainable business centres on how we choose to operate and how we can go further to shape the world in a positive way.

Sustainability is therefore not just about the many responsibilities and obligations that the Group has in a legal sense, but is about broad issues that need to be addressed to ensure that the Group is a healthy and respected business operating on a sustainable basis.

The Group Sustainability Committee is responsible for overseeing and challenging how management is addressing sustainability and reputation issues relating to all stakeholder groups and reports to the Board. For more information on the Committee, see pages 64 and 65.

For more information on our approach and progress read the RBS Sustainability Report, available on rbs.com/sustainable.

Greenhouse gas emissions

Disclosures relating to greenhouse gas emissions are included in the Strategic report on page 32.

Report of the directors

Going concern

The Group's business activities and financial position, the factors likely to affect its future development and performance and its objectives and policies in managing the financial risks to which it is exposed and its capital are discussed in the Business review. The risk factors which could materially affect the Group's future results are set out on pages 523 to 536. The Group's regulatory capital resources and significant developments in 2013 and anticipated future developments are detailed on pages 192 to 208. The liquidity and funding section on pages 209 to 226 describes the Group's funding and liquidity profile, including changes in key metrics, the build up of liquidity reserves and the outlook for 2014.

Having reviewed the Group's forecasts, projections and other relevant evidence, the directors have a reasonable expectation that the Group and the company will continue in operational existence for the foreseeable future. Accordingly, the financial statements of the Group and of the company have been prepared on a going concern basis.

BBA disclosure code

The Group's 2013 financial statements have been prepared in compliance with the principles set out in the Code for Financial Reporting Disclosure published by the British Bankers' Association in 2010. The Code sets out five disclosure principles together with supporting guidance. The principles are that the Group and other major UK banks will provide high quality, meaningful and decision-useful disclosures; review and enhance their financial instrument disclosures for key areas of interest to market participants; assess the applicability and relevance of good practice recommendations to their disclosures acknowledging the importance of such guidance; seek to enhance the comparability of financial statement disclosures across the UK banking sector; and clearly differentiate in their annual reports between information that is audited and information that is unaudited.

Corporate governance

The company is committed to high standards of corporate governance. Details are given in the Corporate governance report on pages 35 to 90. The Corporate governance report and compliance report (pages 91 and 92) form part of this Report of the directors.

Share capital

Details of the ordinary and preference share capital at 31 December 2013 and movements during the year are shown in Note 26 on the consolidated accounts.

During 2013, the company allotted and issued a total of 78.6 million new ordinary shares of £1 each for the purposes of ensuring 2013 coupon payments on discretionary hybrid capital securities were partly neutralised from a Core Tier 1 capital perspective. The shares were allotted to UBS AG at the subscription prices and determined by reference to the average market prices during the sale periods set out below.

Number of shares sold	Subscription price	Sale period	Gross proceeds	Share price on allotment
42,967,903	314.188p	3 May 2013 - 17 July 2013	£135 million	321.6p
20,473,967	341.898p	2 August 2013 - 12 September 2013	£70 million	360.4p
15,091,674	331.309p	1 November 2013 - 9 December 2013	£50 million	336.8p

In addition, the company issued 53.7 million ordinary shares of £1 each in connection with employee share schemes.

Additional information

Where not provided elsewhere in the Report of the directors, the following additional information is required to be disclosed by Part 6 of Schedule 7 to the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008.

The rights and obligations attaching to the company's ordinary shares and preference shares are set out in the company's Articles of Association, copies of which can be obtained from Companies House in the UK or can be found at [rbs.com>about us](http://rbs.com/about-us).

On a show of hands at a general meeting of the company every holder of ordinary shares and cumulative preference shares present in person or by proxy and entitled to vote shall have one vote. On a poll, every holder of ordinary shares or cumulative preference shares present in person or by proxy and entitled to vote shall have four votes for every share held. The notices of Annual General Meetings and General Meetings specify the deadlines for exercising voting rights and appointing a proxy or proxies to vote in relation to resolutions to be passed at the meeting.

The cumulative preference shares represent less than 0.015% of the total voting rights of the company, the remainder being represented by the ordinary shares.

There are no restrictions on the transfer of ordinary shares in the company other than certain restrictions which may from time to time be imposed by laws and regulations (for example, insider trading laws). Pursuant to the Listing Rules of the FCA, certain employees of the company require the approval of the company to deal in the company's shares.

Report of the directors

The rules governing the powers of directors, including in relation to issuing or buying back shares and their appointment are set out in the company's Articles of Association. It will be proposed at the 2014 Annual General Meeting that the directors be granted authorities to allot shares under the Companies Act 2006. The company's Articles of Association may only be amended by a special resolution at a general meeting of shareholders.

A number of the company's share plans include restrictions on transfers of shares while shares are subject to the plans or the terms under which the shares were awarded.

The rights and obligations of holders of non-cumulative preference shares are set out in Note 26 on the consolidated accounts.

Except in relation to the Dividend Access Share, the company is not aware of any agreements between shareholders that may result in restrictions on the transfer of securities and/or voting rights. There are no persons holding securities carrying special rights with regard to control of the company.

Under the rules of certain employee share plans, eligible employees are entitled to acquire shares in the company, and shares are held in trust for participants by The Royal Bank and Ulster Bank Dublin Trust Company as Trustees. Voting rights are exercised by the Trustees on receipt of participants' instructions. If a participant does not submit an instruction to the Trustee no vote is registered.

The Royal Bank of Scotland plc 1992 Employee Share Trust, The Royal Bank of Scotland Group plc 2001 Employee Share Trust and The Royal Bank of Scotland Group plc 2007 US Employee Share Trust hold shares on behalf of the Group's employee share plans. The voting rights are exercisable by the Trustees, however, in accordance with investor protection guidelines, the Trustees abstain from voting. The Trustees would take independent advice before accepting any offer in respect of their shareholdings for the company in a takeover bid situation.

Awards granted under the company's employee share plans may be met through a combination of newly issued shares and shares acquired in the market by the company's employee benefit trusts.

A change of control of the company following a takeover bid may cause a number of agreements to which the company is party to take effect, alter or terminate. All of the company's employee share plans contain provisions relating to a change of control. Outstanding awards and options may vest and become exercisable on change of control, subject where appropriate to the satisfaction of any performance conditions at that time and pro-rating of awards. In the context of the company as a whole, these agreements are not considered to be significant.

Directors

The names and brief biographical details of the current directors are shown on pages 39 to 42.

Sandy Crombie, Alison Davis, Tony Di Iorio, Philip Hampton, Penny Hughes, Brendan Nelson, Baroness Noakes and Philip Scott all served throughout the year and to the date of signing of the financial statements.

Joe MacHale and Art Ryan stepped down from the Board on 14 May 2013 and 30 September 2013 respectively.

Stephen Hester and Bruce Van Saun stepped down from the Board on 30 September 2013.

Ross McEwan and Nathan Bostock were appointed to the Board on 1 October 2013. Nathan has since confirmed his resignation although his leaving date is still to be agreed.

Robert Gillespie was appointed to the Board on 2 December 2013.

All directors of the company are required to stand for election or re-election annually by shareholders at the Annual General Meeting.

Directors' interests

The interests of the directors in the shares of the company at 31 December 2013 are shown on page 79. None of the directors held an interest in the loan capital of the company or in the shares or loan capital of any of the subsidiary undertakings of the company, during the period from 1 January 2013 to 26 February 2014.

Directors' indemnities

In terms of section 236 of the Companies Act 2006 (the "Companies Act"), Qualifying Third Party Indemnity Provisions have been issued by the company to directors, members of the Group's Executive and Management Committees, PRA/FCA Approved Persons and certain directors and/or officers of the Group's subsidiaries.

In terms of section 236 of the Companies Act, Qualifying Pension Scheme Indemnity Provisions have been issued to all trustees of the Group's pension schemes.

Post balance sheet events

Other than those matters detailed in Note 42 on the consolidated accounts, there have been no significant events between the year end and the date of approval of these accounts which would require a change to or disclosure in the accounts.

Report of the directors

Shareholdings

The table below shows shareholders that have notified the Group that they hold more than 3% of the total voting rights of the company at 31 December 2013.

Solicitor For The Affairs of Her Majesty's Treasury as Nominee for Her Majesty's Treasury	Number of shares (millions)	% of share class held	% of total voting rights held
Ordinary shares	3,964	63.9	63.9
B shares (non-voting)	51,000	100	—

On 8 January 2014, the Group was notified that Her Majesty's Treasury's shareholding of ordinary shares as at 31 December 2013 represented 63.9% of the total voting rights. The decrease was as a result of a change in the total voting rights.

Political donations

At the Annual General Meeting in 2013, shareholders gave authority under Part 14 of the Companies Act, for a period of one year, for the company (and its subsidiaries) to make political donations and incur political expenditure up to a maximum aggregate sum of £100,000. This authorisation was taken as a precaution only, as the company has a longstanding policy of not making political donations or incurring political expenditure within the ordinary meaning of those words. During 2013, the Group made no political donations, nor incurred any political expenditure in the UK or EU and it is not proposed that the Group's longstanding policy of not making contributions to any political party be changed. Shareholders will be asked to renew this authorisation at the Annual General Meeting in 2014.

Directors' disclosure to auditors

Each of the directors at the date of approval of this report confirms that:

- (a) so far as the director is aware, there is no relevant audit information of which the company's auditors are unaware; and
- (b) the director has taken all the steps that he/she ought to have taken as a director to make himself/herself aware of any relevant audit information and to establish that the company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of section 418 of the Companies Act.

Auditors

The auditors, Deloitte LLP, have indicated their willingness to continue in office. A resolution to re-appoint Deloitte LLP as the company's auditors will be proposed at the forthcoming Annual General Meeting.

By order of the Board

Aileen Taylor
Secretary
26 February 2014

The Royal Bank of Scotland Group plc
is registered in Scotland No. SC45551

Statement of directors' responsibilities

This statement should be read in conjunction with the responsibilities of the auditor set out in their report on pages 366 to 369.

The directors are responsible for the preparation of the Annual Report and Accounts. The directors are required by Article 4 of the IAS Regulation (European Commission Regulation No 1606/2002) to prepare Group accounts, and as permitted by the Companies Act 2006 have elected to prepare company accounts, for each financial year in accordance with International Financial Reporting Standards as adopted by the European Union. They are responsible for preparing accounts that present fairly the financial position, financial performance and cash flows of the Group and the company. In preparing those accounts, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the accounts.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Group and to enable them to ensure that the Annual Report and Accounts complies with the Companies Act 2006. They are also responsible for safeguarding the assets of the Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm that to the best of their knowledge:

- the financial statements, prepared in accordance with International Financial Reporting Standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the company and the undertakings included in the consolidation taken as a whole; and
- the Strategic Report and Directors' report (incorporating the Business review) include a fair review of the development and performance of the business and the position of the company and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties that they face.

In addition, the directors are of the opinion that the Annual Report and Accounts, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess the company's performance, business model and strategy.

Presentation of information

In the Report and Accounts, and unless specified otherwise, the term 'company' or 'RBSG' means The Royal Bank of Scotland Group plc, 'RBS', 'RBS Group' or the 'Group' means the company and its subsidiaries, 'the Royal Bank' or 'RBS plc' means The Royal Bank of Scotland plc and 'NatWest' means National Westminster Bank Plc.

The company publishes its financial statements in pounds sterling ('£' or 'sterling'). The abbreviations '£m' and '£bn' represent millions and thousands of millions of pounds sterling, respectively, and references to 'pence' represent pence in the United Kingdom ('UK'). Reference to 'dollars' or '\$' are to United States of America ('US') dollars. The abbreviations '\$m' and '\$bn' represent millions and thousands of millions of dollars, respectively, and references to 'cents' represent cents in the US. The abbreviation '€' represents the 'euro', the European single currency, and the abbreviations '€m' and '€bn' represent millions and thousands of millions of euros, respectively.

The geographic analysis in the Business Review, including the average balance sheet and interest rates, changes in net interest income and average interest rates, yields, spreads and margins in this report have generally been compiled on the basis of location of office - UK and overseas – unless indicated otherwise. 'UK' in this context includes transactions conducted through the offices in the UK which service international banking transactions.

The results, assets and liabilities of individual business units are classified as trading or non-trading based on their predominant activity. Although this method may result in some non-trading activity being classified as trading, and vice versa, the Group believes that any resulting misclassification is not material.

International Financial Reporting Standards

As required by the Companies Act 2006 and Article 4 of the European Union IAS Regulation, the consolidated financial statements of the Group are prepared in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee of the IASB as adopted by the European Union (together 'IFRS'). They also comply with IFRS as issued by the IASB.

Presentation of information

Managed results

The financial information on a managed basis, prepared using the Group's accounting policies, shows the underlying performance of the Group which excludes certain one-off and other items. This information is provided in this form to give a better understanding of the results of the Group's operations. Consistent with the manner in which the Group is managed, Group operating profit on a managed basis excludes:

- own credit adjustments;
- Payment Protection Insurance (PPI) costs;
- Interest Rate Hedging Products redress and related costs;
- regulatory and legal actions;
- sovereign debt impairment and interest rate hedge adjustments;
- amortisation of purchased intangible assets;
- integration and restructuring costs;
- gain on redemption of own debt;
- write-down of goodwill and other intangible assets;
- Asset Protection Scheme (APS);
- strategic disposals;
- bank levy;
- bonus tax; and
- RFS Holdings minority interest (RFS MI)

The ceding of control following the partial disposal of the Group's shareholding in Direct Line Group (DLG) has resulted in the Group no longer treating DLG as an operating segment. Consequently, prior period data for 2012 and 2011 on a managed basis (including disclosures relating to our Core business and segmental analysis) have been restated to exclude DLG. These restatements resulted in a decrease in Group operating profit of £398 million for the year ended 31 December 2012 and £477 million for the year ended 31 December 2011. They have no impact on the Group's statutory results.

Revisions

Direct Line Group

The Group sold the first tranche of ordinary shares representing 34.7% of the share capital of DLG in October 2012 via an Initial Public Offering. On 13 March 2013, the Group sold a further 16.8% of ordinary shares in DLG and ceded control. This fulfilled the Group's plan to cede control of DLG by the end of 2013. On 20 September 2013, the Group sold a further 20% of ordinary shares in DLG which is a step toward complete disposal by the end of 2014, as required by the European Commission. At 31 December 2013, the Group held 28.5% of the share capital in DLG.

In accordance with IFRS 5, DLG was classified as a discontinued operation in 2012. From 13 March 2013, DLG was classified as an associate and at 31 December 2013, the Group's interest in DLG was transferred to disposal groups.

Revised allocation of Business Services costs

In 2013, the Group reclassified certain costs between direct and indirect expenses for all divisions. Comparatives have been restated accordingly; the revision did not affect total expenses or operating profit.

Implementation of IAS 19 'Employee Benefits' (revised)

The Group implemented IAS 19 with effect from 1 January 2013. IAS 19 requires: the immediate recognition of all actuarial gains and losses; interest cost to be calculated on the net pension liability or asset at the long-term bond rate, such that an expected rate of return will no longer be applied to assets; and all past service costs to be recognised immediately when a scheme is curtailed or amended. Implementation of IAS 19 resulted in an increase in the loss after tax of £84 million for the year ended 31 December 2012 and £154 million for the year ended 31 December 2011. This also resulted in an increase in the loss per ordinary and B share of 0.8p for the year ended 31 December 2012 and 1.4p for the year ended 31 December 2011. Prior periods have been restated accordingly.

Implementation of IFRS 10 'Consolidated Financial Statements'

The Group implemented IFRS 10 with effect from 1 January 2013. IFRS 10 adopts a single definition of control: a reporting entity controls another entity when the reporting entity has the power to direct the activities of that other entity so as to vary returns for the reporting entity. IFRS 10 requires retrospective application. Following implementation of IFRS 10, certain entities that have trust preferred securities in issue are no longer consolidated by the Group. As a result there has been a reduction in non-controlling interests of £0.5 billion with a corresponding increase in Owners' equity (Paid-in equity); prior periods have been restated accordingly.

Statutory results

The statutory results of the Group include the one-off and other items in the appropriate captions in the income statement.

Reconciliations between managed and statutory results are detailed on pages 169 to 171.

Glossary

A glossary of terms is provided on pages 549 to 556.

Forward-looking statements

Certain sections in this document contain ‘forward-looking statements’ as that term is defined in the United States Private Securities Litigation Reform Act of 1995, such as statements that include the words ‘expect’, ‘estimate’, ‘project’, ‘anticipate’, ‘believe’, ‘should’, ‘intend’, ‘plan’, ‘could’, ‘probability’, ‘risk’, ‘Value-at-Risk (VaR)’, ‘target’, ‘goal’, ‘objective’, ‘will’, ‘endeavour’, ‘outlook’, ‘optimistic’, ‘prospects’ and similar expressions or variations on such expressions.

In particular, this document includes forward-looking statements relating, but not limited to: the Group’s restructuring and new strategic plans, divestments, capitalisation, portfolios, net interest margin, capital ratios, liquidity, risk-weighted assets (RWAs), return on equity (ROE), profitability, cost:income ratios, leverage and loan:deposit ratios, funding and risk profile; discretionary coupon and dividend payments; implementation of legislation of ring-fencing and bail-in measures; sustainability targets; litigation, regulatory and governmental investigations; the Group’s future financial performance; the level and extent of future impairments and write-downs; and the Group’s exposure to political risks, including the referendum on Scottish independence, credit rating risk and to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity and equity price risk. These statements are based on current plans, estimates and projections, and are subject to inherent risks, uncertainties and other factors which could cause actual results to differ materially from the future results expressed or implied by such forward-looking statements. For example, certain market risk disclosures are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and, as a result, actual future gains and losses could differ materially from those that have been estimated.

Other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this document include, but are not limited to: global economic and financial market conditions and other geopolitical risks, and their impact on the financial industry in general and on the Group in particular; the ability to implement strategic plans on a timely basis, or at all, including the simplification of the Group’s structure, the divestment of Citizens Financial Group and the exiting of assets in RBS Capital Resolution as well as the disposal of certain other assets and businesses as announced or required as part of the State Aid restructuring plan; the achievement of capital and costs reduction targets; ineffective management of capital or changes to capital adequacy or liquidity requirements; organisational restructuring in response to legislation and regulation in the

United Kingdom (UK), the European Union (EU) and the United States (US); the implementation of key legislation and regulation including the UK Financial Services (Banking Reform Act) 2013 and the proposed EU Recovery and Resolution Directive; the ability to access sufficient sources of capital, liquidity and funding when required; deteriorations in borrower and counterparty credit quality; litigation, government and regulatory investigations including investigations relating to the setting of LIBOR and other interest rates and foreign exchange trading and rate setting activities; costs or exposures borne by the Group arising out of the origination or sale of mortgages or mortgage-backed securities in the US; the extent of future write-downs and impairment charges caused by depressed asset valuations; the value and effectiveness of any credit protection purchased by the Group; unanticipated turbulence in interest rates, yield curves, foreign currency exchange rates, credit spreads, bond prices, commodity prices, equity prices and basis, volatility and correlation risks; changes in the credit ratings of the Group; changes to the valuation of financial instruments recorded at fair value; competition and consolidation in the banking sector; the ability of the Group to attract or retain senior management or other key employees; regulatory or legal changes (including those requiring any restructuring of the Group’s operations) in the UK, the US and other countries in which the Group operates or a change in UK Government policy; changes to regulatory requirements relating to capital and liquidity; changes to the monetary and interest rate policies of central banks and other governmental and regulatory bodies; changes in UK and foreign laws, regulations, accounting standards and taxes, including changes in regulatory capital regulations and liquidity requirements; impairments of goodwill; pension fund shortfalls; general operational risks; HM Treasury exercising influence over the operations of the Group; reputational risk; the conversion of the B Shares in accordance with their terms; limitations on, or additional requirements imposed on, the Group’s activities as a result of HM Treasury’s investment in the Group; and the success of the Group in managing the risks involved in the foregoing.

The forward-looking statements contained in this document speak only as of the date of this announcement, and the Group does not undertake to update any forward-looking statement to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

The information, statements and opinions contained in this document do not constitute a public offer under any applicable legislation or an offer to sell or solicitation of any offer to buy any securities or financial instruments or any advice or recommendation with respect to such securities or other financial instruments.

Business review

Description of business

Introduction

The Royal Bank of Scotland Group plc is the holding company of a large global banking and financial services group. Headquartered in Edinburgh, the Group operates in the United Kingdom, the United States and internationally through its principal subsidiaries, the Royal Bank and NatWest. Both the Royal Bank and NatWest are major UK clearing banks. In the United States, the Group's subsidiary RBS Citizens is a large commercial banking organisation. Globally, the Group has a diversified customer base and provides a wide range of products and services to personal, commercial and large corporate and institutional customers.

Following the placing and open offers in December 2008 and in April 2009, HM Treasury owned approximately 70.3% of the enlarged ordinary share capital of the company. In December 2009, the company issued a further £25.5 billion of new capital to HM Treasury. This new capital took the form of B shares, which do not generally carry voting rights at general meetings of ordinary shareholders but are convertible into ordinary shares and qualify as Core Tier 1 capital. Following the issuance of the B shares, HM Treasury's holding of ordinary shares of the company remained at 70.3% although its economic interest rose to 84.4%.

At 31 December 2013, HM Treasury's holding in the company's ordinary shares was 63.9% and its economic interest was 80.2%.

The Group had total assets of £1,028 billion and owners' equity of £59 billion at 31 December 2013. The Group's risk asset ratios at 31 December 2013 were a Total capital ratio of 16.5%, a Core Tier 1 capital ratio of 10.9% and a Tier 1 capital ratio of 13.1%.

Organisational structure

The Group's activities during 2013 were organised on a divisional basis as follows:

UK Retail offers a comprehensive range of banking products and related financial services to the personal market. It serves customers through a number of channels including: the RBS and NatWest network of branches and ATMs in the United Kingdom, telephony, online and mobile. UK Retail is committed to serving customers well, making banking easier and convenient whilst ensuring that we do business in an open, honest and sustainable manner.

UK Corporate is a leading provider of banking, finance and risk management services to the corporate and SME sector in the United Kingdom. It offers a full range of banking products and related financial services through a nationwide network of relationship managers, and also through telephone and internet channels. The product range includes invoice finance through the RBSIF brand and asset finance through the Lombard brand.

Wealth provides private banking and investment services in the UK through Coutts & Co and Adam & Company, offshore banking through RBS International, NatWest Offshore and Isle of Man Bank, and international private banking through Coutts & Co Ltd.

International Banking serves the world's largest companies with a leading client proposition focused on financing, risk management and transaction services. It serves as the delivery channel for Markets products to international corporate clients. The division also serves international subsidiaries of clients from other RBS Group divisions (e.g. UK Corporate, Ulster Bank and US Retail & Commercial) through its international network.

Ulster Bank is a leading retail and commercial bank in Northern Ireland and the Republic of Ireland. It provides a comprehensive range of financial services through both its Retail Banking division, which provides loan and deposit products through a network of branches and direct channels, and its Corporate Banking division, which provides services to businesses and corporate customers.

US Retail & Commercial provides financial services primarily through the Citizens and Charter One brands. US Retail & Commercial is engaged in retail and corporate banking activities through its branch network in 12 states in the United States and through non-branch offices in other states.

In February 2013, the Group announced that it would commence work on a partial flotation of RBS Citizens and in November 2013 confirmed that a partial initial public offering is now planned for 2014. The Group intends to fully divest the business by the end of 2016.

The divisions discussed above are collectively referred to as Retail & Commercial.

Markets is a leading origination, sales and trading business across debt finance, fixed income and currencies. The division offers a unified service to the Group's corporate and institutional clients. The Markets' origination, sales and research teams build strong ongoing client partnerships, provide market perspective and access, and work with the division's trading and structuring teams to meet the client's objectives across financing, risk management, investment, securitisation and liquidity.

A new strategy for the Markets division was announced in June 2013 enabling RBS to concentrate on its core customers' needs where the Markets business is strongest. Markets is now focused on our core fixed income capabilities across rates, foreign exchange, asset backed products, credit and debit capital markets, while de-emphasising some more capital intensive structured product areas.

Central Functions comprises Group and corporate functions, such as treasury, finance, risk management, compliance, legal, communications and human resources. The Centre manages the Group's capital resources and Group-wide regulatory projects and provides services to the operating divisions.

Non-Core Division managed separately assets that the Group intended to run off or dispose of. The division contained a range of businesses and asset portfolios primarily from the legacy GBM businesses, higher risk profile asset portfolios including excess risk concentrations, and other illiquid portfolios. It also included a number of other portfolios and businesses including regional markets businesses that the Group had concluded were no longer strategic.

Business review

Business Services supports the customer-facing businesses and provides operational technology, customer support in telephony, account management, lending and money transmission, global purchasing, property and other services. Business Services drives efficiencies and supports income growth across multiple brands and channels by using a single, scalable platform and common processes wherever possible. It also leverages the Group's purchasing power and is the Group's centre of excellence for managing large-scale and complex change. For reporting purposes, Business Services costs are allocated to the divisions above. It is not deemed a reportable segment.

Business divestments

To comply with the European Commission State Aid requirements the Group agreed a series of restructuring measures to be implemented over a four year period from December 2009. These include the divestment of Direct Line Insurance Group plc, the sale of 80.01% of the Group's Global Merchant Services business (completed in 2010) and the sale of substantially all of the RBS Sempra Commodities joint venture business (largely completed in 2010), as well as the divestment of the RBS branch-based business in England and Wales and the NatWest branches in Scotland, along with the direct SME customers across the UK ("UK branch-based businesses").

In October 2012, Santander UK plc withdrew from its agreed purchase of the UK branch-based businesses. In September 2013, the Group reached an agreement with an investor consortium led by Corsair Capital and Centerbridge Partners for an investment in these businesses ahead of a stock market flotation. This includes 308 RBS branches in England and Wales and 6 NatWest branches in Scotland. The new bank will be called Williams & Glyn, the brand RBS used for its branches in England and Wales before 1985.

In March 2013 and September 2013, the Group sold a further 16.8% and 20% respectively of the total issued share capital in Direct Line Insurance Group plc (DLG). This followed the sale in October 2012 via an initial public offering of 520.8 million ordinary shares representing 34.7% of the total issued share capital. At 31 December 2013, the Group held 28.5% of the issued ordinary share capital of DLG.

On 26 February 2014 RBS announced that it had entered into a placing agreement to complete the sale of its residual interest in DLG (except for 4.2 million shares held to satisfy long term incentive plan awards granted by RBS to DLG management). Accordingly, on settlement of the placing, the Group will have completed the disposal as required by the European Commission.

RBS Capital Resolution (RCR)

In response to a recommendation by the Parliamentary Commission on Banking Standards, RBS worked closely with HM Treasury (HMT) and its advisers on a 'good bank/bad bank' review and identified a pool of c.£38 billion of assets with particularly high long-term capital intensity, credit risk and/or potentially volatile outcomes in stressed environments.

The review concluded that the effort, risk and expense involved in the creation of an external bad bank could not be justified and consequently RBS decided to create an internal 'bad bank', RBS Capital Resolution (RCR), to manage these assets down so as to release capital. RCR brings assets under common management and increases focus on the run down.

RCR became fully operational on 1 January 2014 with a pool of c.£29 billion of assets, down from the forecast of c.£38 billion due to accelerated disposals and increased impairments. Whilst RCR is of a similar size to the Non-Core division, the assets have been selected on a different basis and no direct comparisons can be drawn.

Strategic review

In November 2013, the Group announced that it was undertaking a comprehensive business review of its: Customer-facing business, IT and operations and Organisational and decision making structures.

The aim of the review is to improve the bank's performance and effectiveness in serving its customers, shareholders and wider stakeholders.

As described on pages 8 and 9, the Group has announced the results of its Strategic review, resulting in it being realigned into three businesses: Personal & Business Banking, Commercial & Private Banking, and Corporate & institutional Banking. In addition, the Group will be rationalising and simplifying its systems, based on a target architecture with improved resilience.

Business review

Competition

The Group faces strong competition in all the markets it serves. Banks' balance sheets have strengthened whilst loan demand remains subdued as many customers continue to deleverage even as the UK economy begins to show signs of recovery. Competition for retail deposits has eased somewhat as institutions have made progress towards building strong and diverse funding platforms for their balance sheets.

Competition for corporate and institutional customers in the UK and abroad is from UK banks and from large foreign universal banks that offer combined investment and commercial banking capabilities. In addition, the Group's Markets division faces strong competition from dedicated investment banks. In asset finance, the Group competes with banks and specialist asset finance providers, both captive and non-captive. In European and Asian corporate and institutional banking markets the Group competes with the large domestic banks active in these markets and with the major international banks.

In the small business banking market, the Group competes with other UK clearing banks, specialist finance providers and building societies.

In the personal banking segment, the Group competes with UK clearing banks and building societies, major retailers and life assurance companies. In the mortgage market, the Group competes with UK clearing banks and building societies. Increasingly, the ambitions of non-traditional players in the UK market are gaining credibility, with new entrants active and seeking to build their platforms by acquiring businesses made available through restructuring of incumbents. The Group distributes life assurance products to banking customers in competition with independent advisors and life assurance companies.

In the UK credit card market large retailers and specialist card issuers are active in addition to the UK banks. In addition to physical distribution channels, providers compete through direct marketing activity and the internet.

In Wealth Management, The Royal Bank of Scotland International competes with other UK and international banks to offer offshore banking services. Coutts and Adam & Company compete as private banks with UK clearing and private banks, and with international private banks. Competition in wealth management remains strong as banks maintain their focus on competing for affluent and high net worth customers.

In Ireland, Ulster Bank competes in retail and commercial banking with the major Irish banks and building societies, and with other UK and international banks and building societies active in the market. The challenging conditions in the Irish economy persist and many of the domestic Irish banks have required State support and are engaged in significant restructuring actions.

In the United States, RBS Citizens competes in the New England, Mid-Atlantic and Mid-West retail and mid-corporate banking markets with local and regional banks and other financial institutions. The Group also competes in the US in large corporate lending and specialised finance markets, and in fixed-income trading and sales. Competition is principally with the large US commercial and investment banks and international banks active in the US. The economic recovery in the US is proving weaker than expected and loan demand is weak in Citizens' markets.

Business review

Risk factors

Summary of our Principal Risks and Uncertainties

Set out below is a summary of certain risks which could adversely affect the Group; it should be read in conjunction with the Risk and Balance Sheet management section on pages 174 to 364. This summary should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties. A fuller description of these and other risk factors is included on pages 523 to 536.

- The Group's ability to implement its new strategic plan and achieve its capital goals depends on the success of its efforts to refocus on its core strengths and the timely divestment of RBS Citizens. The Group has undertaken since 2009 an extensive restructuring, including the disposal of non-core assets as well as businesses as part of the State Aid restructuring plan approved by the EC. The Group recently created RBS CRG to manage the run down of problem assets with the goal of removing such assets from the balance sheet over the next three years. The Group has also taken steps to strengthen its capital position and established medium term targets which will require the timely divestment of RBS Citizens to achieve. The Group is also undertaking a new strategic direction which will result in a significant downsizing of the Group, including simplifying the Group by replacing the current divisional structure with three customer segments. The level of structural change required to implement the Group's strategic and capital goals together with other regulatory requirements such as ring fencing are likely to be disruptive and increase operational risks for the Group. There is no assurance that the Group will be able to successfully implement its new strategy on which its capital plan depends or achieve its goals within the time frames contemplated or at all.
- Despite the improved outlook for the global economy over the near to medium-term, actual or perceived difficult global economic conditions and increased competition, particularly in the UK, create challenging economic and market conditions and a difficult operating environment for the Group's businesses. Uncertainties surrounding the referendum on Scottish independence and the implications of an affirmative outcome for independence are also likely to affect the Group. These factors, together with additional uncertainty relating to the recovery of the Eurozone economy where the Group has significant exposure and the risk of a return of volatile financial markets, in part due to the monetary policies and measures carried out by central banks, have been and will continue to adversely affect the Group's businesses, earnings, financial condition and prospects.
- The Group is subject to substantial regulation and oversight, and any significant regulatory or legal developments such as that which has occurred over the past several years could have an adverse effect on how the Group conducts its business and on its results of operations and financial condition. Certain regulatory measures introduced in the UK and in Europe relating to ring-fencing of bank activities may affect the Group's borrowing costs, may impact product offerings and the viability of certain business models and require significant restructuring with the possible transfer of a large number of customers between legal entities.
- The Group could fail to attract or retain senior management, which may include members of the Group Board, or other key employees, and it may suffer if it does not maintain good employee relations.
- The Group is subject to a number of regulatory initiatives which may adversely affect its business, including the UK Government's adoption of the Financial Services (Banking Reform) Act 2013, the US Federal Reserve's new rules for applying US capital, liquidity and enhanced prudential standards to certain of the Group's US operations and ongoing reforms in the European Union with respect to capital requirements, stability and resolution of financial institutions, including CRD IV and other currently debated proposals such as the Resolution and Recovery Directive.
- The Group's ability to meet its obligations including its funding commitments depends on the Group's ability to access sources of liquidity and funding. The inability to access liquidity and funding due to market conditions or otherwise or to do so at a reasonable cost due to increased regulatory constraints, could adversely affect the Group's financial condition and results of operations. Furthermore, the Group's borrowing costs and its access to the debt capital markets and other sources of liquidity depend significantly on its and the UK Government's credit ratings which would be likely to be negatively impacted by political events, such as an affirmative outcome of the referendum for the independence of Scotland.
- The Group's business performance, financial condition and capital and liquidity ratios could be adversely affected if its capital is not managed effectively or as a result of changes to capital adequacy and liquidity requirements, including those arising out of Basel III implementation (globally or by European, UK or US authorities) as well as structural changes that may result from the implementation of ring-fencing under the Financial Services (Banking Reform) Act 2013 or proposed changes of the US Federal Reserve with respect to the Group's US operations. The Group's ability to reach its target capital ratios in the medium term will turn on a number of factors including a significant downsizing of the Group in part through the sale of RBS Citizens.
- The Group is, and may be, subject to litigation and regulatory and governmental investigations that may impact its business, reputation, results of operations and financial condition. Although the Group settled a number of legal proceedings and regulatory investigations during 2013, the Group is expected to continue to have a material exposure to legacy litigation and regulatory matter proceedings in the medium term. The Group also expects greater regulatory and governmental scrutiny for the foreseeable future particularly as it relates to compliance with new and existing laws and regulations such as anti-money laundering and anti-terrorism laws.
- Operational and reputational risks are inherent in the Group's businesses.

Business review

Risk factors continued

- The Group is highly dependent on its information technology systems and has been and will continue to be subject to cyber attacks which expose the Group to loss of customer data or other sensitive information, and combined with other failures of the Group's information technology systems, hinder its ability to service its clients which could result in long-term damage to the Group's business and brand.
- The Group or any of its UK bank subsidiaries may face the risk of full nationalisation or other resolution procedures, including recapitalisation of the Group or any of its UK bank subsidiaries, through bail-in which has been introduced by the Financial Services (Banking Reform) Act 2013 and will come into force on a date stipulated by HM Treasury. These various actions could be taken by or on behalf of the UK Government, including actions in relation to any securities issued, new or existing contractual arrangements and transfers of part or all of the Group's businesses.
- As a result of the UK Government's majority shareholding in the Group it may be able to exercise a significant degree of influence over the Group including on dividend policy, the election of directors or appointment of senior management or limiting the Group's operations. The offer or sale by the UK Government of all or a portion of its shareholding in the company could affect the market price of the equity shares and other securities and acquisitions of ordinary shares by the UK Government (including through conversions of other securities or further purchases of shares) may result in the delisting of the Group from the Official List.
- The actual or perceived failure or worsening credit of the Group's counterparties or borrowers, including sovereigns in the Eurozone, and depressed asset valuations resulting from poor market conditions have led the Group to realise and recognise significant impairment charges and write-downs which have adversely affected the Group and could continue to adversely affect the Group if, due to a deterioration in economic and financial market conditions or continuing weak economic growth, it were to recognise or realise further write-downs or impairment charges.
- The value of certain financial instruments recorded at fair value is determined using financial models incorporating assumptions, judgements and estimates that may change over time or may ultimately not turn out to be accurate.
- Recent developments in regulatory or tax legislation and any further significant developments could have an effect on how the Group conducts its business and on its results of operations and financial condition, and the recoverability of certain deferred tax assets recognised by the Group is subject to uncertainty.
- The Group is required to make planned contributions to its pension schemes and to compensation schemes in respect of certain financial institutions, either of which, independently or in conjunction with additional or increased contribution requirements may have an adverse impact on the Group's results of operations, cash flow and financial condition.

Notes:

- (1) Total income on a managed basis excludes own credit adjustments, gain on redemption of own debt, Asset Protection Scheme, strategic disposals and RFS MI. In the statutory consolidated income statement, these items are included in total income.
- (2) Operating (loss)/profit on a managed basis excludes own credit adjustments, PPI costs, Interest Rate Hedging Products redress and related costs, regulatory and legal actions, sovereign debt impairment and related interest rate hedge adjustments, integration and restructuring costs, gain on redemption of own debt, write-down of goodwill and other intangible assets, Asset Protection Scheme, amortisation of purchased intangible assets, strategic disposals, bank levy, bonus tax and RFS MI.
- (3) Impairment losses on a managed basis excludes sovereign debt impairment and related interest rate hedge adjustments.
- (4) Cost:income ratio on a managed basis represents operating expenses excluding PPI costs, Interest Rate Hedging Products redress and related costs, regulatory and legal actions, integration and restructuring costs, write-down of goodwill and other intangible assets, amortisation of purchased intangible assets, bank levy, bonus tax and RFS MI, expressed as a percentage of total income as defined in (1) above. On a statutory basis, cost:income ratio represents operating expenses expressed as a percentage of total income.
- (5) Adjusted (loss)/earnings per ordinary and equivalent B share is based on earnings from continuing operations adjusted for own credit adjustments, PPI costs, Interest Rate Hedging Products redress and related costs, regulatory and legal actions, sovereign debt impairment and related interest rate hedge adjustments, integration and restructuring costs, gain on redemption of own debt, write-down of goodwill and other intangible assets, Asset Protection Scheme, amortisation of purchased intangible assets, strategic disposals, bank levy and bonus tax. Adjusted earnings per ordinary and equivalent B share excludes the participation rights of the dividend access share.
- (6) Funded balance sheet represents total assets less derivatives.
- (7) Comprises deposits by banks and customer accounts.

Overview of results

The financial information on a managed basis, prepared using the Group's accounting policies, shows the underlying performance of the Group which excludes certain one-off and other items. This information is provided to give a better understanding of the results of the Group's operations.

Business review

Summary consolidated income statement for the year ended 31 December 2013

In the income statement set out below, own credit adjustments, PPI costs, Interest Rate Hedging Products redress and related costs, regulatory and legal actions, sovereign debt impairment and related interest rate hedge adjustments, integration and restructuring costs, gain on redemption of own debt, write-down of goodwill and other intangible assets, Asset Protection Scheme, amortisation of purchased intangible assets, strategic disposals, bank levy, bonus tax and RFS Holdings minority interest ("one-off and other items") are shown separately. In the statutory consolidated income statement on page 370, these items are included in the appropriate captions.

The Group does not allocate one-off and other items to individual divisions. However, of the one-off and other items of significance, regulatory and legal actions of £2,394 million in 2013 relate predominantly to Markets while Payment Protection Insurance (PPI) costs of £900 million relate mainly to UK Retail and Interest Rate Hedging Products redress and related costs of £550 million is mainly attributable to UK Corporate and Markets. Goodwill write-down of £1,059 million relates to International Banking and the write-down of other intangible assets relates to Markets. Of the integration and restructuring costs of £656 million, UK Retail accounts for approximately 30%, International Banking approximately 15%, Markets approximately 10%, Centre approximately 23% and other divisions less than 10% each.

Results summary

2013 compared with 2012 - managed

Operating loss

Group operating loss was £2,303 million compared with an operating profit of £2,952 million in 2012. The decline in performance primarily related to increased impairment losses resulting from the establishment of RBS Capital Resolution (RCR) and lower income in Markets.

Total income

Total income declined by 12% to £19,442 million, principally driven by lower income in Markets reflecting the smaller balance sheet, reduced risk levels and the uncertain market environment.

Net interest income

Group net interest income declined by 4% to £10,992 million largely reflecting lower interest-earning asset balances partially offset by repricing initiatives. Group net interest margin improved by 9 basis points driven by moves to reprice deposits in a number of divisions, partially offset by a roll-off in higher yielding securities.

Non-interest income

Non-interest income decreased by 21% to £8,450 million in 2013 principally driven by lower income from trading activities in Markets as the division managed down the scale of the balance sheet and reduced risk. This was partially offset by a £506 million improvement in Non-Core trading losses. Operating lease and rental income fell by £392 million, largely reflecting the disposal of RBS Aviation Capital in 2012.

Within other operating income, Non-Core recorded a loss of £334 million excluding rental income, primarily related to fair value adjustments associated with investment properties.

Operating expenses

Total operating expenses fell by 4% to £13,313 million, with staff costs down 7% as headcount fell by 4,300 to 114,900, principally in UK Retail, Markets and Non-Core. Markets operating expenses decreased by 11% to £2,610 million and Non-Core by 36% to £605 million, driven by exiting staff and lower central support requirements on run-down. Group cost: income ratio was up at 68%.

Impairment losses

Impairment losses increased by 60% to £8,432 million from £5,279 million in 2012 primarily due to increased charges resulting from the establishment of RCR. Excluding the impact of RCR (£4,490 million), impairment losses fell by 25% to £3,942 million with significant improvements in Non-Core, Ulster Bank and UK Retail partially offset by increases in International Banking, US Retail & Commercial and Markets.

Loan impairments represented 2.0% of gross loans and advances to customers excluding reverse repos compared with 1.2% in 2012.

Risk elements in lending at 31 December 2013 represented 9.5% of loans and advances excluding reverse repos, compared with 9.1% a year earlier. Provision coverage was 64% compared with 52% at 31 December 2012.

Business review

Results summary continued

Non-operating items

The continuing, albeit modest, strengthening of RBS's credit profile resulted in a £120 million accounting charge in relation to own credit adjustments versus £4,649 million in 2012.

To reflect current experience of Payment Protection Insurance complaints received, the Group increased its PPI provision by £900 million in 2013 compared with £1,110 million in 2012, bringing the cumulative charge taken to £3.1 billion, of which £2.2 billion had been utilised at 31 December 2013.

Integration and restructuring costs were £656 million compared with £1,415 million in 2012 with most of the costs relating to the Retail transformation, a reduction in the size of Markets and programme costs for the EC mandated disposal of certain UK branch-based businesses.

Write-down of goodwill was £1,059 million compared with £18 million in 2012 as the International Banking division was written off in 2013. Write-down of other intangible assets, including software, of £344 million related to Markets.

Liability management exercises undertaken by the Group during 2013 resulted in a net gain of £175 million (2012 - £454 million).

The Asset Protection Scheme, which the Group exited from in 2012, was accounted for as a credit derivative and movements in the fair value of the contract were taken as non-operating items. The APS fair value charge was £44 million in 2012.

The gain on strategic disposals of £161 million primarily relates to the disposal of the Group's remaining interest in WorldPay. In 2012 the gain of £113 million primarily related to the disposal of RBS Aviation Capital.

The UK bank levy is based on the total chargeable equity and liabilities as reported in the balance sheet at the end of a chargeable period. The cost of the levy to the Group for 2013 was £200 million compared with £175 million in 2012.

Interest Rate Hedging Products redress and related costs

Following an industry-wide review in 2012 conducted in conjunction with the Financial Services Authority, a charge of £700 million was booked for redress in relation to certain interest-rate hedging products sold to small and medium-sized businesses classified as retail clients under FSA rules. In 2013, a further charge of £550 million was booked reflecting both higher volumes and anticipated redress payments, recalibration of our methodology based on experience during 2013, and additional administration charges.

Regulatory and legal actions

Charges relating to regulatory and legal actions totalled £2,394 million compared with £381 million in 2012. These charges primarily relate to various claims and conduct related matters affecting Group companies, primarily those related to mortgage-backed securities and securities related litigation, following recent litigation settlements and regulatory decisions.

Tax

The tax charge was £382 million in 2013 compared with £441 million in 2012. The tax charge for the year reflects losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland), a reduction in the carrying value of the deferred tax asset in respect of UK losses and the effect of the reduction of 3% in the rate of UK corporation tax enacted in July 2013.

Loss per share

Basic loss from continuing operations was 81.3p per ordinary and equivalent B share compared with 54.5p in 2012. Adjusted loss from continuing operations was 38.3p compared with earnings of 4.3p in 2012.

2013 compared with 2012 - statutory

Operating loss

Operating loss before tax for the year was £8,243 million compared with £5,277 million in 2012.

Total income

Total income increased 10% to £19,757 million in 2013 primarily reflecting a lower accounting charge for own credit partially offset by lower income in Markets.

Net interest income

Net interest income decreased by 4% to £10,981 million largely reflecting lower interest-earning asset balances partially offset by re-pricing initiatives.

Non-interest income

Non-interest income increased to £8,776 million from £6,539 million in 2012. This included a loss on own credit adjustments of £120 million (2012 - £4,649 million), net gain on redemption of own debt of £175 million (2012 - £454 million) and movements in the fair value of the Asset Protection Scheme resulting in a £44 million charge in 2012. Excluding these items, non-interest income was down 19% compared with 2012.

Operating expenses

Operating expenses increased to £19,568 million from £17,939 million in 2012. This included PPI costs of £900 million (2012 - £1,110 million), IRHP redress and related costs of £550 million (2012 - £700 million), regulatory and legal actions of £2,394 million (2012 - £381 million), integration and restructuring costs of £656 million (2012 - £1,415 million), write-down of goodwill of £1,059 million (2012 - £18 million) and write-down of other intangible assets of £344 million (2012 - £106 million). Excluding these items, operating expenses were down 4% driven by exiting staff and lower central support requirements on downsizing in Markets and Non-Core.

Impairment losses

Impairment losses were £8,432 million, including £4,490 million relating to RCR, compared with £5,279 million in 2012.

Risk elements in lending represented 9.5% of gross loans and advances to customers excluding reverse repos at 31 December 2013 (2012 - 9.1%).

Provision coverage of risk elements in lending was 64% (2012 - 52%).

Business review

Tax

The tax charge for 2013 was £382 million (2012 - £441 million).

Loss per share

Basic loss per ordinary and equivalent B share from continuing operations was 81.3p per share compared with 54.5p per share in 2012.

2012 compared with 2011 - managed

Operating profit

Group operating profit, was £2,952 million compared with £1,141 million in 2011. The improvement was driven by lower costs in Markets, reflecting reduced headcount and lower levels of variable compensation, and a better operating performance in Non-Core, where losses fell by 32%. These improvements were partially offset by weaker performance in Retail & Commercial, as economic conditions remained difficult.

Total income

Total income declined by 6% to £22,085 million, primarily reflecting lower net interest income.

Net interest income

Group net interest income declined by 7% to £11,417 million largely reflecting lower interest-earning asset balances. Group net interest margin (NIM) increased slightly, despite very low interest rates and strong deposit competition.

Non-interest income

Non-interest income decreased by £443 million in 2012 principally driven by lower net fees and commissions and a fall in insurance net premium income. Net fees and commissions fell largely due to weaker consumer spending volumes in the UK together with legislation changes in the US.

Operating expenses

Total operating expenses fell by 7% to £13,854 million, with staff costs down 6% as headcount fell by 8,300 to 119,200. The decline in expenses was largely driven by Non-Core run-down and lower variable compensation (particularly in Markets), including variable compensation award reductions and clawbacks following the settlements reached with UK and US authorities in relation to attempts to manipulate LIBOR. The run-off of discontinued businesses in Markets and International Banking, following the restructuring announced in January 2012, and simplification of processes and headcount reduction in UK Retail also yielded cost benefits. Group cost: income ratio was flat at 63%.

Impairment losses

Impairment losses fell to £5,279 million from £7,437 million in 2011, with Core impairments falling by £464 million and Non-Core by £1,694 million, mostly in the Ulster Bank and commercial real estate portfolios.

Impairments represented 1.2% of gross loans and advances excluding reverse repos compared with 1.5% in 2011.

Risk elements in lending at 31 December 2012 represented 9.1% of loans and advances excluding reverse repos, compared with 8.6% a year earlier. Provision coverage was 52%, compared with 49% at 31 December 2011.

Non-operating items

The continuing strengthening RBS's credit profile resulted in a £4,649 million accounting charge in relation to own credit adjustments versus a gain of £1,914 million in 2011. This reflected a tightening of more than 340 basis points in the Group's credit spreads over the year.

The Asset Protection Scheme, which the Group exited from during the year, was accounted for as a credit derivative and movements in the fair value of the contract were taken as non-operating items. The APS fair value charge was £44 million in 2012 bringing the cumulative charge for the APS to £2.5 billion.

To reflect current experience of Payment Protection Insurance complaints received, the Group increased its PPI provision by £1,110 million in 2012 compared with £850 million in 2011, bringing the cumulative charge taken to £2.2 billion, of which £1.3 billion (59%) in redress had been paid by 31 December 2012.

In 2011, the Group recorded an impairment loss of £1,099 million in respect of its AFS portfolio of Greek government debt. In 2012, the vast majority of this portfolio was exchanged for Greek sovereign debt and European Financial Stability Facility notes; the Greek sovereign debt received in the exchange was sold.

Integration and restructuring costs of £1,415 million increased by £394 million versus £1,021 million in 2011, primarily driven by costs incurred in relation to the strategic restructuring of Markets and International Banking (M&IB) that took place during 2012.

Liability management exercises undertaken by the Group during 2012 resulted in a net gain of £454 million (2011 - £255 million).

The UK bank levy is based on the total chargeable equity and liabilities as reported in the balance sheet at the end of a chargeable period. The cost of the levy to the Group for 2012 was £175 million compared with £300 million in 2011.

Interest Rate Hedging Products redress and related costs

Following an industry-wide review conducted in conjunction with the Financial Services Authority, a charge of £700 million has been booked for redress in relation to certain interest-rate hedging products sold to small and medium-sized businesses classified as retail clients under FSA rules.

Regulatory fines

On 6 February 2013, RBS reached agreement with the Financial Services Authority, the US Department of Justice and the Commodity Futures Trading Commission in relation to the setting of LIBOR and other trading rates, including financial penalties of £381 million. The Group continues to co-operate with other bodies in this regard and expects it will incur some additional financial penalties.

Business review

Results summary continued

Tax

The tax charge was £441 million in 2012, compared with £1,075 million in 2011. The high tax charge in the year reflects profits in high tax regimes (principally US) and losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland), the reduction in the carrying value of deferred tax assets in Ireland in view of continuing losses, the reduction in the carrying value of deferred tax assets in Australia following the strategic changes to the Markets and International Banking businesses announced in January 2012 and the effect of the two reductions of 1% in the rate of UK corporation tax enacted in March 2012 and July 2012 on the net deferred tax balance.

Earnings per share

Basic loss from continuing operations was 54.5p per ordinary and equivalent B share compared with a loss of 22.7p in 2011. Adjusted earnings from continuing operations was 4.3p per ordinary and equivalent B share compared with a loss of 2.7p in 2011.

2012 compared with 2011 - statutory

Operating loss

Operating loss before tax for the year was £5,277 million compared with £1,396 million in 2011.

Total income

Total income decreased 27% to £17,941 million in 2012.

Net interest income

Net interest income decreased by 7% to £11,402 million.

Non-interest income

Non-interest income decreased to £6,539 million from £12,348 million in 2011. This included movements in the fair value of the Asset Protection Scheme resulting in a £44 million charge (2011 - £906 million), net gain on redemption of own debt of £454 million (2011 - £255 million) and a loss on own credit adjustments of £4,649 million (2011 - £1,914 million gain). Excluding these items, non-interest income was down 3% compared with 2011.

Operating expenses

Operating expenses increased to £17,939 million from £17,340 million in 2011. This included PPI costs of £1,110 million (2011 - £850 million), IRHP redress and related costs of £700 million, regulatory fines of £381 million, integration and restructuring costs of £1,415 million compared with £1,016 million in 2011, and write-down of goodwill and other intangible assets of £124 million, principally as a result of exits from selective countries and lower revenue projections by Markets. Excluding these items, operating expenses were down 8% driven by cost savings achieved as a result of the cost reduction programme.

Impairment losses

Impairment losses were £5,279 million, compared with £8,707 million in 2011.

Risk elements in lending represented 9.1% of gross loans and advances to customers excluding reverse repos at 31 December 2012 (2011 - 8.6%).

Provision coverage of risk elements in lending was 52% (2011 - 49%).

Tax

The tax charge for 2012 was £441 million (2011 - £1,075 million).

Loss per share

Basic loss per ordinary and equivalent B share from continuing operations was 54.5p per share compared with 22.7p per share in 2011.

Notes:

- (1) Interest receivable has been increased by £4 million (2012 and 2011 - £8 million) and interest payable has been increased by £83 million (2012 - £152 million; 2011 - £150 million) to record interest on financial assets and liabilities designated as at fair value through profit or loss. Related interest-earning assets and interest-bearing liabilities have also been adjusted.
- (2) Interest receivable was increased by £2 million in 2011 in respect of exceptional interest receivable.
- (3) Interest receivable has been decreased by £38 million (2012 and 2011 - nil) and interest payable has been decreased by £31 million (2012 - £138 million; 2011 - £143 million) in respect of non-recurring adjustments.
- (4) Interest receivable has been increased by nil (2012 - nil; 2011 - £5 million) and interest payable has been decreased by £11 million (2012 - £15 million; 2011 - £3 million) to exclude RFS Holdings minority interest.
- (5) Interest receivable includes £798 million (2012 - £565 million; 2011 - £627 million) in respect of loan fees forming part of the effective interest rate of loans and receivables.
- (6) Gross yield is the interest earned on average interest-earning assets of the banking book.
- (7) Interest spread is the difference between the gross yield and the interest rate paid on average interest-bearing liabilities of the banking business.
- (8) Net interest margin is net interest income of the banking business as a percentage of average interest-earning assets of the banking business.
- (9) The analysis into UK and overseas has been compiled on the basis of location of office.
- (10) Interest receivable and interest payable on trading assets and liabilities are included in income from trading activities.
- (11) Interest income includes amounts (unwind of discount) recognised on impaired loans and receivables. The average balances of such loans are included in average loans and advances to banks and loans and advances to customers.

Analysis of change in net interest income - volume and rate analysis

Volume and rate variances have been calculated based on movements in average balances over the period and changes in interest rates on average interest-earning assets and average interest-bearing liabilities. Changes due to a combination of volume and rate are allocated pro rata to volume and rate movements.

	2013 over 2012 - managed			2013 over 2012 - statutory

*Restated - see page 102.

Note:
(1) Managed basis excludes movements in own credit adjustments, Asset Protection Scheme, gain on redemption of own debt, strategic disposals and RFS MI.

2013 compared with 2012 - managed

Non-interest income decreased by £2,218 million to £8,450 million.

The majority of the decline in income was in Markets, where income from trading activities was £1,001 million lower as the division managed down the scale of the balance sheet and reduced risk. This was partially offset by a £506 million improvement in Non-Core trading losses.

Within other operating income, Non-Core recorded a loss of £334 million excluding rental income, primarily related to fair value adjustments associated with investment properties.

A £392 million reduction in operating lease income largely reflects the disposal of RBS Aviation Capital in Q2 2012. This was partially offset by lower depreciation.

2013 compared with 2012 - statutory

Non-interest income increased by £2,237 million to £8,776 million primarily due to the lower accounting charge for improved own credit of £120 million compared with £4,649 million in 2012.

Net fees and commissions fell by 7% principally reflecting declines in Markets, UK Corporate, International Banking and Non-Core.

The continuing strengthening of RBS's credit profile, albeit modest, resulted in a £120 million accounting charge in relation to own credit adjustment compared with £4,649 million in 2012.

Income from trading activities increased by £1,010 million to £2,685 million principally due the lower charge in relation to own credit adjustment and increase in Non-Core partially offset by a decline in Markets, where income from trading activities declined by £1,001 million as the division managed down the scale of the balance sheet and reduced risk.

The increase in other operating income predominantly reflected lower accounting charges for own credit adjustments partially offset by losses on disposal and value adjustments in Non-Core. In addition, the disposal of RBS Aviation Capital in June 2012 resulted in a £392 million reduction in operating lease income.

Business review

2012 compared with 2011 - managed

Non-interest income was down 4% at £10,668 million with higher profits on available-for-sale bond disposals in Group Treasury more than offset by a 10% decline in fees and commissions, largely due to a decline in UK Retail fees as a result of weaker consumer spending volumes.,

Markets trading income was sustained, despite the significant reduction in trading assets through balance sheet management and optimisation.

The decrease in other operating income predominantly reflected the disposal of RBS Aviation Capital in June 2012, which resulted in lower rental income in Non-Core.

2012 compared with 2011 - statutory

Non-interest income was down 47% at £6,539 million primarily due to the accounting charge for improved own credit of £4,649 million compared with a credit of £1,914 million in 2011, offset by a lower fair value charge of £44 million compared with £906 million in 2011 on the Asset Protection Scheme.

Net fees and commissions fell by 10% largely due to a decline in UK Retail fees, as a result of weaker consumer spending volumes, and in Markets, primarily due to the run-off in the cash equity business.

Markets trading income was sustained, despite the significant reduction in trading assets following its restructuring early in 2012.

The decrease in other operating income predominantly reflected own credit adjustments and the disposal of RBS Aviation Capital in June 2012, which resulted in lower rental income in Non-Core, partially offset by a lower fair value charge on the Asset Protection Scheme.

The continuing strengthening of RBS's credit profile resulted in a £4,649 million accounting charge in relation to own credit adjustment versus a gain of £1,914 million in 2011. This reflected a tightening of more than 340 basis points in the Group's cash market credit spreads over the year.

APS is accounted for as a derivative and the movements in fair value are recorded each quarter. The fair value charge was £44 million in 2012 versus £906 million in 2011.

*Restated - see page 102.

Note:

(1) Managed basis excludes PPI costs, Interest Rate Hedging Products redress and related costs, regulatory and legal actions, integration and restructuring costs, amortisation of purchased intangible assets, write-down of goodwill and other intangible assets, bank levy, bonus tax and RFS MI.

2013 compared with 2012 - managed

Operating expenses decreased by £541 million, 4%, to £13,313 million. Markets decreased by £327 million, 11%, to £2,610 million and Non-Core by £339 million, 36%, to £605 million, driven by lower staff numbers and reduced central support requirements on run-down.

Staff expenses were down by 7%, at £6,882 million, with headcount down by 4,400, principally in UK Retail, Non-Core and Markets.

The Group cost:income ratio increased from 63% to 68%, with the Core cost:income ratio increasing from 59% to 64%, driven by weaker income.

2013 compared with 2012 - statutory

Operating expenses increased by £1,629 million, or 9% primarily due to higher charges resulting from regulatory and legal actions, and write-down of goodwill and other intangible assets, primarily in International Banking. These were partially offset by lower charges on Payment Protection Insurance claims, Interest Rate Hedging Products redress and integration and restructuring costs.

Staff expenses were down by 13%. Excluding integration and restructuring costs of £280 million (2012 - £812 million), staff costs were down 7%, as staff numbers (FTEs) fell by 4,100 to 118,400, principally in UK Retail, Markets and Non-Core.

Charges of £2,394 million of regulatory and litigation provisions were recorded during the year primarily relating to mortgage-backed and other securities litigation in the US.

Write-down of goodwill and other intangible assets was £1,403 million and includes £1,059 million relating to the International Banking division following an impairment review.

Charges for PPI redress and related costs totalled £900 million, down £210 million from 2012. Of the cumulative provision of £3.1 billion, £2.2 billion had been utilised at 31 December 2013. The remaining provision of £900 million covers approximately twelve months of redress and administrative expenses.

Charges of £550 million were booked for Interest Rate Hedging Product redress and administration costs, down £150 million from 2012. The cumulative provision was £1.25 billion at 31 December 2013.

Business review

2012 compared with 2011 - managed

Operating expenses fell by £992 million, or 7%, with staff costs down 9% (but broadly stable as a percentage of total income) as headcount fell by 8,300 to 119,200. The decline in expenses was largely driven by Non-Core run-down and lower variable compensation (particularly in Markets), including bonus award reductions and clawbacks following the settlements reached with UK and US authorities in relation to attempted LIBOR manipulation. The run-off of exited businesses in Markets and International Banking, following the restructuring announced in January 2012, and simplification of processes and headcount reduction in UK Retail also yielded cost benefits.

Business Services costs were down 6% in the year, reflecting increased benefits from earlier cost saving programmes as a number of initiatives reached their full run rate. Technology Services costs were 8% lower and Corporate Services costs 4% lower. Headcount was 2% down on 2011.

The Core cost:income ratio was broadly flat at 59%, reflecting the ongoing focus on cost control in an environment where income growth remained challenging.

2012 compared with 2011 - statutory

Operating expenses increased by £599 million, or 3% primarily due to charges resulting from legacy conduct issues partially offset by Non-Core run-down and run-off of exited businesses in Markets and International Banking, following the restructuring announced in January 2012. Simplification of processes and headcount reduction in UK Retail also yielded cost benefits.

Staff expenses were cut by 4%. Excluding integration and restructuring costs of £811 million (2011 - £464 million), staff costs were down 9%, as headcount fell by 10,200 to 118,700.

To reflect current experience of Payment Protection Insurance complaints received, RBS increased its PPI provision by £1,110 million in 2012, bringing the cumulative charge taken to £2.2 billion, of which £1.3 billion in redress had been paid by 31 December 2012.

On 31 January 2013, the Financial Services Authority announced the findings of its industry-wide review of the sale of Interest Rate Hedging Products to some small and medium-sized businesses that were classified as retail clients under FSA rules. As a result, RBS provided £700 million in 2012 to meet the costs of redress.

On 6 February 2013, RBS reached agreement with the Financial Services Authority, the US Department of Justice and the Commodity Futures Trading Commission in relation to the setting of LIBOR and other trading rates, including financial penalties of £381 million. The Group continues to co-operate with other bodies in this regard and expects it will incur some additional financial penalties.

Integration costs

	2013 £m	2012 £m	2011 £m
Staff costs	—	—	38
Premises and equipment	1	(2)	6
Other administrative expenses	1	2	51
Depreciation and amortisation	—	—	11
	2	—	106

Note:

(1) Integration costs in 2011 excluded a £2 million charge included within net interest income and a loss of £3 million within other operating income in respect of integration activities.

Integration costs of £106 million in 2011 primarily relate to RBS N.V. (formerly ABN AMRO) integration activity during the year, which is now largely complete.

Accruals in relation to integration costs are set out below.

	At 1 January 2013 £m	Charge to income statement £m	Utilised during the year £m	At 31 December 2013 £m

*Restated - see page 102.

2013 compared with 2012

Restructuring costs were £489 million compared with £1,244 million in 2012. These costs primarily relate to the Retail transformation and the reduction in the size of Markets.

2012 compared with 2011

Restructuring costs were £1,244 million compared with £765 million in 2011. The increase was primarily driven by costs incurred in relation to the strategic restructuring of Markets and International Banking announced in January 2012.

Accruals in relation to restructuring costs are set out below.

	At 1 January 2013 £m	Currency translation adjustments £m	Charge to income statement £m	Utilised during the year £m	At 31 December 2013 £m

Of which RCR related (2)	4,490	—	—	4,490	—	—

Notes:

(1) Managed basis excludes sovereign debt impairment and related interest rate hedge adjustments.

(2) Pertaining to the creation of RCR and related strategy.

RBS Capital Resolution ('RCR') was set up from 1 January 2014 and will manage a pool of £29 billion of assets with particularly high capital intensity or potentially volatile outcomes in stressed environments, aiming to accelerate the run-down of these exposures over a three year period to free up capital for the bank. This revised strategy to run down high risk loans faster resulted in an increased impairment charge relating to impaired or non-performing assets transferred to RCR, reflecting adverse changes in our estimates of future cash flows. Further details about RCR are set out on pages 160 to 163.

2013 compared with 2012 - managed and statutory

Group loan impairment losses rose by 58% to £8,412 million reflecting the increased provisions recognised in connection with the creation of RCR. Adjusting for this, impairment losses fell by £1,393 million (26%) to £3,922 million, driven by significant improvements in Non-Core, Ulster Bank and UK Retail, partially offset by increases in International Banking, US Retail & Commercial and Markets.

Additional loan impairments arising from the RCR accelerated asset recovery strategy totalled £4,490 million, of which £3,118 million related to Non-Core, £892 million to Ulster Bank, £410 million to UK Corporate, £52 million to International Banking and £18 million to Markets.

Excluding the impact of the creation of RCR, Core Ulster Bank loan impairments fell by £482 million (35%) to £882 million, mainly as a result of continued improvement in retail mortgage debt-flow and in recovery trends. UK Retail loan impairments fell by £210 million (40%), primarily from lower default levels.

Excluding the impact of the creation of RCR, Non-Core loan impairments fell by £792 million to £1,528 million, reflecting the continued reduction in the overall portfolio.

2012 compared with 2011 - managed and statutory

Loan impairment losses declined by £1,926 million to £5,315 million, primarily driven by a £1,518 million fall in Non-Core impairments, mostly in the Ulster Bank and commercial real estate portfolios.

Core loan impairments were down £408 million, or 12%, largely due to lower default rates in UK Retail and an improved credit environment for US Retail & Commercial, which helped drive impairment reductions of £259 million and £165 million respectively. Core Ulster Bank impairments stabilised, though still at a very high level (£1,364 million in 2012 versus £1,384 million in 2011).

Loan impairments as a percentage of gross loans and advances improved by 30 basis points, principally reflecting the improved credit profile in Non-Core and the better US credit environment.

Loan impairment provisions rose to £21.3 billion, increasing coverage of risk elements in lending to 52%, compared with 49% in 2011.

Actual tax charge	(382)	(441)	(1,075)

*Restated - see page 102.

2013 compared with 2012 - managed and statutory

The tax charge in the year ended 31 December 2013 reflects losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland), a reduction in the carrying value of the deferred tax asset in respect of UK losses and the effect of the reduction of 3% in the rate of UK corporation tax enacted in July 2013.

2012 compared with 2011 - managed and statutory

The high tax charge in 2012 reflects profits in high tax regimes (principally US) and losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland), the reduction in the carrying value of deferred tax assets in Ireland in view of continuing losses, the reduction in the carrying value of deferred tax assets in Australia following the strategic changes to the Markets and International Banking businesses announced in January 2012, and the effect of the two reductions of 1% in the rate of UK corporation tax enacted in March 2012 and July 2012 on the net deferred tax balance.

Business review

Divisional performance

The results of each division on a managed basis are set out below. The results are stated before movements in own credit adjustments, Payment Protection Insurance (PPI) costs, Interest Rate Hedging Products (IRHP) redress and related costs, regulatory and legal actions, sovereign debt impairment and related interest rate hedge adjustments, integration and restructuring costs, gain on redemption of own debt, write-down of goodwill, Asset Protection Scheme, amortisation of purchased intangible assets, strategic disposals, bank levy, bonus tax, write-down of other intangible assets and RFS MI. The impact of the establishment of RBS Capital Resolution is included within the 'managed basis' results.

Business Services directly attributable costs have been allocated to the operating divisions, based on their service usage. Where services span more than one division an appropriate measure is used to allocate the costs on a basis which management considers reasonable. Business Services costs are fully allocated and there are no residual unallocated costs.

As discussed on page 102, following a share sale in March 2013, Direct Line Group is no longer an operating segment. Prior periods have been restated accordingly.

Group Centre directly attributable costs have been allocated to the operating divisions, based on their service usage. Where services span more than one division, the costs are allocated on a basis management considers reasonable. The residual unallocated costs remaining in the Group Centre relate to volatile corporate items that do not naturally reside within a division.

Treasury costs are allocated to operating divisions as follows: term funding costs are allocated or rewarded based on long term funding gap or surplus; liquidity buffer funding costs are allocated based on share of overall liquidity buffer derived from divisional stresses; and capital cost or benefit is allocated based on share of divisional risk-adjusted risk-weighted assets (RWAs).

Notes:

- (1) Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).
- (2) Provision coverage percentage represents loan impairment provisions as a percentage of risk elements in lending.
- (3) Divisional RWAs are based on a long-term conservative average secured mortgage probability of default methodology rather than the current lower point in time basis required for regulatory reporting.

In March 2013 UK Retail announced its strategy to become a simpler and more customer-focused business. Investment of £700 million over the next 3-5 years has been committed to build the best retail bank in the UK. Good progress has been made with £180 million of investment during 2013 through a number of initiatives directed at enhancing customer service and simplification of products and services. These have included:

- Improvements to Mobile and Digital Banking which continue to evolve in line with how customers prefer to conduct their business. One example of this is the enhancements in the mobile application allowing customers to pay their mobile phone contacts and obtain cash without using their debit card with the award winning 'Get Cash'. Investment in digital products and services continued in 2013, with 50% of eligible customers now banking online or on mobile. We currently have 5.6 million online users and 2.9 million customers using our mobile app with over 100 million transactions made in 2013. Branch counter transactions were 31 million or 11% lower across the same period. In addition, UK Retail now has over 2.5 million active mobile users, using the service 28 times a month on average. Mobile net promoter scores continued to increase in 2013.

- During the year UK Retail invested in the introduction of a new integrated telephony system, increased training and the professional development of our staff. We spent more time on each call to support excellent customer service and to promote relevant offerings, including self service.
- During Q1 2013 mortgage advisors attended extensive training courses to help ensure customers receive the best possible outcome to meet their needs. The training affected balance growth during H1 2013; however, application volumes have rebounded quickly with the launch of competitively priced products and the 'NatYes' and 'RBYES' advertising campaigns leading to H2 2013 applications being 30% higher than H1 2013. RBS was the first bank to be ready to deliver the second phase of the UK Government's Help To Buy scheme, launched in early October 2013. Extended opening hours in branches helped to deliver more than 3,000 approvals assisting young people and families across Britain buy their home. Gross mortgage lending increased 3% year-on-year to £14.3 billion with Q4 2013 25% higher than Q4 2012.

Business review

UK Retail continued

- Significant focus on streamlining processes has benefited all distribution channels, with the capacity created allowing more time for staff coaching and resulting in advisors spending more time and having better conversations with customers.
- In addition, our product range has been simplified down from 56 to 46 with several products winning awards. A highlight of this UK Retail strategy is the success of the new instant saver product launched in Q4 2012, which at the end of 2013 had more than £10 billion in balances. Furthermore, nearly 800,000 customers have registered for Cashback Plus online since launch in Q3 2013 and are being rewarded for using their debit cards with selected retailers.
- A major branch refurbishment programme is under way with over one quarter completed. 350 branches now have a digital banking zone where customers can use in-branch technology to access online banking. Wi-Fi in-branch allows customers to access their account via their own devices.

During 2013 good progress has been made with FCA (Financial Conduct Authority) reportable complaints, which declined 22%. In addition, the provision relating to historic Payment Protection Insurance (PPI) mis-selling was increased by £860 million, bringing the total to £3.0 billion. The PPI expense is not included in the operating profit of UK Retail.

In 2014, UK Retail will aim to maintain a leading position in digital banking, launching new capability and customer proposition through mobile devices.

2013 compared with 2012

Operating profit increased by 3% to £1,943 million driven by a 39% decline in impairment losses. Net interest income was broadly stable, though investment advice income was adversely impacted following changes introduced by the Retail Distribution Review (RDR). Costs increased primarily because of a higher FSCS levy and other regulatory charges totalling £116 million in the year, conduct-related provisions of £63 million and additional technology investment of £45 million.

Mortgage balance growth was affected in H1 2013 by mortgage advisor training; however, balances recovered during H2 2013 assisted by early adoption of the second phase of the UK Government's Help To Buy scheme. Gross lending increased to £8.9 billion in H2 2013. Customer deposits increased by 7%, above the UK market average of 4% due to strong growth in both current accounts (13%) and instant access savings accounts (15%).

Net interest income was broadly flat.

- Mortgage new business margins reduced in line with market conditions; however, overall book margins improved.
- Deposit margins declined reflecting the impact of continued lower rates on current account hedges. Savings margins, however, have increased over 2013 with improved market pricing.

Non-interest income fell by 2% to £958 million due to subdued advice income post RDR.

Direct costs increased by 7% due to higher FSCS levy and other regulatory charges and conduct-related provisions of £63 million. This was partly offset by lower staff costs due to a reduction in headcount of 2,300. Indirect costs increased by 3%, largely due to investment in technology.

Impairments declined by 39% to £324 million due to lower customer defaults across all products reflecting continued improvement in asset quality.

Risk-weighted assets declined by 4% to £43.9 billion largely reflecting balance reductions across the unsecured portfolio and quality improvements.

2012 compared with 2011

Operating profit fell by 6% as a 10% decline in income was only partly offset by lower costs, down 6%, and improved impairment losses, down 33%.

Mortgage balances grew by £4.1 billion with the share of new business at 10%, ahead of our stock level of 8%. Growth as a result of FLS was starting to appear by the end of the year as mortgage applications moved through the pipeline to completion. Deposit growth of 6% was in line with the market and drove a 300 basis point improvement in the loan:deposit ratio to 103%.

Net interest income was down 7% due to weaker deposit margins and reduction in unsecured balances, partly offset by mortgage growth. Unsecured balances now represent 13% of total loans and advances to customers compared with 23% in 2008, following realignment of risk appetite and strong mortgage growth. Net interest margin declined as a result of lower rates on current account hedges and increased competition on savings rates in the early part of the year, partly offset by widening asset margins.

Non-interest income was 19% lower mainly due to:

- lower unauthorised overdraft fees as we continue to help customers manage their finances by providing mobile text alerts and further improving mobile banking functionality;
- weak consumer confidence lowering spending and associated fees on cards; and
- lower investment income as a result of weak customer demand and less advisor availability due to restructuring and retraining in preparation for regulatory changes in 2013.

Costs were down £150 million, 6%, driven by the ongoing simplification of processes across the business, lower headcount and lower FSCS levy.

Impairment losses were £259 million or 33% lower, reflecting the continued benefit of risk appetite tightening in prior years and also a smaller unsecured loan book. Impairments as a percentage of loans and advances were 50 basis points versus 70 basis points in 2011.

Risk-weighted assets continued to improve over the year as the portfolio mix adjusted, with increases in lower-risk secured mortgages, decreases in unsecured lending and further quality improvements across the book.

2013 was a year in which UK Corporate underlined its commitment to support the UK economy and played an active role in the communities it operates in.

As part of this commitment the Bank appointed Sir Andrew Large to undertake a thorough and independent review of the lending standards and practices used by RBS and NatWest. UK Corporate will implement all of the Independent Lending Review's recommendations and is adopting a revised strategy and capabilities to enhance support to SMEs and the wider UK economic recovery while maintaining sound lending practices.

As part of the division's concerted effort to support its SME customers, UK Corporate has been proactively reviewing the business needs of SME customers to understand if they could benefit from the offer of additional facilities. In 2013, over 12,000 customers were identified for additional funding under UK Corporate's 'Statements of Appetite' initiative. The initiative resulted in approximately £6 billion of new funding being offered to customers.

The division has continued to support the government-backed Funding for Lending Scheme (FLS) and as at 31 December 2013 had allocated in excess of £4.7 billion of new FLS-related lending to almost 25,000 customers, £3.1 billion of which has been drawn since the scheme was launched. Mid-sized manufacturers are being offered targeted support, with interest rates reduced by more than 1% in some cases. SME customers benefited from both lower interest rates and the removal of arrangement fees.

Business review

As well as delivering a range of lending initiatives, UK Corporate continued to develop new propositions for its customers. Following a successful pilot UK Corporate launched a leading business-to-business online community platform, Bizcrowd, to support independent needs matching. By the end of 2013 Bizcrowd had over 27,000 users and is now helping to bring businesses together across the UK.

During the course of 2013 UK Corporate's Business Banking Enterprise Programme helped over 40,000 entrepreneurs through over 1,000 events. Through its combination of nationwide start-up surgeries, mobile business schools and business academies, the programme offers support and advice to aspiring entrepreneurs, new start-up businesses and established SMEs looking to grow. Combined with UK Corporate's skills-based volunteering scheme, a programme offering all employees five days to volunteer with a charitable organisation, UK Corporate continued to deliver on its on-going commitment to communities.

2013 compared with 2012

The business delivered a return on equity of 11.0% excluding the impact of increased impairment losses related to the creation of RCR, primarily property and shipping exposures, which reduced return on equity by 3.1%.

Net interest income was 3% lower at £2,874 million, as increased income from re-pricing initiatives was offset by the lower rate environment impacting deposit returns, the non-repeat of 2012 deferred income recognition revisions (£58 million) and reduced lending volumes, as loan repayments coupled with run-off in property and shipping sectors outpaced new lending.

Non-interest income reduced 9% to £1,593 million, primarily from lower Markets revenue share income, a decline in operating lease income (offset by an associated reduction of operating lease depreciation in expenses), lower lending fees and higher derivative close-out costs associated with impaired assets.

Expenses, increased 6% to £2,219 million, primarily as a result of remediation provisions of £68 million, an increased share of branch network costs and an uplift in investment spend. This was offset by the reduction in operating lease depreciation, a decline in Markets revenue share related costs and lower staff incentive expenditure.

Whilst full year impairments include the additional impact of increased impairment losses related to the creation of RCR (£410 million), underlying impairments improved by £60 million, or 7%, to £778 million due to lower individual and collectively assessed provisions in the SME business, partially offset by higher individual cases in the mid-to-large corporate business.

Risk-weighted assets were broadly in line with 2012 at £86.1 billion as reduced asset volumes and movements into default offset increases resulting from the implementation of risk model changes.

2012 compared with 2011

With economic factors continuing to suppress business confidence, 2012 saw lower income and operating profit. Nonetheless, the business delivered a return on equity of 14.5%, slightly below the prior year and comfortably ahead of the cost of capital.

Operating profit decreased by 7%, with income down 3% and increased impairments, up 6%, partially offset by a 3% decrease in costs.

Net interest income was 4% lower, reflecting a 3% fall in lending volumes as loan repayments outstripped new lending, deposit margin compression due to strong competition and the continuation of low yields on current accounts. This was partially offset by improved asset margins and a 1% increase in deposit volumes.

Non-interest income was broadly in line with 2011, with stable income from transaction services, asset finance, Markets revenue share and other lending fees.

Total costs were down 3% due to tight control over direct discretionary expenditure combined with lower indirect costs as a result of operational savings, partially offset by increased investment expenditure.

Core lending balances were up £200 million, excluding the property, housebuilding and construction sectors. The loan:deposit ratio decreased by 400 basis points, principally reflecting deposit growth and portfolio de-risking, particularly in commercial real estate. The Group took part in a number of Government initiatives, seeking responsibly to stimulate additional credit demand in the face of continued customer deleveraging and low business confidence levels.

Impairments increased by 6% with lower specific provisions, mainly in the SME business, more than offset by reduced levels of latent provision releases across the division (£44 million in 2012 versus £226 million in 2011). Impairments as a percentage of loans and advances edged up modestly to 80 basis points.

Risk-weighted assets increased by 9% as regulatory changes to capital models during H2 2012 totalling £15 billion (primarily the implementation of the market-wide slotting approach on real estate and increases to default risk weights in other models) were partly offset by a fall in funded assets.

Not reflected in operating results was UK Corporate's £350 million share of the provision for interest rate swap redress which relates to prior periods, mainly pre-2008.

Business review

2013 saw a major shake-up of the UK financial advice landscape with the implementation of the Retail Distribution Review (RDR). Clients welcomed Coutts' new fully compliant advice-led model where Coutts requires its advisers to achieve the more stringent Level 6 rating, in excess of the FCA's minimum Level 4 requirement. Coutts has received a number of industry accolades for its levels of service, such as 'UK Private Bank of the Year' (The Banker Global Private Banking Awards). Total assets under advice grew to approximately £3 billion over the year.

Following the deposit re-pricing strategy implemented in the second half of 2013 deposit margins have significantly improved. Lending volumes have remained resilient despite pay-downs in line with best-advice policy under RDR. In addition, a new international trust strategy was announced, strengthening the client offering by positioning it as a market-leading, client-centric trust business. This was achieved by the creation of a centre of excellence in Jersey, accompanied by withdrawal from the Cayman Islands and restructuring of the Geneva trust business.

Work continued on streamlining client-facing processes and driving increased benefits from the division's global technology platform, including significant enhancements to Coutts' online and digital client channels. A streamlining of the London property footprint from 11 buildings to 2 was also concluded, alongside further office rationalisation in the International business.

2013 compared with 2012

Operating profit was 9% lower at £221 million, driven by lower income partially offset by a decrease in expenses and impairment losses.

Income declined by 7% to £1,093 million, with the reduction in net interest income reflecting the lower spread earned on deposits as a result of lower Group funding requirements.

Non-interest income fell by 7% to £419 million due to the disposal of the Latin American, Caribbean and African businesses for a profit of £15 million in H1 2012 together with a decline in fee income in the International business.

Expenses were 4% lower at £843 million as a result of reduced headcount, tight discretionary cost management and the non-recurrence of two regulatory fines totalling £26 million incurred during 2012. This was partially offset by a one-off UK tax treaty charge in the International business.

Client assets and liabilities managed by the division declined by 2%, with a £1.7 billion reduction in deposits following re-pricing initiatives in the UK in line with the wider Group funding strategy. Assets under management increased by 3% due to positive market movements. Lending was 2% lower, reflecting increased levels of repayments in the UK.

Impairments were £17 million lower at £29 million, largely reflecting a small number of specific impairments.

2012 compared with 2011

Operating profit increased by £1 million to £243 million driven by higher income partially offset by increased expenses and impairment losses.

Total income increased by £66 million, with net interest income up £75 million, largely driven by improvements in margins and strong divisional treasury income, particularly during H1 2012.

Non-interest income fell by 2% as the gain from the disposal of the Latin American, Caribbean and African businesses was more than offset by a decline in fee income in the UK and lower investment volumes, driven by continued economic uncertainty.

Expenses were £44 million or 5% higher at £881 million, with significant investment in change programmes, including the development of new products and services capability and the implementation of RDR in the UK.

Expenses also increased as a result of client redress following a past business review into the sale of the ALICO Enhanced Variable Rate Fund announced in November 2011 and a Financial Services Authority fine of £8.75 million relating to Anti Money Laundering control processes.

Client assets and liabilities fell by 1% with a £2 billion decrease in assets under management, primarily reflecting low margin client outflows of £1.4 billion and the impact of client transfers following the disposal of the Latin American, Caribbean and African businesses. This fall was partially offset by increases in lending and deposit volumes.

Impairment losses were £46 million, up £21 million, largely reflecting a small number of large specific impairments.

International Banking provides for the needs of its customers through its offering of debt financing, risk management and transaction services across its network. Business conditions remain challenging as themes of low interest rates and margin compression continue. International Banking remained focused on cost discipline throughout 2013 and continued to strengthen its balance sheet. Despite credit model uplifts, risk-weighted assets reduced 6% year on year.

The strength of the division's efforts in serving its customers' needs is reflected in recent external industry awards and recognition, including:

- Best Trade Finance Bank, UK, and Best Supply Chain Finance Provider, Western Europe - Global Finance. Global Trade Review magazine's 'Leaders in Trade' award for Best Bank for Documentary Processing 2013, making this the 4th consecutive win for the bank.

- A good performance in the Euromoney 2013 Cash Management Survey, particularly in Europe, ranking #1 in the Netherlands, #2 in the UK and #2 in Western Europe. International Banking improved on last year's performance in APAC, achieving a #8 ranking, and retained a #9 ranking in North America and a #6 ranking globally.
- Received the 'Most Innovative Investment Bank for Loans' award at The Banker Investment Banking Awards 2013 providing a further indication that RBS is putting customers at the heart of its business.
- Best Debt House, UK - Euromoney.

Business review

International Banking continued

2013 compared with 2012

Operating profit, decreased by £315 million as lower income and higher impairments, including £52 million in relation to the accelerated asset recovery strategy associated with RCR, were only partially offset by lower costs.

Income was 13% lower:

- Cash management was 22% lower reflecting a decline in three-month LIBOR rates as well as increased funding costs of liquidity buffer requirements.
- Loan portfolio decreased by 6%, in line with a smaller balance sheet.

Expenses were down £77 million, or 5%, reflecting continued emphasis on cost control and timely run-off of discontinued business.

Impairment losses were £118 million higher than in 2012, including two large single-name provisions and £52 million in relation to the impact of the accelerated RCR asset recovery strategy.

Third party assets were down 8% due to reductions in the loan portfolio following increased levels of customer repayments partially offset by an increase in Asia trade volume.

Customer deposits declined by 15% in line with a change in Group funding strategy.

Risk-weighted assets decreased by 6% primarily as a result of management action to mitigate credit model increases and a smaller balance sheet.

Return on equity was 4% or 5% excluding the impact of the accelerated RCR asset recovery strategy compared with 9% in 2012.

2012 compared with 2011

Operating profit decreased by £161 million as a decline in income was only partially mitigated by lower expenses and impairment losses.

Income was 17% lower:

- Loan portfolio decreased by 32%, mainly due to a strategic reduction in assets, in order to allocate capital more efficiently, and the effect of portfolio credit hedging and lower corporate appetite for risk management activities.
- Cash management was broadly in line with the previous year. Deposit margins declined following reductions in both three month LIBOR and five year fixed rates across Europe; however, this was offset by lower liquidity costs due to the strategic initiative to reduce short-term bank deposits.
- Trade finance increased by 6% as a result of increased activity, particularly in Asia.
- The restructuring in 2012 led to a reduction in activities undertaken in the division, which contributed to a decline in income.

Expenses declined by £215 million, reflecting planned restructuring initiatives following the formation of the International Banking division. Savings were achieved through headcount reduction, run-off of discontinued businesses and a resulting decrease in infrastructure support costs. Revenue-linked expenses also fell in line with the decrease in income.

Impairment losses decreased by £57 million with the non-repeat of a single name impairment.

Third party assets declined by 24%, with targeted reductions in the lending portfolio following a strategic reduction in assets.

Customer deposits increased by 2%. Successful efforts to rebuild customer confidence following the Moody's credit rating downgrade and the Group technology incident in June 2012 outweighed economic pressures. This, coupled with the managed reduction in loans and advances to customers, improved the loan:deposit ratio to 91%.

Bank deposits were down 51%, mainly as a result of lower short-term balances, reflecting a strategic initiative to reduce liquidity outflow risk.

Risk-weighted assets increased by 20%, reflecting the impact of regulatory uplifts partially offset by successful mitigation through balance sheet reduction. Risk-weighted asset intensity in the loan book has increased significantly given the uplifts, which will result in strategic adjustments going forward.

The creation of RCR will expedite the resolution of underperforming, capital intensive assets and allow Ulster Bank to focus on building a stronger core business for the future. The creation of RCR resulted in additional charges of £911 million in Ulster Bank's results in Q4 2013.

Operating performance for 2013, excluding the impact of the creation of RCR, improved by £494 million or 48% versus prior year primarily reflecting higher income and a 64% reduction in mortgage impairment losses driven by enhanced collections effectiveness, the development of programmes to assist customers in financial difficulty and a modest improvement in economic conditions.

Ulster Bank is committed to supporting the Irish economic recovery and £1.7 billion of funding has been made available to support new lending in 2014, £1 billion for business customers and £700 million for personal customers. The bank made considerable progress during 2013 in its commitment to building a really good bank that serves customers well.

Business review

Simplifying Banking

Ulster Bank delivered a number of improvements for personal and business customers in 2013:

- The launch of initiatives such as "Get Cash", "Pay Your Contacts" and "Emergency Cash" provided a new range of simple and convenient services for customers to access their cash and make payments online and via mobile.
- Further development of online and mobile banking for business customers focused on providing an efficient and effective day-to-day banking service. Enhancements during 2013 included a speedy and simplified account application process; registration for Anytime Banking via telephone; ability to manage personal and business accounts together and access to extended transaction history.
- The efficiency and effectiveness of Ulster Bank's digital offering was evidenced by a 55% increase in mobile app registrations and more than 100 million transactions were carried out via digital channels during 2013. Over 315,000 customers regularly use mobile app banking services and 640,000 customers make regular use of online Anytime banking services.

Supporting Enterprise and the Community:

- Supporting entrepreneurship and the growth of small businesses in the local community is a long term commitment of Ulster Bank. Highlights in 2013 included:
- The Community Impact Fund and Business Woman Can initiative which facilitated women in local communities to set up their own business. The bank also supported a number of projects in schools across the island of Ireland through its MoneySense programme.
- Ulster Bank's dedicated SME teams offer professional support and a range of products to help customers meet their banking challenges and grow their business. The agri-specialist team has introduced a number of initiatives during 2013 to support the farming sector.
- The 'One Week in June' initiative raised £430,000 for a number of Irish charities through a series of fundraising events involving both customers and staff.
- In partnership with Concern Worldwide and Disasters Emergency Committee, Ulster Bank ATMs, branches and online banking facilitated donations to the Philippines Typhoon emergency appeals.

Helping Customers out of Financial Difficulty:

- Ulster Bank is committed to working with all customers in financial difficulty to find a solution. The Bank continued to invest in its Problem Debt Management Unit and further developed a range of solutions to make it easier for customers to enter into arrangements. As a consequence, the number of mortgage customers in arrears of 90 days or more has decreased every month since March 2013.

2013 compared with 2012

Excluding the impact of the creation of RCR, operating result improved by £494 million or 48% primarily due to a higher income and lower impairment losses on the mortgage portfolio.

Total income increased by £26 million or 3% to £871 million primarily reflecting hedging gains on the mortgage portfolio. Net interest margin for 2013 increased by 3 basis points to 1.91% although net interest income was £18 million lower at £631 million, largely driven by lower interest-earning assets and a higher cost of funding.

Total expenses increased by £33 million or 6% to £554 million driven by the costs of mandatory change programmes such as the Single Euro Payment Area, £18 million, an investment of £10 million in programmes to support customers in financial difficulty and an accelerated depreciation charge of £12 million.

Impairment losses, excluding the impact of RCR, were £482 million, 35% lower. This was predominantly due to a sharp reduction in losses on the mortgage portfolio which reduced by £411 million or 64% due to a decline in arrears levels driven by an improved collections performance and the development of programmes to assist customers in financial difficulty, coupled with stabilising residential property prices.

The loan:deposit ratio reduced from 130% to 120% during 2013 reflecting continued customer deleveraging and low levels of demand for new lending. Retail and SME deposit balances increased by 2% during 2013, offset by a reduction in wholesale customer balances, resulting in a 2% decline in total deposit balances.

Risk-weighted assets decreased by 15% reflecting a smaller performing loan book and stabilising credit metrics.

2012 compared with 2011

Operating loss increased by £56 million primarily reflecting a reduction in income driven by lower interest earning asset volumes.

Total expenses fell by £26 million, reflecting the benefits of cost saving initiatives.

Impairment losses remained elevated, as weak underlying credit metrics prevailed. Falling asset values throughout most of 2012 and high levels of unemployment coupled with weak domestic demand continued to depress the property market. The impairment charge for 2012 was driven by a combination of new defaulting customers and deteriorating security values. Risk elements in lending increased by £2 billion during the year reflecting continued difficult conditions in both the commercial and residential property sectors.

The loan to deposit ratio improved from 143% to 130%, driven by a combination of deposit growth and a decrease in the loan book. At constant currency, the loan book decreased by 2% as a result of natural amortisation and limited new lending due to low levels of market demand. Retail and SME deposits increased by 8%; however, this was partly offset by outflows of wholesale balances driven by market volatility and the impact of a rating downgrade in the second half of 2011.

Business review

US Retail & Commercial continued

On 1 November 2013, RBS announced plans to accelerate its previously announced partial initial public offering of RBS Citizens Financial Group (RBSCFG) into the second half of 2014. RBS intends to fully divest its position in RBSCFG by the end of 2016, leaving it as a standalone regional bank, owned by public shareholders.

RBSCFG has commenced a number of actions in 2013 aimed at improving financial performance. RBSCFG continued to drive profitable growth in its core business by focusing on the customer and delivering a differentiated experience. In addition, RBSCFG has launched a series of initiatives aimed at narrowing the performance gap with competitors, including selectively expanding lending areas where RBSCFG has proven capabilities (such as Mid-Corporate, Specialty Verticals) and selective expansion of risk appetite (moving from super-prime to prime in certain products).

RBSCFG has also launched transformational initiatives in 2013 including:

- A special initiative called Project 'TOP', 'Tapping Our Potential'. The project intends to improve the overall effectiveness and efficiency of the franchise by utilising ideas generated by our colleagues.
- On 7 January 2014, RBSCFG announced the sale of its Chicago-area retail branches, small business operations and select middle market relationships in the Chicago market to U.S. Bank National Association, the lead bank of U.S. Bancorp. RBSCFG will maintain a presence in Chicago through its commercial business lines and several national consumer business lines not included in the sale⁽¹⁾. The sale, expected to close in mid-2014 (subject to regulatory approval), includes 94 Charter One branches in the Chicago area, \$5.3 billion in local deposits and \$1.1 billion in locally originated loans for a deposit premium of approximately \$315 million, or 6%. The proceeds will be reinvested in the remaining franchise, where we have stronger market positions and better long-term growth prospects.

Moreover, RBSCFG continued to grow its core franchise by consistently delivering a differentiated customer experience and leveraging its strong market presence (top 5 deposit market share in 8 of its top 10 Metropolitan Statistical Areas).

In 2013, Consumer Banking continued to improve customer convenience, address the shift in customer preference, and expand its distribution presence. Consumer Banking installed more than 900 intelligent deposit machines (enhanced ATMs), improved the web account opening process, simplified online banking log-in, and released a new mobile application optimised for the iPad. Consumer Banking also implemented a new branch image capture system throughout the network that automates teller processing and offers secure paperless transactions, debit card identification and clear receipts that provide on-the-spot balance availability.

Notes:

(1) RBSCFG will continue to operate several businesses in the Chicago market, including the consumer businesses lines of mortgage lending, Education Finance and Auto Finance. RBS Citizens, the bank's commercial banking division, will continue a diverse range of commercial banking operations in Chicago including Asset-Based Lending, Asset Finance, Equipment Leasing, Commercial Real Estate, Treasury Solutions, Capital Markets, Sponsor Finance, Franchise Finance and the majority of its corporate banking business.

(2) Source: SNL Financial. Based on most recent regulatory data as of Q3 2013. Market includes all US banks required to file regulatory reports.

In recognition of the customer experience it offers, Money magazine named Citizens Bank one of the "Best Banks in America" in 2013. In addition to a "robust presence" defined by its many branches and ATMs, Money recognised RBSCFG's extended branch hours that include seven-day-a-week supermarket branches. Money also noted that RBSCFG's convenience options also extend to its mobile banking apps for Android and iPhone, which are generating positive customer feedback in the industry. An August report issued by Xtreme Labs noted that "Citizens Bank is the only bank with the highest rated apps on both Android (4.5 stars) and iOS (4.5 stars) platforms".

The Small Business Banking and Commercial Enterprise Banking divisions were integrated into one consolidated Business Banking division within Consumer Banking, targeting companies with up to \$25 million in annual sales. The consolidation will enhance the customer experience, transform sales and service, and align products and processes.

Commercial Banking remained focused on growing and deepening relationships by providing thought leadership and improved product capabilities to clients. Commercial and Industry loan growth was 8.5% compared with the same time period a year ago, which was 1.3% higher than the market⁽²⁾. The strong results are partially due to the launch of several growth initiatives, which includes expanding our MidCorporate business nationally, as well as growing our Franchise Finance, Lender Finance and other key industry verticals.

Corporate Finance & Capital Markets continued to take market share from both regional competitors and large money centre banks. Commercial Banking moved up in the Overall Middle Market Bookrunner league table from an unranked position in 2009 to #6 by origination volume and #8 by number of transactions in Q4 2013.

Furthermore, the strategic alliance with Oppenheimer allowed Commercial bankers to deliver M&A ideas and solutions that are helping us provide comprehensive solutions to our clients. This alliance won the Barlow Research Associates' Monarch Innovation Award for "Most Innovative Product". The award highlights RBSCFG's commitment to making it easier for middle market companies to develop financial strategies that encompass both commercial banking and investment banking products and services.

As a result of our ongoing focus on providing thought leadership to our clients, our most recent client survey (Q3 2013) showed significant improvement in Middle Market customer satisfaction metrics over the same period a year ago. Net Promoter score increased from 36 to 50, which is well above the peer average of 42. "Proactively Provides Advice and Solutions" score was up from 62% to 85% and lead relationships as a percent of total relationships improved from 51% to 58%. Both metrics are strong indicators of our Commercial bankers' thought leadership capabilities.

Business review

2013 compared with 2012

Operating profit of £647 million (\$1,012 million) was down £107 million (\$184 million), or 14%. The operating environment and market conditions remained challenging, with intense competition for loans. An extended period of low short-term rates limited net interest margin expansion and the rise in long-term rates dramatically slowed mortgage refinance volumes.

Net interest income was down 1% at £1,916 million (\$2,998 million) due to a smaller investment portfolio, consumer loan run-off and the effect of prevailing economic conditions on asset yields partially offset by the benefit of interest rate swaps, commercial loan growth and favourable funding costs.

Average loans and advances were flat, with commercial loan growth of 5% despite competition for lending opportunities offset by run-off of long-term fixed-rate consumer products.

Average customer deposits were flat, with planned run-off of high priced time deposits and lower wholesale deposits offset by growth achieved in checking and money market balances. Consumer checking balances grew by 3% while small business checking balances grew by 7% over the year.

Excluding the £47 million (\$75 million) gross gain on the sale of Visa B shares in 2012, non-interest income was down £39 million (\$83 million), or 4% at £1,073 million (\$1,679 million), reflecting lower mortgage banking fees as refinancing volumes have slowed, and lower deposit fees. This was partially offset by higher securities gains and commercial banking fee income.

Excluding the £88 million (\$138 million) litigation settlement in 2012 relating to a class action lawsuit regarding the way overdraft fees were assessed on customer accounts prior to 2010 and the £8 million (\$13 million) litigation reserve associated with the sale of Visa B shares, total expenses of £2,186 million (\$3,421 million) were broadly in line with prior year. This largely reflects a mortgage servicing rights impairment recapture driven by the increase in long-term rates offset by the cost of regulatory compliance and new technology investments and a one-off £21 million (\$33 million) pension gain in 2012.

Impairment losses increased by £65 million (\$99 million) to £156 million (\$244 million) for the year and represented 0.3% of loans and advances to customers.

2012 compared with 2011

US Retail & Commercial posted an operating profit of £754 million (\$1,196 million), up £217 million (\$336 million), or 40%, from 2011. Excluding the £88 million (\$138 million) litigation settlement in Q1 2012 and the £39 million (\$62 million) net gain on the sale of Visa B shares in Q2 2012, operating profit was up £266 million (\$412 million), or 50%, largely reflecting lower impairment losses due to an improved credit environment.

Net interest income was up £53 million (\$47 million), or 3%, driven by targeted commercial loan growth, deposit pricing discipline and lower funding costs. This was partially offset by consumer loan run-off and lower asset yields reflecting prevailing economic conditions.

Non-interest income was up £7 million. In US dollar terms non-interest income was down \$10 million, or 1%, reflecting a decline in debit card fees as a result of the Durbin Amendment legislation and lower securities gains and deposit fees. This was largely offset by strong mortgage banking fees of £69 million (\$109 million), up 71%, and the £47 million (\$75 million) gross gain on the sale of Visa B shares.

Gross loans and advances to customers were down £0.3 billion. In US dollar terms loans and advances to customers were up \$3.1 billion, or 4%, due to strong growth in commercial loan volumes.

Customer deposits decreased by 1% as a result of movements in foreign exchange rates partially offset by strong growth achieved in checking balances. Consumer checking balances fell by 1% while small business checking balances grew by 4% over the year.

Excluding the £88 million (\$138 million) litigation settlement, relating to a class action lawsuit regarding the way overdraft fees were assessed on customer accounts prior to 2010, and the £8 million (\$13 million) litigation reserve associated with the sale of Visa B shares, and a one-off £21 million (\$33 million) pension gain in Q4 2012, total expenses were down 1%, reflecting lower loan collection costs and the elimination of the Everyday Points rewards programme for consumer debit card customers, partially offset by higher operational losses.

During the year, RBS Citizens offered former employees a one-time opportunity to receive the value of future pension benefits as a single lump sum payment. The transaction allowed RBS Citizens to partially de-risk its pension plan and future liability under the plan. A strong participant take-up rate of 60% enabled RBS Citizens to reduce its pension liability by 17% and recognise a £21 million (\$33 million) accounting gain.

Impairment losses were down £235 million (\$379 million), or 72%, reflecting an improved credit environment and lower impairments on securities. Loan impairments improved by £168 million (\$266 million) driven primarily by commercial loan impairments. Impairments as a percentage of loans and advances fell to 20 basis points.

Business review

Markets continued

In 2013, Markets launched and executed a strategic repositioning of the business, aimed at reducing risk, tightening controls, consolidating the geographic footprint and reducing complexity by refocusing on the franchise's core strengths in fixed income products. The division met or exceeded all internal targets for reducing controllable costs, risk weighted assets and balance sheet, while meeting revenue and operating profit expectations. Controls were enhanced, trading was integrated into four financial hubs, the front-to-back operating model was simplified and an agreement was reached for the sale of the Investor Products and Equity Derivatives business. Market share in the four core product areas (Rates, Currencies, Asset Backed Products and Credit) remained broadly stable with high profile client transactions executed across the globe. As a result of the strategic repositioning, Markets ended 2013 better positioned for the changing regulatory and external environment.

Lower income in 2013 compared with 2012 reflected both the strategic scaling back of the balance sheet and risk reduction in a difficult market environment. Client activity was limited by the uncertainty that surrounded the much anticipated tapering of the Federal Reserve's programme of quantitative easing. This contrasted with 2012 when markets were boosted by the European Central Bank's Long Term Refinancing Operation. Nevertheless, Markets' core businesses remained resilient and continued to produce positive results. Currencies income increased significantly year on year and Corporate Debt Capital Markets reaffirmed its leading position in the GBP market.

2013 compared with 2012

Operating profit fell by £889 million with income falling by 26%, partly offset by significant cost reductions. The de-risking of Markets resulted in a 36% reduction in risk-weighted assets.

Rates actively repositioned the business during 2013, lowering the balance sheet and reducing risk. This, combined with a weak trading performance in H1 2013, resulted in subdued returns.

Currencies income increased as the franchise remained resilient and FX Options benefited from opportunities in volatile FX and emerging markets.

Asset Backed Products continued to perform well, although income was affected by investor concerns regarding tapering of the Federal Reserve's programme of quantitative easing and a reduction in the balance sheet and risk resources deployed by the business.

Credit Markets reflected the previous year's de-risking of credit trading and witnessed a modest reduction in Debt Capital Markets income, although the business executed a number of significant transactions and retained its leading position in corporate GBP issuance.

Costs fell by 11%, reflecting a reduction in headcount of 1,000 – split evenly between the front and back-office - and tightly controlled discretionary expenses, although this was offset by a higher level of legal costs, primarily related to legacy issues in the US Asset Backed Products business.

The increase in impairments was driven predominantly by provisions against a single exposure in 2013.

Reducing risk and refocusing the division on core fixed income and currencies products drove a substantial reduction in both balance sheet and risk capital. Third party assets were £72 billion lower than 31 December 2012 and risk-weighted assets, at £65 billion, were down £37 billion.

2012 compared with 2011

Operating profit increased by 68% reflecting 2% growth in income and 20% decrease in direct expenses, most notably through a reduction in staff costs.

Rates benefited from a strong trading performance, while losses incurred in managing counterparty exposures during the third quarter of 2011 were not repeated during 2012. Revenues for the year were up 32% to £1.9 billion.

Currencies volumes were weak across the industry, although the Spot FX business minimised the impact on revenue. Options income was limited by further Eurozone uncertainty.

Asset Backed Products continued to perform strongly as markets were sustained throughout the year by investors' search for yield. Revenues for the year were £1.3 billion, up 8% from a strong performance of £1.22 billion in 2011.

A 59% increase in Credit Markets revenue to £735 million was driven by Flow Credit which, as a result of improved risk management and more benign market conditions, recorded good profitability compared with a loss in 2011. This was partially offset by weaker earnings from credit origination.

The division focused on controlling costs throughout 2012, driving total expenses down by 16%. Lower staff expenses, down 26%, reflect lower headcount and lower levels of variable compensation, including reductions and clawbacks following the Group's LIBOR settlements reached on 6 February 2013, with the compensation ratio falling from 44% to 32%. Headcount reductions totalled 2,700 in the year, including that resulting from the exit of businesses announced in January. Other expenses fell by 3% as rigorous controls on discretionary expenditure and the exiting of product areas continued to take effect, partially offset by higher legal expenses.

The reduction in third party assets reflected management action to optimise and de-risk the balance sheet, consistent with previously disclosed medium-term objectives.

The division reduced risk-weighted assets, successfully focusing on lowering risk and enhancing models whilst managing the requirement for greater prudence in the regulatory environment.

Not reflected in Markets operating results in 2012 were the following items: £381 million for regulatory fines; £350 million for its share of the provision for interest rate swap redress; and approximately £700 million in restructuring costs associated with the strategic changes that took place during 2012.

Business review

Central items

	2013 £m	2012 £m	2011 £m
Central items not allocated	(89)	84	(34)

Funding and operating costs have been allocated to operating divisions, based on direct service usage, requirement for market funding and other appropriate drivers where services span more than one division.

Residual unallocated items relate to volatile corporate items that do not naturally reside within a division.

2013 compared with 2012

Central items not allocated, represented a debit of £89 million in 2013 compared with a credit of £84 million in 2012, a reduction of £173 million.

This has been principally driven by higher unallocated Treasury and funding costs, £175 million higher, including volatile items under IFRS and lower gains on Treasury available-for-sale securities, down £156 million from £880 million in 2012 to £724 million in 2013.

Central items included various legacy litigation and conduct provisions totalling £127 million for 2013, a reduction of £33 million compared with 2012, and a property-related impairment of £65 million which have been offset by the non-repeat of £175 million costs incurred in 2012 in relation to the technology incident and credits totalling £80 million recognised in relation to the Group's share of profit from its stake in Saudi Hollandi, which was held as a disposal group in 2012.

2012 compared with 2011

Central items not allocated represented a credit of £84 million compared with a debit of £34 million in 2011.

Significant central costs included the Group technology incident cost of £175 million, a £160 million provision for various litigation and legacy conduct issues, as well as unallocated Treasury costs of circa £390 million. VAT recoveries of £85 million and Group Pension fund adjustment of circa £50 million in 2011 were not repeated.

Offsetting these costs, profits on Group Treasury available-for-sale bond disposals totalled £880 million compared with £516 million in 2011, as active management of the liquid assets portfolio as well as favourable market conditions enabled the Group to crystallise gains on some holdings.

Business review

Non-Core has successfully achieved and surpassed its five year Strategic Plan target, reducing third party assets from the opening £258 billion position to end 2013 significantly below the original c.£40 billion target at £28 billion. Over the life of Non-Core this represents an overall reduction of £230 billion, or 89%. This was achieved through a mixture of disposals, run-off and impairments. By the end of 2013, the Non-Core funded balance sheet was c.4% of the Group's funded balance sheet compared with 21% when the division was created. RWAs have reduced from £171 billion to £29 billion, or 83%, over the life of Non-Core.

Third party assets were reduced by £29 billion, or 51%, during the year. Approximately £3.1 billion of the reduction was due to increased impairments as a result of the change in the future run-down/disposal plan for the remaining Non-Core assets under the transition to RCR.

2013 is the final reporting period for the Non-Core division. Approximately £12 billion of assets which were managed by Non-Core are to be returned to the relevant Core divisions, with the remaining assets transferring to RCR from 1 January 2014.

2013 compared with 2012

Third party assets declined by £29 billion, or 51%, reflecting run-off of £15 billion, disposals of £11 billion and impairments of £5 billion, of which £3.1 billion is driven by the new RCR strategy to exit these assets over a shorter timeframe than previous plans.

Risk-weighted assets were £31 billion lower, driven by disposals and run-off.

Operating loss of £5,527 million was £2,648 million higher than 2012, principally due to a £2,353 million increase in impairments. This was predominantly due to £3,118 million of 2013 impairments related to the creation of RCR, most significantly with £2,299 million in Ulster Bank and £742 million in International Banking, driven by the new RCR strategy to exit these assets over a shorter timeframe than previous plans, which has led to increased impairment losses on the non-performing assets.

Operating loss before impairment losses was £295 million higher with a reduction in net interest income of £407 million, £207 million additional disposal losses and £104 million further fair value writedowns offset by £506 million lower losses from trading activities.

The reduction in net interest income of £407 million was driven by a 31% fall in interest earning assets driven by run-off and disposals.

Headcount declined by 1,700, or 55% to 1,400 of which 1,000 relates to operations in India and Romania, reflecting divestment activity and run-off.

2012 compared with 2011

Third party assets declined by £35 billion, or 38%, largely reflecting disposals of £18 billion and run-off of £16 billion. The disposal of RBS Aviation Capital in Q2 2012 contributed c.£5 billion of this reduction.

Risk-weighted assets were £33 billion lower, principally driven by disposals, run-off and restructuring of existing positions.

An operating loss of £2,879 million was £1,340 million lower than 2011, principally due to lower impairments and expenses, partially offset by lower net interest income following run-off and disposals.

Impairment losses fell by £1,694 million to £2,223 million, with £1,366 million of this reduction from the Ulster Bank portfolio and £269 million from the real estate portfolio.

Income declined by £686 million as continued divestment and run-off reduced net interest income. Rental income was lower following the disposal of RBS Aviation Capital in Q2 2012.

Expenses were £332 million lower, driven by reduced headcount and lower operating lease depreciation, principally following the disposal of RBS Aviation Capital.

Headcount declined by 29% to 2,900 reflecting the divestment activity and run-off across the business.

Business review

RBS Capital Resolution

Background

In June 2013, in response to a recommendation by the Parliamentary Commission on Banking Standards, the UK Government announced it would review the case for an external 'bad bank', based on three objectives as originally outlined by the Chancellor:

- accelerating the return of RBS to the private sector;
- supporting the British economy; and
- best value for the taxpayer.

Following this announcement, RBS worked closely with HM Treasury ('HMT') and its advisers to identify a pool of assets with particularly high long-term capital intensity, credit risk, low returns and/or potential stress loss in varying scenarios. The balance of this identified pool was £47 billion as at 30 June 2013. The pool was forecast to be c.£38 billion of assets as at 31 December 2013, which together with derivatives were forecast to attract c.£116 billion of RWA equivalents⁽¹⁾.

HMT published its report on 1 November 2013. The review concluded that the effort, risk and expense involved in the creation of an external bad bank could not be justified. It also concluded that "RBS's existing provisions and levels of capital deducted suggested that projected future losses are appropriately covered".

As a result, and in line with its new strategic direction set out on 1 November 2013, RBS announced the creation of RBS Capital Resolution ('RCR') to separate and wind down RBS's high capital intensive assets. RCR will bring assets under common management and was established with the following principles:

- removing risk from the balance sheet in an efficient, expedient and economic manner;
- reducing the volatile outcomes in stressed environments; and
- accelerating the release of capital through management and exit of the portfolio.

The RCR division created with effect from 1 January 2014 is of a similar size to the ex Non-Core division, but the assets were selected on a different basis and no direct comparisons should be drawn. RCR assets were selected on the basis of long term capital intensity whereas the Non-Core assets were selected based on five strategic tests.

Going forward, as part of its external reporting, the Group will provide comprehensive and transparent disclosures on the progress of RCR, including funding and capital employed and released. Furthermore, a Board Oversight Committee ('BOC') has been set up reporting directly to the Group Board, to report on adherence to asset management principles and recommend changes to strategy where appropriate. The BOC comprises a quorum of any two of the Chairman of the Group Board, the Senior Independent Director, the Chair of the Group Audit Committee and the Chair of the Board Risk Committee.

While there are inevitable uncertain market and execution risks associated with running down such assets, it is RBS's aspiration, subject to shareholder value, to remove most of these assets and capital from the balance sheet in three years. RCR will target a reduction in funded assets to c.£23 billion by the end of 2014; to between £15 billion and £11 billion by the end of 2015 and to less than £6 billion by the end of 2016. RCR is expected to be Common Equity Tier 1 ('CET1') accretive over its life and is neutral for shareholder value, taking into account future regulatory capital requirements.

The RCR pool of assets was forecast to be c.£38 billion and c.£116 billion RWAe at its inception on 1 January 2014 based on 30 June 2013 data. Since this forecast was made:

- £4.6 billion of impairments and other adjustments were recorded in respect of non-performing and other assets as a result of the change in realisation strategy noted above, with capital impact of £37 billion RWAe. The increased impairments relate to certain of the impaired or non-performing assets transferred to RCR, and reflect the revised holding strategy which has led to adverse changes in our estimates of future cash flows.
- there were materially higher levels of disposal activity and recoveries (£5 billion) in Non-Core than had been forecast based on 30 June 2013 data, with a capital impact of £14 billion reduction in RWAe.

In aggregate, these two factors reduced the opening funded assets by £9 billion to £29 billion and RWAe by £51 billion to £65 billion. This reduction in funded assets in the second half of the year, particularly the disposals, has also resulted in a corresponding decrease in the Group's funding requirements.

At 1 January 2014, 48% of the portfolio's funded assets are from Non-Core (excluding Ulster Bank), 17% from Ulster Bank (Core and Non-Core) and the remainder are from UK Corporate, International Banking and Markets.

£12 billion of assets with RWAe of £11 billion managed by Non-Core have been returned to the relevant Core divisions because they did not meet the risk and capital criteria for RCR.

RCR commenced on 1 January 2014 and its first results will be reported separately in the Group's first quarter 2014 results.

Note:

- (1) RWA equivalent (RWAe) is an internal metric that measures the equity capital employed in divisions. RWAe converts both performing and non-performing exposures into a consistent capital measure, being the sum of the regulatory RWAs and the regulatory capital deductions, the latter converted to RWAe by applying a multiplier. The Group applies a CET1 ratio of 10%, consistent with that used for divisional return on equity measure; this results in an FLB3 RWAe conversion multiplier of 10.

Business review

Roll forward of funded assets

	Note	£bn
Estimated balance at 30 June 2013		46.8
Disposals	(a)	(6.0)
Run-off	(b)	(4.8)
Impairments	(c)	(5.2)
Other	(d)	(1.9)
Balance at 31 December 2013		28.9

Notes

- (a) disposals in the second half of the year, predominantly in Non-Core.
- (b) represents repayments and amortisations, partially offset by draw down of facilities across the portfolios.
- (c) includes all impairments in the second half of 2013, predominately in Non-Core, and reflects increased impairments relating to the creation of RCR and the related strategy.
- (d) other includes fair value adjustments, foreign exchange movements (£1.2 billion) and finalisation of the asset pool.

Roll forward of FLB3 RWAE

	Note	£bn
Estimated balance at 30 June 2013		136.8
Disposals	(a)	(11.9)
Run-off	(b)	(10.9)
Impairments	(c)	(45.1)
Other	(d)	(3.9)
Balance at 31 December 2013		65.0

Notes:

- (a) includes all aspects relating to disposals including associated removal of deductions from regulatory capital.
- (b) represents RWAE on repayments and amortisations, partially offset by draw down of facilities across the portfolios.
- (c) RWAE impairment charge.
- (d) other includes fair value adjustments; changes to inputs for RWA calculation (including LGD, PD, and slotting category); the implementation of a new RWA model or modification of an existing model approved by the PRA, foreign exchange movements and finalisation of the asset pool.

The £18 billion decrease in funded assets in the second half of the year resulted in a significantly higher reduction of £72 billion in RWAE. This was due to:

- impairments of £5 billion recognised in the second half of 2013 resulted in a lower capital deduction for the excess of expected loss over provisions. Allowing for a restriction in provisions allowable against expected losses, the benefit was £4.5 billion or £45 billion of RWAE.
- disposals of £6 billion resulting in RWAE of £12 billion.
- run-off of £5 billion with a corresponding RWAE of £11 billion.

Capital deductions comprised expected losses less impairment provisions (31 December 2013 - £1,774 million; 30 June 2013 - £6,047 million) and allocation of defined pension fund deficit (31 December 2013 - £58 million; 30 June 2013 - £38 million).

Additional details are set out on the following pages.

Business review

Commentary on consolidated balance sheet

2013 compared with 2012

Total assets of £1,027.9 billion at 31 December 2013 were down £284.4 billion, 22%, compared with 31 December 2012. This was driven by the downsizing of the Markets business, primarily reflected in decreases in loans to banks and customers, debt securities and derivatives balances, and a further decrease in loans and advances to banks and customers due to Non-Core disposals and run off.

Loans and advances to banks decreased by £9.9 billion, 15%, to £54.1 billion. Excluding reverse repurchase agreements and stock borrowing ('reverse repos'), down £8.3 billion, 24%, to £26.5 billion, bank placings declined £1.6 billion, 6%, to £27.6 billion.

Loans and advances to customers declined £59.4 billion, 12%, to £440.7 billion. Within this, reverse repurchase agreements were down £20.1 billion, 29%, to £49.9 billion. Customer lending decreased by £39.3 billion, 9%, to £390.8 billion, or £35.2 billion to £416.0 billion before impairments. This reflected reductions in Non-Core of £19.9 billion, along with declines in International Banking, £6.2 billion, UK Corporate, £4.5 billion, Markets, £4.3 billion, Ulster Bank, £1.9 billion, UK Retail, £0.4 billion, Wealth, £0.3 billion, and US Retail & Commercial, £0.2 billion which included the impact of £0.7 billion of customer loans being transferred to assets of disposal groups at 31 December 2013. These decreases were partially offset by the effect of exchange rate and other movements, £2.5 billion.

Debt securities were down £43.8 billion, 28%, to £113.6 billion, driven mainly by reductions within Markets and Group Treasury in holdings of UK and Eurozone government securities and financial institution bonds.

Equity shares decreased by £6.4 billion, 42%, to £8.8 billion due to the targeted run-down of Markets' equities business.

Movements in the value of derivative assets, down £153.9 billion, 35%, to £288.0 billion, and liabilities, down £148.8 billion, 34% to £285.5 billion, primarily reflects upward shifts in major yield curves which resulted in significant mark-to-market decreases on interest rate contracts.

Property, plant and equipment decreased by £1.9 billion, 19%, to £7.9 billion driven largely by the disposal of Non-Core assets.

Intangible assets decreased by £1.2 billion, 9%, to £12.4 billion primarily as a result of the write-down of goodwill relating to the International Banking division at 31 December 2013.

The decrease in assets and liabilities of disposal groups, down £11.0 billion, 78%, to £3.0 billion, and £6.8 billion, 67%, to £3.4 billion respectively, primarily reflects the deconsolidation of Direct Line Group following the further sale of shares and ceding of control in 2013. The remaining interest, classified as an associate, is included in assets of disposal groups at 31 December 2013. In addition, disposal groups include loans and deposits in Illinois branches for sale in US Retail & Commercial.

Deposits by banks decreased £37.4 billion, 37%, to £64.0 billion, with decreases in inter-bank deposits, down £21.7 billion, 38%, to £35.3 billion and repurchase agreements and stock lending ('repos'), down £15.7 billion, 35%, to £28.7 billion, as a result of the Group's lower funding requirements and reduced derivative cash collateral.

Customer accounts decreased £50.4 billion, 10%, to £470.9 billion. Within this, repos decreased £31.6 billion, 36%, to £56.5 billion. Excluding repos, customer deposits were down £18.8 billion, 4%, at £414.4 billion, primarily reflecting decreases in International Banking, £6.9 billion, Markets, £4.8 billion, UK Corporate, £2.4 billion, Wealth, £1.7 billion, Ulster Bank, £0.7 billion, US Retail & Commercial, £5.9 billion, which included the impact of £3.2 billion of customer deposits being transferred to liabilities of disposal groups at 31 December 2013, and the effect of exchange rate and other movements of £3.4 billion. These decreases were partially offset by increases in UK Retail, £7.3 billion.

Debt securities in issue decreased £26.8 billion, 28%, to £67.8 billion due to lower funding requirements as a result of the reduction in the overall size of the balance sheet, with most of the reduction in medium term notes in issue.

Retirement benefit liabilities decreased by £0.7 billion, 17%, to £3.2 billion with net actuarial gains of £0.5 billion arising from improved asset returns and higher discount rates partly offset by an increase in the assumed inflation rate. Additional employer contributions of £0.4 billion to the Group's Main scheme also reduced retirement benefit liabilities.

Subordinated liabilities decreased by £2.8 billion, 10% to £24.0 billion, primarily as a result of the net decrease in dated loan capital with redemptions of £3.4 billion and the effects of exchange and other movements of £1.2 billion being partially offset by issuances of £1.8 billion.

Minority interests decreased by £1.3 billion, 73%, to £0.5 billion, predominantly due to the deconsolidation of Direct Line Group following the further sale of shares and ceding of control in 2013.

Owner's equity decreased by £9.9 billion, 14%, to £58.7 billion, driven by the £9.0 billion attributable loss for the year together with movements in cash flow hedging reserves, £1.7 billion and foreign exchange reserves, £0.2 billion. Partially offsetting these reductions were share issuances of £0.4 billion, the termination of the contingent capital facility, £0.3 billion, the recognition of actuarial gains in respect of the Group's defined benefit pension schemes, net of tax, £0.2 billion and other reserve movements, £0.1 billion.

Business review

Commentary on consolidated balance sheet continued

2012 compared with 2011

Total assets of £1,312.3 billion at 31 December 2012 were down £194.6 billion, 13%, compared with 31 December 2011. This was principally driven by a decrease in loans and advances to banks and customers led by Non-Core disposals and run off, decreases in debt securities and the continuing reduction in the mark-to-market value of derivatives.

Loans and advances to banks decreased by £19.4 billion, 23%, to £64.0 billion. Excluding reverse repurchase agreements and stock borrowing ('reverse repos'), down £4.7 billion, 12%, to £34.8 billion, bank placings declined £14.7 billion, 34%, to £29.2 billion.

Loans and advances to customers declined £15.5 billion, 3%, to £500.1 billion. Within this, reverse repurchase agreements were up £8.6 billion, 14%, to £70.0 billion. Customer lending decreased by £24.0 billion, 5%, to £430.1 billion, or £22.6 billion to £451.2 billion before impairments. This reflected reductions in Non-Core of £22.6 billion, along with declines in International Banking, £14.3 billion, UK Corporate, £2.9 billion, Markets, £1.0 billion and Ulster Bank, £0.7 billion, together with the effect of exchange rate and other movements, £4.7 billion. These were partially offset by the transfer from disposal groups of £18.9 billion of customer balances relating to the UK branch-based businesses, together with underlying growth in UK Retail, £2.6 billion, US Retail & Commercial, £1.9 billion and Wealth, £0.2 billion.

Debt securities were down £51.6 billion, 25%, to £157.4 billion, driven mainly by reductions within Markets and Group Treasury in holdings of UK and Eurozone government securities and financial institution bonds.

Settlement balance assets and liabilities decreased £2.0 billion to £5.7 billion and £1.6 billion to £5.9 billion respectively reflecting the overall reduction in the size of the balance sheet.

Movements in the value of derivative assets, down £87.7 billion, 17%, to £441.9 billion, and liabilities, down £89.7 billion, 17%, to £434.3 billion, primarily reflect decreases in interest rate and credit derivative contracts, together with the effect of currency movements, with Sterling strengthening against both the US dollar and the Euro.

Intangible assets decreased £1.3 billion, 9%, to £13.5 billion, primarily as a result of write-down of the Direct Line Group goodwill, £0.4 billion, and the transfer of the remaining £0.5 billion of goodwill together with £0.2 billion of other intangible assets to assets of disposal groups at 31 December 2012.

Property, plant and equipment decreased by £2.1 billion, 18%, to £9.8 billion driven largely by the disposal of investment property in Non-Core.

The decrease in assets and liabilities of disposal groups, down £11.4 billion, 45%, to £14.0 billion, and £13.8 billion, 58%, to £10.2 billion respectively, primarily reflects the removal of the UK branch-based businesses from disposal groups following Santander's withdrawal from the purchase, together with the disposal of RBS Aviation Capital in the second quarter. These were partly offset by the transfer to disposal groups of Direct Line Group at 31 December 2012.

Deposits by banks decreased £7.4 billion, 7%, to £101.4 billion, with a decrease in inter-bank deposits, down £12.0 billion, 17%, to £57.1 billion. This was partly offset by an increase in repurchase agreements and stock lending ('repos'), up £4.6 billion, 12%, to £44.3 billion, improving the Group's mix of secured and unsecured funding.

Customer accounts increased £18.3 billion, 4%, to £521.3 billion. Within this, repos decreased £0.8 billion, 1%, to £88.0 billion. Excluding repos, customer deposits were up £19.1 billion, 5%, at £433.2 billion, primarily reflecting the transfer from disposal groups of £21.5 billion of customer accounts relating to the UK branch-based businesses together with underlying increases in UK Retail, £6.0 billion, International Banking, £2.0 million, US Retail & Commercial, £1.8 billion, UK Corporate, £0.8 billion, Ulster Bank, £0.7 billion and Wealth, £0.7 billion. This was partially offset by decreases in Markets, £9.7 billion, and Non-Core, £0.9 billion, together with exchange and other movements £3.8 billion.

Debt securities in issue decreased £68.0 billion, 42%, to £94.6 billion reflecting the maturity of the remaining notes issued under the UK Government's Credit Guarantee Scheme, £21.3 billion, the repurchase of bonds and medium term notes as a result of the liability management exercise completed in September 2012, £4.4 billion, and the continuing reduction of commercial paper and medium term notes in issue in line with the Group's strategy.

Short positions were down £13.4 billion, 33%, to £27.6 billion mirroring decreases in debt securities.

Retirement benefit liabilities increased by £1.6 billion, 73%, to £3.9 billion with net actuarial losses of £2.3 billion on the Group's defined benefit pension schemes, primarily arising from significant reductions in the real discount rates in the Sterling, Euro and US dollar currency zones. These were partially offset by the £0.6 billion excess of employer contributions paid over the current year pension charge.

Insurance liabilities of £6.2 billion relating to Direct Line Group were transferred to liabilities of disposal groups at 31 December 2012.

Subordinated liabilities increased by £0.5 billion, 2% to £26.8 billion, primarily as a result of the net increase in dated loan capital. Issuances of £1.4 billion and redemptions of £0.3 billion were partly offset by a net decrease of £0.6 billion arising from the liability management exercise completed in March 2012, which consisted of redemptions of £3.4 billion offset by the issuance of £2.8 billion new loan capital.

Non-controlling interests increased by £1.1 billion, 158%, to £1.8 billion, predominantly due to the sale of 34.7% of the Group's investment in Direct Line Group during the fourth quarter.

Owner's equity decreased by £6.7 billion, 9%, to £68.7 billion, driven by the £6.1 billion attributable loss for the period together with movements in foreign exchange reserves, £0.9 billion, the recognition of actuarial losses in respect of the Group's defined benefit pension schemes, net of tax, £1.8 billion, and other reserve movements of £0.2 billion. Partially offsetting these reductions were gains in available-for-sale reserves, £0.6 billion, and cash flow hedging reserves, £0.8 billion, share capital and reserve movements in respect of employee share schemes, £0.8 billion and other share issuances of £1.0 billion.

Cash flow

	2013 £m	2012* £m	2011* £m
Net cash flows from operating activities	(30,631)	(45,113)	3,325
Net cash flows from investing activities	21,183	27,175	14
Net cash flows from financing activities	(2,728)	2,017	(1,741)
Effects of exchange rate changes on cash and cash equivalents	512	(3,893)	(1,473)
Net (decrease)/increase in cash and cash equivalents	(11,664)	(19,814)	125

*Restated - see page 102.

2013

The major factors contributing to the net cash outflow from operating activities of £30,631 million were the decrease of £28,780 million in operating assets and liabilities, the net operating loss before tax of £8,066 million from continuing and discontinued operations, loans and advances written-off net of recoveries of £4,090 million and other provisions utilised of £2,066 million. These were partially offset by provisions for impairment losses of £8,432 million and other provisions charged net of releases £4,422 million.

Net cash inflows from investing activities of £21,183 million related to the net inflows from sales of securities of £19,211 million, the sale of property, plant and equipment of £1,448 million and net divestments of business interests and intangible assets of £1,150 million offset by net cash outflows from the purchase of property, plant and equipment of £626 million.

Net cash outflows from financing activities of £2,728 million relate primarily to the repayment of subordinated liabilities of £3,500 million and interest paid on subordinated liabilities of £958 million partly offset by the issue of subordinated liabilities of £1,796 million.

2012

The major factors contributing to the net cash outflow from operating activities of £45,113 million were the decrease of £48,736 million in operating assets and liabilities, the net operating loss before tax of £5,388 million from continuing and discontinued operations, loans and advances written off net of recoveries of £3,925 million and other non-cash items of £1,491 million. These were partially offset by the elimination of foreign exchange differences of £7,140 million, provisions for impairment losses of £5,283 million and depreciation and amortisation of £1,854 million.

Net cash inflows from investing activities of £27,175 million related to the net inflows from sales of securities of £26,092 million, the sale of property, plant and equipment of £2,215 million and divestments in business interests and intangible assets of £352 million offset by net cash outflows from the purchase of property, plant and equipment of £1,484 million.

Net cash inflows from financing activities of £2,017 million relate primarily to the issue of subordinated liabilities of £2,093 million and proceeds of non-controlling interests issued of £889 million partly offset by interest paid on subordinated liabilities of £746 million and dividends paid of £301 million.

2011

The major factors contributing to the net cash inflow from operating activities of £3,325 million were the elimination of foreign exchange differences of £2,702 million, depreciation and amortisation of £1,875 million and inflow from other items of £3,106 million, partially offset by the net operating loss before tax of £914 million from continuing and discontinued operations and the decrease of £3,444 million in operating assets and liabilities.

Net cash inflows from investing activities of £14 million related to the net inflows from sales of securities of £3,074 million, and sale of property, plant and equipment of £1,840 million offset by net cash outflows from investments in business interests and intangible assets of £1,428 million and from the purchase of property, plant and equipment of £3,472 million.

Net cash outflows from financing activities of £1,741 million relate primarily to interest on subordinated liabilities of £714 million, repayment of subordinated liabilities of £627 million and redemption of non-controlling interests of £382 million.

Tier 1	13.1	12.4	13.0	12.9	14.1
Total	16.5	14.5	13.8	14.0	16.1

It is the Group's policy to maintain a strong capital base, to expand it as appropriate and to utilise it efficiently throughout its activities to optimise the return to shareholders while maintaining a prudent relationship between the capital base and the underlying risks of the business. In carrying out this policy, the Group has regard to the supervisory requirements of the PRA. The PRA uses risk asset ratio (RAR) as a measure of capital adequacy in the UK banking sector, comparing a bank's capital resources with its risk-weighted assets (the assets and off-balance sheet exposures are 'weighted' to reflect the inherent credit and other risks); by international agreement, the RAR should be not less than 8% with a Tier 1 component of not less than 4%. At 31 December 2013, the Group's total RAR was 16.5% (2012 - 14.5%) and the Tier 1 RAR was 13.1% (2012 - 12.4%). For further information refer to Risk and Balance sheet management: Capital management on pages 192 to 208.

Presentation of information

Except as otherwise indicated by an asterisk (*), information in the Risk and balance sheet management section (pages 174 to 364) is within the scope of the Independent auditor's report. Disclosures in this section include disposal groups in relevant exposures unless otherwise indicated. Refer to pages 172 and 173 for the Analysis of balance sheet pre and post disposal groups.

Risk governance*

Governance structure

The Group is committed to achieving the highest standards of corporate governance in every aspect of the business, including risk management.

A key aspect of the Group Board's responsibility as the main decision-making body at Group level is the setting of Group risk appetite to ensure that the levels of risk the Group is willing to accept in the attainment of its strategic business and financial objectives are clearly understood.

The day-to-day management of risk in the Group is carried out through two independent risk management functions: RBS Risk Management and Group Conduct and Regulatory Affairs, which manage risk through independent oversight and challenge of both the customer-facing businesses and the support functions. These risk management functions provide an overarching risk control framework linked to the risk appetite of the Group. For further detail on risk appetite, refer to page 183.

To enable the Group Board to carry out its objectives, it delegates authority to various committees as required and appropriate. A number of key committees specifically consider risk across the Group:

Group Board - Sets and owns the Group's risk appetite, which is cascaded across its divisions, functions and material legal entities. The Group Board also sets the Group's strategic direction and carries out regular assessments to ensure that strategic plans are consistent with risk appetite.

Board Risk Committee - Provides oversight and advice on current and potential risk exposures, risk strategy and tolerance. The Committee also promotes a risk awareness culture within the Group.

Group Executive Committee - Operates under delegated authority from the Group Board and considers emerging issues material to both the Group's strategy and risk exposures. The Group Executive Committee also oversees control frameworks.

Executive Risk Forum - Provides executive input to the Group Board and the Group Executive Committee on risk management issues such as risk appetite, risk policies and risk management strategies. It has full authority to act on all material and/or enterprise-wide risk and control matters across the Group and implements Group Board and Group Executive Committee risk management decisions.

Group Audit Committee - Reviews accounting policies, financial reporting and regulatory compliance practices of the Group, as well as its systems and standards of internal controls. It monitors the Group's processes for internal audit and external audit and relationships with regulatory authorities. It operates under delegated authority from the Group Board.

Group Risk Committee - Oversees and acts on material and enterprise-wide risk and control matters across the Group. It reviews and challenges risks and limits across the functional areas. It reviews risks and issues on both a thematic and specific basis, focusing on forward-looking, emerging risks. It considers the overall risk profile across the Group and identifies any key issues for escalation to the Executive Risk Forum. It operates under delegated authority from the Executive Risk Forum.

In addition, functional risk committees ensure that effective risk control frameworks are in place and that limits are consistent with the Group's risk appetite. Divisional executive committees develop, own and manage divisional risk appetites, ensuring that these are consistent with the Group's targets.

Risk management

The Group Chief Risk Officer leads RBS Risk Management through the strategic setting and execution of its responsibilities. The Group Chief Risk Officer reports directly to the Group Chief Executive and the Board Risk Committee, with a right of access to the Chairman of the Board Risk Committee.

RBS Risk Management is designed to align as closely as possible with the customer-facing businesses and support functions while maintaining an appropriate level of independence. This underpins the Group's approach to risk management and is reinforced through the Group by reporting lines from divisions to RBS Risk Management and from RBS Risk Management to senior executives, Boards and Committees.

In RBS Risk Management, the following Group risk functional heads report directly to the Group Chief Risk Officer and are responsible for Group-wide risk appetite and standards under their respective disciplines:

- Group Head of Operational Risk;
- Group Chief Credit Officer;
- Head of Enterprise Risk Management;
- Head of Global Country Risk; and
- Chief Operating Officer, RBS Risk Management.

Risk management in divisions focuses on all material risks including credit, market, operational, regulatory, country and business risk (refer to pages 188 to 191 for further detail of these risks). Liquidity risk and the day-to-day management of liquidity and funding of the Group's assets is Group Treasury's responsibility (refer to page 210). Oversight of risk in divisions is the responsibility of the relevant divisional Chief Risk Officer (CRO), with input from the relevant Group risk function heads.

*unaudited

Business review Risk and balance sheet management

This involves ensuring:

- All activities undertaken by the individual divisions are consistent with the Group's risk appetite targets;
- Group policies and resulting operating frameworks, including delegated authorities and limits, are complied with through effective monitoring and exception reporting; and
- Operation of Group-wide risk processes such as the Group Policy Framework and the New Product Risk Assessment Process are effective.

Divisional CROs report directly to the Group Chief Risk Officer.

The Group Chief Risk Officer has direct involvement in the selection, appointment or removal of divisional CROs and Group risk function heads and also has responsibility for their ongoing performance assessment and management.

Divisions mirror the Group risk management structure: divisional executive committees are responsible for setting and managing their exposures in line with their risk appetite and within Group constraints. The divisional risk committees oversee risk exposures arising from divisional business activities and focus on ensuring that the associated risks are adequately monitored and controlled. The divisional CROs provide independent oversight of this process, with support from the Group Chief Risk Officer and Group risk function heads as appropriate. Additional challenge and oversight is provided by Group risk function heads on an ongoing basis and by divisional risk and audit committees on a periodic review basis. For a summary of the main risk types faced by the Group and how it manages each of them, refer to pages 187 to 191.

Conduct and Regulatory Affairs

Created in August 2013, by amalgamating Group Compliance (previously part of RBS Risk Management) and RBS Regulatory Affairs (formerly part of RBS Legal), Group Conduct and Regulatory Affairs is led by the Group Head of Conduct and Regulatory Affairs, who reports directly to the Group Chief Executive and the Board Risk Committee, with right of access to the Chairman of the Board.

The following functional heads report directly to the Group Head of Conduct and Regulatory Affairs, each of whom is responsible for the firm-wide risk appetite and standards of their respective disciplines: the Global Head of Compliance; the Global Head of Financial Crime; and the Director, RBS Regulatory Affairs.

A Chief Compliance Officer in each division (reporting to the Global Head of Compliance) provides advisory support to assist the divisions' management of conduct, regulatory affairs and financial crime.

Three lines of defence

The three lines of defence is an industry-wide model for the management of risk, understood as a clear set of principles by which to implement a cohesive operating model across an organisation. The model's main purpose is to define accountabilities and responsibilities for managing risk across the organisation.

*unaudited

1st line of defence - Business units including all business areas and functions are accountable for owning and managing the risks which exist in their area within a defined risk appetite and framework.

2nd line of defence - Independent monitoring and control functions, as well as Group Policy Standard owners, are accountable for owning and developing the risk and control frameworks and tools which the 1st line of defence uses to discharge its responsibilities. The 2nd line of defence must be appropriately independent from the business and accountable for overseeing and challenging the 1st line of defence on the effective management of its risks.

3rd line of defence - Group Internal Audit provides independent assurance on the appropriateness of the design and operational effectiveness of risk management and internal control processes that mitigate the Group's key risks.

Business model

The Group is a bank serving approximately 24 million retail and corporate customers worldwide. UK Retail offers individuals a wide range of traditional retail banking and insurance products, including residential mortgages and credit cards, while UK Corporate provides both small businesses and large corporations with an extensive range of loan products and transactional services. Most of the customers of both divisions are located in the UK. Wealth provides both banking and investment services to high-net-worth individuals in the UK and overseas, while International Banking offers loan products and transactional services to corporations and financial institutions across a wide range of countries. Markets provides corporations and financial institutions in both the UK and overseas with investment banking products and services, helping them to hedge exposures to interest rate and foreign exchange risk. Markets also helps customers structure securitisation transactions and issue debt.

In addition, Ulster Bank and Citizens Bank, offer loan and investment products, as well as transactional services, to individuals and corporations. The customers of Ulster Bank are in Ireland while those of Citizens Bank are in the US. The Group delivers its products through a diverse array of channels, including extensive branch networks, in-store branches and call centres, in addition to online and mobile channels.

It is the aim of the Group to become a bank that customers, and all other stakeholders, can depend on. It intends to do so by focusing on its core retail and corporate customers in its main market of the UK. It plans to simplify its products and services as well as the processes it uses to deliver them, enhancing their appeal. Simplifying processes should also lower costs, enabling the bank to provide customers with better products and services at lower prices.

The Group's main sources of earnings are interest income from lending and deposits and fee income from transactional and other services. Given the low interest rate environment in both the UK and the US, its net interest margin, that is, the difference between the interest it earns from lending and the interest it pays on deposits, has been under pressure. In order to offset this pressure, the Group is working to reduce costs and increase non-interest income.

Business review Risk and balance sheet management

Risk governance* continued

Business model continued

Over the last few years, the Group has either exited or sold a number of businesses in order to align its cost structure with its smaller scope and scale. In addition, it is reducing costs through rationalisation, integration and simplification. For example, UK Retail is rationalising its service delivery channels and simplifying the operations that support them, using the resulting cost savings to invest in new technology and providing additional channels for customers such as mobile banking. A number of other divisions are taking similar steps.

The Group's activities expose it to a number of risks. The Group is pursuing a strategy of reducing the risks it takes while focusing on the delivery of products and services to a domestic customer base, giving rise to strategic risk. The delivery of all of its products and services exposes the Group to conduct risk, which has recently materialised in the form of fines and reputational damage, resulting from a failure to treat customers in line with their and other stakeholders' expectations.

The Group also faces a range of other risks. As measured by risk-weighted assets (RWAs), the most significant of these is credit risk, which consists of counterparty and non-counterparty credit risk. Credit risk arises from its lending activities in all divisions. Counterparty credit risk arises from its security financing and derivative trading activities. This is concentrated in Markets.

RWAs by division

The second most significant source of risk is market risk, which arises from the Group's trading activities (traded market risk) and from the impact of changes in market prices on the value of its other financial assets and liabilities (non-traded market risk). Traded market risk is concentrated in Markets while non-traded market risk is distributed across the Group and with the exception of US Retail & Commercial and Markets, these divisions transfer this risk to Group Treasury for management.

Operational risk, which arises from all of the Group's business activities, is the third most significant source of risk as measured by RWAs. Its importance is increasing as a result of changes driven by regulation as well as the Group's strategy.

The activities of several divisions, particularly Markets and International Banking, but also Ulster Bank and US Retail & Commercial, expose the Group to country risk.

Finally, through the activities of all its divisions, the Group is exposed to a range of other risks, including pension, business, regulatory and reputational.

Risk events and lessons learned

LIBOR related settlements

The Group reached settlements with the Financial Services Authority (FSA) in the United Kingdom, the United States Commodity Futures Trading Commission (CFTC) and the United States Department of Justice (DOJ) on 8 February 2013 in relation to investigations into submissions, communications and procedures around the setting of the London Interbank Offered Rate (LIBOR). The Group agreed to pay penalties of £87.5 million, \$325 million and \$150 million to the FSA, CFTC and DOJ respectively. As part of the settlement with the DOJ, RBS plc entered into a Deferred Prosecution Agreement on one count of wire fraud relating to Swiss Franc LIBOR, and one count for an anti-trust violation relating to Yen LIBOR. RBS Securities Japan Limited also agreed to enter a plea of guilty to one count of wire fraud relating to Yen LIBOR.

Industry-wide investigations were made into the setting of certain benchmark rates across a range of currencies. Regulators found wrongdoing on the part of 21 RBS employees, predominantly in the setting of the bank's Yen and Swiss Franc LIBOR submissions.

*unaudited

Business review Risk and balance sheet management

Both before and after these findings were issued, management took action to strengthen significantly the systems and controls governing its LIBOR submissions: the Group created an independent and ring-fenced rate-setting team; all relevant staff were obliged to undertake a comprehensive training programme; and new preventative and detective controls put in place, including monitoring and statistical checking of submissions by independent personnel in the Group. A rate setting review board was also created to oversee the submission process.

For more information on LIBOR related settlements, refer to page 477.

Payment Protection Insurance

Since the judicial review decision in 2011, the Group has worked closely with both the Financial Conduct Authority and the Financial Ombudsman Service. It has invested considerable resources in ensuring that all Payment Protection Insurance (PPI) complaints are handled in a fair manner in line with regulatory requirements. The Group stopped selling PPI in 2010 and has since then made a number of changes to ensure fair customer outcomes and to ensure that the appropriate lessons are learned from PPI. These include substantially simplifying our retail product offering and sales processes (including, but not limited to, protection products), enhancing training for, and controls in relation to, customer advisers and improving management information on products sales. Our product design and approval processes are now also radically different from the time when PPI products were available to customers.

UK Retail and the wider Group are engaged in a wide-ranging conduct risk programme designed to ensure the focus of our culture is always on the customer and delivering good customer outcomes. While this is a long-term project, the Group is confident that it has already resulted in material changes to the way it conducts business.

For more information on PPI refer to page 479. For information on other litigation, investigations and reviews, refer to pages 474 to 482.

Top and emerging risk scenarios

As part of its risk management process, the Group identifies and monitors its top and emerging risk scenarios. These are events that, should they materialise, would lead to a significant unexpected negative outcome, thereby causing the Group as a whole, or a particular division, to fail to meet one or more strategic objectives. In assessing the potential impact of risk materialisation, the Group takes into account both financial and reputational considerations.

Management is concerned with a range of risk scenarios. However, a small number attracted particular attention from senior management during the past year. These were grouped into four broad categories:

- Macroeconomic risks;
- Conduct, regulatory and legal risks;
- Risks related to the Group's operations; and
- Political risk.

Further information on these and other risks facing the Group is detailed in Risk factors on pages 523 to 536.

The Group's top and emerging risks are as follows:

Macroeconomic risks

(i) Increased impairments arising from defaults in sectors to which the Group has concentrated exposures, particularly commercial real estate and shipping

The Group has material exposure to borrowers in a number of sectors, particularly shipping. This sector has experienced falling revenues and declining asset values. If global economic growth remains subdued, losses in these sectors may increase unexpectedly. Any such losses may be exacerbated by issues related to controls.

Impact on the Group

If borrowers default, the value of the Group's collateral may prove inadequate to repay the associated debt, leading to increased impairments. UK Corporate is likely to be most affected.

Mitigants

Optimisation of the Group's shipping and a significant proportion of commercial real estate portfolios is part of Capital Resolution Group strategy.

(ii) Increased impairments arising from a more severe than expected economic downturn

The Group's return to profitability depends on the economic recovery of its major markets. If their recovery is slower than expected, the Group's return to profitability and private ownership may also be deferred. All divisions could be affected.

Impact on the Group

A slower than expected recovery would likely result in lower revenues and income, and higher impairments. It could also result in higher operational losses. If such a downturn were prolonged, capital might also be negatively affected.

Mitigants

The Group develops business plans to take into account the possibility of slow economic growth and implemented strategies, such as cost reductions, to reduce its vulnerability.

(iii) An increase in the Group's obligations to support pension schemes

The Group has established various pension schemes for its employees as a result of which it has incurred certain obligations as sponsor of these schemes. If economic growth stagnates and interest rates remain low as a result, the value of pension scheme assets may not be adequate to fund the pension schemes' liabilities. All of the Group's businesses are exposed to this risk.

Impact on the Group

As asset values were lower and liabilities higher when valued most recently, the Group may be required to set aside additional capital in support of the schemes. The amount of additional capital required depends on the size of the shortfall when the assets are valued as well as the efficacy, and acceptability to the regulator, of management actions undertaken to address it.

*unaudited

Business review Risk and balance sheet management

Risk governance* continued

Top and emerging risk scenarios continued

In addition, the Group may be required to increase its cash contributions to the schemes. Similarly, the amount of additional cash contributions that may be required depends on the size of the shortfall when the assets are valued. If interest rates fall further, the value of the schemes' assets may decline while the value of their liabilities increases, leading to a need to increase cash contributions.

Mitigants

The trustee is responsible for the investment of the main scheme's assets, which are held separately from the assets of the Group.

Conduct, regulatory and legal risks

(i) Increased conduct costs and reputational damage arising from a failure to achieve fair customer outcomes.

In order to achieve its strategic objectives, the Group must put the customer at the heart of its business.

Impact on the Group

Failure to do so would cause the Group to fail to achieve its strategic objectives, which would affect earnings, liquidity, capital and shareholder confidence adversely. The risk of failure affects all divisions.

Mitigants

In order to address this risk, during the year the Group continued to embed good conduct at the heart of the business to ensure fair outcomes for customers.

(ii) Losses or reputational damage arising from litigation

Given its diverse operations, the Group is exposed to the risk of litigation. For example, during the course of 2013, it was subject to shareholder litigation, securities related litigation, various class actions claims, including those related to LIBOR and foreign exchange trading, and mass consumer claims such as those related to Payment Protection Insurance and interest rate hedging products. This risk affects all of the Group's divisions.

Impact on the Group

As a result of litigation, the Group may incur fines, be ordered to pay damages or other compensation, suffer reputational damage, or face limitations on its ability to operate. For example, in the case of LIBOR, the Group agreed to pay settlement penalties to resolve investigations by the European Commission into Yen LIBOR competition infringements and EURIBOR competition infringements.

Mitigants

The Group defends claims against it to the best of its ability and it cooperates fully with various governmental and regulatory authorities.

(iii) Increased costs arising from a failure to demonstrate compliance with existing regulatory requirements related to conduct, particularly with respect to mis-selling

The Group is subject to regulation governing the conduct of its business activities. For example, it must ensure that it sells its products and services only to informed customers. This affects all divisions.

Impact on the Group

If the Group sells products to uninformed customers, or fails to handle complaints well, it may be subject to fines, incur remediation costs or even be subject to criminal charges. It may also suffer significant damage to its reputation.

Mitigants

Although more work needs to be done to mitigate this risk, the Group has simplified some products and stopped offering others. Where appropriate, it has compensated purchasers of some products and services, such as payment protection insurance and certain interest rate hedging products. Future payments of such compensation would give rise to additional costs.

Risks related to the Group's operations

(i) Increased losses arising from cyber attacks

The Group has experienced cyber attacks, which are increasing in frequency and severity across the industry. This risk affects all divisions.

Impact on the Group

A successful cyber attack could lead to fraudulent activity or the loss of customer data. The Group could experience significant losses as a result of the need to reimburse customers, pay fines or both. Furthermore, a successful cyber attack could cause significant damage to the Group's reputation.

Mitigants

The Group has participated in an industry-wide cyber attack simulation. It has also initiated a large scale programme to improve controls over user access. In addition, it has reviewed its websites and taken steps to rationalise them, put additional anti-virus protections in place and taken steps to educate staff on information protection.

(ii) Increased losses arising from the failure of information technology systems

The Group's information technology systems are vulnerable to failure. Because they are complex, recovering from failure is very challenging.

Impact on the Group

A failure of information technology systems could lead to the Group's inability to process transactions or provide services to its customers. Should a failure not be rectified promptly, the Group might lose customers, be subject to fines, incur remediation costs or face legal action. Its reputation might also suffer.

Mitigants

The Group has launched a major investment programme to improve resilience, which has already had an impact. The Group has also enhanced its back up systems and created a 'shadow bank' capable of providing basic services in the event of need. Finally, the Group is improving the documentation of critical business functions.

Business review Risk and balance sheet management

(iii) Increased costs arising from a failure to execute successfully major projects

The Group has a number of major projects underway, the successful conclusion of which is essential if it is to meet new regulatory and strategic requirements. These new requirements affect its organisational structure, its business strategies, its information technology systems, its operational processes and its product offerings. Given the number, scale and complexity of these projects, the Group may not complete them successfully, or at all. This affects all divisions.

Impact on the Group

If the Group does not complete these projects successfully, the interests of customers may be affected, necessitating customer redress. The Group may also incur regulatory fines, lose market share and suffer damage to its reputation.

Mitigants

The Group is working to implement change in line with its project plans while assessing the risks to implementation and taking steps to mitigate those risks where possible.

(iv) Increased costs due to an inability to recruit or retain suitable staff

The Group is undergoing significant organisational change, the result of a need to implement new business strategies and respond to a changing external environment. The pace of change, coupled with the associated uncertainty may cause experienced staff members to leave the Group and prospective staff members not to join. Although these risks concern all divisions, they particularly affect Markets and US Retail & Commercial.

Impact on the Group

If it cannot retain or attract the necessary staff members, the Group may be unable to implement its business strategies or meet regulatory requirements on time, or at all. It may also experience control failures. The Group's reputation may suffer as a result.

Mitigants

The Group has communicated expected changes in its organisational structure to members of staff, implementing plans aimed at minimising unexpected staff losses. The Group is also working to develop and implement an enhanced recruitment strategy.

Political risks

The Group and the Royal Bank, its principal operating subsidiary, are both headquartered and incorporated in Scotland. The Scottish Government is holding a referendum in September 2014 on the question of Scottish independence from the UK. Although the outcome of the referendum is uncertain, subject to any mitigating factors, the uncertainties resulting from an affirmative vote in favour of independence would be likely to significantly impact the Group's credit ratings and could also impact the fiscal, monetary, legal and regulatory landscape to which the Group is subject. Were Scotland to become independent, it may also affect Scotland's status in the European Union.

The occurrence of any of the impacts above could significantly impact the Group's costs and would have a material adverse effect on the Group's business, financial condition, results of operations, and prospects.

*unaudited

Stress testing

Governance

Stress testing is the evaluation of a bank's financial position under severe but plausible stress scenarios. Stress testing also refers to the broader framework under which these tests are developed, evaluated and used within the Group's decision-making process in the context of the wider economic environment.

The Group's stress testing framework is designed to embed stress testing as a key risk management technique into mainstream risk reporting, capital planning and business processes at divisional, legal entity and Group levels.

The Executive Risk Forum (refer to Risk governance on page 176 for further information) is the main body overseeing the Group's stress testing approach, processes and results. The forum is primarily responsible for reviewing and challenging the results of any Group-wide stress test and ensuring that, where necessary, appropriate management actions are undertaken.

The Board Risk Committee receives reports detailing stress tests undertaken as part of the financial planning process. It reviews and challenges the stress scenarios and considers their impact on the Group's financial position. These reports outline relevant management actions as well as the extent to which such actions mitigate the effects of the stress scenario on the Group's capital adequacy.

The Board Risk Committee may also request additional stress tests as it deems necessary. Stress testing forms part of the Group's risk and capital management framework and is a major component of the Basel III requirements. It highlights to senior management potential unexpected adverse outcomes related to a mixture of risks and provides an indication of how much capital might be required to absorb losses should adverse scenarios materialise.

Scenario selection

Stress test scenarios target both firm-wide vulnerabilities and negative global impacts. They consider a five year horizon and include stress projections for macroeconomic variables such as gross domestic product, unemployment rates, property prices, stock price indices, interest rates and inflation. The tests include a variety of scenarios, including some featuring an intensification of the eurozone's sovereign debt problems.

Under one of them, there is a severe recession in the UK in 2013/2014, a sharp rise in unemployment and a marked fall in equity prices. There are downgrades of UK sovereign debt by two notches, and corresponding downgrades for UK banks, including the Group, leading to increased funding costs and lower levels of lending. As the economic environment deteriorates, there is market concern about losses in the banking sector.

Another test run in 2013 is a high inflation-no growth scenario.

Inflationary pressures surge as a result of the growth in central bank balance sheets in recent years. Sovereign bond yields rise steeply as market sentiment sours, and there is a reduction in disposable income and corporate profits, leading to a global recession. Recovery begins only in late 2014. As the bank's risk profile improves as a result of deleveraging, it should be better able to withstand extreme stress scenarios.

Business review Risk and balance sheet management

Risk governance* continued

Stress testing continued

Methodologies

Stress testing is part of the financial planning process and is conducted and presented to senior management semi-annually. Once simply conducted principally to meet regulatory requirements, it is now an integral part of enterprise risk management and used to assess the impact of business decisions on the Group's capital position.

As part of the financial planning and strategy cycle, stress tests are conducted by divisions and aggregated to produce firm-wide results. These stress tests are also used for monitoring divisional and Group risk appetite.

Risk-type specific stress testing is also conducted. For example, within the market risk management framework, a comprehensive programme of stress tests covers a variety of historical and hypothetical scenarios. Reverse stress testing, explicitly identifying and assessing scenarios most likely to render the bank's business model unviable, is also conducted as required by the PRA. In order to cross the business model failure threshold, an instantaneous one year global shock of a similar scale as the 2008 financial crisis is required, but the impact of such a scenario is more likely to be felt over multiple years. Future revenues, and the gradual disposal of Non-Core assets, would partially offset losses, making failure much less likely.

Portfolios subject to review

Portfolio specific stress tests assess the reaction of key-focus portfolios to systemic shocks and individual risk factors to identify potential vulnerabilities, including risks that have not yet matured or are not yet visible. They assess the potential for outsized losses and the impact of rebalancing portfolios.

External stress tests

The Group also takes part in a number of external stress tests. In 2014 the Group will take part in the Bank of England's concurrent stress test of the UK banking system, as well as an industry-wide external stress test conducted by the European Banking Authority on the European Union banking system.

Business review Risk and balance sheet management

Risk appetite*

Risk appetite is both a key business tool and an integral part of the Group's enterprise-wide approach to risk management. It is aligned with the Group's strategic objectives, aiming to strike an optimal balance between building a sustainable risk profile and creating long-term value for the Group's customers, investors and wider stakeholders. The risk appetite framework seeks to ensure that each business can withstand significant deteriorations in economic and market conditions.

The Group's risk appetite is set and owned by the Group Board which identifies and establishes the level and types of risks the Group is able and willing to take in order to meet its:

- Strategic objectives - the Group's strategic plan is built on the core foundations of serving customers well, building a sustainable risk profile and creating long-term value for its shareholders; and
- Wider obligations to stakeholders - a bank that is safe and sound and puts serving customers at the heart of its thinking will also perform well for its owners, employees, regulators and communities.

Risk appetite is cascaded and embedded across the Group. The risk appetite framework provides each business with a greater understanding of acceptable risk levels, aligning commercial strategies with the most effective use of financial resources, such as capital, funding and risk capacity. Risk appetite provides a solid platform that allows the Group to focus on its key business strengths and competitive advantages over the long term.

The Board Risk Committee reviews the Group's risk appetite framework and targets on an annual basis to ensure they remain aligned with strategic objectives, business performance, emerging risks and changes in the external environment.

Strategic risk objectives

Risk management plays an integral role in the delivery of the Group's strategic goal. The implementation of a stronger and more effective culture of risk management and control provides the platform necessary to address vulnerabilities, rebuild on core strengths and position the Group on a sustainable and profitable path for future growth.

Financial strength and resilience are at the heart of the Group's strategic plan. The Group has defined this level of robustness as that which is capable of achieving and sustaining a standalone credit rating (i.e. without government support) that is in line with those of its strongest international peers.

Given this central aim, in 2009 the Group Board set out four key strategic objectives, aligned with the Group's strategic plan.

- *Maintain capital adequacy.* To ensure that the Group has sufficient capital resources to meet regulatory requirements and to cover the potential for unexpected losses in its asset portfolio.
- *Deliver stable earnings growth.* To ensure that strategic growth is based around a longer-term risk versus reward consideration, with significantly lower volatility in underlying profitability than was seen during the financial crisis.
- *Ensure stable and efficient access to funding and liquidity.* To ensure that the Group has sufficient funding to meet its obligations, taking account of the constraint that some forms of funding may not be available when they are most needed.
- *Maintain stakeholder confidence.* To ensure that stakeholders have confidence in the Group's recovery plan, its ability to deliver its strategic objectives and the effectiveness of its business culture and operational controls.

Each objective is essential in its own right, but also mutually supportive of the others. The strategic risk objectives are the bridge between the Group-level business strategy and the frameworks, limits and tolerances that are used to set risk appetite and manage risk in the business divisions on a day-to-day basis.

*unaudited

Business review Risk and balance sheet management

Risk appetite measures

Risk appetite starts with the strategic goals and risk philosophy set by the Group Board and is cascaded through key targets, limits and risk tolerances that influence decision making, from the enterprise-wide to the transactional level.

The risk appetite framework is based on four main pillars:

- Risk envelope metrics - The Group has set sustainable business goals over a medium-term horizon, including a target for the capital ratio, leverage ratio, loan:deposit ratio, liquidity portfolio and use of wholesale funding. These are the broad boundaries within which the Group operates. Non-Core division also acts as a primary driver for reducing risk and the size of the balance sheet.
- Quantitative risk appetite targets - Risk appetite is also aligned with potential risk exposures and vulnerabilities under severe but plausible stress conditions. Quantitative targets, to be met under stress conditions, are set around the Group's strategic risk objectives for maintaining capital adequacy, delivering stable earnings growth and ensuring stable and efficient access to funding and liquidity.
- Qualitative risk appetite targets - The fourth strategic risk objective of maintaining stakeholder confidence covers qualitative aspects relating to the culture of risk management and controls and meeting stakeholder expectations. Risk appetite is based around identified expectations across a range of stakeholders (e.g. customers, employees, investors and the general public) and is closely aligned with key risk policies and controls (e.g. the Group Policy Framework, conduct risk and reputational risk).
- Risk control frameworks and limits - Risk control frameworks set detailed tolerances and limits for material risk types (e.g. credit risk, market risk, conduct risk and operational risk) that are used to manage risk on a day-to-day basis. These limits support and are required to be consistent with the high-level risk appetite targets.

The framework is supported by a programme of communication, engagement and training rolled out across the Group to embed a wide understanding of the purpose and value of an effective risk appetite.

Risk appetite supports value creation in a safe sustainable way. It is embedded within the annual planning and budgeting process. Business strategies are designed on the basis of key value drivers (e.g. customer franchises, income and profit generation, synergies) and whether they fit within agreed risk appetite boundaries. A range of different but complementary tools have been developed to measure whether strategic plans are consistent with risk appetite, to test broader 'what if' questions and to assess the impact of changes in key assumptions:

- Integrated stress testing - assesses how earnings, capital and funding positions change under an unfavourable, yet plausible, scenario. Stress scenarios can differ by theme, geographical location or severity.

- Economic capital - provides complementary insights, with a breadth of understanding of risk profile changes and 'tail risks' generated by stimulating millions of different scenarios.
- Sensitivity analysis - provides 'ready reckoners' around changes in key variables. It provides a high-level view on questions such as 'what if gross domestic product worsened by a further 1%', identifying certain tipping points where the Group's risk profile moves outside appetite.

More effective processes for reporting the results have also been developed, presenting the Board and senior management with a more holistic and dynamic view of key risk exposures.

Divisional risk appetite statements

Risk appetite is set at the Group level then cascaded and embedded across all business areas. Each division is required to develop, own and manage a risk appetite statement aligned with the Group's risk appetite and:

- Covers all identified material risks;
- Enables each business to understand its acceptable levels of risk; and
- Ensures that commercial strategies are aligned with the use of available financial resources.

By setting a clear risk appetite and embedding a strong risk culture throughout its businesses, the Group can identify, measure and control risk exposures and respond effectively to shocks. Each division is responsible for ensuring its strategic plans are consistent with its approved risk appetite.

Risk control frameworks and limits

Risk control frameworks and their associated limits are an integral part of the risk appetite framework and a key part of embedding risk appetite targets in day-to-day risk management decisions. The risk control frameworks manage risk concentrations on a 'bottom-up' basis through portfolio and product limit setting, expressing a clear tolerance for material risk types that is aligned to business activities. These are aligned with a 'top-down' approach via a calibration of their aggregate contribution with the Group's risk appetite targets (i.e. earnings volatility, capital and liquidity consumption and impact on stakeholder confidence).

The Group Policy Framework directly supports the qualitative aspects of risk appetite, helping to rebuild and maintain stakeholder confidence in the Group's risk control and governance. Its integrated approach is designed to ensure that an appropriate standard of control is set for each of the material risks the Group faces, with an effective assurance process put in place to monitor and report on performance. Risk appetite has its own policy standard within the Group Policy Framework that sets out clear roles and responsibilities to measure, cascade and report performance against risk appetite, as well as to provide assurances that business is being conducted within approved risk limits and tolerances.

Risk appetite* continued

Culture, values and remuneration

Objectives for risk culture

Risk culture plays a key role in the Group's ambition to build "a really good bank". A strong risk culture is a key part of ensuring risk appetite is effectively embedded across the Group. The link between risk appetite and strategic objectives encourages people at all levels of the business to think about risk, how they identify it and how they manage it. It incorporates the quantitative and qualitative aspects of risk and uses both absolute and relative risk measures.

Risk culture policies

The Group's values - of "serving customers well", "working together", "doing the right thing" and "thinking long term" - act as a clear starting point for a strong and effective risk culture. A wide range of communication and engagement activities (detailed below) has been undertaken to discuss the meaning of each value with employees and how they affect and guide day-to-day activities.

The embedding of the Group's values into a strong risk culture is supported by a revised and more focused Code of Conduct. The Code provides guidance on expected behaviour and sets out the standards of conduct that support the Group's values. It explains the effect of decisions that are taken and describes the principles that must be followed.

These business principles cover conduct related issues as well as wider business activities. They focus on desired outcomes, with practical guidelines to align the Group's values with its commercial strategy and actions. The embedding of business principles facilitates sound decision making and a clear focus on good customer outcomes in 'the moments that matter'. It is aligned with the people management and remuneration processes to support a positive and strong risk culture through appropriate incentive structures.

Training

Across the risk management function, a series of events and activities have been undertaken to 'bring alive' the Group's values and culture for employees. This is supported by performance management processes that hold individuals to account for poor behaviour and reward the behaviour that supports our purpose, visions and values.

Challenge mechanisms

A simple decision making guide (called the "YES check") has been included within the Code of Conduct. It is a simple, intuitive set of five questions, designed to ensure the values guide day-to-day decisions:

- Does what I am doing keep our customers and the Bank safe and secure?
- Would customers and colleagues say I am acting with integrity?
- Am I happy with how this would be perceived on the outside?
- Is what I am doing meeting the standards of conduct required?
- In five years time would others see this as a good way to work?

Each question is a prompt to think about the situation and how it fits with the Group's values. It ensures that employees can think through decisions that don't have a clear answer, guiding the judgements behind their decisions and actions.

Risk-based key performance indicators

The Group's policy standards require all current Code Staff roles to use a balanced scorecard approach to performance management. This ensures recognition of the longer-term business requirements and a balance between financial and non-financial metrics, including an evaluation of adherence to internal controls and risk management. Since 2011, all Code Staff roles have had specific risk objectives in their performance plan.

Unvested awards are subject to clawback and may be reduced, or forfeited in full, at the discretion of the Group Performance and Remuneration Committee. For Code Staff roles, the Committee can apply clawback if the company, business area and team, or the individual subsequently incurs significant loss (either financial or reputational), or if the Group as a whole suffers a material failure of risk management or material downturn in its financial performance.

Awards to employees under the Group's long-term incentive plan are subject to financial and operational measures and an underlying requirement for effective risk management during the performance period.

The Group Performance and Remuneration Committee has put in place a Group-wide remuneration policy which is explicitly aligned with effective risk management. Performance is a key input into the determining of remuneration levels. Group and divisional plans and targets are aligned with the risk appetite and the long-term interests of the Group, as determined by the Board. These targets are the basis of Group Executive members' objectives, which are approved by the Group Performance and Remuneration Committee. These objectives are then cascaded through the divisions and functions.

There is significant focus on risk in performance assessment with all executives and Code Staff receiving specific risk feedback through an independent "360-degree" feedback process. As part of the line manager's assessment of individual performance divisional control functions, including risk, provide independent input to the line manager.

Business review Risk and balance sheet management

Risk coverage

The Group continued to strengthen its approach to risk management amid a challenging and ever-changing external environment in 2013. Areas of progress included:

- The completion of the phased roll-out of the Group's conduct risk policies and of a more effective operating model, supported by the development and delivery of awareness initiatives and targeted training;
- The implementation of the enhanced country risk appetite framework, including top-down risk appetite, and of enhanced assurance processes;
- The introduction of a new integrated operating model for managing regulatory developments, which combines divisional and functional teams to leverage expertise more effectively; and
- Further strengthening of the Group's credit risk management framework.

The main risk types faced by the Group are presented below, together with a summary of the key areas of focus and how the Group managed these risks in 2013. In preparing disclosures related to these risks, the Group has considered the recommendations of the Enhanced Disclosure Task Force issued in October 2012. A summary of the recommendations and list of disclosures that meet these recommendations has been included on page 557.

Risk type	Definition	Features	How the Group manages risk and the focus in 2013
Capital adequacy risk	The risk that the Group has insufficient capital.	<p>Arises from: Inefficient management of capital resources.</p> <p>Character and impact: Characterised typically by credit risk losses.</p> <p>It has the potential to disrupt the business if there is insufficient capital to support business activities. It also has the potential to cause the Group to fail to meet regulatory requirements. Group capital and earnings may be affected, impairing the activities of all divisions.</p>	<p>The Group's Core Tier 1 ratio on a Basel 2.5 basis was 10.9% and on a fully loaded Basel III (FLB3) basis was 8.6% at 31 December 2013. The Group is targeting a FLB3 Common Equity Tier 1 ratio of c.11% by the end of 2015 and 12% or above by the end of 2016. The timely run-down of RCR and the successful divestment of Citizens are key to the achievement of the Group's capital plans.</p> <p>Refer to the Capital management section on pages 192 to 208 for further information.</p>
Liquidity and funding risk	The risk that the Group is unable to meet its financial liabilities as they fall due.	<p>Arises from: The Group's day-to-day operations.</p> <p>Character and impact: Dependent on company-specific factors such as maturity profile and composition of sources and uses of funding, the quality and size of the liquid asset buffer as well as broader market factors, such as wholesale market conditions alongside depositor and investor behaviour.</p> <p>It has the potential to cause the Group to fail to meet regulatory liquidity requirements, become unable to support normal banking activity or at worst cease to be a going concern. Adverse impact on customer and investor confidence in the Group and the wider financial system is also possible.</p>	<p>Liquidity and funding metrics continued to strengthen with short-term wholesale funding of £32.4 billion, covered more than four times by a liquidity portfolio of £146.1 billion. Liquidity coverage and net stable funding ratios also improved.</p> <p>Refer to the Liquidity and funding risk section on pages 209 to 226 for further information.</p>

Business review Risk and balance sheet management

Risk appetite*: Risk coverage continued

Risk type	Definition	Features	How the Group manages risk and the focus in 2013
Credit risk	The risk of financial loss due to the failure of a customer, or counterparty, to meet its obligation to settle outstanding amounts.	<p>Arises from: Deterioration of the credit quality of customers or counterparties of the Group, leaving them unable to meet their contractual obligations.</p> <p>Character and impact: Losses can vary materially across portfolios and may include the risk of loss due to the concentration of credit risk related to a specific product, asset class, sector or counterparty.</p> <p>It has the potential to affect adversely the Group's financial performance and capital.</p>	<p>During 2013, loan impairment charges were £8.4 billion, of which £4.5 billion related to the creation of RCR and the related strategy. Excluding the increased impairments related to RCR, loan impairment losses fell by £1.4 billion. Impairment provisions covered risk elements in lending of £39.4 billion by 64%, up from 52% a year earlier. Credit risk RWAs fell by 16% to £313.4 billion, within which counterparty risk RWAs more than halved to £22.3 billion, reflecting risk reduction and core product focus in Markets as well as Non-Core disposals and run-off.</p> <p>Credit risk is managed using a suite of credit approval, risk concentration, early warning and problem management frameworks as well as associated risk management tools.</p> <p>The focus in 2013 was on the calibration of the credit control framework to align with Group risk appetite targets and the enhancement of existing Basel models.</p> <p>Refer to the Credit risk and Balance sheet analysis sections on pages 227 to 317 for further information.</p>
Market risk	The risk of loss arising from fluctuations in interest rates, credit spreads, foreign currency rates, equity prices, commodity prices and other risk-related factors such as market volatilities that may lead to a reduction in earnings, economic value or both.	<p>Arises from: Adverse movements in market prices.</p> <p>Character and impact: Characterised by frequent small losses, which are material in aggregate, and infrequent large material losses due to stress events.</p> <p>It has the potential to materially affect financial performance in Markets, International Banking, Non-Core and Group Treasury where the Group has the majority of its exposures. The Group's non-trading activities in retail and commercial businesses can also be affected through interest rate risk and foreign exchange non traded exposures.</p>	<p>During 2013, the Group continued to reduce its risk exposures. Average trading value-at-risk (VaR) decreased significantly from £97 million to £79 million, reflecting risk reduction and capital management focus. De-risking within the rates business and improvements in the capture of valuation adjustment risks within the counterparty exposure management desk in Markets helped reduce VaR in the first half of 2013. Ongoing reductions in the asset-backed securities inventory drove down the risk even further in the second half of 2013.</p> <p>Refer to the Market risk section on pages 318 to 340 for further information.</p>

Business review Risk and balance sheet management

Risk type	Definition	Features	How the Group manages risk and the focus in 2013
Country risk	The risk of losses occurring as a result of either a country event or unfavourable country operating conditions.	<p>Arises from: Sovereign events, economic events, political events, natural disasters or conflicts.</p> <p>Character and impact: Primarily present in credit portfolios of Markets, International Banking, Ulster Bank (Ireland), Group Centre (mainly Treasury), US Retail & Commercial and Non-Core.</p> <p>It has the potential to affect parts of the Group's credit portfolio that are directly or indirectly linked to the country in question.</p>	<p>The Group Country Risk Committee manages country risk matters including: risk appetite; risk management strategy and framework; risk exposure and policy; sovereign ratings; sovereign loss given default rates; and country Watchlist colours, with escalation where needed to the Executive Risk Forum.</p> <p>Regular, detailed reviews are carried out on all portfolios to ensure their composition remains in line with the Group's country risk appetite and reflects economic and political developments.</p> <p>A country risk Watchlist process identifies emerging issues and assists in the development of mitigation strategies. In 2013, the scope of this process was widened to include all countries with Group exposure.</p> <p>Balance sheet exposure to eurozone periphery countries continued to fall, and was down by 11% to £52.9 billion at the end of 2013, of which 70% related to Ireland, primarily reflecting exposures in Ulster Bank.</p> <p>Refer to the Country risk section on pages 341 to 353 for further information.</p>
Conduct risk	The risk that the conduct of the Group and its staff towards its customers, or within the markets in which it operates, leads to reputational damage and/or financial loss.	<p>Arises from: Breaches of regulatory rules or laws, resulting from the Group's retail or wholesale conduct; or from failing to meet customers' or regulators' expectations of the Group.</p> <p>Character and impact: Failures in product design, training and competence, complaint handling and transaction reporting can lead to an increase in complaints, compensation claims and regulatory censure.</p> <p>It has the potential to affect earnings (through loss of customer confidence and sales), as well as capital and liquidity (including regulator imposed fines for inappropriate conduct). It also affects the confidence of other key Group stakeholders, such as private and institutional shareholders, regulators and governments.</p>	<p>Conduct risk is managed through the Group's Conduct Risk Committee, under delegated authority from the Executive Risk Forum. The Committee is responsible for governance, leadership and risk appetite.</p> <p>The focus in 2013 was on placing conduct risk at the centre of the Group's philosophy and on completing the development of the risk framework. Promoting understanding of conduct issues and ensuring compliance with regulations and rules are priorities for the Group.</p> <p>Refer to the Conduct risk section on pages 355 and 356 for further information.</p>

Business review Risk and balance sheet management

Risk appetite*: Risk coverage continued

Risk type	Definition	Features	How the Group manages risk and the focus in 2013
Pension risk	The risk to a firm caused by its contractual or other liabilities to, or with respect to, its pension schemes, whether established for its employees or for those of a related company or otherwise. It also means the risk that the firm will make payments or other contributions to, or with respect to, a pension scheme because of a moral obligation, or because the firm considers that it needs to do so for some other reason.	<p>Arises from: Variation in value of pension scheme assets and liabilities owing to changes to life expectancy, interest rates, inflation, credit spreads, and equity and property prices.</p> <p>Character and impact: Pension schemes' funding positions can be volatile due to the uncertainty of future investment returns and the projected value of schemes' liabilities. The Group might have to make financial contributions to, or with respect to, its pension schemes.</p> <p>It has the potential to adversely affect the Group's funding and capital requirements.</p>	<p>The Group's Pension Risk Committee considers the Group's view of pension risk, mechanisms that could be used for managing pension risk and the financial strategy implications of the pension schemes as well as reviewing fund performance. The Committee reports to the Group Asset and Liability Committee on the material pension schemes that the Group is obliged to support.</p> <p>In 2013, various pension risk stress testing initiatives were undertaken, focused both on internally defined scenarios and on scenarios designed to meet integrated PRA stress testing requirements.</p> <p>Refer to the Pension risk section on pages 356 and 357 for further information.</p>
Operational risk	The risk of loss resulting from inadequate or failed processes, people, systems or from external events.	<p>Arises from: The Group's day-to-day operations and is relevant to every aspect of the Group's business.</p> <p>Character and impact: May be financial in nature (characterised by either frequent small losses or infrequent material losses), or may lead to direct customer and/or reputational impact (for example, a major IT systems failure or fraudulent activity).</p> <p>It has the potential to affect the Group's profitability and capital requirements directly, as well as stakeholder confidence.</p>	<p>Operational risk is managed by the Operational Risk Executive Committee. It is responsible for identifying and managing emerging operational risks, and for reviewing and monitoring operational risk profile strategies and frameworks, ensuring they are in line with risk appetite.</p> <p>In 2013, the focus was on continued implementation and embedding of risk assessments across the Group, including the strengthening of links between risk assessments and other elements of the Group operational risk framework. In addition, risk assessments were increasingly used to identify single points of failure.</p> <p>Refer to the Operational risk section on pages 358 to 360 for further information.</p>
Regulatory risk	The risk of material loss or liability, legal or regulatory sanctions, or reputational damage, resulting from the failure to comply with (or adequately plan for changes to) relevant official sector policy, laws, regulations, or major industry standards, in any location in which the Group operates.	<p>Arises from: The Group's regulatory, business or operating environment, and in how it responds to these.</p> <p>Character and impact: The crystallisation of regulatory risk can result in adverse impacts on the Group's customers, strategy, business, financial condition or reputation, for instance, through the failure to provide appropriate protections to customers, or from regulatory enforcement or other interventions.</p> <p>It has the potential to adversely impact the Group's customers, strategy, business, financial condition or reputation.</p>	<p>The management of regulatory (as well as conduct) risk is overseen by the Conduct and Regulatory Affairs function.</p> <p>The Group's existing Compliance and Regulatory Affairs teams were brought together in the second half of 2013, following the creation of the role of Group Head of Conduct and Regulatory Affairs. The Conduct and Regulatory Affairs function has responsibility for setting Group-wide policy and standards, providing advice to the business and ensuring controls are effective for managing regulatory affairs, compliance and financial crime risks across all businesses.</p> <p>Other enhancements were also made during 2013 included the creation of a more centralised approach to assurance activities and the introduction of a new 'Centres of Excellence' model for the management of regulatory developments, bringing together divisional and functional resources to manage issues more effectively.</p> <p>Refer to the Regulatory risk section on page 360 and 361 for further information.</p>

*unaudited

Business review Risk and balance sheet management

Risk type	Definition	Features	How the Group manages risk and the focus in 2013
Reputational risk	The risk of brand damage and/or financial loss due to a failure to meet stakeholders' expectations of the Group.	<p>Arises from: Actions taken (or, in some cases, not taken) by the Group, as well as its wider policies and practices.</p> <p>Character and impact: Can result in an inability to build or sustain customer relationships, in low staff morale, in regulatory censure, or in reduced access to funding.</p>	<p>The reputational risk framework is aligned with the Group's focus on serving customers well, strategic objectives and the risk appetite goal of maintaining stakeholder confidence.</p> <p>In 2013, the environmental, social and ethical risk management function was set up to address the reputational risk associated with the clients the Group chooses to do business with. It sets policy and provides guidance to avoid reputational risk relating to business engagements and lending to clients in sensitive industry sectors.</p> <p>Refer to the Reputational risk section on pages 361 and 362 for further information.</p>
Business risk	The risk of losses as a result of adverse variance in the Group's revenues and/or costs relative to its business plan and strategy.	<p>Arises from: Internal factors such as volatility in pricing, sales volumes and input costs, and/or by external factors such as exposure to macroeconomic, regulatory and industry risks.</p> <p>Character and impact: Can lead to adverse changes in revenues and/or costs.</p> <p>It has the potential to directly affect the Group's profitability and capital requirements, as well as stakeholder confidence.</p>	<p>The Group Board has ultimate responsibility for business risk through the achievement of the Group's business plan. The primary responsibility for divisional financial performance rests with the divisional CEO supported by divisional Executive Committee and functions.</p> <p>In 2013, the management and measurement of business risk was enhanced with an increased focus on stress testing.</p> <p>The Group responded to business risk challenges by focusing on the management of net interest margin in order to sustain and grow revenues. In addition, it introduced cost management programmes to deliver substantial savings.</p> <p>Refer to the Business risk section on pages 362 and 363 for further information.</p>
Strategic risk	The risk that the Group will make inappropriate strategic choices, or that there will be changes in the external environment to which the Group fails to adapt its strategies.	<p>Arises from: the Group's management of its strategy.</p> <p>Character and impact: Varied losses affecting earnings, capital, liquidity and customer and stakeholder confidence. Can affect all divisions.</p>	<p>The Group is focusing on reducing strategic risk following a wide-ranging review to analyse core activities and formulate an appropriate plan, including rationalisation where necessary, to address the business challenges of the next five years.</p> <p>The successful execution of this strategy is set against a background of increasing regulatory demands and scrutiny as well as a challenging macroeconomic environment. Successful and timely execution of the strategy will be key to the future success of the Group.</p> <p>Refer to the Strategic risk section on pages 363 and 364 for further information.</p>
Political risk	The risk to the Group's business and operations of the referendum on Scottish independence.		<p>During 2013 the focus on the question of potential Scottish independence from the UK heightened, and the Scottish government will be holding a referendum in September 2014. A vote in favour of Scottish independence would be likely to impact the Group's costs and could also impact the fiscal, legal and regulatory landscape to which the Group is subject. Were Scotland to become independent, it may also affect Scotland's status in the European Union.</p>

Business review Risk and balance sheet management

Capital management*

Definition

The Group aims to maintain an appropriate level of capital to meet its business needs and regulatory requirements, and operates within an agreed risk appetite. The appropriate level of capital is determined based on the dual aims of: (i) meeting minimum regulatory capital requirements; and (ii) ensuring the Group maintains sufficient capital to uphold customer, investor and rating agency confidence in the organisation, thereby supporting the business franchise and funding capacity.

2013 overview

The Group reported a Core Tier 1 ratio of 10.9% as at 31 December 2013. On a fully loaded Basel III basis, the Group's equivalent Common Equity Tier 1 (CET1) ratio was 8.6%.

The Group's Core Tier 1 ratio is higher than at the end of 2012 despite absorbing changes to credit model parameters and in the face of challenging economic headwinds and continuing costs of de-risking. This has been achieved through a continued focus on reshaping the Group's use of capital with the Group announcing in November 2013 management actions to accelerate the building of its capital strength. The measures include creation of an internal 'bad bank' to accelerate the run-down of high risk assets of £29 billion funded assets at the end of 2013.

Faster run-down of high risk assets entails accelerated and increased impairments and other adjustments in the fourth quarter of 2013, but the capital impact of this is significantly reduced by a commensurate reduction in expected loss capital deductions. The management strategy will result in a strengthening of the Group's capital ratios in the medium term.

The Group continues to target a fully loaded Basel III CET1 ratio of c.11% by the end of 2015 and 12% or above by the end of 2016.

The Group has announced plans to accelerate the divestment of RBS Citizens. Preparations for a partial initial public offering in 2014 are on track and the Group intends to fully divest the business by the end of 2016, benefiting CET1.

The Group continues to meet the minimum leverage ratio under both the Basel III and Capital Requirements Regulation (CRR) bases.

Focus for the Group remains on active de-risking of the balance sheet to meet strategic objectives, demonstrated in the leverage exposure measure by Non-Core asset disposal and run-off, and the downsizing of Markets business.

Regulatory developments

CRD IV

The European Union has implemented the Basel III proposals through the CRR and the Capital Requirements Directive (CRD), collectively known as CRD IV. CRD IV was implemented on 1 January 2014. The European Banking Authority's technical standards which will provide clarification of the CRD IV, are still to be finalised through adoption by the European Commission and implemented within the UK.

The Prudential Regulatory Authority (PRA) announced the acceleration of the end state rules for CET1 capital, whereby from 1 January 2014 the calculation is now closely aligned with the fully loaded definition. There will be no transitional arrangements applied to the prudential filters or regulatory deductions with the exception of unrealised gains on available for sale debt and equity which will be incorporated from 1 January 2015.

CRD IV and Basel III will impose a minimum CET1 ratio of 4.5% of RWAs. There are three buffers which will affect the Group: the capital conservation buffer set at 2.5%; the counter-cyclical capital buffer (up to 2.5% of RWAs), to be applied when macroeconomic conditions indicate areas of the economy are over-heating; and the Global-Systemically Important Bank buffer currently set at 1.5% for the Group. The regulatory target capital requirements will be phased in and are expected to apply in full from 1 January 2019, in the meantime using national discretion the PRA can apply a top-up. As set out in the PRA's Supervisory Statement SS3/13, the Group and other major UK banks and building societies are required to meet a CET1 ratio of 7% after taking into account certain adjustments set by the PRA.

PRA guidance indicates that from 1 January 2015, the Group must meet at least 56% of its Pillar 2A capital requirement with CET1 capital and the balance with Additional Tier 1 capital. The Pillar 2A capital requirement is the additional capital that the Group must hold, in addition to meeting its Pillar 1 requirements in order to comply with the PRA's overall financial adequacy rule.

Subordinated debt instruments which do not meet the new eligibility criteria will be grandfathered on a reducing basis over ten years.

Governance

Governance and approach

The Group Asset and Liability Management Committee (GALCO) is responsible for ensuring the Group maintains adequate capital at all times. The Capital and Stress Testing Committee (CAST) is a cross-functional body driving and directing integrated risk capital activities including determination of the amount of capital the Group should hold, how and where capital is allocated and planning for actions that would ensure that an adequate capital position would be maintained in a stressed environment. These activities have linkages to capital planning, risk appetite and regulatory change. CAST reports through GALCO and comprises senior representatives from Risk Management, Group Finance and Group Treasury. Target capital ratios are set and monitored by the PRA for the Group. Management of capital is achieved by supervision of forecast capital and RWA over a five year time horizon.

Pillar 3

The Group's Pillar 3 disclosures provide additional analysis of exposure at default and credit risk measures such as credit risk mitigation, counterparty credit risk and provisions and their associated RWAs under the various Basel II approaches.

*unaudited

Business review Risk and balance sheet management

Capital management* continued

Governance continued

Determining appropriate capital

The Group's own determination of sufficient capital is derived from the desired credit rating, risk appetite and reflects the current and emerging regulatory requirements of the Group. It is evaluated through both internally and externally defined stress testing to identify potential changes in capital ratios in a range of scenarios.

Basel II requires RWAs to be calculated for credit, market and operational risk with various approaches available to banks, with differing levels of sophistication. The minimum capital requirement is calculated as 8% of RWAs.

The Group identifies the management and recovery actions that could be applied in stress environments. These form an important part of the capital management approach and the contingency planning arrangements, complementing the established buffers.

Monitoring and maintenance

Based on these determinations, which are continually reassessed, the Group aims to maintain capital adequacy, both at Group level and in each regulated entity.

The Group operates a rigorous capital planning process aimed at ensuring the capital position is controlled within the agreed parameters. This incorporates regular re-forecasts of the capital positions of the regulated entities and the overall Group. In the event that the projected position might deteriorate beyond acceptable levels, the Group would issue further capital and/or revise business plans accordingly.

Stress testing approaches are used to determine the level of capital required to ensure the Group expects to remain adequately capitalised.

Minimising surplus profits and capital

The Group has a process in place which requires surplus distributable profits of all Group subsidiaries, after making allowance for sufficient capital to support current and prospective growth in the following half-year, to be repatriated by way of a dividend on a half yearly basis and paid in cash before the period end. Surplus is defined as subsidiary capital of more than £1 million in excess of the regulatory minimum for UK banks and in accordance with the Group's policy, including capital buffers, or the industry specific/overseas regulatory requirements. However, fungibility of capital is subject to the approval of the local regulator.

Capital allocation

Capital resources are allocated to the Group's businesses based on key performance parameters agreed by the Group Board in the annual strategic planning process. Principal among these is a profitability metric, which assesses the effective use of the capital allocated to the business. Projected and actual return on equity is assessed against target returns set by the Group Board. The allocations also reflect strategic priorities, the intensity of regulatory capital use and the usage of other key Group resources such as balance sheet liquidity and funding.

Economic profit is also planned and measured for each division during the annual planning process. It is calculated by deducting the cost of equity utilised in the particular business from its operating profit and measures the value added over and above the cost of equity.

The Group aims to deliver sustainable returns across the portfolio of businesses with projected business returns stressed to test key vulnerabilities.

The divisions use return on capital metrics when making pricing decisions on products and transactions, to ensure customer activity is appropriately aligned with Group and divisional targets and allocations.

The PRA uses the risk asset ratio as a measure of capital adequacy in the UK banking sector, comparing a bank's capital resources with its RWAs (the assets and off-balance sheet exposures are weighted to reflect the inherent credit and other risks).

Economic capital

Economic capital is an internal measure of the risks to which the Group is exposed and is used as a supplement to other risk and capital tools, such as stress testing and regulatory capital. The measure includes risk exposures for credit, market, business, operational, pension, fixed asset and interest rate risk in the banking book. These models capture risks not fully addressed within the Pillar 1 regulatory framework e.g. concentration, pension, interest rate, business risk and diversification.

The characteristics of the models are consistent across risks, business lines and throughout the economic cycle, but are also flexible to allow outcomes to be employed for a number of purposes e.g. severity level/confidence interval, time horizon and correlations. Models have been developed internally but are subject to rigorous governance including external benchmarking, independent validation and extensive internal review and challenge. Models are regularly reviewed and continue to be updated for new data sources and improvements in risk modelling methodology.

The ability to change severity levels supports management of earnings volatility and capital risk. Economic models are used in the Internal Capital Adequacy Assessment Process, assessing risk profiles within the risk appetite framework, functional risk management e.g. credit exposures at both Group and business levels, assessing business line profitability on a risk adjusted basis and the management and allocation of capital.

Business review Risk and balance sheet management

Capital resources

The Group's capital, RWAs and risk asset ratios, on the basis of current rules (Basel 2.5) and CRR or fully loaded Basel III (FLB3), calculated in accordance with PRA definitions, are set out below.

<u>Current rules</u> <u>Capital</u>	2013 £bn	2012 £bn	2011 £bn
Core Tier 1	42.2	47.3	46.3
Core Tier 1 (excluding Asset Protection Scheme (APS) in 2011)	42.2	47.3	49.1
Tier 1	50.6	57.1	57.0
Total	63.7	66.8	60.7

RWAs by risk

Credit risk			
- non-counterparty	291.1	323.2	344.3
- counterparty	22.3	48.0	61.9
Market risk	30.3	42.6	64.0
Operational risk	41.8	45.8	37.9
	385.5	459.6	508.1
APS relief	—	—	(69.1)
	385.5	459.6	439.0

Risk asset ratios

	%	%	%
Core Tier 1	10.9	10.3	10.6
Core Tier 1 (excluding APS in 2011)	10.9	10.3	9.7
Tier 1	13.1	12.4	13.0
Total	16.5	14.5	13.8

Estimated FLB3 (1)

	2013	2012
CET1 capital	£36.8bn	£37.9bn
RWAs	£429.1bn	£494.6bn
CET1 ratio	8.6%	7.7%
Leverage ratio	3.5%	3.1%

Note:

(1) Calculated on the basis disclosed on page 199.

Key points

- Core Tier 1 capital ratios, under current rules and the fully loaded Basel III basis, improved by 60 basis points and 90 basis points respectively in the year. The benefit of lower RWAs was partially offset by the significant attributable loss for the year. The establishment of RCR and the related impairments reduced the ratios by c.10 basis points and c.20 basis points respectively.
- RWA decreases under current rules were primarily in Markets (£36.8 billion) as a result of balance sheet and risk reduction, and in Non-Core (£31.2 billion) reflecting disposal of capital intensive portfolios and run-off.

Current capital resources and CRR capital estimate

A reconciliation between capital as reported under the current basis (Basel 2.5), transitional basis (PRA) and full basis (final CRR) is set out below.

Although the CRR text has been finalised, many of the Regulatory Technical Standards (RTS) are still draft. The finalisation of these could have a material impact in a number of areas such as the scope of the deduction for insignificant financial holdings. Further guidance is provided by the European Banking Authority through published Q&A.

The 'year 1 transitional basis' applies the rules as if 2013 was year 1 of the transition period. The full basis shows the same calculation based on a complete implementation of CRR. This is based on the Group's interpretation of the current rules and guidance.

In the first year of transition, the regulatory adjustments will be calculated under the new rules. The CRR deductions are determined by applying the transitional percentage (20% in year 1)⁽¹⁾. The residual balance will be deducted according to the current rules, except where the PRA has specified a different treatment.

The Group is well advanced in its preparations to comply with the new requirements. Given the phasing of both capital requirements and target levels, in advance of needing to comply with the fully loaded end state requirements, the Group will have the opportunity to continue to generate additional capital from earnings and take management actions to mitigate the impact of CRD IV.

The Group's CET1 ratio on a fully loaded basis at 31 December 2013, based on its interpretation of the rules is estimated at 8.6%⁽¹⁾.

The actual impact of CRD IV on capital ratios may be different as the requirements and related technical standards have not yet been finalised and will ultimately be subject to application by local regulators. The actual impact will also be dependent on required regulatory approvals and the extent to which further management action is taken prior to implementation.

Note:

(1) The PRA issued its consultative paper on implementing CRD IV (PS7/13) in December 2013. Under the draft proposals, there would be no transition in respect of the changes to the prudential filters and deductions from CET1. These proposals came into effect from 1 January 2014.

At 31 December 2013	36,768	8,733	45,501

Notes:

General:

In accordance with the PRA's Policy Statement PS7/13 issued in December 2013 on the implementation of CRD IV, all regulatory adjustments and deductions to CET1 have been applied in full (i.e. no transition) with the exception of unrealised gains on AFS securities which will be included from 2015.

CRD IV and Basel III will impose a minimum CET1 ratio of 4.5% of RWAs. There are three buffers which will affect the Group: the capital conservation buffer set at 2.5%; the counter-cyclical capital buffer (up to 2.5% of RWAs), to be applied when macroeconomic conditions indicate areas of the economy are over-heating; and the Global-Systemically Important Bank buffer currently set at 1.5% for the Group. The regulatory target capital requirements will be phased in and are expected to apply in full from 1 January 2019, in the meantime using national discretion the PRA can apply a top-up. As set out in the PRA's Supervisory Statement SS3/13, the Group and other major UK banks and building societies are required to meet a CET1 ratio of 7% after taking into account certain adjustments set by the PRA.

PRA guidance indicates that from 1 January 2015, the Group must meet at least 56% of its Pillar 2A capital requirement with CET1 capital and the balance with Additional Tier 1 capital. The Pillar 2A capital requirement is the additional capital that the Group must hold, in addition to meeting its Pillar 1 requirements in order to comply with the PRA's overall financial adequacy rule.

Estimates, including RWAs, are based on the current interpretation, expectations, and understanding of the CRR requirements, anticipated compliance with all necessary enhancements to model calibration and other refinements, as well as further regulatory clarity and implementation guidance from the UK and EU authorities. The actual CRR impact may differ from these estimates when the final technical standards are interpreted and adopted.

Capital base:

- (1) Includes the nominal value of B shares (£0.5 billion) on the assumption that RBS will be privatised in the future and that they will count as permanent equity in some form by the end of 2017.
- (2) The PVA, arising from the application of the prudent valuation requirements to all assets measured at fair value, has been included in full in line with the guidance from the PRA and uses methodology discussed with the PRA pending the issue of the final RTS by the European Banking Authority. The full amount of the applicable PVA has been included in provisions in the determination of the deduction for expected losses.
- (3) Where the deductions from AT1 capital exceed AT1 capital, the excess is deducted from CET1 capital. The excess of AT1 deductions over AT1 capital in year one of transition is due to the application of the current rules to the transitional amounts.
- (4) Insignificant investments in equities of other financial entities (net): long cash equity positions are considered to have matched maturity with synthetic short positions if the long position is held for hedging purposes and sufficient liquidity exists in the relevant market. All the trades are managed and monitored together within the equities business.
- (5) Based on current interpretations of the final draft of the RTS on credit risk adjustments, issued in July 2013, the Group's standardised latent provision has been reclassified to specific provision and is therefore no longer included in Tier 2 capital.

Risk-weighted assets:

- (1) Current securitisation positions are shown as risk-weighted at 1,250%.
- (2) RWA uplifts include the impact of credit valuation adjustments and asset valuation correlation on banks and central counterparties.
- (3) RWAs reflect implementation of the full internal model method suite, and include methodology changes that took effect immediately on CRR implementation.
- (4) Non-financial counterparties and sovereigns that meet the eligibility criteria under CRR are exempt from the credit valuation adjustments volatility charges.
- (5) The CRR final text includes a reduction in the risk-weight relating to small and medium-sized enterprises.

Business review Risk and balance sheet management

Capital management* continued

Estimated leverage ratio

The Basel III agreement introduced a leverage ratio as a non-risk based backstop limit intended to supplement the risk-based capital requirements. It aims to constrain the build up of excess leverage in the banking sector, introducing additional safeguards against model risk and measurement errors.

The PRA's Supervisory Statement SS3/13 also states that the Group and the other major UK banks and building societies are expected to maintain a 3% end point Tier 1 leverage ratio, after taking into account the adjustments required by the PRA.

The transitional period for the introduction of this ratio started with a supervisory monitoring period in 2011, with a parallel run period from January 2013 to December 2017. A minimum ratio of 3% is applied initially. The requirement is expected to be included in Pillar 1 from January 2018.

The Basel III leverage percentages are lower than those currently reported, primarily due to changes in methodology relating to the inclusion of potential future exposure on derivatives and undrawn commitments. In addition, inclusion or exclusion of grandfathered capital instruments can result in material differences.

The leverage ratios set out below are based on:

- Tier 1 capital as set out in the final CRR text; and
- Exposure measure calculated using the final CRR text as well as the December 2010 Basel III text; further specificity being sourced from the instructions in the July 2012 Quantitative Impact Study and the related Frequently Asked Questions.

The estimated leverage ratio, based on the Basel Committee on Banking Supervision (BCBS) proposal issued in January 2014, is detailed below.

Estimated leverage ratio	Exposure £bn	2013			2012		
		Tier 1 capital £bn	Leverage	Leverage %	Exposure £bn	Tier 1 capital £bn	Leverage
CRR basis:							
Transitional measure	1,062.1	44.3	24x	4.2	1,205.2	54.0	22x
Full end point measure	1,062.1	36.8	29x	3.5	1,202.3	37.9	32x
Basel III basis:							
Transitional measure	1,093.5	44.3	25x	4.1	1,225.8	54.0	23x
Full end point measure	1,093.5	36.8	30x	3.4	1,222.9	37.9	32x
BCBS basis:							
Transitional measure	1,082.0	44.3	24x	4.1	1,239.8	54.0	23x
Full end point measure	1,082.0	36.8	29x	3.4	1,236.9	37.9	33x

Key points

- The Group's estimated leverage ratios, under both the CRR and Basel III texts, as well as the recently issued BCBS proposal are above 3%.
- Estimated leverage ratios on all full end point measure bases improved during the year reflecting downsizing in Markets and Non-Core as well as risk reduction and portfolio focus ahead of CRR implementation.
- The PRA Policy Statement PS7/13 requires an acceleration of the CRR transitional approach for computing the capital base. Thus the majority of CET1 capital deductions will apply with immediate effect. This causes a year-on-year reduction of around £10 billion in Tier 1 capital, causing the reduction in transitional measure leverage ratios.

Transitional leverage exposure measure	1,062.1	1,093.5	1,082.0	1,205.2	1,225.8	1,239.8

Notes:

- (1) Under the Basel III view, the balance sheet value is reduced for allowable netting under the Basel II framework (excluding cross-product netting) which mainly relates to cash positions under a master netting agreement. In the CRR calculation, the balance sheet value is replaced with the related regulatory exposure value which has netting of both cash positions and related collateral of securities financing transactions (SFTs). The BCBS view permits the effects of master netting agreements for calculation of counterparty exposure but with very tight restrictions upon the recognition of those agreements for offset of cash received.
- (2) Regulatory deductions: to ensure consistency between the numerator and the denominator, items that are deducted from capital are also deducted from total assets. For the BCBS basis, the shortfall in the stock of eligible provisions relative to expected losses is adjusted.
- (3) Potential future exposure (PFE) on derivatives: the regulatory add-on which is calculated by assigning percentages based on the type of instrument and the residual maturity of the contract to the nominal amounts or underlying values of derivative contracts. Under the latest BCBS proposal, variation margin is permitted to be offset against the replacement cost for derivative exposures (but not the PFE) where specific conditions are met. Refer to the table below for further analysis.
- (4) Undrawn commitments represent regulatory add-ons relating to off-balance sheet undrawn commitments based on a 10% credit conversion factor for unconditionally cancellable commitments and 100% for other commitments. The CRR basis uses the credit conversion factor (CCF) as per risk measure for medium to low risk trade finance and officially supported export credits. For the BCBS measure, commitments other than securitisation liquidity facilities with an original maturity up to one year and commitments with an original maturity over one year will receive a CCF of 20% and 50%, respectively. Refer to page 202 for further analysis.

Derivative notional

The table below analyses derivative notional values by product and maturity.

	<1 year £bn	1-5 years £bn	>5 years £bn	Credit	Credit	Total £bn
				derivative 5% add on factor (1) £bn	derivative 10% add on factor (1) £bn	
2013						
Interest rate	10,582	16,212	8,795			35,589
Exchange rate	3,261	814	480			4,555
Equity	43	35	1			79

	12.3	34.4	103.4	17.4	12.3	7.7	187.5

Notes:

- (1) International Banking facilities are primarily undrawn facilities to large multinational corporations, many of which are domiciled in the UK.
(2) Based on a 10% credit conversion factor.

Risk-weighted assets

The table below analyses the movement in credit risk RWAs by key drivers during the year.

	Credit risk		
	Non-counterparty £bn	Counterparty £bn	Total £bn
At 1 January 2013	323.2	48.0	371.2
Foreign exchange movement	(1.7)	(0.3)	(2.0)
Business movements	(27.4)	(4.9)	(32.3)
Risk parameter changes (1)	(11.0)	(2.9)	(13.9)
Methodology changes (2)	1.4	(16.1)	(14.7)
Model updates (3)	15.3	(1.5)	13.8
Disposals	(8.6)	—	(8.6)
Other changes	(0.1)	—	(0.1)
At 31 December 2013	291.1	22.3	313.4

Notes:

- (1) Relates to changes in credit quality metrics of customers and counterparties such as probability of default and loss given default.
(2) Relates to internal treatment of exposures or calibration of models and regulatory prescribed changes.
(3) Refers to implementation of a new model or modification of an existing model following approval by the PRA and includes:
 - o exposure at default treatment (£4.8 billion) in the second quarter of 2013;
 - o continuation of commercial real estate slotting (£4.4 billion) throughout 2013; and
 - o loss given default changes to the shipping portfolio (£3.7 billion) in the second half of 2013.

The table below analyses movements in market and operational risk RWAs during the year.

	Market risk			
	Markets £bn	Other £bn	Total £bn	Operational risk £bn
At 1 January 2013	36.9	5.7	42.6	45.8
Business and market movements	(9.0)	(1.8)	(10.8)	(4.0)
Model updates (1)	(1.5)	—	(1.5)	—
At 31 December 2013	26.4	3.9	30.3	41.8
				72.1

Note:

- (1) Market risk model updates in 2013 primarily related to valuation adjustments.

*unaudited

Business review Risk and balance sheet management

The table below analyses RWA movements by division during the year.

Total RWAs	UK Retail £bn	UK Corporate £bn	Wealth £bn	IB (1) £bn	Ulster Bank £bn	US R&C (1) £bn	Markets £bn	Other £bn	Core £bn	Non-Core £bn	RFS MI £bn	Total £bn
At 1 January 2013	45.7	86.3	12.3	51.9	36.1	56.5	101.3	5.8	395.9	60.4	3.3	459.6
Business and market movements	(1.8)	(9.6)	(0.3)	(6.0)	(5.7)	(0.4)	(35.1)	2.7	(56.2)	(22.2)	0.6	(77.8)
Disposals	—	—	—	—	—	—	—	—	—	(8.6)	—	(8.6)
Model updates	—	9.4	—	3.1	0.3	—	(1.7)	1.6	12.7	(0.4)	—	12.3
At 31 December 2013	43.9	86.1	12.0	49.0	30.7	56.1	64.5	10.1	352.4	29.2	3.9	385.5

Note:

(1) IB: International Banking; R&C: Retail & Commercial.

Key points

- RWAs were down £74.1 billion or 16% overall, of which £57.8 billion related to credit risk, £12.3 billion to market risk and £4.0 billion to operational risk.
- Credit risk RWAs were down £57.8 billion or 16% to £313.4 billion despite absorbing £13.8 billion of higher RWAs due to model updates.
 - Non-counterparty RWAs were down £32.1 billion or 10% to £291.1 billion: in Non-Core (£24.1 billion) due to run-off and disposals in commercial real estate, shipping and leveraged finance portfolios; and in Retail & Commercial (£10.0 billion) due to loans migrating into default, risk parameter changes and balance sheet reduction.
 - Counterparty RWAs were down £25.7 billion or 54% to £22.3 billion in Markets (£17.2 billion) and Non-Core (£7.8 billion). Methodology changes, significantly all in Markets, reflected extension of product coverage improvements in models and reduction in weighting applied for exposure at default. This was partially offset by the impact of higher loss given defaults for hedge funds.
- Market risk RWAs were down £12.3 billion or 29% to £30.3 billion significantly all in Markets reflecting balance sheet and risk reduction £9.0 billion and model changes of £1.5 billion.
- Operational risk RWAs were down £4.0 billion or 9% to £41.8 billion primarily due to reductions in Markets.

For additional analyses on RWAs by sector and related density see pages 207 and 208.

Risk-weighted assets continued

FLB3 and Basel 2.5

The following tables set out RWAs under future and current rules.

	Estimated FLB3 £bn	Basel 2.5 £bn
2013		
UK Retail	43.9	43.9
UK Corporate	82.9	86.1
Wealth	12.0	12.0
International Banking	50.3	49.0
Ulster Bank	30.1	30.7
US Retail & Commercial	58.8	56.1
Retail & Commercial	278.0	277.8
Markets	99.9	64.5
Centre	13.1	10.1
Core	391.0	352.4
Non-Core	34.2	29.2
Group before RFS Holdings minority interest	425.2	381.6
RFS Holdings minority interest	3.9	3.9
Group	429.1	385.5

Key points

- Estimated FLB3 RWAs were £43.6 billion or 11% higher than under current rules principally reflecting:
 - Credit valuation adjustments, £16.7 billion and financial institution asset valuation correlation, £5.6 billion.
 - Treatment of securitisations as risk-weighted at 1,250% instead of as capital deductions, £18.7 billion.
 - Other model and methodology changes, £7.2 billion.
 - Reduced risk-weighting for small and medium-sized enterprises, £4.6 billion, mainly in UK Corporate.

Notes:

- (1) The Group can only include particular types of subsidiary undertaking in the regulatory consolidation. Insurance undertakings and non-financial undertakings are excluded from the regulatory consolidation, although they are included in the consolidation for financial reporting.
- (2) The Group must proportionally consolidate its associates for regulatory purposes where they are classified as credit institutions or financial institutions. These will generally have been equity accounted for financial reporting purposes.

Assets of disposal groups		3.0	—	3.0	—	—	—	—	(3.0)	—	—	—
Total assets		1,027.9	4.3	1,032.2	(69.5)	27.4	(322.5)	(15.4)	(14.2)	638.0	75.7	713.7
Contingent obligations (7)											30.5	30.5
											106.2	744.2

Notes:

- (1) Represents proportional consolidation of associates and deconsolidation of certain subsidiaries, as required by regulatory rules. Refer to previous page for additional details.
- (2) The exposures in regulatory trading book businesses are subject to market risk and are therefore excluded from EAD. Refer to the Market risk section on page 318.
- (3) Impairment loss provisions on loans and advances and securities, and credit valuation adjustment on derivatives.
- (4) Includes:
 - Reverse repos: reflects regulatory approach for securities financing transactions including netting of collateral and cash legs.
 - Loans and advances: cash collateral pledged with counterparties in relation to net derivative liability positions.
 - Derivatives: impact of master netting arrangements.
- (5) Capital deductions are excluded as EAD only captures exposures for credit RWAs.
- (6) Comprises:
 - Cash and balances at central banks: notice balances with central banks included in loans and advances, reclassified as central bank balances for EAD.
 - Loans and advances: includes offset related to cash management pooling arrangements not allowed under IFRS, standardised approach credit risk mitigation and reclassification of central bank balances. This is partially offset by the reclassification of disposal groups and prepayments, accrued income and other assets as customer balances.
 - Debt securities: gross up of banking book securities that are matched by trading book short positions that cannot be offset under regulatory rules.
 - Derivatives: reflects difference between netting arrangements and netting within regulatory model sets as well as EAD valuation adjustments.
 - Property, plant and equipment: includes residual value of operating leases.
 - Prepayments, accrued income and other assets: includes amounts reclassified to loans and advances.
 - Assets of disposal groups: amounts reclassified to relevant balance sheet lines for EAD.
- (7) Includes documentary credits (commercial letters of credit providing for payment by the Group to a named beneficiary against presentation of specified documents), classified as commitments for financial reporting, and amounts related to entities proportionally consolidated for regulatory reporting.

Liquidity and funding risk

Definition

Liquidity and funding risk is the risk that the Group is unable to meet its financial obligations, including financing wholesale maturities or customer deposit withdrawals, as and when they fall due.

The risk arises through the maturity transformation role that banks perform. It is dependent on company specific factors such as maturity profile, composition of sources and uses of funding, the quality and size of the liquidity portfolio as well as broader market factors, such as wholesale market conditions alongside depositor and investor behaviour.

Overview

- During 2013 the Group's deposit surplus continued to build and liquidity reserves were maintained at strong levels, further strengthening the balance sheet. This allowed the Group to easily absorb the minimal outflows following the announcement of the S&P credit rating downgrade (A-/A-2 from A/A-1, with a negative outlook) in November 2013.
- Following the continued success of the Group's Non-Core run-down and the reduction in the size of the Markets business, the Group's loan:deposit ratio improved by 600 basis points in the year to 94%. In response, the Group has been actively managing down excess cash, through liability management exercises and deposit re-pricing.
- The Group's credit profile improved significantly during the year, evidenced by the narrowing of the credit spreads. The spread of the most recent subordinated debt issue in December 2013 was 125 basis points lower than a comparable issuance in 2012.
- Continued reduction in the utilisation of wholesale funding and improvements in the characteristics and behavioural properties of the deposit base. Short-term wholesale funding excluding derivative collateral (STWF) reduced by 22% in the year to £32.4 billion, covered more than four times by the liquidity portfolio and the ratio of customer deposits to total funding improved to 75% from 70%.
- Continued enablement of new unencumbered assets as pre-positioned collateral for various central bank liquidity facilities.

Liquidity risk

Policy, framework and governance

The Group's liquidity policy reflects internal appetite, best market practice and complies with prevailing regulatory structures. These policies are designed to address four broad issues which ensure that:

- The Group's main legal entities maintain adequate liquid resources at all times to meet liabilities as they fall due.
- The Group maintains an adequate liquid asset portfolio appropriate to the business activities of the Group and its risk profile.
- The Group has in place robust strategies, policies, systems, and procedures for identifying, measuring, monitoring and managing liquidity risk.
- The Group has a comprehensive liquidity risk management framework in place to ensure the Group maintains an appropriate level of financial resources to meet its financial obligations as and when they fall due.

The risk management framework identifies the sources of liquidity risk and the steps the Group can take when these risks exceed certain actively monitored limits. These actions include when and how to use the Group's liquidity reserves and what other adjustments to the Group's balance sheet should be undertaken to manage these risks within the Group's risk appetite.

The Group's appetite for liquidity risk is set by the Board as a percentage of the Individual Liquidity Adequacy Assessment (ILAA) stressed outflows and then managed on a daily basis by various functions within the business with liquidity risk controlled at legal entity, country, regional and divisional levels.

In setting risk limits the Board takes into account the nature of the Group's various activities, the Group's overall risk appetite, market best practice and regulatory compliance.

The Group Asset and Liability Management Committee (GALCO) sets and reviews the liquidity risk management framework and limits within the risk appetite set by the Group Board. GALCO oversees the implementation of liquidity management across the Group. Each significant legal entity has a nominated Legal Entity Liquidity Risk Owner who is responsible for managing the liquidity risk for their legal entity. Group Treasury conducts the review, challenge and reporting of the Group's liquidity performance, while GALCO's management of liquidity risk is overseen by the Executive Risk Forum, Executive Committee and the Group Board.

Business review Risk and balance sheet management

Regulatory oversight*

The Group operates in multiple jurisdictions and is subject to a number of regulatory regimes.

The Group's principal regulator, the PRA, has a comprehensive set of liquidity policies, the cornerstone of which is Policy Statement (PS) 09/16. In order to comply with the PRA regulatory process, the Group:

- At least annually, completes and keeps updated an ILAA;
- Undertakes the Focused Liquidity Review process which is a comprehensive review of the Group's ILAA, liquidity policies and operational capacity and capability. This in turn leads to the Group and the PRA agreeing the parameters of Group's Individual Liquidity Guidance (ILG) which influences the overall size of the Group's liquidity portfolio.

In addition, the Group's US operations meet liquidity requirements set out by the Federal Reserve Board, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation and the Financial Industry Regulatory Authority. In the Netherlands, RBS N.V. is subject to the De Nederlandsche Bank liquidity oversight regime. In the Republic of Ireland, Ulster Bank Ireland Limited is subject to oversight from the Central Bank of Ireland.

In January 2013, the Basel Committee on Banking Supervision (BCBS) issued its revised draft guidance for calculating the liquidity coverage ratio (LCR), which is currently expected to come into force from 1 January 2015 on a phased basis. Pending the finalisation of the definitions, the Group monitors the LCR and the net stable funding ratio (NSFR) in its internal reporting framework based on its interpretation and expectation of the final rules. On this basis, as of 31 December 2013, the Group's LCR was 102% and the NSFR 122%.

At present there is a broad range of interpretations on how to calculate both the NSFR and the LCR due to the lack of commonly agreed technical standards. The Group continues to assess the impact of these consultations and actively communicates with regulators and industry groups. Assumptions will be refined as regulatory interpretations evolve.

Under the EU Capital Requirements Regulation to implement the recommended guidance of Basel 3, the European Banking Authority (EBA) is tasked with issuing a set of technical standards for implementing the LCR within the EU, to be ratified by the European Commission before 30 June 2014. The LCR metric will come into effect as a minimum standard from 1 January 2015.

The PRA has issued a statement proposing to retain the existing ILG framework until 31 December 2014, whilst the EBA's implementation of the LCR is finalised.

Several regulatory regimes outside the EU where the Group operates have also published consultation papers with guidance for implementation of the LCR, including the Joint Banking Supervisors of the US. We anticipate further consultations for LCR standards to be published across other jurisdictions in which the Group operates during the course of 2014. Additionally, the BCBS has issued a proposal for revising the guidance on NSFR, expected to be finalised in 2014.

Measurement and monitoring

In implementing the Group's liquidity risk management framework, a suite of tools are used to monitor, limit and stress test the risks within the balance sheet. The limits control the amount and composition of funding sources, asset and liability mismatches and funding concentrations, in addition to the level of liquidity risk.

To foster appropriate pricing behaviour, decision making and balance sheet composition Group Treasury uses transfer pricing of liquidity and funding costs, limits and parameters. This ensures liquidity and funding risk is reflected in the measurement of divisional business performance and ensures divisions are being correctly incentivised to source the most appropriate mix of funding.

The Board's determination and quantification of the appetite for liquidity risk is primarily determined by reference to the ILAA which includes a comparison of the size of liquidity portfolio to an assessment of stressed outflows. The ILAA also informs the Board and PRA of the Group's liquidity risks, their mitigation and about the current and future liquidity profile.

Within the liquidity portfolio the Group holds cash at central banks, high quality government securities and collateral eligible for use in central bank operations, such as the Bank of England's Discount Window Facility.

In determining what assets should be held within the liquidity portfolio, the liquidity risk management framework dictates minimum internal quality criteria, level of currency diversification and maturity mix. The liquidity value of an asset is generally determined by reference to the haircut that would be applied by a central bank operation or in a private repurchase agreement.

The Group actively monitors a range of market-wide and firm-specific early warning indicators of emerging liquidity stresses. Indicators include such areas as customer deposit outflows, market funding costs and movements in the Group's credit default swap premiums. Early warning indicators and regulatory metrics are reported daily to senior management, including the CFO and Group Treasurer.

Liquidity risks are reviewed daily at a significant legal entity level and performance reported at least monthly to legal entity, divisional and Group Asset and Liability Management Committees. Any breach of internal metric limits will set in motion a series of actions and escalations that could lead to activation of the Group's Contingency Funding Plan.

In November 2013, the Group's credit rating was downgraded by Standard & Poor's. Prior to this event, the Group undertook an intensive internal review of the magnitude of a rating downgrade on customer and counterparty behaviours and these included stress testing and scenario modelling. This analysis was also shared with the PRA. Following the downgrade by Standard & Poor's, there was minimal impact on customer or counterparty behaviour, the primary reason for deposit withdrawals was due to contractual downgrade triggers or the rating no longer meeting the customer or counterparty's investment requirements.

Business review Risk and balance sheet management

Liquidity risk continued

Stress testing and contingency planning*

Liquidity stress tests apply scenario-based behavioural and contractual assumptions to cash inflows and outflows to assess the level of liquidity reserves required under a particular scenario.

A stress event can occur when either firm-specific or market-wide factors or a combination of both lead to depositors and investors to withdraw or not to renew funding on maturity. This could be caused by many factors including fears over the viability of the firm. Additionally, liquidity stress can be brought on by customers choosing to draw down on loan agreements and facilities.

Simulated liquidity stress testing is performed at least quarterly for each division as well as the major operating subsidiaries in order to evaluate the strength of the Group's liquidity risk management.

Stress tests are designed to examine the impact of a variety of firm-specific and market-wide scenarios on the future adequacy of the Group's liquidity reserves. Stress test scenarios are designed to take into account the Group's experiences during the financial crisis, recent market conditions and events. These scenarios can be run at any time in response to the emergence of firm-specific or market-wide risks that could have a material impact on the Group's liquidity position. In the past these have included credit rating changes and political and economic conditions changing in particular countries.

In determining the adequacy of the Group's liquidity resources the Group focuses on the outflows it anticipates as a result of any stress scenario occurring. These outflows are measured over certain time periods which extend from two weeks to three months. The Group is expected to be able to withstand these stressed outflows through its own resources (primarily through the use of the liquidity portfolio) without having to resort to extraordinary central bank or governmental assistance.

The Group's liquidity risk appetite is measured by reference to the liquidity portfolio as a percentage of stressed contractual and behavioural outflows under the worst of three severe stress scenarios, as prescribed by the PRA. These are a market-wide stress, an idiosyncratic stress and a combination of both. At 31 December 2013, the Group's liquidity portfolio was 145% of the worst case stress requirements.

Key liquidity risk stress testing assumptions

- *Net wholesale funding* - Outflows at contractual maturity of wholesale funding, with no rollover/new issuance, prime brokerage, 100% loss of excess client derivative margin and 100% loss of excess client cash.
- *Secured financing and increased haircuts* - Loss of secured funding capacity at contractual maturity date and incremental haircut widening, depending upon collateral type.
- *Retail and commercial bank deposits* - Substantial outflows as the Group could be seen as a greater credit risk than competitors.
- *Intra-day cash flows* - Liquid collateral held against intra-day requirement at clearing and payment systems is regarded as encumbered with no liquidity value assumed. Liquid collateral is held against withdrawal of unsecured intra-day lines provided by third parties.
- *Intra-group commitments and support* - Risk of cash within subsidiaries becoming unavailable to the wider Group and contingent calls for funding on Group Treasury from subsidiaries and affiliates.
- *Funding concentrations* - Additional outflows recognised against concentration of providers of wholesale secured financing.
- *Off-balance sheet activities* - Collateral outflows due to market movements, and all collateral owed by the Group to counterparties but not yet called; anticipated increase in firm's derivative initial margin requirement in stress scenarios; collateral outflows contingent upon a multi-notch credit rating downgrade of Group firms; drawdown on committed facilities provided to corporates, based on counterparty type, creditworthiness and facility type; and drawdown on retail commitments.
- *Franchise viability* - Group liquidity stress testing includes additional liquidity in order to meet outflows that are non-contractual in nature, but are necessary in order to support valuable franchise businesses.
- *Management action* - Unencumbered marketable assets that are held outside of the Core liquidity portfolio and are of verifiable liquidity value to the firm, are assumed to be monetised (subject to haircut/valuation adjustment).

The Group has a Contingency Funding Plan (CFP), which is updated at least annually and as the balance sheet evolves and forms the basis of analysis and actions to remediate adverse events as and if they arise. The CFP provides a detailed description of the availability, size and timing of all sources of contingent liquidity available to the Group in a stress event. These are ranked in order of economic impact and effectiveness to meet the anticipated stress requirement. The CFP includes documented processes for actions that may be required to meet the outflows and specifies roles and responsibilities for the effective implementation of the CFP.

Business review Risk and balance sheet management

Liquidity reserves

Liquidity risks are mitigated by the Group's centrally managed liquidity portfolio. The size of the portfolio is determined under the Group's liquidity risk management framework with reference to the Group's risk appetite.

The majority of the portfolio is centrally managed by Group Treasury, ring-fenced from the Markets trading book, and is the ultimate responsibility of the Group Treasurer. This portfolio is held in the PRA regulated UK Defined Liquidity Group (UK DLG) comprising the Group's five UK banks: The Royal Bank of Scotland plc, National Westminster Bank Plc, Ulster Bank Limited, Coutts & Company and Adam & Company.

Certain of the Group's significant operating subsidiaries - RBS N.V., RBS Citizens Financial Group, Inc. and Ulster Bank Ireland Limited - hold locally managed portfolios of liquid assets that comply with local regulations but differ from PRA rules. These portfolios are the responsibility of the local Treasurer who reports to the Group Treasurer.

The UK DLG liquidity portfolio accounted for c.88% of the Group's total liquidity portfolio, this portion is available to meet liquidity needs as they arise across the Group. The remaining liquidity reserves are held locally within non-UK bank subsidiaries, the majority of this portion is restricted by regulatory requirements and therefore assumed to be restricted and only be available for use locally.

Separately from the liquidity portfolio, the Group holds high quality assets to meet payment systems collateral requirements, these assets are not freely available to other areas of the Group.

The Group categorises its liquidity portfolio, including its locally managed liquidity portfolios, into primary and secondary liquid assets.

Primary liquid assets generally comprise eligible liquid assets, such as cash and balances at central banks, treasury bills and other high quality government and US agency bonds.

Secondary liquid assets comprise other assets that are eligible as collateral for local central bank liquidity facilities but do not meet the core local regulatory definition. These assets include own-issued securitisations or whole loans that are retained on balance sheet and pre-positioned with a central bank so that they may be converted into additional sources of liquidity at very short notice.

The composition of the liquidity portfolio is influenced by quality of counterparty, maturity mix and currency mix. The PRA rules dictate certain minimum quality standards for the UK DLG liquidity portfolio. The liquidity value of the portfolio is determined with reference to current market prices and the haircuts necessary to generate cash from the asset.

The Group in consultation with the PRA and subject to the requirements of the PRA's ILG can change the composition of its liquidity portfolio. The change in composition may relate to market specific factors, changes in internal liquidity risk mix or regulatory guidance.

Liquidity metrics*

The table below sets out the key liquidity and related metrics monitored by the Group.

	2013 %	2012 %
Stressed outflow coverage (1)	145	128
Liquidity coverage ratio (LCR) (2)	102	>100
Net stable funding ratio (NSFR) (2)	122	117

Notes:

- (1) The Group's liquidity risk appetite is based on the internal Individual Liquidity Adequacy Assessment which is measured by reference to the liquidity portfolio as a percentage of stressed outflows under the worst of three severe stress scenarios of a market-wide stress, an idiosyncratic stress and a combination of both. Liquidity risk adequacy is determined by surplus of liquid assets over three months stressed outflows under the worst case stresses. This assessment is performed in accordance with PRA guidance.
- (2) In January 2013, the Basel Committee on Banking Supervision issued its revised draft guidance for calculating LCR which is currently expected to come into effect from January 2015 on a phased basis. Pending the finalisation of the technical standards, the Group monitors the LCR and NSFR based on its interpretations of the expected final rules.

Total assets and undrawn commitments	1,241	361	1,528	424	1,747	467	
Net stable funding ratio		122%			117%		111%

Notes:

(1) Available stable funding and required stable funding.

(2) Deferred tax and other liabilities.

(3) Prepayments, accrued income, deferred tax, settlement balances and other assets.

Key point

- The NSFR has improved by 500 basis points to 122% in the year. The required stable funding fell by £63 billion mainly due to the £31 billion decrease in customer lending reflecting balance sheet reduction, business disposals and a £24 billion reduction in other assets, principally equity shares reduction in Markets and lower disposal groups. This was mostly offset by a £55 billion reduction in available stable funding primarily due to a £33 billion planned reduction in term wholesale funding and £11 billion in customer deposit outflow.

Business review Risk and balance sheet management

Funding risk

Funding sources

The Group's primary funding source is its customer deposit base, primarily built through its retail and commercial franchises in the UK, Ireland and the US. These deposits form a stable base which fully funds the Group's customer lending activities.

Complementary to its deposit funding, the Group also accesses various wholesale markets for funding, on both a public and private basis. These include long-term secured and unsecured debt, short-term money markets and repurchase agreements. The Group has set policies for the prudent use of wholesale funding, as part of its wider liquidity policies.

Maintaining access to global capital markets provides the Group's funding base with diversity. Over time the Group's wholesale funding mix has been diversified by currency, geography, maturity and type. The Group accesses the wholesale funding markets directly or through its main operating subsidiaries via established funding programmes. The use of different entities to access the market from time to time allows the Group to further diversify its funding mix and in certain limited circumstances demonstrate to regulators that specific operating subsidiaries enjoy market access in their own right.

The Group may access various funding facilities offered by central banks from time to time. The use of such facilities can be both part of a wider strategic objective to support initiatives to help stimulate economic growth or as part of the Group's broader liquidity management and funding strategy. Overall usage and repayment of available central bank facilities will fit within the Group's overall liquidity risk appetite and concentration limits.

During 2013, the Group repaid €8.5 billion of the original €10 billion borrowed under the European Central Bank's Long Term Refinancing Operation. The remaining balance is used to fund certain of the Group's Eurozone banking subsidiaries and the usage of this facility will be evaluated on an ongoing basis. The Group has not drawn down any additional funds under the Bank of England's Funding for Lending Scheme during the year and has repaid the initial drawing of £750 million in order to manage its excess cash position. The Group remains committed to supporting the objectives of the Funding for Lending scheme.

Analysis

Funding sources

The Group's balance sheet composition is a function of the broad array of product offerings and diverse markets served by its core divisions. The structural composition of the balance sheet is augmented as needed through active management of both asset and liability portfolios. The objective of these activities is to optimise the liquidity profile in the normal business environment, while ensuring adequate coverage of all cash requirements under extreme stress conditions.

As set out below the Group's asset and liability types broadly match. Customer deposits provide more funding than customer loans absorb; repurchase agreements are largely covered by reverse repurchase agreements; interbank lending and funding largely match each other and this gap has narrowed over the past five years; and derivative assets are largely matched against derivative liabilities.

The table below shows the Group's sources and uses of funding.

	2013	
	Liabilities £bn	Assets £bn
Customer deposits (1)	407	373 Customer loans and advances (1)
Bank deposits (short-term only) (1)	14	18 Loan and advances to banks (1)
Trading liabilities (2)	67	93 Trading assets (2)
Other liabilities and equity (3)	100	90 Other assets (3)
Repurchase agreements	85	76 Reverse repurchase agreements
Term wholesale funding (1)	69	90 Primary liquidity portfolio
Funded balance sheet	742	740 Funded balance sheet
Derivatives	286	288 Derivatives
	1,028	1,028

Notes:

(1) Excludes held for trading.

(2) Financial instruments classified as held-for-trading (HFT) excluding security financing transactions and derivatives.

(3) Includes non-HFT financial instruments and non-financial assets/liabilities.

Business review Risk and balance sheet management

Wholesale funding

The table below summarises funding metrics.

	Short-term wholesale funding (1)		Total wholesale funding		Net inter-bank funding (2)		
	Excluding derivative collateral £bn	Including derivative collateral £bn	Excluding derivative collateral £bn	Including derivative collateral £bn	Deposits £bn	Loans (3) £bn	inter-bank funding £bn
2013	32.4	51.5	108.1	127.2	16.2	(17.3)	(1.1)
2012	41.6	70.2	150.4	179.0	28.5	(18.6)	9.9
2011	102.4	134.2	226.2	258.1	37.3	(24.3)	13.0

Notes:

(1) Short-term wholesale balances denote those with a residual maturity of less than one year and include longer-term issuances.

(2) Excludes derivative cash collateral.

(3) Primarily short-term balances.

The table below shows the Group's principal funding sources excluding repurchase agreements.

Key points

- Wholesale funding reduced by nearly 29% in the year to £127 billion principally reflecting strategic downsizing in Markets.
- Short-term wholesale funding has decreased by £9.2 billion to £32.4 billion reflecting the reduced funding requirement and ongoing liability management.

Business review Risk and balance sheet management

Deposits and repos

The table below shows the composition of the Group's deposits and repos.

	2013		2012		2011	
	Deposits £m	Repos £m	Deposits £m	Repos £m	Deposits £m	Repos £m
Financial institutions						
- central and other banks	35,329	28,650	57,074	44,332	69,114	39,691
- other financial institutions	53,607	52,945	64,237	86,968	66,009	86,032
Personal and corporate deposits	364,062	3,539	369,755	1,072	370,744	2,780
	452,998	85,134	491,066	132,372	505,867	128,503

£161 billion (or 39%) of the customer deposits included above are insured through the UK Financial Services Compensation Scheme, US Federal Deposit Insurance Corporation scheme and other similar schemes. Of the personal and corporate deposits above, 53% relate to personal customers.

The liquidity risk the Group is exposed to through security financing transactions is significantly lower than in relation to unsecured funding. The Group limits any exposure by setting limits and monitoring any mismatch of quality, maturity or currency. The exposure is also monitored in the context of the available liquid assets.

Firm financing*

The Group has access to the short-term money markets to supplement deposit and wholesale funding. The Group's reverse repos, mainly within Markets, are generally used to fund repos or to cover short positions. In addition, repos are used to fund a small proportion of Markets' trading assets and by Group Treasury as part of the liquidity portfolio management.

The following table shows the Groups gross repos by quality and maturity.

2013	Less than 1 month			More than 1 month		Total £bn
	£bn	£bn	£bn	£bn	£bn	
AA- and above				69.5	21.6	91.1
Other				27.6	7.1	34.7
Total				97.1	28.7	125.8

Key points

- 72% of the Group's repo balance related to AA- or above collateral reducing the exposure to re-financing risk.
- Of the £125.8 billion gross repos, £49.6 billion related to firm financing.

nm = not meaningful

Notes:

- (1) Excludes reverse repurchase agreements and net of impairment provisions.
- (2) Excludes repurchase agreements.
- (3) All conduits relate to International Banking and have been extracted and shown separately as they were funded by commercial paper issuance until the end of the third quarter of 2012.

Key point

- The loan:deposit ratio improved by 600 basis points to 94% with the funding surplus increasing to £25.1 billion from £2.0 billion at 31 December 2012. The improvement in Retail & Commercial funding surplus was £6.6 billion and Non-Core run-off resulted in £21.2 billion contraction of its funding gap.

Maturity analysis

The contractual maturity of balance sheet assets and liabilities reflects the maturity transformation role banks perform, lending long-term but obtaining funding predominantly through short-term liabilities such as customer deposits. In practice, the behavioural profiles of many liabilities exhibit greater stability and longer maturity than the contractual maturity. This is particularly true of many types of retail and corporate deposits which, despite being repayable on demand or at short notice, have demonstrated stable characteristics even in periods of acute stress such as those experienced in 2008.

Retail & Commercial*

The table below shows the behavioural and contractual maturity analysis of Retail & Commercial customer deposits.

	Less than 1 year £bn	1-5 years £bn	More than 5 years £bn		Total £bn
			£bn	£bn	
2013

Business review Risk and balance sheet management

Encumbrance

The Group reviews all assets against the criteria of being able to finance them in a secured form (encumbrance) but certain asset types lend themselves more readily to encumbrance. The typical characteristics that support encumbrance are an ability to pledge those assets to another counterparty or entity through operation of law without necessarily requiring prior notification, homogeneity, predictable and measurable cash flows, and a consistent and uniform underwriting and collection process. Retail assets including residential mortgages, credit card receivables and personal loans display many of these features.

From time to time the Group encumbers assets to serve as collateral to support certain wholesale funding initiatives. The three principal forms of encumbrance are own asset securitisations, covered bonds and securities repurchase agreements.

The Group categorises its assets into three broad groups; assets that are:

- already encumbered and used to support funding currently in place via own asset securitisations, covered bonds and securities repurchase agreements.
- not currently encumbered but can for instance be used to access funding from market counterparties or central bank facilities as part of the Group's contingency funding.
- not currently encumbered. In this category, the Group has in place an enablement programme which seeks to identify assets which are capable of being encumbered and to identify the actions to facilitate such encumbrance whilst not impacting customer relationships or servicing.

The Group's encumbrance ratios are set out below.

Encumbrance ratios

Total

Excluding balances relating to derivative transactions

Excluding balances relating to derivative and securities financing transactions

	2013 %	2012 %	2011 %
Total	17	18	19
Excluding balances relating to derivative transactions	19	22	26
Excluding balances relating to derivative and securities financing transactions	11	13	19

Key points

- The Group's total encumbrance ratio dropped to 17%.
- 31% of the Group's residential mortgage portfolio was encumbered as at 31 December 2013.
- Unencumbered financial assets covered unsecured liabilities excluding derivatives.
- In addition to the £451.4 billion on-balance sheet assets available to support future funding and collateral requirements there is £12.7 billion net off-balance sheet collateral available from reverse repurchase and derivative collateral transactions.

	(45.3)	(9.0)	(42.7)	(85.1)	(6.0)	(188.1)

Notes:

- (1) Encumbered assets are those on the balance sheet that have been pledged to provide security for the liability shown above and are therefore not available to secure funding or to meet other collateral needs.
- (2) Unencumbered readily realisable assets are those assets on the balance sheet that can be readily used to meet funding or collateral requirements and comprise:
 - (a) Liquidity portfolio: cash balances at central banks, high quality debt securities and loans that have been pre-positioned with central banks. In addition, the liquidity portfolio includes securitisations of own assets which has reduced over the years and has been replaced by loans.
 - (b) Other readily realisable assets: other liquidity reserves, including assets that have been enabled for use with central banks; and unencumbered debt securities.
- (3) Unencumbered other realisable assets are those assets on the balance sheet that have no restrictions for funding and collateral purposes but are not readily realisable in their current form. These assets include loans that could be prepositioned with central banks but have not been subject to internal and external documentation review and diligence work.
- (4) Assets that cannot be encumbered comprise:
 - (a) derivatives, reverse repurchase agreements and trading related settlement balances.
 - (b) non-financial assets such as intangibles, prepayments and deferred tax.
 - (c) assets in disposal groups.
 - (d) loans that cannot be pre-positioned with central banks based on criteria set by the central banks, primarily US, including date of origination and level of documentation.
 - (e) non-recourse invoice financing balances and certain shipping loans whose terms and structure prohibit their use as collateral.
- (5) In accordance with market practice the Group employs its own assets and securities received under reverse repo transactions as collateral for repos.

Summary of assets available as collateral (on and off-balance sheet)*

The table below summarises total on and off-balance sheet assets that are available to support funding and collateral requirements.

	2013 £bn
Total on-balance sheet assets	1,027.9
Less:	
- Reverse repos and derivatives	(364.5)
- Other assets not available to be pledged	(40.5)
Total on-balance sheet assets available	622.9
Add:	
- Fair value of securities received as collateral from reverse repo and derivative transactions	124.2
Total assets available	747.1
Less:	
- On-balance sheet assets pledged	(171.5)
- Reverse repo and derivative securities collateral that have been rehypothecated	(111.5)
Assets available to be pledged	<u>464.1</u>

Key point

- Of the £464.1 billion collateral available, £166.8 billion is in the Group's liquidity portfolio. The remainder is available to support for general funding and collateral needs.

Credit risk

Definition

Credit risk is the risk of financial loss due to the failure of a customer or counterparty to meet its obligation to settle outstanding amounts.

Sources of credit risk

The Group is exposed to credit risk as a result of a wide range of business activities. The most significant source of credit risk is lending. The second most significant source is counterparty credit risk, which results from the Group's activities in the derivatives and securities financing transaction markets.

The Group offers a number of lending products where it has an irrevocable obligation to provide credit facilities to a customer. Security may be obtained to mitigate the risk of loss in the form of physical collateral, such as commercial real estate assets and residential property, or financial collateral such as cash or bonds. Also included in the Group's lending are exposures arising from leasing activities.

Derivatives and securities financing transactions expose the Group to counterparty credit risk, which is the risk of loss arising from a failure of a customer to meet obligations which vary in value by reference to a market factor.

The Group holds debt securities with the intention of selling them and so is exposed to market risk. However, it also holds some debt securities generally for liquidity management purposes, and is exposed to credit risk as a result.

The Group is exposed to credit risk from off-balance sheet products such as trade finance activities and guarantees.

Credit risk governance

A strong credit risk management function is vital to support the ongoing profitability of the Group. The potential for loss is mitigated through a robust credit risk culture in the business units and through a focus on sustainable lending practices. The Group's credit risk management function is responsible for credit approval and managing concentration risk, as well as credit risk control frameworks and acts as the ultimate authority for the approval of credit. This, together with strong independent oversight and challenge, enables the business to maintain a sound credit environment.

The Group Chief Credit Officer (GCCO), through the Group Credit Risk (GCR) function, is responsible for the development of, and ensuring compliance with, Group-wide policies and credit risk frameworks as well as Group-wide assessment of provision adequacy. The risk management functions, located in the Group's business divisions, are responsible for the execution of these policies.

The divisional credit risk management functions work together with GCR to ensure that the risk appetite set by the Group Board is met. The credit risk function in each division is managed by a Chief Credit Officer, who reports jointly to a divisional Chief Risk Officer and to the GCCO. Divisional credit risk management activities include transaction analysis, credit approval, ongoing credit risk stewardship, and early problem identification and management.

The Executive Risk Forum (ERF) considers and approves material aspects of the Group's credit risk management framework, such as credit risk appetite and limits for portfolios of strategic significance. The ERF has delegated approval authority to the Group Credit Risk Committee, a functional sub-committee of the Group Risk Committee, to act on credit risk matters. These include, but are not limited to, credit risk appetite and limits (within the overall risk appetite set by the Board and the ERF), credit risk strategy and frameworks, credit risk policy and the oversight of the credit profile across the Group. There are separate Group Credit Risk Committees for the retail and wholesale portfolios and these are chaired by the GCCO.

The Group Audit Committee (GAC) provides oversight of the Group's provision adequacy. The GCCO is accountable to the GAC for the adequacy of the Group's provisions, both individual and collective. The Group Provisions Committee, which is chaired by either the Group Chief Risk Officer or the GCCO, approves recommendations from the divisional provisions committees.

Key trends in the credit risk profile of the Group, performance against limits and emerging risks are set out in the RBS Risk Management Monthly Report provided to the Executive Committee, the Board Risk Committee and the Group Board.

Risk appetite and concentration framework

Risk appetite is set using specific quantitative targets under stress, including earnings volatility and capital adequacy. The Group's credit risk framework has therefore been designed around the factors that influence the Group's ability to meet those targets. These include product and asset class, industry sector, single name and country concentrations. Any of these factors could generate higher earnings volatility under stress and, if not adequately controlled, could undermine capital adequacy. Tools such as stress testing and economic capital are used to measure credit risk volatility and develop links between Group risk appetite targets and the credit risk control framework. The frameworks are supported by a suite of Group-wide and divisional policies that set out the risk parameters within which divisions must operate. The Group also manages its exposures to counterparty credit risk closely, using portfolio limits and specific tools to control more volatile or capital intensive business areas.

Wholesale

Four formal frameworks are used to manage wholesale credit concentration risk. The Group continually reassesses its frameworks to ensure that they remain appropriate for its varied business franchises and current economic conditions, as well as to reflect further refinements in the Group's risk measurement models.

Business review Risk and balance sheet management

Risk management*

Product/asset class concentration framework

The Group manages certain lines of business where the nature of credit risk assumed could result in a concentration or a heightened risk in some other form. This includes specific credit risk types such as settlement or wrong-way risk and products such as long-dated derivatives or securitisations. These product and asset classes may require formal policies and expertise as well as tailored monitoring and reporting measures. In some cases specific limits and thresholds are deployed to ensure that the credit risk inherent in these lines of business and products is adequately controlled. Product and asset classes are reviewed regularly. The reviews consider the risks inherent in each product or asset class, the risk controls applied, monitoring and reporting of the risk, the client base, and any emerging risks to ensure risk appetite remains appropriate.

Sector concentration

Exposures are assigned to, and reviewed in the context of, a defined set of industry sectors. Risk appetite and portfolio strategies are set at either the sector or sub-sector level, depending on where exposures may result in excessive concentration, or where trends in both external factors and internal portfolio performance give cause for concern. Regular formal reviews are undertaken at Group or divisional level depending on materiality. Reviews may include an assessment of the Group's franchise in a particular sector, an analysis of the outlook, identification of key vulnerabilities or stress testing.

As a result of the reviews carried out in 2013, the Group further reduced its risk appetite in the corporate sectors of commercial real estate and retail. For further details on sector-specific strategies, exposure reduction and key credit risks, refer to pages 252 to 267.

Single name concentration

A single name concentration (SNC) framework addresses the risk of outsized exposure to a borrower or borrower group. The framework includes elevated approval authority, additional reporting and monitoring, and the requirement for plans to address exposures in excess of appetite.

Several credit risk mitigation techniques are available to reduce single name concentrations. If the Group decides that its exposure is too high, it may decide to sell excess exposures. Alternatively, it may decide to take additional security or guarantees such as cash, bank or government guarantees or enter into credit default swaps. Credit risk mitigants must be effective in terms of legal certainty and enforceability. In addition, maturity or expiry dates must be the same, or later, than the underlying obligations.

Aggregate SNC exposures remain outside of the Group's longer-term appetite. However, material reductions have been achieved since the framework was introduced. This trend continued during the year, with a 21% decrease in the number of excesses since December 2012.

Country concentration

The country concentration framework is described in the Country risk section on pages 341 to 353.

Retail

A product and asset class framework exists to control credit risk for retail businesses. It sets limits that measure and control the asset quality of each key business area, the portfolios in that business and the new business being originated. The actual performance of each portfolio is tracked relative to these limits and action taken where necessary.

Credit risk assessment

Wholesale

The credit risk function assesses, approves and manages the credit risk associated with a borrower or group of related borrowers.

The Gcco has established a framework of individual delegated authorities, which are set out in the Group Credit Risk Policy. The framework requires at least two individuals to approve each credit decision, one from the business and one from the credit risk function. Both must hold appropriate delegated authority, which is dependent on their experience and expertise. Only a small number of senior executives hold the highest authority provided under the framework. While both parties are accountable for the quality of each decision taken, the credit risk approver holds ultimate sanctioning authority.

In all circumstances the risks associated with any proposal to provide, increase, review or change the terms or conditions of credit facilities must be assessed prior to a credit decision being made. Assessments of credit risk must, at a minimum, specifically address the following elements:

- The amount, terms, tenor, structure, conditions, purpose and appropriateness of all credit facilities;
- Compliance with applicable Group and/or divisional credit policies;
- The customer's ability to meet obligations, based on an analysis of financial information and a review of payment and covenant compliance history;
- The source of repayment and the customer's risk profile, including sector analysis and sensitivity to economic and market developments, and credit risk mitigation;
- Refinancing risk - that is the risk of loss arising from the failure of a customer to settle an obligation on expiry of a facility through the drawdown of another credit facility provided by the Group or by another lender;
- Consideration of all other risks such as environmental, social and ethical, regulatory and reputational risks; and
- The portfolio impact of the transaction, including the impact on any credit risk concentration limits or agreed divisional risk appetite.

At a minimum, credit relationships are reviewed and re-approved annually. The renewal process addresses borrower performance, including reconfirmation or adjustment of risk parameter estimates; the adequacy of security; compliance with terms and conditions; and refinancing risk.

Credit risk continued

Risk management* continued

Retail

Retail lending entails making a large number of small value loans. To ensure that it makes these lending decisions consistently, the Group analyses the historical debt servicing behaviour of customers, including their behaviour with respect to their other lenders. The Group then uses the results of these analyses to set its lending rules, developing different rules for different products. The resulting credit decision making process is then largely automated, with customers receiving a credit score that reflects the outcome of a comparison of their credit profile with the rule set. However, in the case of relatively high value, complex personal or small business loans, including some residential mortgage lending, specialist credit managers make the final lending decisions.

Controls and assurance

The Group's credit control and assurance framework has three key components: credit policy; policy compliance assurance; and independent assurance. These apply to both wholesale and retail credit risk at both portfolio and individual customer level.

The first component is the Group Credit Policy Standard, which is part of the Group Policy Framework. It sets out the rules the Group's businesses must follow to ensure that credit risks are identified and effectively managed through the credit lifecycle.

The second component is a policy assurance activity that GCR undertakes to provide the GCCO with evidence of the effectiveness of credit risk management controls in place across the Group. The results of these reviews are presented to the Group Credit Risk Committee on a regular basis in support of the self-certification that GCR must complete from time to time.

The third component of the Group's credit assurance framework is the Credit Quality Assurance (CQA) function. CQA independently reviews the Group's lending activities to identify control breaches, assess portfolio quality and recommend process improvements. These findings are escalated to senior management and plans to address shortcomings are recorded and tracked in the Group's operational risk system. CQA's activities are overseen by GAC and the results of its reviews are regularly shared with the Group's main regulators.

Risk measurement*

The Group uses a range of measures for credit risk exposures. The internal measure used, unless otherwise stated, is credit risk assets (CRA) consisting of:

- Lending exposure - measured using drawn balances and includes cash balances at central banks and loans and advances to banks and customers (including overdraft facilities, instalment credit and finance leases).

- Counterparty exposures - measured using marked-to-market value of derivatives after the effect of enforceable netting agreements and regulatory approved models but before the effect of collateral. Counterparty exposures include rate risk management, which includes exposures arising from foreign exchange transactions, interest rate swaps, credit default swaps and options. Exposures are mitigated by off-setting in-the-money and out-of-the-money transactions where such transactions are governed by legally enforceable netting agreements and exposures are calculated by regulatory approved models. Exposures are shown before deducting collateral.
- Contingent obligations - measured using the value of the committed amount and including primarily letters of credit and guarantees.

CRA exclude issuer risk (primarily debt securities) and securities financing, repurchase and reverse repurchase arrangements. CRAs take account of regulatory netting although, in practice, obligations are settled under legal netting arrangements that provide a right of legal set-off but do not meet the offset criteria under IFRS.

Credit risk models

The Group uses credit risk models in the credit approval process, ongoing credit risk management, monitoring and reporting and portfolio analytics. These may be divided into three categories:

Probability of default (PD)

PD models assess the probability of a customer failing its credit obligations over a one year period.

- Wholesale models - A number of credit grading models are in place that consider risk characteristics relevant to different customer types. These models use a combination of quantitative inputs, such as recent financial performance, and qualitative inputs such as management performance or sector outlook. As part of the credit assessment process, the Group assigns each customer an internal credit grade based on its PD.
- Retail models - Each customer account is scored and models are used to assign a PD. Inputs vary across portfolios and include both internal account and customer level data, as well as data from credit bureaus. This score is used to support automated credit decision making through the use of a statistically derived scorecard.

Exposure at default (EAD)

EAD models provide estimates of the level of use of a credit facility at the time of a customer's default, recognising that customers may make further drawings on unused credit facilities prior to default. Regulatory requirements determine that EAD is always equal to or higher than current utilisation. Exposure can be reduced by a netting agreement, subject to meeting standards of legal enforceability.

Business review Risk and balance sheet management

Loss given default (LGD)

LGD models estimate the amount that cannot be recovered in the event of customer default. When estimating LGD, the Group's models assess both borrower and facility characteristics, as well as various credit risk mitigants. The cost of collections and a time discount factor for the delay in cash recovery are also incorporated.

Changes to credit models

The Group reviews and updates models on an ongoing basis, reflecting more recent data, changes to products and portfolios, and updated regulatory requirements. Extensive changes were made to wholesale models in 2012 and 2013. This process continues with further changes, notably in banks and corporate exposure classes, planned for 2014.

As in 2012, the impact of the model changes implemented in 2013 largely affected the lower risk segments of the Group's portfolios, mostly to customers bearing the equivalent of investment-grade ratings.

Model changes affect year-on-year comparisons of risk measures in certain disclosures. Where meaningful, the Group in its commentary has differentiated between instances where movements in risk measures reflect the impact of model changes, and those that reflect movements in the size of underlying credit portfolios or their credit quality.

Economic capital

The credit economic capital model is an extensive framework that allows for the calculation of portfolio credit loss distributions and associated metrics over a given risk horizon for a variety of business purposes.

The model takes into account migration risk (risk that credit assets will deteriorate in credit quality across multiple years), factor correlation (the assumption that groups of obligors share a common factor) and contagion risk (for example, the risk that the weakening of the sovereign's creditworthiness has a significant impact on the creditworthiness of a business operating in that country).

Credit risk assets*

The table below provides a bridge between balance sheet captions and the related components of credit risk assets (CRA).

	Balance sheet £bn	Within the scope of market risk (1) £bn	Not within the scope of CRA (2) £bn	Credit adjustments (3) £bn	Netting and collateral (4) £bn	Reclassifications (5) £bn	Methodology differences and CRA £bn
2013							
Cash and balances at central banks	82.7	—	(3.9)	—	—	1.7	80.5
Reverse repurchase agreements and stock borrowing	76.4	—	(76.4)	—	—	—	—
Loans and advances	418.4	—	(3.0)	25.2	(28.4)	(7.5)	404.7
Debt securities	113.6	(56.7)	(56.9)	—	—	—	—
Equity shares	8.8	(7.2)	(1.6)	—	—	—	—
Settlement balances	5.6	(5.6)	—	—	—	—	—
Derivatives	288.0	—	—	1.8	(242.8)	9.9	56.9
Other assets (6)	34.4	—	(25.6)	—	—	(7.8)	1.0
Total assets	1,027.9	(69.5)	(167.4)	27.0	(271.2)	(3.7)	543.1
Contingent obligations (7)							29.9
							573.0

Notes:

(1) The exposures in regulatory trading book businesses are subject to market risk and are hence excluded from CRA. Refer to the market risk section on page 318.

(2) Includes cash in ATMs and branches, items in the course of collection, reverse repurchase agreements, securities and other assets (refer to note below).

(3) Includes impairment loss provisions related to loans and advances and credit valuation adjustment on derivatives.

(4) Comprises:

- Loans and advances: cash collateral pledged with counterparties in relation to net derivative liability positions.

- Derivatives: impact of master netting arrangements.

(5) Comprises:

- Cash and balances at central banks: notice balances with central banks included in loans and advances, reclassified as central bank exposure in CRA.
- Loans and advances: includes offset related to cash management pooling arrangements not allowed under IFRS and reclassification of central bank balances. This is partially offset by reclassification of disposal groups and prepayments, accrued income and other assets as customer balances.

- Derivatives: reflects difference between netting arrangements and netting within regulatory model sets, and balances with central counterparties after netting but before variation margin presented net on the balance sheet.

- Other assets: includes amounts reclassified to loans and advances from disposal groups and prepayments, accrued income and other assets and residual value of operating leases.

(6) Other assets: includes intangible assets, property, plant and equipment, deferred tax, prepayments and accrued income and assets of disposal groups.

(7) Includes documentary credits (commercial letters of credit providing for payment by the Group to a named beneficiary against presentation of specified documents), classified as commitments for financial reporting.

Divisional analysis

	2013 £m	2012 £m	2011 £m
UK Retail	113,223	114,120	111,070
UK Corporate	97,166	101,148	105,078
Wealth	19,819	19,913	20,079
International Banking	60,438	64,518	72,737
Ulster Bank	33,129	34,232	37,781
US Retail & Commercial	53,411	55,036	56,546
Retail & Commercial	377,186	388,967	403,291
Markets	81,021	106,336	114,327
Other	71,409	65,186	64,517
Core	529,616	560,489	582,135
Non-Core	43,340	65,220	92,709
	572,956	625,709	674,844

Key points

- Overall, CRA fell by 8% during the year. 59% of the £52.8 billion reduction was in the Core divisions.
- CRA in the Retail & Commercial divisions continued to increase as a proportion of the Core portfolio, accounting for 71% of the Core CRA (2012 - 69%).
- The reduction in the Core portfolio was mostly driven by the implementation of a risk reduction strategy in Markets. CRA in Markets fell by 24% during the year, affected by a contraction in lending and rate risk management activities. Markets represented 15% of Core CRA (2012 - 19%). CRA decreased in all Core divisions with the exception of 'other'.
- The increase in CRA in 'other' predominantly related to Group Treasury's exposure to central banks in the UK and US and was a function of the Group's liquidity requirements and cash positions. Exposures to central banks in Western Europe decreased by 76% year-on-year and at the year end represented 7% of 'other' exposure (2012 - 32%).
- At the year end, Non-Core accounted for 8% of total CRA (2012 - 10%) as asset disposals and run-offs continued. Some 50% of the reduction in Non-Core was in the property sector as the Group continued to reduce its concentration in this sector, in particular commercial real estate.

Credit risk continued

Credit risk assets* continued

Key points

Financial markets and the Group's focus on risk appetite and sector concentration had a direct impact on the portfolio during the year with the following key trends observed:

- Total CRA fell 8%, with the only notable increase being in the sovereign sector, including exposures to central banks (increased 3%). Excluding sovereign exposures, CRA decreased by 10%.
- At the year end, the portfolio comprised 31% personal exposure (2012 - 29%), sovereign 15% (2012 - 13%) exposure to banks and other financial institutions 16% (2012 - 18%), property 13% (2012 - 14%), and other corporate sectors 25% (2012 - 26%).
- CRA fell in all geographic regions. The largest decrease, in Western Europe, was primarily a result of reduced exposures to European central banks.
- UK exposure increased to 56% of CRA (2012 - 51%) because of a £16.2 billion rise in exposure to the Bank of England. This was offset predominantly by falls in Non-Core property (£7.5 billion) and Core personal and banking sectors, which fell £4.3 billion in total. Excluding sovereigns, UK Core exposure fell by 3%).
- The personal sector, excluding exposures in North America, fell by 2% due to reduced overdraft and lending exposure in the UK. This was offset by slightly increased UK mortgage exposure. Personal exposure in North America decreased disproportionately due to Non-Core exposures.
- Exposure to sovereigns fluctuates according to Group liquidity requirements and cash positions. These are driven by inflows and outflows of deposits which determine the level of cash placed with central banks and have contributed to higher exposures at the Bank of England and lower exposures at European central banks. The Group's sovereign portfolio comprises exposures to central governments, central banks and sub-sovereigns such as local authorities, primarily in the Group's key markets of the UK, Western Europe and the US. The asset quality is high because exposures are largely short-term cash balances placed with central banks such as the Bank of England, the Federal Reserve and the Eurosystem (including the European Central Bank and central banks in the eurozone). Information on the Group's exposure to governments, including peripheral eurozone sovereigns, can be found in the Country risk section.
- Exposure to the banking sector is well diversified geographically. Limits and exposures are tightly controlled through the combination of the SNC framework, bespoke credit policies and country limits. Derivatives generated the largest exposure for banks (58% of credit risk assets in the banks sector), but a large portion of the exposures was collateralised. The increase in bank exposure in the Asia Pacific region was largely driven by short-term, trade finance related activities.
- Exposure to banks and financial institutions declined by 20%. This was primarily as a result of limited lending and interbank money market activity which fell by 8% and a reduction in derivative exposures which fell by 27%. The declining trend in interbank activity was largely attributable to increased bank liquidity including access to liquidity via schemes put in place via central banks and governments. The reduction in derivative exposure was due to the Group exiting certain products and the benefits of regulatory netting derived from the implementation of new modelling methodology. The Group has a suite of control frameworks and policies for managing the derivatives portfolio, particularly uncollateralised derivatives with long tenors. During the year the control framework for this segment of the portfolio was further tightened.
- Exposure to other financial institutions comprises a range of financial companies, the largest of which were funds (25%) securitisation vehicles (22%) and financial intermediaries (16%) including broker dealers and central counterparties (CCPs). The Core other financial institutions portfolio decreased by 8% in 2013. The Non-Core portfolio decreased by 31%.
- At the year end, the total exposure to CCPs was £4.1 billion (2012 - £3.2 billion). Regulatory initiatives to encourage the wider use of CCPs for clearing over-the-counter derivatives across the industry continue. The Group supports this move but recognises that its concentration risk to CCPs will continue to rise when it clears its own trades, as well as when it acts as a clearing broker for third parties. This increased concentration risk is being managed under a specific risk appetite and control framework. The Group's CCP exposure remains dominated by a small number of well-established, high quality and reputable clearing houses.
- The Group continued to manage down its exposures to financial guarantors - credit derivative products companies (CDPCs) and monolines with a view to exiting these portfolios. Exposure to financial guarantors declined by 69% and represented less than 1% of the other financial institutions portfolio (2012 - 2%). Exposures have decreased materially over time as trades are commuted and exposures reduced due to the tightening credit spread of the assets protected by CDPCs and monolines. At the year end, exposures to CDPCs and monolines totalled £274 million (2012 - £874 million).
- The majority of the Group's property exposure was commercial real estate in Ireland and the UK (refer to Commercial real estate on pages 252 to 257 for further details). The remainder comprised lending to construction companies and building materials groups, which fell by £1.7 billion (15%), and housing associations, which increased by £0.9 billion (12%). A total of 59% of the Group's Core property exposure was in UK Corporate (2012 - 60%) with Ulster Bank and US Retail & Commercial representing 10% and 9% respectively, unchanged from 2012.

*unaudited

Business review Risk and balance sheet management

- The Group's exposure to the shipping sector (including shipping related infrastructure) declined by 18% in 2013 as a result of scheduled loan amortisation, secondary sales and prepayments. Out of the total exposure of £11.4 billion, £8.6 billion related to asset-backed exposure to ocean-going vessels of which dry bulk accounted for 35% of the exposure, tankers 34%, container ships 15%, gas 10% and other vessels 6%. Conditions remained poor across the major shipping market segments in 2013, as charter rates and vessel values remained depressed. The majority of the Group's exposure is extended against security in vessels of recent construction, with less than 4% of the lending secured on vessels aged over 15 years. A key protection for the Group is the minimum security covenant. The overall loan-to-value (LTV) on the portfolio at 31 December 2013 was 76%, split 70% for Core and 97% for Non-Core portfolio respectively. Within the Core portfolio, 13% of exposure had LTVs greater than 100%.
- An increased number of clients suffered liquidity challenges during the year or failed to meet their minimum security covenant. This led to a commensurate rise in referrals to the Watchlist and transfers to the Global Restructuring Group. At 31 December 2013, 12% of the Group's exposure to this sector was in the Watch Red category and loans in default amounted to £0.9 billion.
- The reduction in exposure in the retail and leisure sector was consistent with the Group's strategies to re-balance the Core portfolios towards stronger customers in the sector while continuing to reduce the Non-Core book. The modest growth in North America was in line with agreed sector and region risk appetite.
- Exposure in the telecoms, media and technology sector fell by 18% during the year, driven by divisional strategies to exit underperforming sub-sectors in the portfolio. Notably, media exposure fell 31% during the year.
- Exposure to healthcare of £9.5 billion at the year end (2012 - £9.9 billion) was included in the business services sector. The Group's healthcare exposure was heavily biased towards the UK, which represented 68% of the exposure, unchanged from 2012.

Credit risk continued

Credit risk assets* continued

Asset quality (AQ)

Internal reporting and oversight of CRA is principally differentiated by credit grades. Customers are assigned credit grades based on various credit grading models that reflect the key drivers of default for each customer type. All credit grades across the Group map to both a Group level asset quality scale, used for external financial reporting, and a master grading scale for wholesale exposures, used for internal management reporting across portfolios. Accordingly, measures of risk exposure may be readily aggregated and reported at increasing levels of granularity depending on stakeholder or business need. Performing loans are defined as AQ1-AQ9 (where the PD is less than 100%) and non-performing loans as AQ10 (where the PD is 100%).

Exposures are allocated to asset quality bands on the basis of statistically driven models, which produce an estimate of default rate. The variables included in the models vary by product and geography. For portfolios secured on residential property these models typically include measures of delinquency and loan to value as well as other differentiating characteristics such as bureau score, product features or associated account performance information.

The table below shows CRA by asset quality band.

AQ band	Probability of default range	2013				2012				2011			
		Core £m	Non-Core £m	Total £m	Total %	Core £m	Non-Core £m	Total £m	Total %	Core £m	Non-Core £m	Total £m	Total %

Key points

- Trends in the asset quality of the Group's credit risk exposures during 2013 reflected the change in the proportion of assets in the sovereign sector and movements in the underlying asset quality of the portfolio. The Group's overall asset quality for performing assets improved slightly year-on-year.
- The increase in the proportion of the Group's Core exposures in the AQ1 band reflected the increase in the Group's exposure to sovereigns, in line with the Group's liquidity and capital management practices.
- The increase in AQ4 was due to a positive shift in the asset quality band distribution of UK Retail and reflected improvements in the underlying credit quality of the UK Retail mortgage portfolio over the last three years.
- Trends in the Group's non-performing credit risk exposures in 2013 were predominantly driven by the Non-Core and Ulster Bank portfolios, with these two divisions accounting for 70% of the Group's AQ10 CRA.
- Property continued to be the largest sector in non-performing assets - 57% of total AQ10 exposure (2012 - 58%).
- Non-performing assets in the Ulster Bank portfolio continued to grow, driven by exposures in the wholesale property sector. Refer to Key loan portfolios: Ulster Bank Group (Core and Non-Core) on pages 265 to 267 for more details.
- The personal sector accounted for 21% (2012 - 21%) of the Group's AQ10 exposure. AQ10 exposure in this sector decreased during the year for all divisions except Ulster Bank.
- In UK Retail non-performing assets continued to fall, principally as a result of lower flows of assets into non-performing across all portfolios, as well as write-downs of aged debt.
- The slight decrease in the level of AQ10 exposure in UK Corporate was driven primarily by reductions in the property sector, offset by increases in shipping. At the year end, shipping represented 12% of the AQ10 assets in UK Corporate (2012 - 8%).
- Non-Core exposure fell in all AQ bands.

Risk mitigation

Risk mitigation techniques are used in the management of credit portfolios across the Group, typically to mitigate credit concentrations in relation to an individual customer, a borrower group or a collection of related borrowers. Where possible, the Group nets customer credit balances against obligations.

Mitigation tools applied can include: structuring a security interest in a physical or financial asset; use of credit derivatives, including credit default swaps, credit-linked debt instruments and securitisation structures; and use of guarantees and similar instruments (for example, credit insurance) from related and third parties.

When seeking to mitigate risk, at a minimum the Group considers the following:

- The suitability of the proposed risk mitigation, particularly if restrictions apply;
- The means by which legal certainty is to be established, including required documentation, supportive legal opinions and the steps needed to establish legal rights;
- Acceptable methodologies for initial and subsequent valuation of collateral, the frequency of valuation and the advance rates given;
- The actions it can take if the value of collateral or other mitigants is less than needed;
- The risk that the value of mitigants and counterparty credit quality may deteriorate simultaneously;
- The need to manage concentration risks arising from collateral types; and
- The need to ensure that any risk mitigation remains legally effective and enforceable.

The Group's business and credit teams are supported by specialist in-house documentation teams. The Group uses industry-standard loan and security documentation wherever possible. However, when the Group uses non-standard documentation, external lawyers are employed on a case-by-case basis.

Risk mitigation continued

Lending

The types of collateral the Group takes to mitigate the credit risk arising from wholesale lending varies according to the nature of the counterparty and its assets. The most common types are:

- Commercial real estate - The market value of the collateral typically exceeds the loan amount at origination date. The market value is defined as the estimated amount for which the asset could be sold in an arm's length transaction by a willing seller to a willing buyer. In Ireland and, to a lesser extent, the UK, a lack of market data has made estimating the value of property difficult and so causes the Group to use a range of other types of information to value such collateral, including expert judgement and indices. For further information, regarding the Group's commercial real estate portfolio refer to pages 252 to 257.
- Residential property - The Group takes collateral in the form of residential property to mitigate the credit risk arising from mortgages and home equity lending. The Group values residential property during the loan underwriting process by either appraising properties individually or using statistically valid models. The Group updates residential property values quarterly using the relevant residential property index, namely the Halifax Quarterly Regional House Price Index in the UK, the Case-Shiller Home Price Index in the US, the Central Statistics Office Residential Property Price Index in the ROI, and the Nationwide House Price Index in Northern Ireland.

- Physical assets - These may include stock, plant, equipment, machinery, vehicles, ships and aircraft. Such assets are suitable collateral only if the Group can identify, locate, and segregate them from other assets on which it does not have a claim. The Group values physical assets in a variety of different ways, depending on the type of asset concerned and may rely on balance sheet valuations in certain cases. In the US, the Group also takes collateral in the form of motor vehicles to mitigate the credit risk arising from automobile lending. The Group values new vehicles at cost and used ones at the relevant average trade-in value.
- Receivables - These are amounts owed to the Group's counterparties by their own customers. The Group values them after taking into account the quality of its counterparty's receivable management processes and excluding any that are past due.

All collateral is assessed case-by-case to ensure that it will retain its value independently of the provider. The Group monitors the value of the collateral and, if there is a shortfall, will seek additional collateral.

The table below analyses commercial real estate (Core and Non-Core) lending by loan-to-value ratio, which represents loan value before provisions relative to the value of the property financed.

Notes:

(1) In 2012, the Group reclassified loans with limited (defined as LTV>1,000%) or non-physical security as minimal security, of which a majority were commercial real estate development loans in Ulster Bank. Total portfolio average LTV is quoted net of loans with minimal security given that the anticipated recovery rate is less than 10%. Provisions are marked against these loans where required to reflect the relevant asset quality and recovery profile.

(2) Other non-performing loans of £2.3 billion (2012 - £2.0 billion; 2011 - £2.5 billion) were subject to the Group's standard provisioning policies. Other performing loans of £5.4 billion (2012 - £6.6 billion; 2011 - £9.2 billion) included general corporate loans, typically unsecured, to commercial real estate companies, and major UK house builders in addition to facilities supported by guarantees. The credit quality of these exposures was consistent with that of the performing portfolio overall.

(3) Weighted average by exposure.

(4) 2012 LTV revised to reflect refinement to security value reporting implemented during 2013.

Notes:

(1) Includes residential mortgages and home equity loans and lines (refer to page 260 for a breakdown of balances).

(2) Where no indexed LTV is held.

(3) Average LTV weighted by value is calculated using the LTV on each individual mortgage and applying a weighting based on the value of each mortgage.

Counterparty credit risk

The Group mitigates counterparty credit risk arising from both derivatives and repurchase agreements through the use of netting, collateral and the use of market standard documentation.

The Group mitigates counterparty credit risk by netting amounts it owes to a counterparty against amounts the same counterparty owes to it, in accordance with relevant regulatory and internal policies. It generally does so only if it has a netting agreement in place as well as a legal opinion to the effect that the agreement is enforceable in the relevant jurisdictions.

Collateral generally takes the form of cash. In the case of repurchase agreements, collateral usually takes the form of debt and equity securities at the outset but if the value of collateral falls relative to that of the obligation, the Group may require additional collateral in the form of cash (variation margin). Industry standard documentation, such as master repurchase agreements and credit support annexes accompanied by legal opinion, is used for financial collateral taken as part of trading activities.

The Group limits counterparty credit exposures by setting limits which take into account the potential adverse movement of a counterparty credit exposure after adjusting the impact of netting and collateral where applicable.

Mitigation of counterparty credit risk	2013 £bn	2012 £bn	2011 £bn
Reverse repurchase agreements	76.5	104.8	100.9
Securities received as collateral (1)	(76.4)	(104.7)	(98.9)
Derivative assets gross exposure	288.0	441.9	530.1
Counterparty netting	(242.8)	(373.9)	(441.6)
Cash collateral held	(24.3)	(34.1)	(37.2)
Securities received as collateral	(6.0)	(5.6)	(5.3)

Note:

(1) In accordance with normal market practice, at 31 December 2013 £63.7 billion (2012 - £100.7 billion; 2011 - £95.4 billion) had been resold or re-pledged as collateral for the Group's own transactions.

Business review Risk and balance sheet management

Early problem identification and problem debt management

Wholesale

Early problem identification

Each division has defined early warning indicators (EWIs) to identify customers experiencing financial difficulty, and to increase monitoring if needed. EWIs may be internal, such as a customer's bank account activity, or external, such as a publicly-listed customer's share price. If EWIs show a customer is experiencing potential or actual difficulty, divisional credit officers may decide to place it on the Watchlist.

*Watchlist**

There are three Watch classifications - Amber, Red and Black - reflecting progressively deteriorating conditions. Watch Amber customers are performing customers who show early signs of potential financial difficulty, or have other characteristics that warrant closer monitoring. Watch Red customers are performing customers who show signs of declining creditworthiness which requires active management usually by the Global Restructuring Group (GRG). Watch Black customers include risk elements in lending and potential problem loans.

Once on the Watchlist, customers are subject to heightened scrutiny. Depending on the severity of the financial difficulty and the size of the exposure, the customer relationship strategy is reassessed by credit officers, by specialist units in divisions or by GRG. In more material cases, a forum of experienced credit, portfolio management and remedial management specialists in the divisions or GRG may reassess the customer relationship strategy. In accordance with Group-wide policies, a number of mandatory actions are taken, including a review of the customer's credit grade and facility and security documentation.

Other appropriate corrective action is taken when circumstances emerge that may affect the customer's ability to service its debt. Such circumstances include deteriorating trading performance, imminent breach of covenant, challenging macroeconomic conditions, a late payment or the expectation of a missed payment.

For all Watch Red cases, the division is required to consult with GRG on whether the relationship should be transferred to GRG (for more information on GRG, refer to below). Watch Red customers that continue to be managed by the divisions tend to be those requiring subject matter expertise that is available in the divisions rather than in GRG.

At 31 December 2013, exposures to customers reported as Watchlist Red and managed in the divisions totalled £3.2 billion (2012 - £4.3 billion).

Remediation strategies available in the divisions include granting a customer various types of concessions. Any decision to approve a concession will be a function of the division's specific country and sector appetite, the key metrics of the customer, the market environment and the loan structure and security. For further information, refer to the Wholesale forbearance section below.

Other potential outcomes of the relationship review are to: take the customer off the Watchlist; offer additional lending and continue monitoring; transfer the relationship to GRG if appropriate; or exit the relationship altogether.

The following table shows a sector breakdown of CRA of Watch Red customers under GRG management:

Watch Red CRA by current exposure	2013			2012			2011		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m
Property	3,178	1,841	5,019	5,605	4,377	9,982	6,561	6,011	12,572
Transport	1,791	456	2,247	2,238	478	2,716	1,159	2,252	3,411
Retail and leisure	1,092	237	1,329	1,542	432	1,974	1,528	669	2,197
Services	955	40	995	870	84	954	808	141	949
Other	2,312	804	3,116	3,087	1,177	4,264	1,952	916	2,868
Total	9,328	3,378	12,706	13,342	6,548	19,890	12,008	9,989	21,997

The decrease in Watch Red cases was driven predominantly by a lower flow of cases into GRG, repayments and movement of cases into Watch Black. The overall value of customers in default has however reduced during the year. For further information regarding the asset quality of the Group's portfolio refer to the Asset quality section on page 236.

Global Restructuring Group

GRG manages the Group's wholesale problem debt portfolio in cases where its exposure to the customer exceeds £1 million. In addition, GRG provides a specialist credit function, the Strategy Management Unit, for distressed bilateral lending where the exposure is between £250,000 and £1 million. The primary function of GRG is to restore customers to an acceptable credit condition and minimise losses to the Group.

The factor common to all customers managed by GRG is that the Group's exposure is outside risk appetite. Customers transferred to GRG typically show symptoms of significant financial difficulty, such as cash flow pressures, or show evidence that the management team has limited experience of managing a business in difficulty. In addition, a customer may be transferred to GRG if the Group is not provided with sufficient or reliable information on which to make decisions.

GRG relationship managers use their skill, experience and judgement to support customers through these difficulties while seeking to minimise losses to protect the Group's capital.

*unaudited

Business review Risk and balance sheet management

When the relationship is transferred, GRG conducts a detailed assessment of the viability of the business as well as the ability of management to deal with the causes of financial difficulty. Following GRG's initial file assessment and, if appropriate, wider due diligence with input from independent experts (sector experts, accountants and surveyors), various options are presented to the customer. A strategy is then agreed with the customer for dealing with the distressed loan.

The objective is to find a mutually acceptable solution, including repayment, refinancing or transfer to another bank if that is the customer's preferred option. Once a solution is found, management of the loans may be transferred back to the performing divisions. If the business is not viable and a turnaround is not possible, insolvency may be an option.

Wholesale forbearance

Definition

Forbearance takes place when a concession is made on the contractual terms of a loan in response to a customer's financial difficulties.

Concessions granted where there is no evidence of financial difficulty, or where any changes to terms and conditions are within the Group's usual risk appetite (for a customer new to the Group), or reflect improving credit market conditions for the customer, are not considered forbearance.

A number of options are available to the Group. Such actions are tailored to the customer's individual circumstances. The aim of such actions is to restore the customer to financial health and to minimise risk to the Group. To ensure that forbearance is appropriate for the needs and financial profile of the customer, the Group applies minimum standards when assessing, recording, monitoring and reporting forbearance.

Types of wholesale forbearance

Wholesale forbearance may involve the following types of concessions:

- Payment concessions and loan rescheduling, including extensions in contractual maturity, may be granted to improve the customer's liquidity. Concessions may also be granted on the expectation that the customer's liquidity will recover when market conditions improve. In addition, they may be granted if the customer will benefit from access to alternative sources of liquidity, such as an issue of equity capital. These options are commonly used in commercial real estate transactions, particularly where a shortage of market liquidity rules out immediate refinancing and makes short-term collateral sales unattractive.
- Debt may be forgiven, or exchanged for equity, where the customer's business or economic environment means that it cannot meet obligations and where other forms of forbearance are unlikely to succeed. Debt forgiveness is commonly used for stressed leveraged finance transactions. These are typically structured on the basis of projected cash flows from operational activities, rather than underlying tangible asset values. Provided that the underlying business model, strategy and debt level are viable, maintaining the business as a going concern is the preferred option, rather than realising the value of the underlying assets.

A temporary covenant waiver, a recalibration of covenants or a covenant amendment may be used to cure a potential or actual covenant breach.

In return for this relief, the Group would seek to obtain a return

commensurate with the risk that it is required to take. The increased return for the increased risk can be structured flexibly to take into account the customer's circumstances, for example increased margin on a cash or payment in kind basis, and/or deferred return instruments.

The contractual margin may be amended to bolster the customer's day-to-day liquidity to help sustain the customer's business as a going concern. This would normally be a short-term solution. As set out above, the Group would seek to obtain a return commensurate to the risk that it is required to take and this can be structured in the same ways set out above.

Loans may be forbearance more than once, generally where a temporary concession has been granted and circumstances warrant another temporary or permanent revision of the loan's terms. All customers are assigned a PD and related facilities a LGD. These are re-assessed prior to finalising any forbearance arrangement in light of the loan's amended terms. Where forbearance is no longer viable, the Group will consider other options such as the enforcement of security and/or insolvency proceedings.

The ultimate outcome of a forbearance strategy is unknown at the time of execution. It is highly dependent on the cooperation of the borrower and the continued existence of a viable business. The following are generally considered to be options of last resort:

- Enforcement of security or otherwise taking control of assets - Where the Group holds collateral or other security interest and is entitled to enforce its rights, it may enforce its security or otherwise take ownership or control of the assets. The Group's preferred strategy is to consider other possible options prior to exercising these rights.
- Insolvency - Where there is no suitable forbearance option or the business is no longer regarded as sustainable, insolvency will be considered. Insolvency may be the only option that ensures that the assets of the business are properly and efficiently distributed to relevant creditors.

The data presented in the tables below include loans forbearance during 2011, 2012 and 2013 which individually exceeded thresholds set at divisional level. The Group continues to refine its reporting processes for forbearance loans and, as a result, in 2013, thresholds were reduced to range from nil to £3 million. During 2011 and 2012, these thresholds ranged from nil to £10 million. The proportion of the Watch and GRG population covered by these thresholds has changed over time as the thresholds have been reduced. In 2013, this was 90% (2012 - 84%).

As part of the Group's ongoing review of forbearance reporting, the amounts shown as "Completed forbearance" relating to 2012 and 2013 now include loans granted covenant concessions only. These were disclosed by way of a note in 2012. While the Group considers these types of concessions qualitatively different from other forms of forbearance, they constitute a significant proportion of wholesale forbearance and were therefore included.

Business review Risk and balance sheet management

Credit risk continued

Early problem identification and problem debt management continued

The table below shows the value of loans (excluding loans where the Group has initiated recovery procedures) where forbearance was completed during the year, by sector and types.

Wholesale forbearance during the year by sector	2013			2012			2011			Provision coverage (1) %
	Performing £m	Non-performing £m	Provision coverage (1) %	Performing £m	Non-performing £m	Provision coverage (1) %	Performing £m	Non-performing £m	Provision coverage (1) %	
Property	1,759	4,802	60	3,365	3,899	16	2,166	3,215	25	
Transport	1,016	229	34	1,174	130	23	771	670	10	
Retail and leisure	455	390	37	732	113	34	331	433	10	
Services	405	234	77	324	51	30	177	94	3	
Other	670	510	27	1,575	550	40	773	731	47	
	4,305	6,165	55	7,170	4,743	20	4,218	5,143	25	

Forbearance arrangements

The table below analyses the incidence of the main types of wholesale forbearance arrangements by loan value.

Wholesale forbearance during the year by arrangement type (2)	2013	2012	2011
	%	%	%
Payment concessions and loan rescheduling	78	49	92
Other (3)	31	14	9
Covenant-only concessions	16	30	—
forgiveness of all or part of the outstanding debt	9	21	33
Variation in margin	2	6	12

Notes:

(1) Provision coverage reflects impairment provision as a percentage of non-performing loans.

(2) The total exceeds 100% as an individual case can involve more than one type of arrangement.

(3) The main types of 'other' concessions include formal 'standstill' agreements and release of security.

Key points

- A number of refinements have been made in 2013 to the reporting of wholesale forbearance as explained below:
 - Change in reporting thresholds from £10 million to £3 million, increased forbearance reported by £1.7 billion.
 - During ongoing portfolio reviews, a number of facilities totalling £2.3 billion were identified which were being managed in accordance with an agreed forbearance strategy but where the forbearance had not been formally documented. These have been included in the tables above, which has led to an increase in completed forbearance for 2013 and a corresponding decrease in loans which are "in process" for the purpose of forbearance (in process loans are explained below).
 - Covenant only forbearance of £1.7 billion (2012 - £3.5 billion) has been included.
- Year-on-year analysis of forborne loans may be skewed by individual material cases during a given year. This is particularly relevant when comparing the value of forbearance completed in the property and transport sectors in 2013 with previous years.
- At 31 December 2013, loans totalling £9.4 billion (2012 - £13.7 billion) were granted credit approval for forbearance but where such forbearance had not yet been formally documented and which were not being managed in accordance with an agreed forbearance strategy. These loans are referred to as in process and are not included in the tables above. 84% of these were non-performing loans, with an associated provision coverage of 44%, and 16% were performing loans. The principal types of arrangements offered included payment concessions and loan rescheduling, covenant concessions, forgiveness of all or part of the outstanding debt and variations in margin.
- Loans forborne during 2012 and 2013 and outstanding at 31 December 2013 totalled £18.4 billion, of which £8.0 billion related to arrangements completed during 2012.
- Core bank customers were granted forbearance by GRG on loan facilities totalling £6.9 billion during 2012 and 2013, which equates to 23% of loans managed by GRG (excluding loans to customers managed by recovery units). Of these loans, 15% by value had been returned to performing portfolios managed within the originating divisions by 31 December 2013. There are also loans that are not forborne which have been returned from GRG to performing portfolios managed within the originating divisions. 79% by value of the performing Core loans granted forbearance during 2012 remained performing as at 31 December 2013.*
- Provision coverage for forborne loans increased during the year. This was primarily the result of provisions in Ulster Bank, specifically in the property sector, and driven by the Group's RCR strategy. For further information regarding Ulster Bank refer to the Ulster Bank Group (Core and Non-Core) section on pages 265 to 267.

Retail

Collections

Collections functions in each of the Group's retail businesses provide support and assistance to customers who are experiencing difficulties in meeting their obligations to the Group. Such customers may miss a payment on their loan or borrow more than their agreed limit, or contact the Group themselves asking for help. Dedicated support teams are also in place to identify and help customers who have not yet missed a payment but may be facing financial difficulty.

The collections function may use a range of tools to initiate contact with the customer, establish the cause of their financial difficulty and support them where possible. In the process, they may consider granting the customer forbearance.

Additionally, in the UK and Ireland, support is provided to customers with unsecured loans who establish a repayment plan with the Group through a debt advice agency or a self-help tool. Such "breathing space" suspends collections activity for a 30-day period to allow time for the repayment plan to be put in place. Arrears continue to accrue for customer loans granted breathing space.

If collections strategies are unsuccessful the relationship is transferred to the recoveries team. For further details on recoveries, refer to page 250.

Retail forbearance

Definition

Forbearance takes place when a concession is made on the contractual terms of a loan in response to a customer's financial difficulties. In UK Retail and Ulster Bank, a broader definition of forbearance is used that includes mortgages where a customer has made a change to contractual terms, when their payments status is up-to-date and they are not necessarily evidencing signs of financial difficulty. Forbearance is granted on a permanent, or temporary, basis following an assessment of the customer's individual circumstances and ability to pay. For UK Retail and Ulster Bank, the disclosure covers changes in contractual terms dating back to January 2008 and early 2009 respectively.

Identification

Customers who contact the bank directly because of financial difficulties, or who are already in payment arrears, may be granted forbearance. In the course of assisting customers, more than one forbearance treatment may be granted.

Types of retail forbearance

Forbearance is granted principally to customers with mortgages and less extensively to customers with unsecured loans.

Mortgage portfolios

Forbearance options include, but are not limited to, payment concessions, capitalisations of arrears, term extensions and temporary conversions to interest only.

- Payment concessions - A temporary reduction in, or elimination of, the periodic (usually monthly) loan repayment is agreed with the customer. At the end of the concessionary period, forborne principal and accrued interest outstanding is scheduled for repayment over an agreed period. Ulster Bank and RBS Citizens also offer payment concessions in the form of discounted interest rates that involve the forgiveness of some interest (further details below).
- Capitalisation of arrears - The customer repays the arrears over the remaining term of the mortgage and returns to an up-to-date position.
- Term extensions - The maturity date of the loan is extended.
- Interest only conversions - The loan converts from principal and interest repayment to interest only repayment on a temporary basis (Ulster Bank only).

In UK Retail, interest only conversions have not been used to support customers in financial difficulty since 2009, and from 2012 have only been permitted on a very exceptional basis for residential mortgage customers who are up to date on payments. As a result interest only loans with permanent changes to terms are historical stock. In Ulster Bank, interest only conversions are offered to customers under financial stress and solely on a temporary basis.

In response to the economic difficulties in the Republic of Ireland, Ulster Bank has developed additional forbearance options. These payment concessions support customers over an extended period of time and include instances where some interest is forgiven by granting interest rate discounts for a 3-5 year period.

Similarly RBS Citizens participates in the US government mandated Home Affordable Modification Program as well as its own proprietary programme. Both feature a combination of term extensions, capitalisations of arrears, interest rate reductions and conversions from interest only to amortising. These tend to be permanent changes to contractual terms. In order to qualify for either of the programmes, customers must meet government-specified or internal criteria designed to evidence financial difficulty but demonstrate a willingness to pay.

Business review Risk and balance sheet management

Credit risk continued

Early problem identification and problem debt management continued

Unsecured portfolios

For unsecured portfolios in UK Retail and Ulster Bank, forbearance entails reduced or deferred payments. Arrangements to facilitate the repayment of overdraft excesses or loan arrears can be agreed dependent on affordability. Where repayment arrangements are not affordable debt consolidation loans can be provided to customers in collections.

In RBS Citizens, granting of forbearance is predominantly restricted to short-term (1-3 months) loan extensions to alleviate the financial burden caused by temporary hardship. Such extensions are offered only if a customer has demonstrated a capacity and willingness to pay. The number and frequency of extensions granted to a customer are limited. Additionally, for loans secured by vehicles and credit cards, RBS Citizens may offer temporary interest rate modifications, but no principal reductions. Forbearance may also be offered to student loan customers consistent with the policy guidelines of the US Office of the Comptroller of the Currency.

- For unsecured portfolios in UK Retail, £121 million of balances (1% of the total unsecured balances) were subject to forbearance at 2013 year end.
- For unsecured portfolios in Ulster Bank, £16 million (3.8% by value) of the population was subject to forbearance at 31 December 2013.
- For unsecured portfolios in RBS Citizens, £135 million (1.7% of the unsecured balances) were subject to forbearance at 2013 year end (includes auto and recreational vehicle marine portfolios and excludes small business loans as these are included as part of wholesale reporting).

Monitoring of forbearance

Forbearance loans may be performing or non-performing. The granting of forbearance does not change the delinquency status of the loan unless the arrangement involves a capitalisation of all existing arrears of principal and interest, in which case the loan becomes up-to-date.

Loans granted forbearance are included in the non-performing book: when 90 days past due; or if the forbearance arrangement is a payment concession that involves a reduction in contractually required cash flows i.e. the forgiveness of interest. Such loans are classified as impaired. In RBS Citizens, all loans subject to forbearance are included in the non-performing book.

There are instances when loans subject to forbearance are transferred from the non-performing book to the performing book. In UK Retail, when arrears are capitalised, a loan is transferred to the performing book once the borrower has met the revised payment terms for at least six months and is expected to continue to do so. In addition, a small portfolio of loans past due 90 days are managed by UK Retail's collections function.

Loans in this portfolio may also be transferred to the performing book if the customer makes payments that reduce arrears below 90 days.

In Ulster Bank, if a customer makes payments that reduce loan arrears below 90 days, the loan is transferred to the performing book. In addition, where a customer meets the original payment terms for six months and is expected to continue to do so, capitalisation may be agreed. In these cases the loan is also transferred to the performing book.

Mortgages granted forbearance are reviewed regularly to ensure that customers are meeting the agreed terms. Key metrics have been developed to record the proportion of loans that fail to meet the agreed terms over time, as well as the proportion of loans that return to performing with no arrears. Retail forbearance loans can be modified more than once.

Twelve month default rates are calculated for all mortgage forbearance types. In 2013, the average twelve month default rates were 8% for UK Retail, 18% for Ulster Bank and 13% for RBS Citizens.

Business review Risk and balance sheet management

Arrears status and provisions

The mortgage arrears information for retail accounts in forbearance and related provision are shown in the tables below.

	No missed payments		1-3 months in arrears		>3 months in arrears		Total		Forborne balances (1) %
	Balance £m	Provision £m	Balance £m	Provision £m	Balance £m	Provision £m	Balance £m	Provision £m	
2013

Early problem identification and problem debt management continued

Forbearance arrangements

The incidence of the main types of retail forbearance on the balance sheet are analysed below.

	UK Retail £m	Ulster Bank £m	RBS Citizens £m	Wealth £m	Total (1) £m
2013					
Interest only conversions - temporary and permanent (2)	1,784	512	—	—	2,296
Term extensions - capital repayment and interest only	2,478	325	35	29	2,867
Payment concessions (3)	241	1,567	246	12	2,066
Capitalisation of arrears	907	494	—	—	1,401
Other	366	—	92	86	544
	5,776	2,898	373	127	9,174
2012					
Interest only conversions - temporary and permanent	1,220	924	—	6	2,150
Term extensions - capital repayment and interest only	2,271	183	—	27	2,481
Payment concessions (3)	215	762	339	9	1,325
Capitalisation of arrears	932	119	—	—	1,051
Other	452	—	—	3	455
	5,090	1,988	339	45	7,462
2011					
Interest only conversions - temporary and permanent	1,269	795	—	3	2,067
Term extensions - capital repayment and interest only	1,805	58	—	97	1,960
Payment concessions	198	876	180	—	1,254
Capitalisation of arrears	864	101	—	—	965
Other	517	—	—	23	540
	4,653	1,830	180	123	6,786

Notes:

- (1) As an individual case can include more than one type of arrangement, the analysis in the table on forbearance arrangements exceeds the total value of cases subject to forbearance.
- (2) The year-on-year increase for UK Retail was driven by an extension of the reporting definition to include legacy conversions to interest only repayment in cases where customers were previously on a combination of repayment types.
- (3) Includes £365 million of Ulster Bank loans (2012 - £10 million) and £62 million of RBS Citizens loans (2012 - £31 million) where an interest rate discount has been agreed resulting in a reduction of contractual cash flows through forgiveness of interest.

The table below shows forbearance agreed during the year analysed between performing and non-performing.

	UK Retail £m	Ulster Bank £m	RBS Citizens £m	Wealth £m	Total £m
2013					
Performing forbearance	1,332	2,223	—	41	3,596
Non-performing forbearance	186	1,213	101	22	1,522
Total forbearance (1,2)	1,518	3,436	101	63	5,118
2012					
Performing forbearance	1,809	2,111	88	18	4,026
Non-performing forbearance	184	1,009	71	2	1,266
Total forbearance (1,2)	1,993	3,120	159	20	5,292

Notes:

- (1) An individual case can include more than one type of arrangement.
- (2) Includes all arrangements agreed during the year (new customers and renewals) including those deals that have expired at year end. Balances are at year end.

Business review Risk and balance sheet management

Key points

UK Retail

- At 31 December 2013, forbearance balances where the forbearance treatment was provided in the last 24 months amounted to £2.0 billion. This represented a 14% reduction in the year.
- The flow of new forbearance of £380 million in the fourth quarter of 2013 continued on a downward trend compared with an average of £456 million in the preceding four quarters. The full year flow for 2013 was £1.7 billion, a 15% reduction on the 2012 flow.
- 5.5% of total mortgage assets (£5.4 billion) were subject to a forbearance arrangement agreed since January 2008. This represented an increase from 4.9% on 2012 (£4.8 billion). The rise was driven by an extension of the reporting definition to include legacy conversions to interest only repayment in cases where customers were previously on a combination of repayment types. Excluding this change in definition, forbearance stock remained stable.
- Approximately 84% of forbearance loans (2012 - 83%) were up to date with payments compared with approximately 97% of assets not subject to forbearance activity.
- The majority (90%) of UK Retail forbearance is permanent in nature (term extensions, capitalisation of arrears, historic conversions to interest only). Temporary forbearance comprises payment concessions such as reduced or deferred payments with such arrangements typically agreed for a period of three to six months.
- The most frequently occurring forbearance types were term extensions (43% of forbearance loans at 31 December 2013), interest only conversions (31%) and capitalisations of arrears (16%). The growth of interest only stock reflected the extended definition referred to above. The underlying level of transfers was negligible and the remaining stock was the result of legacy policy. Conversions to interest only have only been permitted on a very exceptional basis since the fourth quarter of 2012 and have not been permitted for customers in financial difficulty since 2009.
- The impairment provision cover on forbearance loans remained significantly higher than that on assets not subject to forbearance.

Ulster Bank

- At 31 December 2013, 14.6% of total mortgage assets (£2.8 billion) were subject to a forbearance arrangement (agreed since early 2009), an increase from 10.4% (£2.0 billion) at 31 December 2012. This reflected Ulster Bank's proactive strategies to contact customers in financial difficulty to offer assistance.
- Although the forbearance stock increased by 40% during the year, the number of customers approaching Ulster Bank for assistance for the first time remained broadly stable. This can be attributed to more mortgages being put on to longer-term arrangements, and therefore not exiting forbearance.
- The majority of forbearance arrangements were less than 90 days in arrears (72%).
- The mix of forbearance treatments in Ulster Bank changed with an increase in longer-term solutions. A total of 28% of forbearance loans were subject to a permanent arrangement at 31 December 2013 (2012 - 15%). Capitalisations represented 17% and term extensions represented 11% of the forbearance portfolio at 31 December 2013, increasing from 6% and 9% respectively.
- The remaining forbearance loans were temporary concessions accounting for 72%. Short to medium-term concessions are offered for periods of three months to five years and incorporate different levels of repayment based on the customer's ability to pay.
- Temporary interest only arrangements decreased during 2013 to 18% of forbearance loans at 31 December 2013 (2012 - 46%). This reflected Ulster Bank's strategy to transition customers in financial difficulty to long-term arrangements.
- Payment concessions represented the remaining 54%, comprising: deals where payments amortised the outstanding balance (41%); a diminishing portfolio of deals that negatively amortised (10%); and payment holidays (3%).
- The impairment provision cover on forbearance loans remained significantly higher than that on assets not subject to forbearance.

Credit risk continued

Early problem identification and problem debt management continued

Recoveries

Once a loan has been identified as impaired it is managed by divisional recoveries functions. Their goal is to collect the total outstanding and reduce the Group's loss by maximising cash recovery while treating customers fairly. Where an acceptable repayment arrangement cannot be agreed with the customer, litigation may be considered. In UK Retail and Northern Ireland, no repossession procedures are initiated until at least six months following the emergence of arrears. In the Republic of Ireland, new regulations prohibit taking legal action for an extended period. Additionally, certain forbearance options are made available to customers managed by the recoveries function.

Group impairment loss provisioning

Impaired definition

A financial asset is impaired if there is objective evidence that an event or events since initial recognition of the asset, has adversely affected the amount or timing of future cash flows from it. The loss is measured as the difference between the carrying value of the loan and the present value of estimated future cash flows discounted at the loan's original effective interest rate.

For both wholesale and retail exposures, days-past-due measures are typically used to identify evidence of impairment. In both corporate and retail portfolios, a period of 90 days past due is used. In sovereign portfolios, the period used is 180 days past due. Other factors are considered including: the borrower's financial condition; a forbearance event; a loan restructuring; the probability of bankruptcy; or any evidence of diminished cash flows.

Provisioning methodology

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset carrying amount and the present value of the estimated future cash flows discounted at the financial asset's original effective interest rate. The current net realisable value of the collateral will be taken into account in determining the need for a provision. No impairment provision is recognised in cases where amounts due are expected to be settled in full on realisation of the security. The Group uses one of the following three different methods to assess the amount of provision required: individual; collective; and latent.

Individually assessed provisions

Loans and securities above a defined threshold deemed to be individually significant are assessed on a case-by-case basis. Assessments of future cash flows take into account the impact of any guarantees or collateral held. Projections of cash flow receipts are based on the Group's judgement and facts available at the time. Projected cash flows are reviewed on subsequent assessment dates as new information becomes available.

Collectively assessed provisions

Provisions on impaired credits below an agreed threshold are assessed on a portfolio basis, reflecting the homogeneous nature of the assets. The Group segments wholesale and retail portfolios according to product type, such as credit cards, personal loans and mortgages. The approach taken to assess impaired assets in collections differs from the approach taken to assess those in recoveries (refer to page 245 for further details on collections and refer to above for recoveries).

Provisions are determined based on a quantitative review of the relevant portfolio. They take account of the level of arrears, the value of any security, and historical and projected cash recovery trends over the recovery period. The provisions also incorporate any adjustments that may be deemed appropriate given current economic conditions. Such adjustments may be determined based on a review of the latest cash collections profile and operational processes used in managing exposures.

Latent loss provisions

In the performing portfolio, latent loss provisions are held against losses incurred but not identified before the balance sheet date. Latent loss provisions reflect PDs and LGDs as well as emergence periods. The emergence period is defined as the period between the occurrence of the impairment event and a loan being identified and reported as impaired.

Emergence periods are estimated at a portfolio level and reflect the portfolio product characteristics such as coupon period and repayment terms, and the duration of the administrative process required to report and identify an impaired loan as such. Emergence periods vary across different portfolios from 2 to 225 days. They are based on actual experience within the particular portfolio and are reviewed regularly.

The Group's retail businesses segment their performing loan books into homogeneous portfolios such as mortgages, credit cards or unsecured loans, to reflect their different credit characteristics. Latent provisions are computed by applying portfolio level LGDs, PDs and emergence periods. The wholesale calculation is based on similar principles but there is no segmentation into portfolios. PDs and LGDs are calculated on an individual basis.

Refer to pages 299 to 317 for analysis of impaired loans, related provisions and impairments.

Business review Risk and balance sheet management

Impact of forbearance on provisioning

Wholesale

Forbearance may result in the value of the outstanding debt exceeding the present value of the estimated future cash flows. This may result in the recognition of an impairment loss or a write-off.

Provisions for forborne wholesale loans are assessed in accordance with the Group's normal provisioning policies (refer to Group impairment loss provisioning on page 250). The customer's financial position and prospects as well as the likely effect of the forbearance, including any concessions granted, are considered in order to establish whether an impairment provision is required. Individual impairment assessments for wholesale loans are reassessed in the light of any revisions to the loan's terms.

All wholesale customers are assigned a PD and related facilities an LGD. These are re-assessed prior to finalising any forbearance arrangement in light of the loan's amended terms and any revised grading incorporated in the calculation of the impairment loss provisions for the Group's wholesale exposures.

For performing counterparties, credit metrics are an integral part of the latent provision methodology and therefore the impact of covenant concessions will be reflected in the latent provision. For non-performing loans, covenant concessions will be considered in the overall provision adequacy for these loans.

In the case of non-performing loans that are forborne, the loan impairment provision assessment almost invariably takes place prior to forbearance being granted. The quantum of the loan impairment provision may change once the terms of the forbearance are known, resulting in an additional provision charge or a release of the provision in the period the forbearance is granted.

The transfer of wholesale loans subject to forbearance from impaired to performing status follows assessment by relationship managers in GRG. When no further losses are anticipated and the customer is expected to meet the loan's revised terms, any provision is written-off and the balance of the loan returned to performing status.

Retail

Provisions are assessed in accordance with the Group's provisioning policies (refer to Group impairment loss provisioning on page 250).

Impairment provisions in respect of loans subject to forbearance are evaluated as follows:

In UK Retail performing loans are subject to a latent loss provision but form a separate risk pool for 24 months. The higher of the observed default rates and PDs are used in the latent provisioning calculations for these loans to ensure that appropriate provision is held. Furthermore, for these portfolios the latent provision incorporates extended emergence periods. Once such loans are no longer separately identified, the use of account level PDs refreshed monthly in the latent provision methodology captures the underlying credit risk without a material time lag.

There is no reassessment of the PD at the time forbearance is granted but the loan will be the subject to the latent provisioning methodology described above. Non-performing loans are subject to a collectively assessed provision methodology.

In Ulster Bank performing loans are subject to a latent loss provision but form a separate risk pool for the period of forbearance. The performance of forbearance arrangements is analysed and breakage (a single missed payment) rates computed. The higher of the breakage rate and the modelled PD for this separate risk pool is used when calculating the latent provision. Furthermore, for this portfolio the latent provision incorporates an extended emergence period. Once such loans are no longer separately identified, the use of account level PDs refreshed monthly in the latent provision methodology captures the underlying credit risk without a material time lag. There is no reassessment of the PD at the time forbearance is granted but the loan will be the subject to the latent provisioning methodology described above. Non-performing loans are subject to a collectively assessed provision methodology. However, loans not 90 days past due that are subject to forbearance arrangements involving a reduction in contractually required cash flows i.e. the forgiveness of interest and where arrears have not been capitalised are classified as non-performing. They form a separate risk pool for the period of forbearance and the related loan loss provision is computed using Ulster Bank's latent loss provision methodology.

Non-performing loans are grouped into homogeneous portfolios sharing similar credit characteristics according to the asset type. Further characteristics such as LTVs, arrears status and default vintage are also considered when assessing recoverable amount and calculating the related provision requirement. While non-performing forbearance retail loans do not form a separate risk pool, the LGD models used to calculate the collective impairment provision are affected by agreements made under forbearance arrangements.

In RBS Citizens, retail loans subject to forbearance are segmented from the rest of the non-forborne population and assessed individually for impairment loss throughout their lives until the loans are repaid or fully written off. The amount of recorded impairment depends on whether the loan is collateral dependent. If the loans are considered collateral dependent, the excess of the loan's carrying amount over the fair value of the collateral is the impairment amount. If the loan is not deemed collateral dependent, the excess of the loans' carrying amount over the present value of expected future cash flows is the impairment amount. Any confirmed losses are charged off immediately.

Write-offs

The Group normally writes-off loans when it has exhausted all its collection strategies and has no realistic chance of recovering the money it is owed. Refer to pages 382 and 383 for further information on the Group's write-off policies and practices.

Notes:

(1) Excludes commercial real estate lending in Wealth as these loans are generally supported by personal guarantees in addition to collateral. This portfolio, which totalled £1.4 billion at 31 December 2013 (2012 - £1.4 billion; 2011 - £1.3 billion) continued to perform in line with expectations and required minimal provision.

(2) ROI: Republic of Ireland; NI: Northern Ireland; RoW: Rest of World.

Key points

- In line with Group strategy, the overall gross lending exposure to commercial real estate (CRE) fell by £10.5 billion, or 17%, during 2013 to £52.6 billion. Gross lending exposure is now almost half of the exposure of four years ago. The overall mix of geography, sub-sector and investment and development remained broadly unchanged.
- A significant proportion of the decrease was in Non-Core and was due to repayments, asset sales and write-offs. The Non-Core portfolio totalled £19.3 billion (37% of the portfolio) at 31 December 2013 (2012 - £26.4 billion or 42% of the portfolio).
- The UK portfolio was focused on London and South East England. Approximately 47% of the portfolio was held in these areas at 31 December 2013 (2012 - 43%).

Business review Risk and balance sheet management

Key points

- The overall maturity profile remained relatively unchanged during 2013.
- The majority of Ulster Bank's commercial real estate portfolio was categorised as under one year, owing to the high level of non-performing assets in the portfolio.

Commercial real estate portfolio by asset quality band	AQ1-AQ2 £m	AQ3-AQ4 £m	AQ5-AQ6 £m	AQ7-AQ8 £m	AQ9 £m	AQ10 £m	Total £m
2013

	1,774	8,001	25,005	10,147	5,496	24,423	74,846

Key points

- There was an overall decrease in AQ10 during the year with reductions in Non-Core partially offset by increases in Ulster Bank. The high proportion of the portfolio in AQ10 was driven by exposure in Non-Core (Ulster Bank and International Banking) and Core (Ulster Bank).
- Of the total portfolio of £52.6 billion at 31 December 2013, £24.9 billion (2012 - £28.1 billion) was managed within the Group's standard credit processes. Another £2.9 billion (2012 - £5.1 billion) received varying degrees of heightened credit management under the Watchlist process. The decrease in the portfolio managed in the Group's Watchlist process occurred mainly in Non-Core and UK Corporate. The remaining £24.7 billion (2012 - £29.8 billion) was managed in GRG and included Watchlist and non-performing exposures.

Notes:

- (1) In 2012, the Group reclassified loans with limited (defined as LTV>1,000%) or non-physical security as minimal security, of which a majority were commercial real estate development loans in Ulster Bank. Total portfolio average LTV is quoted net of loans with minimal security given that the anticipated recovery rate is less than 10%. Provisions are marked against these loans where required to reflect the relevant asset quality and recovery profile.
- (2) Other non-performing loans of £2.3 billion (2012 - £2.0 billion; 2011 - £2.5 billion) were subject to the Group's standard provisioning policies. Other performing loans of £5.4 billion (2012 - £6.6 billion; 2011 - £9.2 billion) included general corporate loans, typically unsecured, to commercial real estate companies, and major UK house builders in addition to facilities supported by guarantees. The credit quality of these exposures was consistent with that of the performing portfolio overall.
- (3) Weighted average by exposure.
- (4) 2012 LTV revised to reflect refinement to security value reporting implemented during 2013.

Key points

- The reductions in the higher LTV buckets for the performing book were offset by the growth in these buckets in the non-performing book. Ulster Bank Group accounted for the majority of this deterioration and has addressed this through an increase in provisions (refer to the section on RCR). Ulster Bank Group's provision as a percentage of REIL stood at 76% at 31 December 2013 (2012 - 57%). Valuations continued to be affected by difficult, although improving, market conditions, as well as refinements to the Group's estimation approach.
- Interest payable on outstanding loans was covered 3.1x and 1.6x within UK Corporate and International Banking, respectively, at 31 December 2013 (2012 - 3.0x and 1.5x respectively). The US Retail & Commercial portfolio is managed on the basis of debt service coverage, which includes principal amortisation as well as interest payable. The average debt service coverage was 1.5x at 31 December 2013 (2012 - 1.3x). As a number of different approaches are used across the Group and across geographies to calculate interest coverage ratios, they may not be comparable for different portfolio types and legal entities.

Credit quality metrics relating to commercial real estate lending were as follows:

	Group			Non-Core		
	2013	2012	2011	2013	2012	2011
Lending (gross)	£52.6bn	£63.0bn	£74.8bn	£19.3bn	£26.4bn	£34.3bn
Of which REIL	£20.1bn	£22.1bn	£22.9bn	£14.3bn	£17.1bn	£18.8bn
Provisions	£13.2bn	£10.1bn	£9.5bn	£10.6bn	£8.3bn	£8.2bn
REIL as a % of gross loans to customers	38.2%	35.1%	30.6%	74.1%	64.8%	54.8%
Provisions as a % of REIL	66%	46%	41%	74%	49%	44%

Note:

- (1) Excludes property related lending to customers in other sectors managed by Real Estate Finance.

Key point

- CRE lending net of impairment provisions decreased by £13.5 billion or 26% in the year to £39.4 billion in part due to the increased impairment provisions recorded in the fourth quarter of 2013 in Ulster Bank Non-Core, as part of RCR creation and related strategy. Provision coverage on CRE REIL was 66% compared to 46% at the end of 2012.

Ulster Bank is a significant contributor to Non-Core commercial real estate lending. For further information refer to the section on Ulster Bank Group (Core and Non-Core).

Notes:

(1) Includes residential mortgages and home equity loans and lines (refer to page 260 for a breakdown of balances).

(2) Where no indexed LTV is held.

(3) Average LTV weighted by value is calculated using the LTV on each individual mortgage and applying a weighting based on the value of each mortgage.

Key points

UK Retail

- The UK Retail mortgage portfolio was £99.3 billion at 31 December 2013, an increase of 0.3% from 31 December 2012. The mortgages included £9.1 billion (2012 - £7.9 billion) of residential buy-to-let lending.
- As at 31 December 2013, approximately 43% of the portfolio consisted of fixed rate, 5% a combination of fixed and variable rates and the remainder were variable rate mortgages (including those on managed rates). The interest only proportion of the total portfolio was 26%.
- Gross new mortgage lending amounted to £14.4 billion and the average LTV by volume was 62.7% compared to 61.3% at 31 December 2012. The average LTV calculated by weighted LTV of lending was 66.6% (2012 - 65.2%).
- Based on the Halifax Price Index at September 2013, the portfolio-average indexed LTV by volume was 54.1% (2012 - 58.1%) and 62.0% by weighted value of debt outstanding (2012 - 66.8%). The ratio of total outstanding balances to total indexed property valuations was 45.1% (2012 - 48.5%).
- All new mortgage business is subject to a comprehensive assessment. This includes: i) an affordability test which includes a stressed interest rate that is higher than the customer pay rate; ii) credit scoring; iii) a maximum loan-to-value of 90% with the exception of the UK Government backed schemes Help-to-Buy (from the fourth quarter of 2013), New Buy and My New Home products where lending of up to 95% is provided; and iv) a range of policy rules that restrict the availability of credit to borrowers with higher risk characteristics, for example highly indebted and/or adverse payment behaviour on previous borrowings.
- The arrears rate (defined as more than three payments in arrears, excluding reposessions and shortfalls post property sale), fell to 1.3% (2012 - 1.5%). The number of properties repossessed in 2013 was 1,532 compared with 1,426 in 2012. Arrears rates remained sensitive to economic developments and benefited from the low interest rate environment.
- The impairment charge for mortgage loans was £30 million for 2013 compared to £92 million in 2012, reflecting a lower level of defaults and reduced loss rates as valuations improved on properties held as security on defaulted debt.

Business review Risk and balance sheet management

Credit risk continued

Key loan portfolios* continued

Ulster Bank

- Ulster Bank's residential mortgage portfolio was £19.0 billion at 31 December 2013, with 88% in the Republic of Ireland and 12% in Northern Ireland. At constant exchange rates, the portfolio decreased 2.5% from 31 December 2012 as a result of amortisation and limited growth due to low market demand.
- The assets included £2.2 billion (12%) of residential buy-to-let loans. The interest rate product mix was approximately 68% on tracker rate products, 23% on variable rate products and 9% on fixed rate. Interest only represented 11% of the total portfolio.
- The average individual LTV on new originations was 73% in 2013, (2012 - 74%); the volume of new business remained very low. The maximum LTV available to Ulster Bank customers was 90% with the exception of a specific Northern Ireland scheme which permits LTVs of up to 95% (although Ulster Bank's exposure is capped at 85% LTV).
- The portfolio average indexed LTV fell 4% during 2013 and reflected positive house price index trends over the last 12 months.
- Refer to the Ulster Bank Group (Core and Non-Core) section on pages 265 to 267 for commentary on mortgage REIL and impairments.

RBS Citizens

- RBS Citizens residential real estate portfolio was £19.6 billion at 31 December 2013 (2012 - £21.5 billion). The Core business comprised 91% of the portfolio. The real estate portfolio consisted of £5.9 billion (£5.6 billion Core vs. £0.3 billion Non-Core) of first lien residential mortgages (1% in second lien position) and £13.5 billion (£12.0 billion Core vs. £1.5 billion Non-Core) of home equity loans and lines (first and second liens). Home equity Core consisted of 49% in first lien position while Non-Core consisted of 95% in second lien position.
- RBS Citizens continued to focus on its 'footprint states' of New England, Mid Atlantic and Mid West regions. At 31 December 2013, the portfolio consisted of £16.4 billion (84% of the total portfolio) within footprint.
- Of the total real estate portfolio of £1.8 billion in Non-Core, the serviced-by-others (SBO) element was the largest component (76%). The SBO book decreased from £1.8 billion at 31 December 2012 to £1.4 billion at 31 December 2013 and was closed to new purchases in the third quarter of 2007. The arrears rate of the SBO portfolio decreased from 1.9% at 31 December 2012 to 1.6% at 31 December 2013 reflecting portfolio liquidation as well as more effective account servicing and collections. The charge-off rate also continued to decrease (4.4% annualised at the fourth quarter of 2013 compared to 7.4% in 2012).
- The weighted average LTV of the portfolio decreased from 75% at 31 December 2012 to 67% at 31 December 2013, driven by increases in the Case-Shiller Home Price Index from the third quarter of 2012 to the fourth quarter of 2013. The weighted average LTV of the portfolio, excluding SBO, was 64%.

RBS Citizens auto loans (2)	5,080	0.1	5,289	0.1	4,856	0.2

Notes:

(1) The ratio for UK Retail assets refers to the impairment charge for the year.

(2) The ratio for RBS Citizens refers to the impairment charge in the year, net of recoveries realised in the year.

Key points

UK Retail

- The UK personal lending portfolio comprised credit cards, unsecured loans and overdrafts, and totalled £13.8 billion at 31 December 2013 (2012 - £14.7 billion). Loans fell 12%.
- The impairment charge on unsecured lending was £291 million for the year, down 34% on 2012. The decline reflected the effect of prior risk appetite tightening.
- The Group continued to perform favourably relative to industry benchmarks for cards arrears.

RBS Citizens

- RBS Citizens credit card portfolio is comprised of good quality consumer loans originated in-footprint through the RBS Citizen's branch network and totalled £945 million at 31 December 2013 (2012 - £948 million). The product portfolio credit quality continued to improve with credit scores for new originations throughout 2013 higher than the portfolio average.
- Auto loans originated through dealer networks totalled £5.5 billion at 31 December 2013 (2012 - £5.4 billion). The portfolio maintained strong credit fundamentals. New origination credit and collateral characteristics throughout 2013 remained equally strong as a result of the short balance life and the resulting low collateral risk.

Key loan portfolios* continued

Interest only retail loans

The Group's interest only retail loan portfolios include interest only mortgage lending in UK Retail, Ulster Bank, Wealth and RBS Citizens' portfolios of home equity lines of credit (HELOC) and interest only mortgage portfolios.

	2013		2012	
	Mortgages £bn	Other loans £bn	Mortgages £bn	Other loans (1) £bn
Variable rate	34.8	1.3	38.5	1.5
Fixed rate	8.0	0.1	8.1	0.1
Interest only loans	42.8	1.4	46.6	1.6
Mixed repayment (2)	8.3	—	8.8	—
Total	51.1	1.4	55.4	1.6

Notes:

(1) The other loans category for 2012 has been restated to exclude non-personal interest only loans within Wealth division.

(2) Mortgages with partial interest only and partial capital repayments.

The Group reduced its exposure to interest only mortgages. UK Retail ceased offering interest only mortgages to residential owner occupied customers with effect from 1 December 2012. Interest only repayment remains an option for buy-to-let mortgages. Ulster Bank withdrew interest only as a standard mortgage offering for new lending in the Republic of Ireland in 2010 and in Northern Ireland in 2012. Interest only mortgages are now granted on a very limited basis to high net worth customers or as part of its forbearance programme. RBS Citizens offers its customers interest only mortgages and conventional HELOC that enter an amortising repayment period after the interest only period. Wealth offers interest only mortgages to its high net worth customers.

The Group recognises impairment provisions in respect of loans in its interest only portfolios (UK Retail - 2 years; RBS Citizens - 1 year) that are approaching their contractual maturity based on historical analysis and customer behaviour. These impairment provisions are refreshed as new trends and data become available.

The tables below analyse the Group's interest only mortgage and HELOC portfolios (excluding mixed repayment mortgages) by type, by contractual year of maturity and by originating division.

	2014 (1) £bn	2015-16 £bn	2017-21 £bn	2022-26 £bn	2027-31 £bn	2032-41 £bn	After 2041 £bn	Total £bn

Total	32.5	10.3	42.8		35.7	10.9	46.6	

Note:

(1) UK Retail also has exposure of £7.7 billion to customers who have a combination of repayment types, capital repayments and interest only.

UK Retail

UK Retail's interest only mortgages require full principal repayment (bullet) at the time of maturity. Typically such loans have remaining terms of between 15 and 20 years. Customers are reminded of the need to have an adequate repayment vehicle in place during the mortgage term.

Of the bullet loans that matured in the six months to 30 June 2013, 53% had been fully repaid by 31 December 2013. The unpaid balance totalled £51 million, 96% of which continued to meet agreed payment arrangements (including balances that have been restructured on a capital and interest basis within eight months of the contract date; customers are allowed eight months leeway for their investment plan to mature and cashed in to repay the mortgage). Of the £51 million unpaid balance, 56% of the loans had an indexed LTV of 70% or less with only 14% above 90%. Customers may be offered a short extension to the term of an interest only mortgage or a conversion of an interest only mortgage to one featuring repayment of both capital and interest, subject to affordability and characteristics such as the customer's income and ultimate repayment vehicle. The majority of term extensions in UK Retail are classified as forbearance.

Ulster Bank

Ulster Bank's interest only mortgages require full principal repayment (bullet) at the time of maturity; or payment of both capital and interest from the end of the interest only period, typically seven years, so that customers meet their contractual repayment obligations. For bullet customers, contact strategies are in place to remind them of the need to repay principal at the end of the mortgage term.

Of the bullet mortgages that matured in the six months to 30 June 2013 (£1.2 million), 20% had fully repaid by 31 December 2013 leaving residual balances of £0.9 million, 78% of which were meeting the terms of a revised repayment schedule. Of the amortising loans that matured in the six months to 30 June 2013 (£65 million), 69% were either fully repaid or meeting the terms of a revised repayment schedule.

Ulster Bank also offers temporary interest only periods to customers as part of its forbearance programme. An interest only period of up to two years is permitted after which the customer enters an amortising repayment period following further assessment of the customer's circumstances. The affordability assessment conducted at the end of the forbearance period takes into consideration the repayment of the arrears that have accumulated based on original terms during the forbearance period. The customer's delinquency status does not deteriorate further while forbearance repayments are maintained. Term extensions in respect of existing interest only mortgages are offered only under a forbearance arrangement.

RBS Citizens

RBS Citizens has a book of interest only bullet repayment HELOC loans (£0.4 billion at 31 December 2013) for which repayment of principal is due at maturity, and an interest only portfolio that comprises loans that convert to amortising after an interest only period that is typically 10 years (£8.9 billion at December 2013 of which £8.0 billion are HELOCs). The majority of the bullet loans are due to mature between 2014 and 2015. Of the bullet loans that matured in the six months to 30 June 2013, 50% had fully repaid or are current as of 31 December 2013. The residual balances (modified, delinquent, and charged-off) made up £21 million. For those loans that convert to amortising, the typical uplift in payments is currently 210% (average uplift calculated at £132 per month). Delinquency rates have shown a modest increase in the over 30 days arrears rate.

Business review Risk and balance sheet management

Ulster Bank Group (Core and Non-Core)

Overview

At 31 December 2013, Ulster Bank Group accounted for 10% of the Group's total gross loans to customers (2012 and 2011 - 10%) and 8% of the Group's Core gross loans to customers (2012 and 2011 - 8%) Ulster Bank's financial performance continued to be impacted by the challenging economic climate in Ireland, with impairments remaining elevated in the wholesale bank as a result of limited liquidity in the economy which continues to depress the property market and domestic spending. Additionally, in the fourth quarter of 2013 the Group announced a recovery strategy for loans transferring to RCR. This resulted in a significant increase in provisions as the move from a through the cycle strategy to a 3 year deleverage, reduced expected realisations.

The impairment charge of £4,793 million for 2013 (2012 - £2,340 million; 2011 - £3,717 million) was driven by a combination of new defaulting customers and higher provisions on existing defaulted cases due primarily to the above mentioned RCR strategy. Provisions as a percentage of risk elements in lending increased to 76% in 2013, from 57% in 2012, predominantly as a result of this change in strategy, combined with the deterioration in the value of the Non-Core commercial real estate development portfolio.

Core

The impairment charge for the year of £1,774 million (2012 - £1,364 million; 2011 - £1,384 million) reflected the difficult economic climate in Ireland, and most particularly the RCR deleverage strategy across the corporate portfolios. The mortgage portfolio improved notably in 2013, accounting for £235 million (13%) of the total 2013 impairment charge (2012 - £646 million; 2011 - £570 million) due to lower debt flows driven by improved collections performance and stabilising residential property prices.

Non-Core

The impairment charge for the year was £3,019 million (2012 - £976 million; 2011 - £2,333 million), with the commercial real estate sector accounting for £2,674 million (89%) of the total 2013 impairment charge, again reflecting the RCR strategy.

The table below analyses Ulster Bank Group's loans, REIL, impairments and related credit metrics by sector.

Business review Risk and balance sheet management

Key points

- The commercial real estate lending portfolio for Ulster Bank Group (Core and Non-Core) totalled £14.3 billion at 31 December 2013, of which £10.1 billion or 71% was in Non-Core. The geographic split of the total Ulster Bank Group commercial real estate portfolio remained similar to 2012 with 64% (2012 - 63%) in the Republic of Ireland, 26% (2012 - 26%) in Northern Ireland, 10% (2012 - 11%) in the UK (excluding Northern Ireland) and the balance (0.1%) in Rest of World (primarily Europe).
- Provisions covered CRE REIL by 78%, up from 58% at the end of 2012, with the investment portfolio being covered 80% and the development portfolio 95%.
- Of the total corporate impairment charge recorded during the second half of 2013 of £3.9 billion, £3.4 billion related to all loans that will be transferred to RCR, of which £2.9 billion related to commercial real estate loans and £0.5 billion related to corporate loans.

Key points

- Commercial real estate continued to be the primary sector driving the Ulster Bank Group defaulted loan book. Exposure to the sector fell during 2013 by £1.0 billion, reflecting Ulster Bank's continuing strategy to reduce concentration risk in this sector.
- Ulster Bank experienced further migration of commercial real estate exposures to its problem management framework, where various measures may be agreed to assist customers whose loans are performing, but who are experiencing temporary financial difficulties.
- The outlook for the property sector remains challenging. While there may be some signs of stabilisation in main urban centres, the outlook continues to be negative for secondary property locations on the island of Ireland.

Residential mortgages

Mortgage lending portfolio analysis by country of location of the underlying security is set out below.

	2013 £m	2012 £m	2011 £m

Balance sheet analysis

Credit risk assets analysed on pages 231 to 237 are reported internally to senior management. However, they exclude certain exposures, primarily securities and reverse repurchase agreements and take account of legal netting agreements, that provide a right of legal set-off but do not meet the criteria for offset in IFRS. The tables that follow are therefore provided to supplement the credit risk assets analysis and other analysis to reconcile to the balance sheet. All the disclosures in this section are audited except those relating to RCR on pages 299 and 300.

Financial assets

Notes:

- (1) Relates to offset arrangements that comply with IFRS criteria and transactions cleared through and novated to central clearing houses, primarily London Clearing House and US Government Securities Clearing Corporation.
- (2) Carrying value on the balance sheet represents the exposure to credit risk by class of financial instrument.
- (3) Balance sheet offset reflects the amounts by which the Group's credit risk is reduced through master netting and cash management pooling arrangements. Derivative master netting agreements include cash pledged with counterparties in respect of net derivative liability positions and are included in lending in the table above.
- (4) Includes cash collateral pledged by counterparties based on daily mark-to-market movements of net derivative positions with the counterparty.
- (5) Securities collateral represent the fair value of securities received from counterparties, mainly relating to reverse repo transactions as part of netting arrangements.
- (6) Property valuations are limited to the loan value and reflect the application of haircuts and capping in line with regulatory rules to indexed valuations. Commercial collateral includes shipping vessels and plant and equipment collateral.
- (7) Credit enhancement comprises credit derivatives (bought protection) and guarantees and reflect notional amounts less fair value and notional amounts respectively.

For the notes to this table refer to page 278.

Key points

- Financial asset exposures after offset decreased by £129.4 billion or 16% to £684.3 billion in the year, reflecting the Group's focus on reducing its funded balance sheet primarily through ongoing sales in Non-Core and downsizing of Markets.
- Reductions across securities (debt - £51.0 billion; equity - £6.4 billion), lending (£43.1 billion) reverse repos (£28.4 billion) and derivatives (£153.9 billion) were partially offset by higher cash holdings (£3.4 billion). Conditions in the financial markets and the Group's continued focus on risk appetite and sector concentrations resulted in the trends seen.
- Exposures to central and local government decreased by £29.5 billion principally in debt securities. This was driven by Markets de-risking its balance sheet, management of the Group Treasury liquidity portfolio as well as some risk reduction in respect of Eurozone exposures.
- Exposure to financial institutions was £59.4 billion lower across reverse repos, lending, securities and derivatives. This was driven by economy-wide subdued activity being partially offset marginally by increased cash holdings.
- The banking sector continues to be one of the largest in the Group's portfolio. The sector is well diversified geographically and by exposure with derivative exposures being largely collateralised. The sector continues to be tightly controlled through the combination of the single name concentration framework, bespoke credit policies and country limits. Exposures to the banking sector decreased by £14.8 billion during the year with decreases across, reverse repos lending, securities and derivatives being partially offset by increased cash holdings with central banks.
- Exposure to other financial institutions comprising traded and non-traded products is spread across a wide range of financial companies including insurance, securitisation vehicles, financial intermediaries including broker dealers and central counterparties, financial guarantors - monolines and credit derivative product companies - and funds comprising unleveraged, hedge and leveraged funds. The size of the portfolio decreased by £44.6 billion. Entities in this sector remain vulnerable to market shocks or contagion from the banking sector.
- The Group's exposure to property and construction sector decreased by £13.1 billion, principally in commercial real estate lending. The majority of the Group's Core property exposure is within UK Corporate (72%).
- Retail, wholesale and repairs sector decreased by £4.2 billion, reflecting the Group's strategy to re-balance the Core portfolios towards stronger customers in the sector while at the same time continuing to reduce the Non-Core book.

Business review Risk and balance sheet management

- Transport and storage exposure decreased by £1.1 billion. The sector includes asset-backed exposures to ocean-going vessels. Conditions remain poor across the major shipping market segments in 2013 with low charter rates and vessel values. At 31 December 2013, £1.1 billion (2012 - £0.7 billion) of loans were included in risk elements in lending with an associated provision of £0.4 billion and impairment charge of £0.4 billion for 2013.
- Within lending:
 - UK Retail unsecured lending decreased by £0.6 billion, partially offset by an increase of £0.2 billion in mortgage lending.
 - UK Corporate lending decreased by £4.5 billion, as business demand for credit remains weak.
 - Non-Core continued to make significant progress on its balance sheet strategy by reducing lending by £19.8 billion across all sectors, principally property and construction, where commercial real estate lending decreased by £7.1 billion.

Notes:

- (1) This shows the amount by which the Group's credit risk exposure is reduced through arrangements, such as master netting agreements and cash management pooling, which give the Group a legal right to set off the financial asset against a financial liability due to the same counterparty. In addition, the Group holds collateral in respect of individual loans and advances to banks and customers. This collateral includes mortgages over property (both personal and commercial); charges over business assets such as plant, inventories and trade debtors; and guarantees of lending from parties other than the borrower. The Group obtains collateral in the form of securities in reverse repurchase agreements. Cash and securities are received as collateral in respect of derivative transactions.

- (2) Loans made by the Group's consolidated conduits to asset owning companies are included within financial institutions - other.

Business review Risk and balance sheet management

Asset quality

The asset quality analysis presented below is based on the Group's internal asset quality ratings which have ranges for the probability of default, as set out below. Customers are assigned credit grades, based on various credit grading models that reflect the key drivers of default for the customer type. All credit grades across the Group map to both a Group level asset quality scale, used for external financial reporting, and a master grading scale for wholesale exposures used for internal management reporting across portfolios. Debt securities are analysed by external ratings and are therefore excluded from the following tables. These are set out on pages 285 to 287.

Asset quality band	Probability of default range
AQ1	0% - 0.034%
AQ2	0.034% - 0.048%
AQ3	0.048% - 0.095%
AQ4	0.095% - 0.381%
AQ5	0.381% - 1.076%
AQ6	1.076% - 2.153%
AQ7	2.153% - 6.089%
AQ8	6.089% - 17.222%
AQ9	17.222% - 100%
AQ10	100%

Notes:

- (1) Excludes items in the course of collection from other banks of £1,454 million (2012 - £1,531 million; 2011 - £1,470 million).
- (2) Excludes balances in relation to Direct Line Group (loans to banks: 2012 - £2,036 million; 2011 - £2,579 million and loans to customers: 2012 - £881 million; 2011 - £893 million).
- (3) Exposures are allocated to asset quality bands on the basis of statistically driven models which produce an estimate of default rate. The variables included in the models vary by product and geography. For portfolios secured on residential property these models typically include measures of delinquency and loan-to-value as well as other differentiating characteristics such as bureau score, product features or associated account performance information.

Key points

- Underlying the balance sheet reduction in the year the overall asset quality in the upper bands (AQ1-AQ5) remained broadly similar.
- Within cash and balances at central banks there has been an increase in AQ1 of £2.3 billion due to additional funds deposited with the Bank of England and the Federal Reserve. Additionally, increases of £1.1 billion in AQ3 and AQ4 are due to deposits with other central banks as part of the Group's overall liquidity management.
- Reverse repo balances decreased £28.4 billion due to reduced trading volumes within Markets. However, AQ2 and AQ4-AQ7 have increased £7.2 billion in bank reverse repurchase agreements as a small number of counterparties moved bands, in addition to the implementation of a strategy to develop relationships with newer, lower-rated counterparties.
- Derivatives decreased across all asset quality bands reflecting risk reduction within Markets and upwards shifts in major interest rate yield curves.
- Core customer lending in AQ1-AQ3 increased to 22% from 18% at 31 December 2012 as recalibration of the UK Retail models using updated data trends from the last three years resulted in £9.8 billion moving from AQ5 to higher bands. In addition, mid corporate model updates in UK Corporate and data quality improvements in Wealth also led to improving trends.
- Core past due loans to customers decreased £1.2 billion, with a reduction in Ulster Bank (£0.8 billion) and US Retail and Commercial (£1.2 billion) being offset by increases in UK Retail (£1.2 billion) as balances transferred from the impaired book.
- Impairment provisions increased £4.0 billion, mainly due to RCR and related change in strategy (£4.5 billion) partly offset by a decrease in UK Retail (£0.5 billion).

Business review Risk and balance sheet management

Key points

HFT

- UK and US government bonds and US agency ABS decreased reflecting sales and continued focus on balance sheet reduction and capital management in Markets. The decrease in other government bonds primarily comprised reductions in Japanese, French, Belgian and Canadian bonds, partially offset by increases in Italian, German and Spanish bonds. Short positions in US government bonds decreased, reflecting reduced holdings and short positions in German government bonds increased reflecting focus on reduction in net exposure.

AFS

- Government securities, primarily US, German and UK, decreased by £15.4 billion reflecting Group Treasury's disposals. Holdings in bank issuances fell by £2.9 billion due to maturities and amortisations. The decrease in securities issued by other financial institutions of £6.6 billion primarily related to ABS (£1.6 billion collateralised loan obligations in Non-Core and £3.4 billion residential mortgage-backed securities), due to disposals, maturities and buy backs by issuers. This was partially offset by a build up of securities (£0.9 billion), primarily US agency securities in US Retail & Commercial. The reduction includes £7.2 billion related to Direct Line Group, not included at 31 December 2013 as it is now an associate.

AFS gross unrealised gains and losses

- The UK government net decrease of £0.9 billion reflects exposure reductions. The US government decrease of £0.7 billion reflects exposure reduction as well as the impact of expectations of tapering of the liquidity programme by the US Federal Reserve. The reductions in bank, other financial institutions and ABS reflected maturities, disposals and market movements.

Ratings

The table below analyses debt securities by issuer and external ratings. Ratings are based on the lowest of Standard and Poor's, Moody's and Fitch.

Key points

- AAA rated debt securities decreased as the UK and the Netherlands were downgraded from AAA to AA+ during the year and also reflected the Group's reduced holding of debt securities.
- The decrease in holdings of debt securities rated A to AA- was primarily driven by reductions in Japanese and Belgian bonds.
- Non-investment grade and unrated debt securities accounted for 5% of the portfolio in 2013.

Asset-backed securities

Introduction

The Group structures, originates, distributes and trades debt in the form of loan, bond and derivative instruments in all major currencies and debt capital markets in North America, Western Europe, Asia and major emerging markets. The carrying value of the Group's debt securities is detailed below.

The Group's credit market activities gave rise to risk concentrations in asset-backed securities (ABS). The Group has exposures to ABS, which are predominantly debt securities, but can also be held in derivative form. ABS have an interest in an underlying pool of referenced assets. The risks and rewards of the referenced pool are passed onto investors by the issue of securities with varying seniority by a special purpose entity.

Debt securities include residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), collateralised debt obligations (CDOs), collateralised loan obligations (CLOs) and other ABS. In many cases, the risk associated with these assets is hedged by credit derivatives. The counterparties to some of these hedge transactions are monoline insurers.

The following tables summarise the gross and net exposures and carrying values of these securities by the location of the underlying assets at 31 December 2013, 2012 and 2011 and by IFRS measurement classification of held-for-trading (HFT), designated at fair value (DFV), available-for-sale (AFS) and loans and receivables (LAR). Gross exposures represent the principal amounts relating to ABS. Government sponsored or similar RMBS comprises securities that are: (a) guaranteed or effectively guaranteed by the US government, by way of its support for US federal agencies and government sponsored enterprises or (b) guaranteed by the Dutch government. Net exposures represent the carrying value after taking account of protection purchased from monoline insurers and other counterparties, but exclude the effect of counterparty credit valuation adjustments. The hedge provides credit protection of both principal and interest cash flows in the event of default by the counterparty. The value of this protection is based on the underlying instrument being protected.

Residential mortgage-backed securities

RMBS are securities that represent an interest in a portfolio of residential mortgages. Repayments made on the underlying mortgages are used to make payments to holders of the RMBS. The risk of the RMBS will vary primarily depending on the quality and geographic region in which the underlying mortgage assets are located and the credit enhancement of the securitisation structure. Several tranches of notes are issued, each secured against the same portfolio of mortgages, but providing differing levels of seniority to match the risk appetite of investors. The most junior (or equity) notes will suffer early capital and interest losses experienced by the referenced mortgage collateral, with each more senior note benefiting from the protection provided by the subordinated notes below. Additional credit enhancements may be provided to the holder of senior RMBS notes, including provided by monoline insurers.

The main categories of mortgages that serve as collateral to RMBS held by the Group are set out below and described in the Glossary on pages 549 to 556. The US market has more established definitions of differing underlying mortgage quality and these are used as the basis for the Group's RMBS categorisation.

The Group RMBS classifications, including prime, non-conforming and sub-prime, reflect the characteristics of the underlying mortgage portfolios. RMBS are classified as prime RMBS where the loans have low default risk and are made to borrowers with good credit records and reliable payment histories and there is full documentation. Non-conforming RMBS include US Alt-A RMBS together with RMBS, in jurisdictions other than the US, where the underlying mortgages are not classified as either prime or sub-prime. Classification of RMBS as sub-prime or Alt-A is based on Fair Isaac Corporation scores (FICO), level of documentation and loan-to-value ratios of the underlying mortgage loans. US RMBS are classified as sub-prime if the mortgage portfolio comprises loans with FICO scores between 500 and 650 with full or limited documentation. Mortgages in Alt-A RMBS portfolios have FICO scores of 640 to 720, limited documentation and an original LTV of 70% to 100%. In other jurisdictions, RMBS are classified as sub-prime if the mortgage portfolio comprises loans with one or more high risk characteristics such as: unreliable or poor payment histories; high loan-to-value ratios; high debt-to-income ratio; the loan is not secured on the borrower's primary residence; or a history of delinquencies or late payments on the loan.

Notes:

- (1) Includes US agency and Dutch government guaranteed securities.
- (2) Comprises HFT £1,275 million (2012 - £1,177 million; 2011 - £1,682 million), DFV nil (2012 - £7 million; 2011 - nil), AFS £1,138 million (2012 - £1,173 million; 2011 - £2,056 million) and LAR £158 million (2012 - £317 million; 2011 - £754 million).
- (3) Comprises HFT £504 million (2012 - £808 million; 2011 - £804 million), AFS £26 million (2012 - £149 million; 2011 - £249 million) and LAR £924 million (2012 - £130 million; 2011 - £182 million).

Business review Risk and balance sheet management

Equity shares

The table below analyses holdings of equity shares for eurozone countries and other countries with balances of more than £100 million by country, issuer and measurement classification. The HFT positions in Markets, primarily in run-off and recovery businesses, are used mainly for economic hedging of debt issuances and equity derivatives. The AFS portfolios include capital stock in the Federal Home Loan Bank (a government sponsored entity, included in other financial institutions) and the Federal Reserve Bank, which together amounted to £0.6 billion (2012 - £0.7 billion) that US Retail & Commercial are required to hold. The remaining AFS balances are individually small holdings in unlisted companies, mainly acquired through debt for equity transactions in GRG.

Notes:

- (1) Includes exchange traded contracts were £2,298 billion (2012 - £2,497 billion; 2011 - £2,765 billion) principally interest rate. Trades are margined daily hence carrying values were insignificant: assets - £69 million (2012 - £41 million; 2011 - £119 million) and liabilities - £299 million (2012 - £255 million; 2011 - £428 million).
- (2) Interest rate notional includes £22,563 billion (2012 - £15,864 billion; 2011 - £16,377 billion) in respect of contracts with central clearing counterparties to the extent related assets and liabilities are offset.

Business review Risk and balance sheet management

Key points

- Net exposure decreased by 47% (liabilities decreased by 38%) reflecting increased interest rate yields and continued use of trade compression cycles, partially offset by increased trade volumes.
- Interest rate contracts' fair value decreased due to significant upward shifts in major yield curves as the US Federal Reserve announced tapering of quantitative easing from early 2014. Continued participation in trade compression cycles contributed to a further reduction in exposures.
- Exchange rate contracts' fair value decreased due to strengthening of sterling against the US dollar and decrease in trade volumes.
- The decrease in credit derivatives notional and fair values was driven by increased use of trade compression cycles and novation of certain trades in Markets in line with the Group's risk reduction strategy, primarily in the first half of the year. Tightening of credit spreads also contributed to the decrease in fair value.
- Sales and reduction in trade volumes contributed to reduction in equity contracts.
- Netting and collateral agreements with some financial institutions (bank and non-bank) in certain jurisdictions, or due to other legal reasons, are not deemed to be enforceable and are therefore reported as uncollateralised above.
- 71% of the uncollateralised derivatives related to corporates rated AQ1-AQ3.
- Corporate uncollateralised derivatives, principally all in Markets, relate to large corporates who may have netting arrangements in place but do not have collateral posting capability. A significant proportion of the Group's credit valuation adjustments and funding valuation adjustments relate to those uncollateralised derivatives.

The table below analyses the Group's derivative notional and fair values by trading and settlement method.

Credit derivatives

The Group trades credit derivatives as part of its client-led business and to mitigate credit risk. The Group's credit derivative exposures relating to proprietary trading are minimal. The table below analyses the Group's bought and sold protection.

2011	24,504	22,608	1,896	1,034	862	8.4

REIL, provisions and AFS reserves

Risk elements in lending (REIL) comprises impaired loans and accruing loans past due 90 days or more as to principal or interest. Impaired loans are all loans (including loans subject to forbearance) for which an impairment provision has been established; for collectively assessed loans, impairment loss provisions are not allocated to individual loans and the entire portfolio is included in impaired loans. Accruing loans past due 90 days or more comprise loans past due 90 days where no impairment loss is expected and those awaiting individual assessment. A latent provision is established for the latter.

Divisional analysis

The tables below analyse gross loans and advances (excluding reverse repos) and the related credit metrics by division.

Group	44,080	494,068	42,394	20,674	8.6	49	7,241	4,527

Key points

- The Group loan impairment charge for the year increased by 58% (£3.1 billion) to £8.4 billion from £5.3 billion in 2012. The Core charge increased 26% (£0.8 billion) to £3.8 billion and the Non-Core charge increased by 100% (£2.3 billion) to £4.6 billion. £4.5 billion of the impairment increase was in relation to the creation of RCR and the related strategy, £1.4 billion in Core and £3.1 billion in Non-Core. The underlying provision charge decreased £1.4 billion mainly in UK Retail (£0.2 billion), Ulster Bank residential mortgages (£0.4 billion) and Non-Core (£0.8 billion), largely due to run down and lower single name charges in Non-Core.*
- REIL decreased by £1.7 billion to £39.4 billion during the year mainly in Non-Core (£2.4 billion) and UK Retail (£1.0 billion) offset by increases in UK Corporate (£0.8 billion) and Ulster Bank (£0.9 billion). REIL reductions in Non-Core primarily related to repayments and write-offs in UK corporate and International Banking donated portfolios.
- The RCR provision charge mainly related to loans already within REIL resulting in an 12% increase in the provision coverage ratio to 64% from 52% at December 2012 while the REIL as a percentage of total loans increased to 9.4% from 9.1% at 31 December 2012.*
- UK Retail REIL continued to decrease due to the write-off of aged debt and the transfer of up-to-date mortgages to potential problem loans. Provision coverage remained broadly stable at 59%.
- REIL in UK Corporate increased 14% mainly driven by individual cases in the commercial real estate and shipping portfolios as credit conditions remained difficult in these sectors. The impact of the RCR related strategy resulted in a £0.4 billion provision increase in Q4 2013.*
- Ulster Bank REIL at £8.5 billion increased by 12% compared with 31 December 2012. The increase in REIL was largely in relation to commercial real estate investment loans. RCR and related provisioning in 2013 contributed £0.9 billion to the Core Ulster Bank provision and has resulted in the provision coverage increasing from 52% to 64% in the year and in the fourth quarter.*

Business review Risk and balance sheet management

Balance sheet analysis continued

REIL, provisions and AFS reserves continued

Provisions and AFS reserves methodology

The Group's consumer portfolios, which consist of high volume, small value credits, have highly efficient largely automated processes for identifying problem credits and very short timescales, typically three months, before resolution or adoption of various recovery methods. Corporate portfolios consist of higher value, lower volume credits, which tend to be structured to meet individual customer requirements.

Provisions are assessed on a case by case basis by experienced specialists with input from professional valuers and accountants. The Group operates a transparent provisions governance framework, setting thresholds to trigger enhanced oversight and challenge.

Analyses of provisions are set out on pages 312 to 314.

Available-for-sale financial assets are initially recognised at fair value plus directly related transaction costs and are subsequently measured at fair value with changes in fair value reported in owners' equity until disposal, at which stage the cumulative gain or loss is recognised in profit or loss. When there is objective evidence that an available-for-sale financial asset is impaired, any decline in its fair value below original cost is removed from equity and recognised in profit or loss.

REIL flow statement

REIL are stated without giving effect to any security held that could reduce the eventual loss should it occur or to any provisions marked.

Balance sheet analysis continued

REIL, provisions and AFS reserves continued

Potential problem loans

Potential problem loans (PPL) are loans for which an impairment event has taken place but no impairment loss is expected. This category is used for advances which are not past due 90 days or revolving credit facilities where identification as 90 days overdue is not feasible.

	2013 £m	2012 £m	2011 £m
Potential problem loans	789	807	739

Both REIL and PPL are reported gross and take no account of the value of any security held which could reduce the eventual loss should it occur, nor of any provision marked. Therefore impaired assets which are highly collateralised, such as mortgages, will have a low coverage ratio of provisions held against the reported impaired balance.

Past due analysis

The table below shows loans and advances to customers that were past due at the balance sheet date but are not considered impaired.

	2013			2012			2011		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m

Business review Risk and balance sheet management

Market risk

Definition

Market risk is the risk of losses arising from fluctuations in interest rates, credit spreads, foreign currency rates, equity prices, commodity prices and other factors, such as market volatilities, that may lead to a reduction in earnings, economic value or both.

Sources of risk

The Group is exposed to traded market risk through its trading activities and to non-traded market risk as a result of its banking activities. In many respects, it manages its traded and non-traded market risk exposures separately, as described in this section, largely in line with the regulatory definitions of the trading and non-trading books.

Traded market risk

The majority of the Group's traded market risk exposure arises in Markets and Non-Core.

The primary objective of the Group's trading activities is to provide a range of financing, risk management and investment services to its customers - including major corporations and financial institutions around the world. From a market risk perspective, the Group's trading activities are included within the following markets: currencies; emerging markets; rates; asset-backed products; and traded credit.

The Group undertakes transactions in financial instruments including debt securities, loans, deposits and equities, as well as securities financing and derivatives.

Some of these transactions involve trading or clearing financial instruments on an exchange, including interest rate swaps, futures and options. Holders of these instruments provide margin on a daily basis with cash or other security at the exchange.

Over-the-counter transactions with standard terms are cleared through central counterparties, while complex transactions are settled directly with the counterparty. These range from commoditised transactions in derivative markets to trades tailored to meet specific customer requirements. Such transactions also give rise to counterparty credit risk, which the Group manages actively (for more information on how the Group manages counterparty credit risk, refer to the Credit Risk section, page 241).

Non-traded market risk

The majority of the Group's non-traded market risk exposure arises from retail and commercial banking activities in all divisions from assets and liabilities that are not classified as held for trading.

The Group's management of non-traded market risk is largely organised in line with the following three key categories: non-traded interest rate risk (NTIRR); non-traded foreign exchange risk; and non-traded equity risk.

Interest rate risk

NTIRR arises from the provision to customers of a range of banking products that have differing interest rate characteristics. Therefore, when aggregated, these products form portfolios of assets and liabilities with varying degrees of sensitivity to changes in market interest rates.

Mismatches in these characteristics can give rise to volatility in net interest income as interest rates rise and fall.

NTIRR comprises four primary risk factors: repricing risk, yield curve risk, basis risk and optionality risk. For more information, see page 334.

Foreign exchange risk

Non-traded foreign exchange risk exposures for the Group arise from two main sources:

- the capital deployed in foreign subsidiaries, branches and associates and related currency funding where it differs from sterling (these exposures are known as structural foreign exchange exposures); and
- customer transactions and profits and losses in a currency that are not conducted in the functional currency of the transacting operation.

Equity risk

Non-traded equity risk is the potential variation in the Group's income and reserves arising from changes in the values of non-trading book equity positions. Equity exposures arise through strategic acquisitions, venture capital investments and GRG restructuring arrangements.

Pension risk

The Group's pension-related activities also give rise to market risk. Refer to page 356 and 357 for more information on risk related to pensions.

Linkage to balance sheet*

The table below analyses the Group's balance sheet by trading and non-trading business.

2013	Total	Trading	Non-trading	
	£bn	business (1) £bn	business (2) £bn	Non-trading business Primary risk factor
Assets				
Cash and balances at central banks	82.7	—	82.7	Interest rate, foreign exchange
Net loans and advances to banks	27.6	9.3	18.3	Interest rate
Net loans and advances to customers	390.8	19.4	371.4	Interest rate
Reverse repurchase agreements and stock borrowing	76.4	75.7	0.7	Interest rate
Debt securities	113.6	56.7	56.9	Interest rate
Equity shares	8.8	7.2	1.6	Equity
Derivatives	288.0	284.9	3.1	Interest rate, foreign exchange
Settlement balances	5.6	5.6	—	
Other assets	34.4	—	34.4	Interest rate
Total assets	1,027.9	458.8	569.1	
Liabilities				
Deposits by banks	35.3	19.2	16.1	Interest rate
Customer deposits	414.4	9.7	404.7	Interest rate
Repurchase agreements and stock lending	85.1	73.6	11.5	Interest rate
Debt securities in issue	67.8	19.7	48.1	Interest rate
Settlement balances	5.3	5.3	—	
Short positions	28.0	28.0	—	
Derivatives	285.5	283.4	2.1	Interest rate, foreign exchange
Subordinated liabilities	24.0	—	24.0	Interest rate
Other liabilities	23.3	—	23.3	Interest rate, credit spreads
Total liabilities	968.7	438.9	529.8	

Notes:

- (1) Trading businesses are entities that primarily have exposures that are classified as trading book under regulatory rules. For these exposures, the main methods used by the Group to measure market risk are discussed under Traded market risk - Risk measurement on page 323.
- (2) Non-trading businesses are entities that primarily have exposures that are not classified as trading book. For these exposures, with the exception of pension-related activities, the main measurement methods are sensitivity analysis of net interest income, internal non-traded VaR and fair value calculations; for more information, refer to pages 334 to 340.

Business review Risk and balance sheet management

Governance structure

For general information on risk governance in the Group, see the Risk governance section on pages 176.

The Group Chief Risk Officer (CRO) delegates responsibility for day-to-day control of market risk to the traded and non-traded market risk functions. Responsibility for controlling market risk in divisions is delegated to divisional market risk functions, the heads of which are accountable to divisional CROs, who in turn are accountable to the Group CRO.

Risk management

Frameworks and processes common to both traded and non-traded market risk management are described in this sub-section. Separate sub-sections on traded and non-traded market risk follow, which provide more detailed information specific to the management and measurement of these two risk types.

Risk appetite and limit framework*

Market risk appetite is the level of market risk that the Group accepts when pursuing its business objectives, taking into account both projected and stressed scenarios. The Group has a comprehensive structure and controls in place aimed at ensuring that this appetite is not exceeded.

The Group's qualitative market risk appetite is set out in policy statements. These define the governance, responsibilities, control framework and requirements for the identification, measurement, analysis, management and reporting of market risk arising from the Group's trading and non-trading activities. These policies are also cascaded, as appropriate, to the Group's legal entities, divisions and businesses to ensure there is a consistent control framework throughout.

Group market risk limits that express its market risk appetite in quantitative terms for trading and non-trading activities are proposed by, respectively, the heads of traded and non-traded market risk. Once approved by the ERF, these limits establish a set of comprehensive boundaries within which business activities are conducted and monitored. The heads of traded and non-traded market risk cascade the Group market risk limits down to the legal entities and divisions. The divisional market risk functions are responsible for cascading legal entity and divisional market risk limits to lower levels as appropriate.

The limit framework comprises not only Group limits but also legal entity, divisional and lower level limits and aims to capture all material market risks arising from the Group's activities.

The limit framework at the Group level comprises Value at Risk (VaR), Stressed Value at Risk (SVaR), sensitivity and stress limits (for more details on VaR and SVaR, see pages 323 and 328). The limit framework at the divisional, legal entity and lower levels also comprises additional metrics that are specific to the market risk exposures within its scope. These additional metrics aim to control various risk dimensions such as product type, exposure size, aged inventory, currency and tenor.

The limits are reviewed to reflect changes in risk appetite, business plans, portfolio composition and the market and economic environments.

Limit breaches at the Group level require escalation by the head of traded market risk or the head of non-traded market risk, as appropriate, to the ERF and the Group CRO. Limit breaches at the divisional or legal entity level require escalation by the head of the relevant divisional market risk function to the head of traded market risk or the head of non-traded market risk, as appropriate.

Valuation and independent price verification

Traders are responsible for marking-to-market their trading book positions daily, ensuring that assets and liabilities in the trading book are measured at their fair value. Any profits or losses on the revaluation of positions are recognised daily.

Business unit controllers are responsible for ensuring that independent price verification processes are in place covering all trading book positions held by their business. Independent price verification is the key control over front office marking of positions.

For more information on valuation controls, refer to page 412. The validation of pricing models is discussed below.

Model validation

This sub-section discusses the independent model validation framework governing both pricing models and risk models (including Value-at-Risk).

The Group uses a variety of models to manage and measure market risk, as described below. These models comprise pricing models (used for valuation of positions) and risk models (for risk measurement and capital calculation purposes). They are developed in both divisional units and Group functions and are subject to independent review and sign-off.

The Group has a dedicated independent model review and challenge function - Group Risk Analytics (GRA) - which performs reviews of relevant models in two instances: (i) for new models or amendments to existing models and (ii) as part of its ongoing programme to assess the performance of these models.

A new model is typically introduced when an existing model is no longer fit for purpose or a new product requires a new methodology or model to quantify the risk appropriately. Amendments are usually made when a weakness is identified during use of a model or following analysis either by the model developers in the divisions or by GRA.

GRA also reassesses the appropriateness of approved models following significant market or regulatory developments or portfolio changes. The mechanics of the review process are the same as those for new models.

Pricing models*

Pricing models are developed by a dedicated front office team, in conjunction with the trading desk. They are used for the valuation of positions for which prices are not directly observable and for the risk management of the portfolio.

Any pricing models that are used as the basis for valuing books and records are subject to approval and oversight by asset-level modelled product review committees.

*unaudited

Business review Risk and balance sheet management

Market risk continued

Risk management continued

These committees comprise representatives of the major stakeholders in the valuation process - trading, finance, market risk, model development and model review functions.

The review process comprises the following steps:

- The committees prioritise models for GRA review, considering the materiality of the risk booked against the model and an assessment of the degree of model risk, that is the valuation uncertainty arising from the choice of modelling assumptions.
- GRA quantifies the model risk by comparing front office model outputs with those of alternative models independently developed by GRA.
- The sensitivities derived from the pricing models are validated.
- The conclusions of the review are used by Market Risk to inform risk limits and by Finance to inform model reserves.

Risk models*

All new risk models are subject to GRA review and sign-off.

All model changes are approved through model governance at the divisional level. Changes to existing models that have an impact on VaR exceeding 5% at legal entity level or 15% at a major business level are also subject to GRA review and sign-off as are all model changes that require regulator approval before implementation.

The traded market risk team in Markets also performs regular VaR model testing, which is discussed in more detail under Risk measurement - Value at Risk on page 323.

GRA's independent review comprises some or all of the following steps, as appropriate:

- Testing and challenging the logical and conceptual soundness of the methodology;
- Testing the assumptions underlying the model, where feasible, against actual behaviour. In its validation report, GRA will opine on the reasonableness and stability of the assumptions and specify which assumptions, if any, should be routinely monitored in production;
- Testing whether all key market risks have been sufficiently captured;
- Re-applying the Group's proposed approach to verify that the same outcome is achieved;
- Comparing outputs with results from alternative methods;
- Testing parameter selection and calibration;

- Ensuring model outputs are sufficiently conservative in areas where there is significant model uncertainty;
- Confirming the applicability of tests for accuracy and stability; recalculating and ensuring that results are robust; and
- Ensuring appropriate sensitivity analysis has been performed and documented.

Based on the review and findings from GRA, an internal model governance committee with appropriate delegated authority considers whether a model can be approved for use and whether any conditions need to be imposed, including those relating to the remediation of material issues raised through the review process. Once approved through internal governance, the new or amended model is implemented. Models used for regulatory reporting may additionally require PRA approval before implementation.

GRA also reassesses the appropriateness of approved risk models annually.

Traded market risk

Risk management

The governance framework, risk management principles and appetite and limit framework applicable to the Group's management of market risk are covered by the discussion on page 176. More specific information on the Group's management of traded market risk is provided below.

Identification and assessment

Identification and assessment of traded market risk is achieved through gathering, analysing, monitoring and reporting market risk information by business line or at a consolidated level. Industry expertise, continued system developments and techniques such as stress testing are also used to enhance the effectiveness of the identification of all material market risks.

This is complemented by the Group's New Product Risk Assessment process, which requires market risk teams to assess and quantify market risk associated with all proposed new products.

Reporting and monitoring

The Group's traded market risk exposures are monitored against limits and analysed daily by market risk reporting and control functions. A daily report that summarises the Group's market risk exposures against the limits set by the ERF is sent to the Group CRO, divisional CROs and market risk managers across the divisions.

Divisional market risk functions also prepare daily risk reports that detail exposures against a more granular set of limits and triggers.

Limit reporting is supplemented with regulatory capital and stress testing information as well as ad hoc reporting.

Finally, a market risk update is included in the monthly risk management report sent to Group Board. The update covers the key risks and trends, together with a discussion of relevant issues and market topics.

*unaudited

Business review Risk and balance sheet management

Mitigation

To ensure approved limits are not breached and that the Group remains within its risk appetite, triggers at Group, legal entity and divisional levels have been set such that if exposures exceed a specified level, action plans are developed by the front office, Market Risk and Finance.

Counterparty Exposure Management

Management of the over-the-counter derivative counterparty credit risk and funding risk is carried out by the Counterparty Exposure Management (CEM) desk in Markets. CEM actively manages risk exposures and concentrations on behalf of both Markets and Non-Core. The hedging transactions CEM enters into are booked in the trading book and therefore contribute to the Group's market risk VaR exposure and capital.

Risk measurement

The Group uses a comprehensive and complementary set of methodologies and techniques to measure traded market risk that collectively ensure a complete approach to the measurement of material market risks.

The Group's main measurement methods are VaR and SVaR. Risks that are not adequately captured by these model methodologies are captured by the Risks Not in VaR (RNIV) framework to ensure that the Group is adequately capitalised for market risk. In addition, stress testing is used to identify any vulnerabilities and potential losses in excess of VaR and SVaR.

These methods have been designed to capture correlation effects and allow the Group to form an aggregated view of its traded market risk across risk types, markets and business lines while also taking into account the characteristics of each risk type.

Each of these methodologies and techniques is discussed in more detail below.

Value at-risk

VaR is a statistical estimate of the potential change in the market value of a portfolio (and, thus, the impact on the income statement) over a specified time horizon at a given confidence level.

For internal risk management purposes, the Group's VaR assumes a time horizon of one trading day and a confidence level of 99%. The Group's VaR model is based on a historical simulation, utilising data from the previous 500 days on an equally weighted basis.

The Group's internal traded VaR model captures all trading book positions including those approved by the regulator. In 2013, improvements were made to the risk sensitivities associated with funding valuation adjustments (FVAs), which resulted in a reduction in the hedge portfolio. At the point of implementation, the impact on RBS plc was a £9 million decrease in 1-day 99% regulatory VaR and an associated £42 million decrease in regulatory SVaR. The current internal VaR methodology does not include credit valuation adjustment (CVA) and FVA exposures as these are out of scope of the measure, although the Group is planning to include these in its internal VaR measure in 2014. For an explanation of the distinction between internal VaR and regulatory VaR, see page 330.

The RBS internal VaR model captures the impact on the income statement of the following risk factors:

- Interest rate risk, which arises from the impact of changes in interest rates and volatilities on cash instruments and derivatives. This includes interest rate tenor basis risk and cross-currency basis risk.
- Credit spread risk, which arises from the impact of changes in the credit spreads of sovereign bonds, corporate bonds, securitised products and credit derivatives.
- Currency risk, which arises from the impact of changes in currency rates and volatilities.
- Equity risk, which arises from the impact of changes in equity prices, volatilities and dividend yields.
- Commodity risk, which arises from the impact of changes in commodity prices and volatilities.

The risk factors presented above are sufficient to define the Group's overall market risk exposures. In addition, the following risks, which are components of the above-mentioned risk factors, are also monitored by individual businesses to identify and address any material concentrations:

- Basis risk, which is the risk that imperfect correlation between two instruments in a hedging strategy creates the potential for excess gains or losses, thus adding risk to the position;
- Prepayment risk, which is the risk associated with early unscheduled return of principal on a fixed rate security; and
- Inflation risk, which is the risk of a decrease in the value of instruments as a result of changes in inflation rates and associated volatilities.

Business review Risk and balance sheet management

Market risk continued

Traded market risk continued

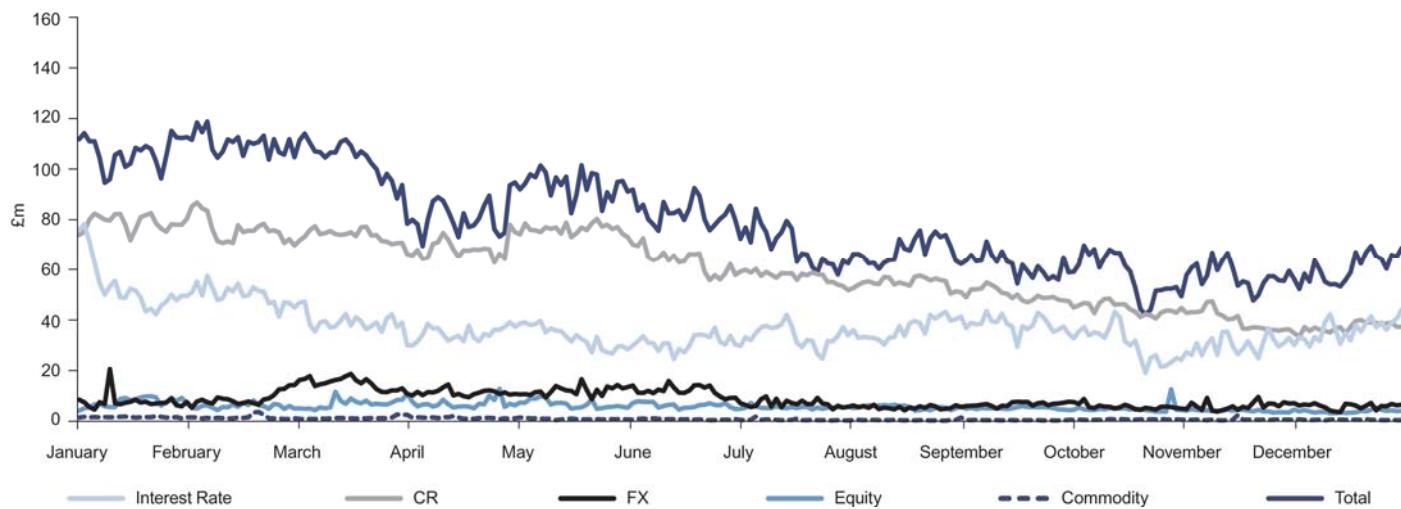

VaR limitations*

Historical VaR and the Group's implementation of this risk measurement methodology have a number of known limitations, as summarised below, and the Group's VaR should be interpreted in light of these. The Group's approach is to supplement VaR with other risk metrics that address these limitations to ensure appropriate coverage of all material market risks.

- Historical simulation VaR may not provide the best estimate of future market movements. It can only provide a forecast of portfolio losses based on events that occurred in the past. The Group model uses the previous two years of data; this period represents a balance between model responsiveness to recent shocks and risk factor data coverage.
- The use of a 99% confidence level VaR statistic does not provide information about losses beyond this level, usually referred to as 'tail' risks. These risks are more appropriately assessed using measures such as Stressed VaR and stress testing.
- The use of a one-day time horizon will not fully capture the profit and loss implications of positions that cannot be liquidated or hedged within one day. This may not fully reflect market risk at times of severe illiquidity in the market when a one-day period may be insufficient to liquidate or hedge positions fully. Thus, the regulatory VaR that is used for modelled market risk capital uses a ten-day time horizon.

- When the Group uses ten-day risk factor changes in the calculation of the regulatory VaR, the ten-day periods overlap, which can introduce an autocorrelation bias in the 99% confidence level VaR statistic. The analysis performed has shown the bias to be small and acceptable for a ten-day period.
- The Group computes the VaR of trading positions at the close of business. Positions may change substantially during the course of the trading day and so intra-day price volatility and trading may not be captured by the model.
- The data used in the model are collected from global sources. For some sources, local end-of-day, rather than London end-of-day, data may be used. This timing mismatch is more material for 1-day return periods than for 10-day periods (which are used for capitalisation purposes) as the overlaps are inherently smaller across shorter periods. When deciding whether or not to use local end-of-day timing, the internal model review committee balances the principle of aligning the treatment of positions and their associated hedges against the goal of using London end-of-day timing consistently.
- Risk factors relevant to a specific portfolio may be omitted, due to a lack of reliable data, or the use of proxy risk factors, for example. The Group has developed the RNIV framework to address these issues.

1-Day 99% traded internal VaR graph, 2013.*

Note:

(1) The internal 99% 1-day VaR does not distinguish between regulator approved products and therefore includes a broader range of products. Refer to page 330 for discussion of regulatory VaR.

Business review Risk and balance sheet management

1-day 99% traded internal VaR table

The table below analyses the internal VaR for the Group's trading portfolios, segregated by type of market risk exposure, and split between Core, Non-Core and CEM.

	2013				2012				2011			
	Average £m	Period end £m	Maximum £m	Minimum £m	Average £m	Period end £m	Maximum £m	Minimum £m	Average £m	Period end £m	Maximum £m	Minimum £m
Interest rate	37.2	44.1	78.2	19.1	62.6	75.6	95.7	40.8	53.4	68.1	79.2	27.5
Credit spread	60.0	37.3	86.8	33.3	69.2	74.1	94.9	44.9	82.7	74.3	151.1	47.4
Currency	8.6	6.5	20.6	3.6	10.3	7.6	21.3	2.6	10.3	16.2	19.2	5.2
Equity	5.8	4.1	12.8	3.2	6.0	3.9	12.5	1.7	9.4	8.0	17.3	4.6
Commodity	0.9	0.5	3.7	0.3	2.0	1.5	6.0	0.9	1.4	2.3	7.0	—
Diversification (1)	(23.7)				(55.4)				(52.3)			
Total	79.3	<u>68.8</u>	118.8	42.1	97.3	<u>107.3</u>	137.0	66.5	105.5	<u>116.6</u>	181.3	59.7
Core	64.2	52.4	104.6	35.6	74.6	88.1	118.0	47.4	75.8	89.1	133.9	41.7
Non-Core	19.3	15.2	24.9	14.9	30.1	22.8	41.9	22.0	64.4	34.6	128.6	30.0
CEM	58.1	43.5	85.4	39.4	78.5	84.9	86.0	71.7	50.1	75.8	78.8	30.3
Total (excluding CEM)	37.2	33.6	60.4	19.1	47.1	57.6	76.4	32.2	75.5	49.9	150.0	41.6

Note:

(1) The Group benefits from diversification as it reduces risk by allocating positions across various financial instrument types, currencies and markets. The extent of the diversification benefit depends on the correlation between the assets and risk factors in the portfolio at a particular time. The diversification factor is the sum of the VaR on individual risk types less the total portfolio VaR.

Key points

- The Group's period end and average interest rate VaR declined in 2013 compared with 2012. The reduction was mainly seen in Q1 2013, when the rates desk significantly de-risked its exposures and repositioned itself to manage concentrations. In addition, CEM's contribution to VaR decreased due to improvements in the capture of valuation adjustment risk within VaR metrics. The volatility seen in the second half was also due to rate volatility reflecting Bank of England and European Central Bank rate announcements and a US Federal Reserve announcement regarding tapering of its quantitative easing programme.
- The Group's period-end and average credit spread VaR declined in 2013 compared with 2012. This decline was driven by an ongoing reduction in inventory as part of Group-wide efforts to reduce RWAs ahead of CRD IV implementation. Risk reduction during the first half of the year was aided by the flow business reducing the complexity of its trading operations. In the second half of the year, the VaR decrease was driven by a reduction in the asset-backed securities inventory.
- The Group's Core and CEM period end and average VaR declined, driven by the declines in the interest rate and credit spread VaR.
- The decrease in average and period end Non-Core VaR reflects the Group's risk reduction strategy.
- During H2 2013, some positions from businesses were migrated to the newly created Run-off and Recovery (ROR) unit in Markets. At 31 December 2013, the VaR on the ROR business was £6.0 million.

Business review Risk and balance sheet management

Market risk continued

Traded market risk continued

VaR validation*

In addition to the independent VaR model reviews carried out by GRA (discussed on page 323), a dedicated model-testing team within Market Risk works with the risk managers to:

- Test the accuracy of the valuation methods used in the VaR model on appropriately chosen test portfolios and trades.
- Apply in-house models to perform advanced internal back-testing to complement the regulatory back-testing.
- Ensure that tests capture the effect of using external data proxies where these are used.
- Identify risks not adequately captured in VaR, and ensure that such risks are addressed via the RNIV framework (see page 328).
- Identify any model weaknesses or scope limitations and their impact.
- Identify and give early warning of any market or portfolio weakness that may become significant.

As well as being an important market risk measurement and control tool, the VaR model is also used to determine a significant component of the market risk capital requirement (see page 332 for more information on calculation of capital requirements). Therefore, it is subject to not only ongoing internal review and validation but also regulator-prescribed back-testing.

VaR back-testing*

The main approach employed to assess the ongoing model performance is back-testing, which counts the number of days when a loss exceeds the corresponding daily VaR estimate, measured at a 99% confidence level.

There are two types of profit and loss (P&L) used in back-testing comparisons: Clean P&L and Hypothetical (Hypo) P&L.

The Clean P&L figure for a particular business day is the firm's actual P&L for that day in respect of the trading activities within the scope of the firm's regulatory VaR model, adjusted by stripping out:

- Fees and commissions;
- Brokerage;
- Additions to, and releases from, reserves that are not directly related to market risk; and
- Any Day 1 P&L exceeding an amount of £500,000 (per transaction).

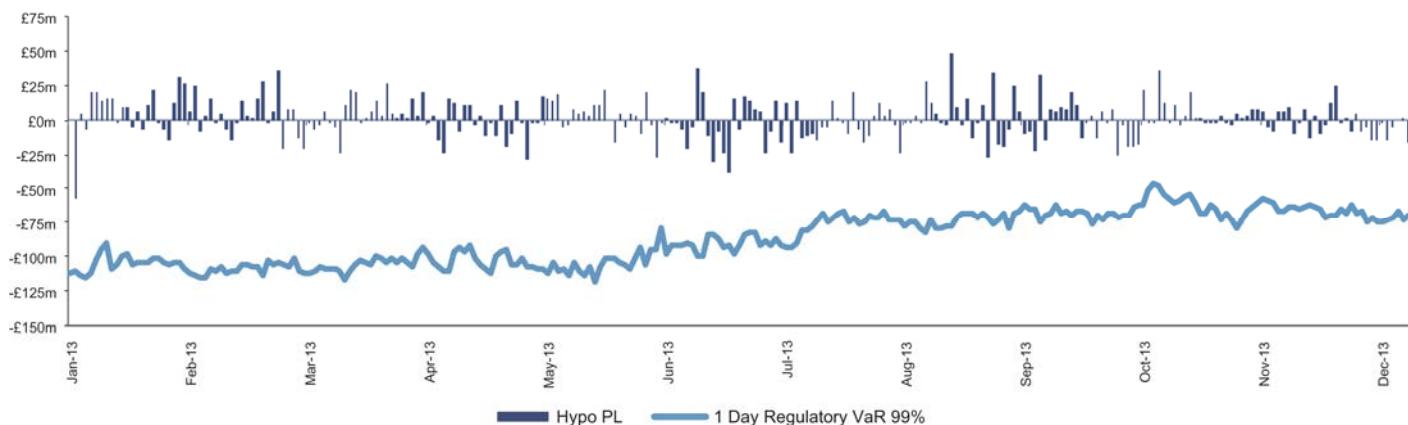

The Hypo P&L reflects the firm's Clean P&L excluding any intra-day activities.

A portfolio is said to produce a back-testing exception when the Clean or Hypo P&L exceeds the VaR level on a given day. Such an event may be caused by a large market movement or may highlight issues such as missing risk factors or inappropriate time series. Any such issues identified are analysed and addressed through taking appropriate remediation or development action. The Group monitors both Clean and Hypo back-testing exceptions.

Regulatory back-testing is performed and reported on a daily basis for legal entities and major business portfolios. Divisional market risk teams also perform back-testing at the lower levels as part of the internal ongoing VaR model validation.

The back-testing described above primarily applies to Markets and Non-Core models, which are approved by the regulators. However, where appropriate, back-testing is also performed for other portfolios that are not subject to regulatory approval.

The graph below presents 1-day 99% regulatory VaR vs. Hypo P&L for RBS plc, the Group's largest legal entity by market risk RWAs and positions.

Business review Risk and balance sheet management

VaR back-testing*

The table below shows regulatory back-testing exceptions for a period of 250 days for 1-day 99% traded regulatory VaR vs. Clean and Hypo P&L for the legal entities approved by the PRA and De Nederlandsche Bank.

Description	Back-testing exceptions		Model status
	Clean	Hypo	
The Royal Bank of Scotland plc	—	—	Green
National Westminster Bank Plc	1	1	Green
RBS Securities Inc	—	—	Green
RBS Financial Products Inc	—	—	Green
The Royal Bank of Scotland N.V.	1	1	Green

Key points

- Statistically the Group would expect to see back-testing exceptions 1% of the time over a one-year period. From a capital requirement perspective, the PRA categorises a firm's VaR model as green, amber or red. A green model status is consistent with a satisfactory VaR model and is achieved for models that have four or fewer exceptions in a continuous 12 month period. The Group's VaR model has maintained a green status for its regulated legal entities and hence has considered that no action is required to rectify or adapt its VaR models.
- The exception at the NatWest level was mainly driven by a large move in inflation following an Office of National Statistics announcement in January that it would not be changing the RPI calculation.
- The exception at the RBS NV level was primarily a result of a significant rise in Indian bond yields as the country's central bank unexpectedly raised benchmark interest rates by 200 basis points.

The table below shows internal back-testing exceptions for a period of 250 days for 1-day 99% traded internal VaR vs. Clean and Hypo P&L for major Markets businesses.

Description	Back-testing exceptions	
	Clean	Hypo
Asset Backed Products	—	—
Treasury Markets	—	—
Emerging Markets	—	—
Equities	—	—
Currency Options	1	1
Interest Rate Options North America	—	—
Non Linear Trading	2	2
Delta Flow (flow rates)	1	1
CEM Funding (derivative funding risk)	—	—
Flow Credit	—	—
Currencies	—	6

Key points

- As mentioned above, statistically the Group would expect to see back-testing exceptions 1% of the time over a one-year period. At Group level, there were no exceptions during 2013, confirming that the model was satisfactory.
- The businesses presented in the table above are subject to quarterly governance by the PRA. For some of these businesses, exceptions were noted during 2013 and analysis conducted as explained below.
- The exceptions in Currency Options, Non-Linear Trading and Delta Flow occurred in the normal course of business and were mainly related to volatile currencies and rates following a Bank of England announcement on interest rates, a US Federal Reserve announcement regarding tapering of its quantitative easing programme and a statistical release indicating slow growth in the Chinese economy.
- The exceptions in Currencies were mainly due to currency fluctuations, driven primarily by increased volatility in the Australian dollar, Singapore dollar and Japanese yen. Investigation into the number of exceptions confirmed that the VaR model used for this business was satisfactory.

Market risk continued

Traded market risk continued

Stressed VaR (SVaR)*

As with VaR, the SVaR technique produces estimates of the potential change in the market value of a portfolio, over a specified time horizon, at a given confidence level. SVaR is a VaR-based measure using historical data from a one-year period of stressed market conditions.

The risk system simulates 99% VaR on the current portfolio for each 260-day period from 1 January 2005 to the current VaR date, moving forward one day at a time. The SVaR is the worst VaR outcome of the simulated results.

This is in contrast with VaR, which is based on a rolling 500-day historical data set. For the purposes of both internal risk management and regulatory SVaR calculation, a time horizon of ten trading days is assumed with a confidence level of 99%.

Trading SVaR*

	2013 £m	2012 £m
Total Group	309	396
Core Markets	298	372
Non-Core	51	69

Key point

- The Group's period end SVaR declined in 2013 compared with 2012. This is consistent with the observed decrease in VaR during 2013 and is primarily driven by significant de-risking of interest rate exposures and reduction in the asset-backed securities inventory.

Risks not in VaR (RNIVs)*

The RNIV approach is used for market risks that fall within the scope of VaR and SVaR but that are insufficiently captured by the model methodology, for example due to a lack of suitable historical data. The RNIV framework has been developed to quantify these market risks and to ensure that the Group holds adequate capital.

The need for an RNIV is typically identified in one of the following two circumstances: (i) as part of the New Product Risk Assessment process, when a risk manager assesses that the associated risk is not adequately captured by the VaR model; or (ii) as a result of a recommendation made by GRA or the model validation team when reviewing the VaR model.

The RNIVs provide a capital estimate of risks not captured in the VaR model and are regularly reported and discussed with senior management and the regulator. The methodology used in the RNIV calculation is internally reviewed by the model-testing team. Where appropriate, risk managers set sensitivity limits to control specific risk factors giving rise to the RNIV. RNIVs form an integral part of the Group's ongoing model and data improvement efforts to capture all market risks in scope for model approval in VaR and SVaR. Since the introduction of the RNIV framework, the Group has made significant progress in transitioning RNIVs into the VaR model.

The Group adopts two approaches for the quantification of RNIVs:

- A standalone VaR approach. Under this approach, two values are calculated: (i) the VaR RNIV; and (ii) the SVaR RNIV.
- A stress-scenario approach. Under this approach, an assessment of ten-day extreme, but plausible, market moves is used in combination with position sensitivities to give a stress-type loss number - the stressed RNIV value.

In 2013, for each legal entity covered by the PRA VaR model waiver, RNIVs above a regulatory defined threshold were aggregated to obtain the following three measures: (i) Total VaR RNIV; (ii) Total SVaR RNIV; and (iii) Total stressed RNIV. In each of these categories, potential diversification benefits between RNIVs are ignored.

The top ten RNIVs represent approximately two thirds of the total RNIV capital requirement.

RNIVs are broadly classified as follows:

- Proxied sensitivities or risk factors: to cover instruments for which market data is not available.
- Higher-order sensitivity terms: to account for the fact that the Group's VaR model is based on a P&L approximation function rather than full repricing of deals.
- Interpolation and re-bucketting inaccuracy: to cover residual errors resulting from the pre-processing of risk factors into a standard set across tenors.
- Data selection bias: to cover the possibility of suboptimal data sources being selected for risk factors.
- Static pricing parameters: to cover the possibility that suboptimal assumed values are used for certain unobserved parameters in pricing models.
- Missing basis risks: to cover cases where data sources are not detailed enough to differentiate the risks of long and short pairs of closely related instruments.

The most material of these are proxy or basis risks, followed by higher-order sensitivity risks.

RNIVs that are related specifically to instruments that have level 3 valuation hierarchy assumptions (see pages 418 to 423) are mainly included in the following categories: proxied sensitivities or risk factors; higher-order sensitivity terms; and static pricing parameters.

*Risks not in VaR (RNIVs)**

The table below analyses capital requirements related to RNIVs.

	2013 £m	2012 £m
Risks Not in VaR (RNIV)	30	94
Risks Not in SVaR (RNISV)	39	149
Stressed RNIV (SRNIV)	149	187
	218	430

Key points

- The decreases in the VaR RNIV and SVaR RNIV were driven by progress in obtaining reliable sources of equity market data and by an improvement in the VaR model for asset-backed products.
- The decrease in the Stressed RNIV primarily reflected a reduction in RBSSI's asset-backed products exposures.

*Stress testing**

The Group undertakes daily market risk stress testing to identify vulnerabilities and potential losses in excess of or not captured in VaR. The calculated stresses measure the impact of changes in risk factors on the fair values of the Group's trading and available-for-sale portfolios.

The Group conducts scenario-based sensitivity analysis and historical, macroeconomic and bottom-up stress testing.

Scenario-based sensitivity analysis measures the sensitivity of the current portfolio to defined movements in market risk factors. These risk factor movements and the resulting valuation changes are typically smaller than those considered in other stress tests.

Historical stress testing is a measure that is used for internal management. Using a similar technical framework to VaR, the current portfolio is stressed using historical data since 1 January 2005. The methodology simulates the impact of the worst loss that would be incurred by historical risk factor movements over the period, assuming a holding period specific to the risk factors and the businesses. At present, a holding period of 60 business days is applied for credit risk factors (including in the case of ABS) and for the AFS portfolios that are held by Markets Treasury and generally a period of 10 business days for other risk factors. The Group reviews the holding periods annually and is considering introducing greater distinction between the liquidity assumptions associated with each risk factor.

The main strength of this methodology is that it is founded on objective data and the potential loss is directly informed by real-life examples. As with all historically based methodologies, an obvious limitation is that the approach is not forward-looking. However, this weakness is materially addressed by the other stress testing approaches that constitute the RBS stress testing framework.

Historical stress tests form part of the Group market risk limit framework and their results are reported daily to senior management.

Macroeconomic stress tests are carried out periodically as part of the firm-wide, cross-risk capital planning process. The scenario narratives are translated into risk factor shocks using historical events and insights by economists, risk managers and the front office. Market risk stress results are combined with those for other risks into the capital plan that is presented to the Board. The cross-risk capital planning process is conducted twice a year, in April/May and October/November, with a planning horizon of five years. The scenario narratives cover both regulatory scenarios such as the PRA Anchor and Fed Stress comprehensive capital assessment review (CCAR) and macroeconomic scenarios identified by the firm such as a Euro Break-Up and the US Fiscal Cliff.

Bottom-up stress testing begins with the analysis of a portfolio and expresses the key vulnerabilities of the portfolio in terms of plausible, so-called vulnerability scenarios under which the portfolio would suffer material losses. These scenarios can be historical, forward-looking, macroeconomic or hypothetical. Bottom-up stress testing is used for internal management information and is not subject to limits. However, relevant scenarios are reported to senior management.

Economic capital

A market risk economic capital framework was developed in 2013 and will be introduced in the Group's internal reporting during 2014.

The associated models calculate the market and default risk in the trading book. The results are annualised to be consistent with the other Group economic capital models to permit consolidation of all risk types as part of the Group-wide economic capital programme.

Other risk measures

In addition to SVaR and stress tests, the Group uses a range of other risk measures to complement VaR. These measures often represent local (small-amplitude) risk calculations which provide valuable additional controls, often at individual desk or business unit level. They mainly include, but are not limited to, sensitivity and position-based risk measures.

Sensitivity measures refer to the changes in deal or portfolio value that result from small changes in market parameters that are subject to the Group market risk limit framework.

Position-based measures are also used and are stated in terms that relate directly to the business activity they are applied to. Examples of such measures include the aggregate open foreign exchange position or the long, short and net amount of security or currency held and aged inventory in trading books.

Traded market risk continued

Regulatory capital*

Regulatory treatment

The market risks subject to capital requirements under Pillar 1 are primarily interest rate, credit spread and equity risks in the trading book and foreign exchange and commodity risks in both the trading and non-trading books. Interest rate and equity risks are split between general and specific risks. General risks represent market risks due to a move in a market as a whole, such as a main index or yield curve, while specific risks represent market risks arising from events particular to an underlying issuer.

Firms can choose from two broad methodologies to calculate their market risk capital charge: (i) the standard rules, whereby regulator-prescribed rules must be applied, and (ii) the internal model approach, where, subject to regulatory approval, a model such as VaR is used to calculate the capital charge.

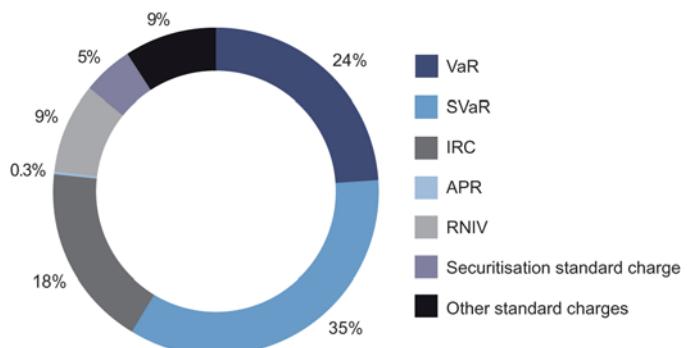

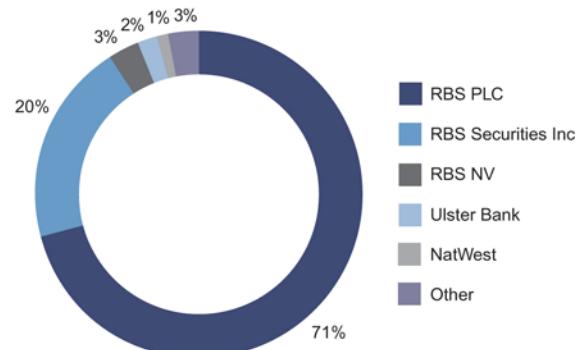

RBS uses both methods, with the internal model approach being used to calculate about 86% of its capital charge.

VaR and SVaR capture general and specific risks but not risks arising from the impact of defaults and rating changes associated with traded credit products and their derivatives. For these risks, three product-dependent approaches are used:

- The Incremental Risk Charge (IRC) model captures risks arising from defaults and rating changes risks for the more liquid traded credit instruments and their derivatives.
- The All Price Risk (APR) model covers the generally lower-liquidity correlation trades and their liquid hedges (such as first-to-default basket trades).
- Securitisation and re-securitisation risks in the trading book are treated with the non-trading book standardised capitalisation approach.

*RWAs by legal entity and by regulatory approach**

Market risk RWAs of £30.3 billion and minimum capital requirement of £2.4 billion are analysed below.

*Regulatory VaR**

The Group's VaR model has been approved by the PRA to calculate its regulatory market risk capital requirement for the trading book for those legal entities under its jurisdiction. These legal entities are The Royal Bank of Scotland plc, RBS Securities Inc, RBS Financial Products Inc, and National Westminster Bank Plc.

While internal VaR provides a measure of the economic risk, regulatory VaR is one of the measures of regulatory capital by legal entity.

The calculation of regulatory VaR differs from that of the internal VaR as it takes into account only regulator-approved products, locations and legal entities and it is based on a ten-day, rather than a one-day, holding period for market risk capital calculations.

The PRA approval covers general market risk in interest rate, foreign exchange, equity and commodity products and specific market risk in interest rate and equity products.

Business review Risk and balance sheet management

VaR back-testing*

For the Group's trading book, a green model status was maintained throughout 2013. For details of back-testing results for regulatory VaR, refer to the table on page 327.

Regulatory SVaR*

The Group's SVaR model has also been approved by the PRA for use in the capital requirement calculation. The regulatory SVaR differs from internal SVaR as it covers only regulator-approved products, locations and legal entities.

Risks not in VaR (RNIVs)*

As discussed earlier, the Group has an established RNIV framework that ensures that the risks not captured in VaR are adequately covered by its capital.

The RNIV framework does not include tail event risks; these risks are covered indirectly by the regulatory multiplier applied to VaR and directly by relevant charges, e.g. IRC, APR and gap risk discussed below.

Gap risk*

Certain traded products are structured with buffers so that losses below a certain level are borne by the Group's counterparties. These products may, however, exhibit large sudden market movements in excess of their buffer, which may result in losses for the Group. The VaR model does not fully capture the risk to the Group presented by these products. The gap risk model takes into account the liquidity of the products and the likely effectiveness of the buffer and produces an additional capital requirement for the relevant products.

This risk is concentrated in the equities business in Markets. Markets' exposure to gap risk was not material in 2013 as the portfolios considered under this framework have been significantly reduced.

Incremental risk charge (IRC)*

The IRC model aims to quantify the impact of defaults and rating changes on the market value of bonds, credit derivatives and other related positions held in the trading book. It also captures basis risks between different instruments, different product maturities and different but related reference entities. Like the internal ratings-based approach for credit risk, it is calculated over a one-year holding period at a 99.9% confidence level.

The multivariate behaviour of positions is modelled via the relevant reference entities using a single-factor model (Gaussian Copula), which allows a more efficient calculation of the charge using numerical integration.

The model is mainly driven by three-month transition, default and correlation parameters. The portfolio impact of correlated defaults and rating changes is assessed with reference to the resulting change in the market value of positions, which is determined using stressed recovery rates and modelled credit spread changes. Individual instrument revaluation vectors are used to capture non-linear behaviour.

The model has different parameters for sovereign and corporate exposures. The model reflects the overall liquidity of each position referencing an entity, arising from product type, product maturity and product concentration characteristics.

A constant level of risk is assumed and achieved by replacing positions that default or migrate in one period with equivalent positions. The average liquidity horizon at the year end was 3.7 months (2012 - 4.6 months).

All price risk (APR)*

The APR model determines the capital that should be held against all material price risks, including those arising from defaults and credit rating changes affecting securities in the hedged portfolio, using a 99.9% confidence level over a one year time horizon.

This model is applied to the correlation trading portfolio subject to certain eligibility criteria (principally that the underlying names be liquid corporate CDS positions).

The most significant risks are credit spread risk, credit (base) correlation risk, index basis risk, default risk and recovery rate risk. In addition, losses due to both hedging costs and hedge slippage are modelled. The overall APR capital charge is floored at 8% of the corresponding standard rules charge for the same portfolio.

RBS no longer has market risk exposure to corporate CDOs in the trading book. It has residual exposure to nth-to-default basket swaps, many of which have matured. As a consequence, the APR charge for RBS is small.

Minimum capital requirements

The following table analyses the market risk minimum capital requirement, calculated in accordance with Basel 2.5.

	2013 £m	2012 £m	2011 £m
Interest rate position risk requirement	147	254	1,107
Equity position risk requirement	1	1	3
Option position risk requirement	10	26	26
Commodity position risk requirement	13	2	2
Foreign currency position risk requirement	39	12	10
Specific interest rate risk of securitisation positions	123	156	250
Total (standard method)	333	451	1,398
Pillar 1 model based position risk requirement	2,086	2,959	3,725
Total market risk minimum capital requirement	2,419	3,410	5,123

The following table analyses the principal contributors to the Pillar 1 model based position risk requirement presented in the previous table.

	2013				
	Average (1) £m	Maximum (1) £m	Minimum (1) £m	Period end £m	2012 £m
Value-at-risk (VaR) (1)	745	875	564	576	825
Stressed VaR (SVaR)	1,056	1,266	830	841	1,226
Incremental risk charge (IRC)	390	458	279	443	467
All price risk (APR)	11	13	8	8	12
Risk not in VaR (RNIV)	286	433	179	218	429

Notes:

(1) The average, maximum and minimum positions are based on the monthly Pillar 1 model based capital requirements.

(2) All items are expressed in capital requirement terms.

Key points

- The Group's total market risk minimum capital requirement fell in 2013, largely driven by the Pillar 1 model-based contributors (primarily VaR, SVaR and RNIV). The standard method requirement also fell, driven by the interest rate position risk requirement and the specific interest rate risk of securitisation positions.
- The interest rate position risk requirement decreased, primarily due to the migration to VaR of certain trades, the maturity or closing of other trades and a reduction in unmatched positions.
- The option position risk requirement fell, driven by an increased impact of netting for some types of options. This was partially offset by the inclusion of some emerging market trades in the calculation as part of the migration of portfolios from RBS NV to RBS plc.
- The foreign currency position risk requirement increased, reflecting accelerated impairments on euro denominated assets in RBS Capital Resolution (RCR).
- Specific interest rate risk of securitisation positions: This charge decreased due to the disposal of assets, primarily in the AAA and BB rating categories, during the year.
- The decline in the VaR and SVaR based charges was driven by significant de-risking of rates exposure in RBS plc in the first half of the year. In addition, the improved capture of valuation adjustments in CEM accompanied by market data improvements drove a further reduction in these charges, particularly during the second half of the year.
- The IRC contribution to the Pillar 1 model based position risk requirement was broadly unchanged. This differs from the figures presented in the IRC table on page 333 for the reasons explained in the note to that table. For more commentary on the IRC, see that table.
- The decrease in the APR charge was due to the maturing of trades, with significant reductions in the final quarter.
- For details on the drivers of the decline in the RNIV charge, see the commentary on page 329.

Business review Risk and balance sheet management

IRC by rating and product category

The following table analyses the IRC by rating and product.

	Internal ratings (1)								Total (1) £m
	AAA £m	AA £m	A £m	BBB £m	BB £m	B £m	CCC £m		
2013									
<i>Product categories</i>									
Cash - ABS	31.4	—	—	0.2	(1.5)	0.1	—	—	30.2
Cash - regular	73.5	15.5	7.2	132.3	21.4	2.9	33.9	—	286.7
Derivatives - credit	(4.5)	(1.2)	(4.6)	(21.4)	(19.5)	(13.4)	(23.0)	—	(87.6)
Derivatives - interest rate	29.7	5.4	0.6	165.5	5.8	0.6	—	—	207.6
Other	1.7	—	—	—	—	—	—	—	1.7
Total	131.8	19.7	3.2	276.6	6.2	(9.8)	10.9	438.6	
2012									
<i>Product categories</i>									
Cash - ABS	59.2	—	—	(0.1)	(0.9)	—	—	—	58.2
Cash - regular	39.5	146.9	9.8	59.9	8.6	16.9	12.7	—	294.3
Derivatives - credit	(0.3)	(14.0)	4.0	30.4	28.4	5.6	(2.7)	—	51.4
Derivatives - interest rate	(1.0)	—	1.5	0.1	(2.1)	(0.3)	—	—	(1.8)
Other	13.8	—	—	—	—	—	—	—	13.8
Total	111.2	132.9	15.3	90.3	34.0	22.2	10.0	415.9	

Notes:

(1) Based on assessment of S&P, Moody's and Fitch ratings, where available, or on the Group's internal master grading scale.

(2) The figures presented are based on the spot IRC charge at 31 December 2013 and will therefore not agree with the IRC position risk requirement, as this is based on the 60-day average. The figures presented above are in capital terms.

Key points

- The Group's IRC was approximately £23 million or 6% higher at 31 December 2013 than one year previously. This rise was primarily due to increased delta trading activity during the year, with significant growth in positions in BBB-rated sovereign issuers including Italy and Spain.
- By product category, the largest rise was in interest rate derivatives, notably increased positions in BBB-rated Italian floating rate notes. This was partly offset by a decrease in BB and BBB-rated credit derivative products, principally CDS and Index CDS.
- A model parameter update at the end of 2013, chiefly incorporating additional rating information from the previous 12 months, produced an increased likelihood of certain counterparties being downgraded and, thus, had a moderate upward impact on the charge.

Securitisation positions in the trading book

The following table shows the capital requirement for trading book securitisation positions by rating.

	Ratings (1)							Capital deductions £m
	AAA £m	AA £m	A £m	BBB £m	Grade £m	Unrated £m	Total (1,2) £m	
2013								
Trading book securitisation charge	8.9	6.2	12.7	35.5	54.5	5.4	123.2	42.9

2012

Trading book securitisation charge	15.5	7.4	15.2	35.3	75.8	6.2	155.4	36.6	1,369.6
------------------------------------	------	-----	------	------	------	-----	-------	------	---------

Notes:

(1) Based on S&P ratings.

(2) Excludes the capital deductions.

(3) Percentage of total standardised position risk requirement.

Key point

- The charge decreased in 2013, due to the disposal of assets, primarily in the AAA and BB rating categories, during the year.

Business review Risk and balance sheet management

Market risk continued

Non-traded market risk

Risk management

The governance framework, risk management principles and appetite and limit framework applicable to the Group's management of market risk are covered by the discussion on pages 176. More specific information on the Group's management of non-traded market risk is provided below.

The Group manages non-traded market risk, separately for the three key categories: non-traded interest rate risk; non-traded foreign exchange risk; and non-traded equity risk.

Non-traded market risk positions are reported on a regular basis to divisional Asset and Liability Management Committees (ALCOs) and monthly to the Group Balance Sheet Management Committee (BSMCo), Group Asset and Liability Committee (GALCO) and the Group Board, with the exception of equity positions, which are reported quarterly to GALCO.

Interest rate risk

Non-traded interest rate risk (NTIRR) factors are grouped into the following categories:

- Repricing risk, which arises when asset and liability positions either mature (in the case of fixed-rate positions) or their interest rates reset (in the case of floating-rate positions) at different dates. These mismatches may give rise to net interest income and economic value volatility as interest rates vary.
- Yield curve risk, which arises from unanticipated changes in the shape of the yield curve, such that rates at different maturity points may move differently. Such movements may give rise to interest income and economic value volatility.
- The two risk factors above incorporate the duration risk arising from the reinvestment of maturing swaps hedging the Group's net free reserves (or net exposure to equity and other low fixed-rate or non-interest-bearing liability balances including, but not limited to, current accounts).
- Basis risk, which arises when related instruments with the same tenor are valued using different reference yield curves. Changes in the spread between the different reference curves can result in unexpected changes in the valuation of or income difference between assets, liabilities or derivative instruments. This occurs, for example, in the Group's retail and commercial portfolios, when products valued on the basis of the Bank of England base rate are funded with LIBOR-linked instruments.
- Optionality risk, which arises when customers have the right to terminate, prepay or otherwise alter a transaction without penalty, resulting in a change in the timing or magnitude of the cash flows of an asset, liability or off-balance sheet instrument. This risk primarily arises in the US mortgage business in Citizens Financial Group where long-term fixed-rate loans are the norm and prepayment penalties are rare.

Due to the long-term nature of many non-trading book portfolios and their varied interest rate repricing characteristics and maturities, it is likely that net interest income will vary from period to period, even if interest rates remain the same. New business originated in any period will alter the interest rate sensitivity of the Group if the resulting portfolio differs from portfolios originated in prior periods, depending on the extent to which exposure has been hedged.

The Group's policy is to manage the interest rate sensitivity within risk limits that are approved by the ERF and endorsed by GALCO before being cascaded to divisions through divisional ALCOs. These include, in particular, interest rate sensitivity and VaR limits.

In order to manage exposures within these limits, the Group aggregates its interest rate positions and hedges them externally using cash and derivatives - primarily interest rate swaps.

This task is primarily carried out by Group Treasury, to which all divisions except US Retail & Commercial and Markets transfer most of their NTIRR. On a monthly basis, the Group's main exposures and limit utilisations are reported to the BSMCo, GALCO and the Group Board.

Foreign exchange risk

The Group's only material non-traded open currency positions are the structural foreign exchange exposures arising from its investments in foreign subsidiaries and associates and their related currency funding. These exposures are assessed and managed by Group Treasury under delegated authority from GALCO. Group Treasury seeks to limit the potential volatility impact on the Group's Core Tier 1 ratio from exchange rate movements to pre-defined risk appetite levels set by GALCO. The sensitivity of the Group's Core Tier 1 capital to exchange rates is updated and reported to GALCO quarterly.

Foreign exchange exposures arising from customer transactions or profit and losses are sold down by divisions and businesses on a regular basis in line with Group policy.

Equity risk

Non-traded equity risk is the potential variation in the Group's income and reserves arising from changes in non-trading book equity valuations. Any such risk is identified prior to any investments and then mitigated through a framework of controls.

Investments, acquisitions or disposals of a strategic nature are referred to the Group Acquisitions and Disposals Committee (ADCo). Once approved by ADCo for execution, such transactions are referred for approval to the Group Board, Group Executive Committee (ExCo), Group Finance Director or as otherwise required. Decisions to acquire or hold equity positions in the non-trading book that are not of a strategic nature, such as customer restructurings, are taken by authorised persons with delegated authority under the Group credit approval framework.

Risk measurement

Interest rate risk

NTIRR can be measured from either an economic value-based or earnings-based perspective (or both). Value-based approaches measure the change in value of the balance sheet assets and liabilities over a longer timeframe, including all cash flows. Earnings-based approaches measure the potential short-term (generally one year) impact on the income statement of charges in interest rates.

Business review Risk and balance sheet management

The Group uses both approaches to quantify its interest rate risk: VaR as its value-based approach and sensitivity of net interest income (NII) as its earnings-based approach.

These two approaches provide different yet complementary views of the impact of interest rate risk on the balance sheet at a point in time. The scenarios employed in the NII sensitivity approach incorporate business assumptions and simulated modifications in customer behaviour as interest rates change. In contrast, the VaR approach assumes static underlying positions and therefore does not provide a dynamic measurement of interest rate risk. In addition, while the NII sensitivity calculations are measured to a 12-month horizon and thus provide a shorter-term view of the risks on the balance sheet, the VaR approach can identify risks not captured in the sensitivity analysis, in particular the impact of duration and repricing risk on earnings beyond 12 months.

Value-at-risk

The Group's standard VaR metrics - which assume a time horizon of one trading day and a confidence level of 99% - are based on interest rate repricing gaps at the reporting date. Daily rate moves are modelled using observations over the last 500 business days. These incorporate customer products plus associated funding and hedging transactions as well as non-financial assets and liabilities such as property, plant and equipment, capital and reserves. Behavioural assumptions are applied as appropriate.

The table below shows the NTIRR VaR for the Group's retail and commercial banking activities at a 99% confidence level together with a currency analysis of period end VaR.

	Average £m	Period end £m	Maximum £m	Minimum £m
2013	45	51	57	30
2012	46	21	65	20
2011	63	51	80	44
		2013 £m	2012 £m	2011 £m
Euro		4	19	26
Sterling		19	17	57
US dollar		44	15	61
Other		2	4	5

Key points

- Period end interest rate VaR was higher at 31 December 2013 than at 31 December 2012. Average VaR was relatively unchanged.
- The overall year-on-year increase in VaR mainly reflected an increase in the duration of the Group's balance sheet - that is, greater economic exposure to longer-term interest rates - as described in more detail below.
- Euro VaR fell, reflecting action taken to reduce the Group's exposure to euro-denominated fixed-rate assets.
- US dollar VaR rose, reflecting action taken by US Retail & Commercial to reduce earnings sensitivity to movements in short term dollar interest rates.
- These movements remained well within the Group's approved market risk appetite.

Sensitivity of net interest income*

To analyse earnings sensitivities, forecasts are generated using implied forward rates, projected new business volumes, mix and pricing generated using business assumptions. Based on the balance sheet at the most recent month end, two NII forecasts are calculated each month: (i) a forecast for the current full year, which incorporates actuals on a monthly basis as the year progresses; and (ii) a base-case 12 month rolling forecast.

In addition, the 12 month rolling forecast is re-run using alternative rates under various scenarios, incorporating changes in customer behaviour and business assumptions as appropriate. Variances between these scenarios are analysed to identify key drivers. These forecasts and sensitivities form part of the information used by senior management to manage the Group's NII targets.

This sensitivity analysis also incorporates assumptions relating to optionality risk.

Business review Risk and balance sheet management

Market risk continued

Non-traded market risk continued

The following table shows the sensitivity of net interest income, over the next 12 months, to an immediate upward or downward change of 100 basis points to all interest rates. In addition, the table includes the impact of a gradual 400 basis point steepening (bear steepener) and a gradual 300 basis point flattening (bull flattener) of the yield curve for tenors greater than a year.

The scenarios represent annualised interest rate stresses of a scale deemed sufficient to trigger a modification in customer behaviour. The asymmetry in the steepening and flattening scenarios reflects the difference in the expected behaviour of interest rates as they approach zero.

The reported sensitivities will vary over time due to a number of factors such as market conditions and strategic changes to the balance sheet mix and should not therefore be considered predictive of future performance.

	Euro £m	Sterling £m	US dollar £m	Other £m	Total £m
2013					
+ 100 basis point shift in yield curves	59	416	175	31	681
- 100 basis point shift in yield curves	(29)	(333)	(82)	(15)	(459)
Bear steepener					403
Bull flattener					(273)
2012					
+ 100 basis point shift in yield curves	(29)	472	119	27	589
- 100 basis point shift in yield curves	(20)	(257)	(29)	(11)	(317)
Bear steepener					216
Bull flattener					(77)
2011					
+ 100 basis point shift in yield curves	(19)	190	59	14	244
- 100 basis point shift in yield curves	25	(188)	(4)	(16)	(183)
Bear steepener					443
Bull flattener					(146)

Key points

- The Group's interest rate exposure remains asset sensitive, such that rising rates will have a positive impact on its net interest income.
- The Group's increased sensitivity to parallel shifts in the yield curve over a 12 month horizon primarily reflects the higher volume of structural hedges maturing in 2014 relative to 2013. This reflects the maturity profile of legacy hedges. If rates were to rise, these would be reinvested at higher rates, with an upward impact on net interest income. This increased sensitivity also reflects changes in underlying pricing assumptions for customer loans and deposits.
- The increased sensitivity to the steepening and flattening scenarios is also primarily driven by the maturity profile of structural hedges.

Structural hedging*

Banks generally have the benefit of a significant pool of stable, non and low interest bearing liabilities, principally comprising equity and money transmission accounts. These balances are usually hedged, either by investing directly in longer-term fixed rate assets or by the use of interest rate swaps, in order to provide a consistent and predictable revenue stream.

The Group targets a weighted average life for these economic hedges. This is accomplished using a continuous rolling maturity programme to achieve the desired profile and is primarily managed by Group Treasury. The maturity profile of the hedge aims to reduce the potential sensitivity of income to rate movements. The structural hedging programme is Group wide, capturing the position within the UK banking group and regulated subsidiaries in other jurisdictions.

Business review Risk and balance sheet management

Product hedging*

Product structural hedges are used to minimise the volatility on earnings related to specific products, primarily money transmission accounts.

The table below shows the element of net interest income associated with product hedges managed by Group Treasury, relating to the main UK banking divisions, except Wealth. The amount represents the incremental contribution of the hedge relative to LIBOR cash rates.

	2013 £m	2012 £m
Net interest income		
Product hedges		
UK Retail	306	359
UK Corporate	206	214
International Banking	73	83
Total product hedges	585	656

Key point

- The yield on product structural hedges declined in 2013 due to the low interest rate environment as maturing hedges were reinvested at lower interest rates.

Equity hedging*

Equity structural hedges are used to minimise the impact of earnings volatility on equity. These hedges contributed £0.8 billion to the UK banking divisions in 2013 (2012 - £0.8 billion), which is an incremental benefit relative to LIBOR cash rates.

Foreign exchange risk

The table below shows the Group's structural foreign currency exposures.

	Net assets of overseas operations £m	RFS MI £m	Net investments in foreign operations £m	Net investment hedges £m	Structural foreign currency exposures pre-economic hedges £m	Economic hedges (1) £m	Residual structural foreign currency exposures £m
2013							
US dollar	16,176	—	16,176	(1,581)	14,595	(3,808)	10,787
Euro	6,606	9	6,597	(190)	6,407	(2,226)	4,181
Other non-sterling	4,233	372	3,861	(3,185)	676	—	676
	27,015	381	26,634	(4,956)	21,678	(6,034)	15,644
2012							
US dollar	17,313	1	17,312	(2,476)	14,836	(3,897)	10,939
Euro	8,903	2	8,901	(636)	8,265	(2,179)	6,086

Note:

(1) Economic hedges represent US dollar and euro preference shares in issue that are treated as equity under IFRS and do not qualify as hedges for accounting purposes.

Business review Risk and balance sheet management

Market risk continued

Non-traded market risk continued

Key points

- The Group's structural foreign currency exposure at 31 December 2013 was £21.7 billion and £15.6 billion before and after economic hedges, respectively, both £2.3 billion lower than at 31 December 2012. Movements in structural foreign currency exposure are significantly driven by movements in net assets of overseas operations.
- Net assets of overseas operations declined by £4.0 billion largely due to increased impairments in Ulster Bank Group and capital restructuring in US Retail & Commercial. Sterling strength also contributed approximately £0.5 billion to the reduction.
- Net investment hedges were reduced broadly in line with the reduction in net investments.
- Economic hedges remained broadly unchanged.
- Changes in foreign currency exchange rates affect equity in proportion to structural foreign currency exposure. A 5% strengthening in foreign currencies against sterling would result in a gain of £1.1 billion in equity (2012 and 2011 - £1.3 billion), while a 5% weakening would result in a loss of £1 billion in equity (2012 and 2011 - £1.2 billion).

Equity risk

Equity positions are carried at fair value on the balance sheet based on available market prices where possible. In the event that market prices are not available, fair value is based on appropriate valuation techniques or management estimates.

Refer to the table below for the balance sheet carrying value of the Group's non-traded book equity positions.

	2013 £m	2012 £m	2011 £m
Exchange-traded equity	368	472	576
Private equity	621	632	674
Other	623	799	1,094
	1,612	1,903	2,344

The exposures may take the form of listed and unlisted equity shares, linked equity fund investments, private equity and venture capital investments, preference shares classified as equity or Federal Home Loan Bank stock. Refer to the table below for the net realised and unrealised gains from these positions:

	2013 £m	2012 £m	2011 £m
Net realised gains arising from disposals	48	89	150
Unrealised gains included in Tier 1 or 2 capital	232	168	235

Note:

(1) Includes gains or losses on available-for-sale instruments only.

Cumulative gains on equity securities designated at fair value through profit or loss but not held for trading purposes were £96 million for December 2013 (2012 - cumulative gains of £184 million).

Business review Risk and balance sheet management

VaR for selected AFS non-trading portfolios

Available-for-sale portfolios in Markets and Non-Core, other than the structured credit portfolio, do not typically form part of the structural interest rate framework due to the short-term nature of the interest rate risks they carry. They are thus monitored and managed through the same framework and using the same metrics as portfolios in the trading book.

The table below details VaR for these portfolios.

	2013				2012				2011			
	Average £m	Period end £m	Maximum £m	Minimum £m	Average £m	Period end £m	Maximum £m	Minimum £m	Average £m	Period end £m	Maximum £m	Minimum £m
Interest rate	2.7	2.4	4.8	1.9	6.9	4.5	10.7	4.1	8.8	9.9	11.1	5.7
Credit spread	8.5	4.4	13.3	4.4	10.5	8.8	15.4	7.3	18.2	13.6	39.3	12.1
Currency	1.3	1.0	2.8	1.0	3.0	1.3	4.5	1.3	2.1	4.0	5.9	0.1
Equity	0.2	0.1	0.3	—	1.7	0.3	1.9	0.3	2.1	1.9	3.1	1.6
Diversification (1)		(2.9)				(5.4)				(13.6)		
Total	9.2	5.0	13.6	5.0	11.8	9.5	18.3	8.5	19.7	15.8	41.6	13.4
Core	8.7	5.0	12.7	5.0	11.3	7.5	19.0	7.1	19.3	15.1	38.9	13.5
Non-Core	2.2	0.4	3.4	0.4	2.5	3.4	3.6	1.6	3.4	2.5	4.3	2.2
CEM	0.8	0.1	1.1	0.1	1.0	1.0	1.1	0.9	0.4	0.9	0.9	0.3
Total (excluding CEM)	9.0	5.1	13.3	5.0	11.5	9.4	17.8	8.2	19.7	15.5	41.4	13.7

Notes:

(1) The Group benefits from diversification as it reduces risk by allocating positions across various financial instrument types, currencies and markets. The extent of the diversification benefit depends on the correlation between the assets and risk factors in the portfolio at a particular time.

(2) The table above excludes the structured credit portfolio and loans and receivables.

Key point

- The total, Core and credit spread period end VaR were lower in 2013 than in 2012. VaR initially increased in Q1 2013 reflecting changes to the call assumptions on some Dutch residential mortgage-backed securities, thereby extending their weighted average life. This increase was offset during Q3 as the issuer bought back some of these securities, resulting in a net decrease in VaR for the year as a whole. The Non-Core period end and average VaR were lower in 2013 than in 2012. VaR steadily declined during 2013, due to de-risking and divestment within Non-Core.

Business review Risk and balance sheet management

Market risk continued

Non-traded market risk continued

Structured credit portfolio

The structured credit portfolio is held in Non-Core. The risk in this portfolio is not managed using VaR because the Group believes this is not an appropriate tool for a non-trading book portfolio comprising illiquid debt securities. These assets are reported on a drawn notional and fair value basis, and managed on a third-party asset and risk-weighted assets basis. Drawn notional represents the amount of cash granted against debt securities received as part of a structured credit transaction. The table below shows the open market risk in the structured credit portfolio.

	Drawn notional					Fair value				
	CDOs (1) £m	CLOs (2) £m	MBS (3) £m	Other ABS (4) £m	Total £m	CDOs (1) £m	CLOs (2) £m	MBS (3) £m	Other ABS (4) £m	Total £m

>10 years	2,180	442	464	593	3,679	766	371	291	347	1,775
	2,212	982	781	1,179	5,154	796	860	514	868	3,038

Notes:

- (1) Collateralised debt obligations.
- (2) Collateralised loan obligations.
- (3) Mortgage-backed securities.
- (4) Asset-backed securities.

Key point

- The total notional and fair value both decreased 67%, to £664 million and £480 million respectively. This was driven by the sale of underlying assets across all categories, in line with Non-Core strategy.

Regulatory capital

The Group holds capital for two types of non-traded market risk exposures: NTIRR and non-trading book foreign exchange.

Capital for the Group's NTIRR is captured under the Pillar 2A process. This is calculated by considering the potential impact on the economic value of the Group over a one year horizon. The four main sources of NTIRR - repricing, yield curve, basis and optionality risks - are captured in the calculation.

Pillar 1 capital must be held for non-trading book foreign exchange exposures, as outlined under BIPRU 7.5.3. The Group does not hold capital for its structural foreign exchange exposures as these are excluded from the calculations as outlined under BIPRU 7.5.4.

The Group's non-traded equity risk is captured in credit risk RWAs.

The Group's capital calculations under ICAAP are also used for economic capital purposes.

Country risk

Definition

Country risk is the risk of losses occurring as a result of either a country event or unfavourable country operating conditions. As country events may simultaneously affect all or many individual exposures to a country, country event risk is a concentration risk. For other types of concentration risks such as product, sector or single name concentration, refer to the Credit risk section.

External environment*

Macroeconomic conditions stabilised in 2013 with signs of improvement in most mature economies. The US showed the strongest improvement, with private investment picking up, the housing sector continuing to strengthen, and unemployment falling. This led the Federal Reserve to announce in May plans to begin normalising monetary policy. In December it announced it would start reducing quantitative easing. This resulted in some volatility in higher-yield asset markets, particularly emerging markets, where those with the largest external financing needs saw capital outflows, currency depreciation and stock market losses.

In the second half of the year, investor concerns were heightened by the risk that the US federal debt ceiling increase would not be passed on time and that the government might delay debt payments. Short-term political solutions to these issues were found, though with further progress needed in 2014.

The eurozone region as a whole remained in recession throughout the year, but signs of recovery were evident by the second half of the year. Germany led, but the periphery also showed notable signs of stabilisation, with Ireland, Spain and Portugal all growing in quarter-on-quarter terms in the last quarter of 2013. Eurozone monetary policy support underpinned investor confidence, while progress was made in developing a banking union that should reduce the risk of a repeat of the financial crisis over the longer term. Nevertheless, France and Italy underperformed peers.

In Japan, an economic reform strategy combined with large monetary stimulus contributed to currency depreciation, a reduction in deflationary expectations and strong growth in the first half of the year. However, momentum slowed in the second half of the year.

Many emerging market economies entered 2013 with high growth rates. While most were in substantially better shape than in previous crises, some had built up significant imbalances during years of strong capital inflows. As economic conditions in mature markets, particularly the US, improved in the course of the year, markets began to anticipate that monetary policies would normalise.

This led to a sharp round of capital outflows, particularly from equity markets, in the second quarter of 2013. Currency depreciations in a number of large emerging economies followed, especially in those with significant current account deficits. Among the better rated economies, India, Brazil, Indonesia, South Africa and Turkey, were particularly affected. To stem the outflow of foreign capital and limit the impact on domestic asset markets, some countries, including India, started tightening monetary policy and accelerated financial sector reforms. Some countries with sizeable accumulated reserve assets, including China and Russia, were able to use their reserves to ease the pressure on their currencies.

*unaudited

Outlook

Further strengthening of economic growth in advanced economies is likely in 2014, but uncertainty over the impact of "tapering" is likely to contribute to further volatility in asset prices across most regions. The US is expected to perform quite strongly, with the eurozone also likely to continue its uneven recovery, although in both cases key areas of the economy will remain fragile. A more challenging year for emerging economies is expected as net capital inflows decline, resulting in more pronounced market volatility and differentiation. Further policy tightening is likely and growth rates are set to slow, especially in the weakest markets.

Sources of risk

Country risk has the potential to affect all parts of the Group's portfolio across wholesale and retail activities that are directly or indirectly linked to the country in question.

It arises from possible economic or political events in each country to which the Group has exposure, and from unfavourable conditions affecting daily operations in a country.

Country events may include a sovereign default, political conflict, banking crisis or deep and prolonged recession leading to possible counterparty defaults. Transfer or convertibility restrictions imposed by a country's government to stem the loss of foreign currency reserves may temporarily prevent counterparties from meeting their payment obligations. Major currency depreciation may also affect a customer's income or debt burden, leading to default.

Unfavourable operating conditions may include the risk that a weak or creditor unfriendly legal system within a country makes it difficult for the Group to recover its claims in the event of customer default. An unreliable or unstable political system may lead to sudden compliance or reputational issues for the Group, or even expropriation without proper compensation.

Governance*

The Group's country risk framework is set by the Executive Risk Forum (ERF). This body delegates authority to the Group Country Risk Committee (GCRC) to decide on country risk matters, including risk appetite, risk management strategy and framework, risk exposure and policy, as well as sovereign ratings, sovereign loss given default rates and country Watchlist colours. The GCRC, which is chaired by the Head of Global Country Risk (GCoR) and includes representatives of divisions with country risk exposures, can escalate issues when necessary to the ERF.

For further information on governance, refer to the Risk governance section on page 175.

Business review Risk and balance sheet management

Risk management*

Risk appetite setting

Country risk appetite was re-set for all countries based on the enhanced country risk appetite framework, introduced in late 2012. This framework has “top-down” and “bottom-up” components.

The “top-down” component is guided by the Group’s global risk appetite; each country’s internal sovereign rating and its strategic importance to the Group; the composition of the Group’s portfolio, as defined by tenors and clients; the funding profile and an assessment of the potential for losses arising from possible key country risk events. This component provides a clear structure for the consideration of downside scenarios, the identification of countries that pose material concentration risks to the Group, as well as possible management actions.

“Bottom-up” analysis includes risk/return performance together with reputational and regulatory risk.

Countries Watchlisted Amber (refer to Risk monitoring, reporting and control below) are monitored closely. Appetite for countries Watchlisted Red is limited to short-term business in areas such as trade finance and derivatives, unless the country is deemed a strategic priority country.

The actual country limits and medium-term sub-limits, with allocations to each division, are set by the GCRC (or the ERF above certain benchmark levels). The divisions manage their exposures within their country limit allocations. Divisions may agree re-allocations between themselves, and may further assign sub-allocations to business units or product groups in the division.

Country limits are set for almost all countries. The UK (and related European special territories of Guernsey, Jersey, the Isle of Man and Gibraltar) is an exception, given its home country status. The US is the other exception because of the specific local risk management structure, the size of the local portfolio and corresponding role in Group-wide risk management, together with the country’s strong ratings.

Risk monitoring, reporting and control

GCoR monitors and reports on Group-level exposures to all countries, and follows up with the divisions in the event of Group-level or divisional limit excesses. GCoR has delegated authority up to specified levels to decide on country limit increases and any such decision must be reported to the GCRC. Persistent excesses are escalated to the GCRC.

A country risk Watchlist process identifies emerging issues and facilitates the development of mitigation strategies. Coverage of the country Watchlist process was extended in 2013 to include all countries to which the Group has exposure.

A monthly report that summarises and discusses the Group’s key country risks and trends is produced for the Group Board.

Detailed portfolio reviews are conducted to ensure that country portfolio compositions remain aligned with the Group’s country risk appetite, in light of economic and political developments.

Changes in sovereign ratings or country Watchlist status trigger review of appetite and are referred to GCRC for discussion.

Risk measurement*

In this section, country exposure includes wholesale and retail on-balance sheet exposure (drawn amounts under lending facilities, mark-to-market derivatives positions and issuer-risk debt securities positions in the banking book and trading book) together with off-balance sheet exposure (contingent obligations and undrawn commitments).

The scope of this country exposure concept is broader than the scope of the credit risk assets concept used in the Credit risk section, as the latter does not include debt securities or securities financing transactions.

The Group also estimates its funding mismatches at risk of redenomination in vulnerable eurozone countries. These mismatches are estimated in terms of potential for additional loss rather than amounts owed and are thus determined starting from the balance sheet exposure as defined on page 344 and excluding relevant offsetting positions. The latter include exposures at low risk of redenomination, as identified through consideration of the relevant documentation, particularly the currency of exposure, governing law, court of jurisdiction, precise definition of the contract currency (for euro facilities), and location of payment. The Group also deducts offsets for provisions taken and liabilities that would be expected to re-denominate at the same time.

Risk mitigation*

Part of the Group’s exposure is mitigated by guarantors or insurers (including export credit agencies), credit default swap (CDS) protection providers, or cash or non-cash collateral (such as commercial or residential real estate) in third countries, which will not be directly affected by a country event in the obligor’s country. For further details on credit mitigation instruments, refer to the Credit risk section.

CDS contracts are used by the Group to hedge either entire portfolios or specific individual exposures. These transactions are subject to regular margining, which usually takes the form of cash collateral. For European peripheral sovereigns, credit protection is purchased from a number of major European banks, mostly outside the country of the reference entity. In a few cases where protection was bought from banks in the country of the reference entity, giving rise to wrong-way risk, this risk is mitigated through specific collateralisation and monitored weekly.

Business review Risk and balance sheet management

Country risk continued

Basis of reporting

The tables in this section show the Group's exposure at 31 December 2013, 2012 and 2011. The numbers are reported by country of operation of the obligor, except exposures to governments and individuals which are shown by country of residence.

The country of operation is the country where the main operating assets of a legal entity are held, or where its main cash flows are generated, taking account of the entity's dependency on subsidiaries' activities. Previously, exposures in this section were reported by country of incorporation. The new basis provides a better reflection of the country risks taken by the Group and is more in line with internal risk management. Prior years' information has been revised.

Countries shown are those which had ratings of A+ or below from Standard and Poor's, Moody's or Fitch at 31 December 2013, where the Group's balance sheet exposure (as defined in this section) to counterparties operating (or individuals residing) in them exceeded £1.0 billion. Also included are selected eurozone countries.

The exposures are stated before taking into account risk mitigants such as guarantees, insurance or collateral (with the exception of reverse repos) which may have been put in place to reduce or eliminate exposure to country risk events. The tables do separately show the Group's CDS positions, as the Group may be either a net buyer or a net seller of protection. The CDS positions for 2013 and 2012 are by country of operation, those for 2011 are by country of incorporation.

Exposures relating to ocean-going vessels are not included as they cannot be meaningfully assigned to specific countries from a country risk perspective.

Definitions

Lending - Comprises gross loans and advances, including cash balances and risk elements in lending (REIL - refer to page 554 for definition).

Debt securities - Comprise securities classified as available-for-sale (AFS), loans and receivables (LAR), held-for-trading (HFT) and designated as at fair value through profit or loss (DFV). All debt securities other than LAR securities are carried at fair value. LAR debt securities are carried at amortised cost less impairment. HFT debt securities are presented as gross long positions (including DFV securities) and short positions per country. Impairment losses and exchange differences relating to AFS debt securities, together with interest, are recognised in the income statement. Other changes in the fair value of AFS securities are reported in AFS reserves, which are presented gross of tax.

Derivatives (net) - Comprise the mark-to-market (mtm) value of such contracts after the effect of legally enforceable netting agreements in line with the corresponding regulatory capital models, but before the effect of collateral.

Securities financing transactions (SFT) (net) - Comprise the mtm value of the cash and securities that are due to the Group at a future date under repurchase agreements, reverse repurchase agreements, stock borrowing, stock lending and equity financing transactions, after the effect of collateral intrinsic to the transaction and legally enforceable netting agreements. Counterparty netting is applied as per the corresponding regulatory capital approach. Additional collateral called to offset mtm positions (variation margin) is not included.

In addition and as memorandum items, the tables show derivatives gross of netting, and SFT gross of netting and collateral intrinsic to the transaction.

Balance sheet - Comprises lending, debt securities, derivatives (net) and SFT (net) exposures, as defined above.

Off-balance sheet - Comprises letters of credit, guarantees, other contingent obligations and legally committed undrawn facilities.

Total - Comprises balance sheet and off-balance sheet exposure, as defined above.

Credit default swaps (CDSs) - Under a CDS contract, the credit risk on the reference entity is transferred from the buyer to the seller. The column 'fair value' (or 'mtm value') represents the balance sheet carrying value of the resulting exposure. The mtm value of CDSs is included in derivatives against the counterparty of the trade, as opposed to the reference entity. The notional is the par value of the credit protection bought or sold and is included against the reference entity of the CDS contract.

The column 'CDS notional less fair value' represents the net effect on exposure should the CDS contracts be triggered by a credit event, assuming a zero recovery rate on the reference exposure. This net effect would be the increase in exposure arising from sold positions netted against the decrease arising from bought positions. For a sold position, the change in exposure equals the notional less the fair value amount; this represents the amount the Group would owe to its CDS counterparties if the reference entity defaulted. Positive recovery rates would tend to reduce the gross components (increases and decreases) of those numbers.

Exposures relating to credit derivative product companies and related hedges as well as Nth-to-default basket swaps have been excluded, as they cannot be meaningfully attributed to a particular reference entity or country. Exposures to CDPCs are disclosed on page 299.

Government - Comprises central, regional and local government.

Eurozone periphery - Ireland, Spain, Italy, Portugal, Greece and Cyprus.

Other eurozone - Austria, Estonia, Finland, Malta, Slovakia and Slovenia.

Asset quality (AQ) - Refer to Asset quality on page 236.

Refer to page 293 for country analysis of equity shares.

Key points*

- During 2013, the US dollar depreciated by 2.3% against sterling, whereas the euro appreciated by 2.2%, impacting exposures.
- Balance sheet and off-balance sheet exposures to nearly all countries declined across all broad product categories. This was because the Group maintained a cautious stance and many clients reduced debt levels. Non-Core lending declined in most countries, particularly in Spain, the Netherlands, France and Romania, reflecting the Group's risk reduction strategy.
- Most of the Group's country risk exposure was in International Banking (primarily trade facilities, other lending and off-balance sheet exposure to corporates and financial institutions); Markets (principally derivatives and securities financing transactions with financial institutions, and HFT debt securities); Ulster Bank (mostly lending to consumers and corporates in Ireland); and Group Treasury (largely cash balances at central banks and AFS debt securities including Spanish cedulas).
- Total eurozone - balance sheet exposure declined by £49.2 billion or 30% to £114.2 billion, caused mostly by significant reductions in liquidity held with the Bundesbank and in derivatives exposure to banks. Most of the latter reductions related to counterparties in the Netherlands, Germany and France, and were largely due to the sale of a part of the Group's CDS positions.

Business review Risk and balance sheet management

Country risk continued

Country exposure continued

- Eurozone periphery - despite the appreciation of the euro against sterling, balance sheet exposure decreased to £52.9 billion, a reduction of £6.6 billion or 11%, in nearly all countries, as follows:
 - Ireland - exposure decreased by £2.1 billion to £37.0 billion, in all broad product categories. Residential and commercial real estate lending declined slightly to £16.9 billion and £10.3 billion, respectively. Provisions increased by £2.8 billion, most of which related to corporate lending.
 - Spain - Group Treasury's holdings of covered bonds (cedulas) decreased by £0.7 billion due to sales in improved market conditions. Corporate lending decreased by £1.3 billion to £2.9 billion, with commercial real estate lending more than halving, largely as a result of disposals in Non-Core, to £0.8 billion.
 - Italy - the £1.3 billion decrease in exposure to £5.2 billion reflected reductions in lending and derivatives to corporate clients. Net HFT debt exposure fluctuates as the Group is a market-maker in Italian government bonds. Off-balance sheet exposure to corporates and non-bank financial institutions also declined, by £0.7 billion.
 - Portugal - exposure declined further by £0.4 billion to £0.9 billion. The remaining exposure mainly consisted of corporate lending to a few large highly creditworthy clients and collateralised derivatives trading with the largest local banks.
 - Greece - exposure decreased by £0.2 billion to £0.4 billion, caused by reductions in lending and derivatives. The remaining exposure comprised mostly of collateralised derivatives exposure to banks and corporate lending, including exposure to local subsidiaries of international companies.
 - Cyprus - exposure increased slightly to £0.2 billion, most of which was covered by parental and export credit agency guarantees from elsewhere.
- Germany - balance sheet exposure decreased from £48.4 billion to £23.9 billion principally owing to a £16.4 billion reduction in cash balances held with the central bank. AFS government bonds decreased by £4.1 billion in line with treasury management strategies. Lending to corporate clients decreased by £1.1 billion, principally in the commercial real estate, oil and gas, and media sectors.
- Netherlands - balance sheet exposure decreased from £23.6 billion to £16.1 billion. AFS debt securities issued by non-bank financial institutions declined by £2.8 billion, primarily following repayments. Corporate lending decreased by £0.8 billion, primarily in commercial real estate. Off-balance sheet exposure to corporate clients decreased by £1.1 billion, mainly in the telecommunications, retail and food and consumer sectors.
- France - balance sheet exposure decreased from £19.7 billion to £14.0 billion. The net long HFT position in government bonds declined by £1.9 billion in the course of normal trading in the rates business.
- Japan - balance sheet exposure decreased by £6.0 billion to £5.3 billion. Net HFT and AFS government bonds fell by £5.1 billion and £1.5 billion, respectively, and derivatives exposure, largely to banks, decreased by £0.5 billion. This reflected depreciation of the yen, lower trading flows and a reduction in Japanese bonds held as derivatives collateral. Lending to the central bank increased by £0.8 billion.
- China - lending to banks increased by £1.8 billion to £2.8 billion. Corporate lending rose by £0.5 billion to £1.5 billion, reflecting customer demand. Derivatives exposure to public sector entities decreased by £0.5 billion to £0.4 billion owing to fluctuations in short-term hedging by clients.
- India - balance sheet exposure decreased by £1.3 billion to £3.8 billion, driven largely by reductions in lending to banks and to the telecommunications and oil and gas sectors.
- CDS positions - the Group approximately halved its European CDS positions by consolidating its derivatives portfolio through contract terminations to reduce risks and capital requirements in line with strategic plans, while maturities reduced the positions further. This resulted in major reductions in the gross notional value of CDS protection bought and sold. Net bought protection in terms of CDS notional less fair value, also fell by £1.2 billion to £5.6 billion, with reductions particularly in the Netherlands and France.
- Funding mismatches - the estimated funding mismatch at risk of redenomination for Ireland was £6.5 billion at the end of the year, falling from £9.0 billion a year before due to an increase in provisions and a reduction in assets. The mismatch for Spain was £6.5 billion, up from £4.5 billion as the Group reduced its local funding (and associated cost) given the improved outlook for the country. The net position for Italy fell to £0.5 billion from £1.0 billion. The net positions for Portugal, Greece and Cyprus were all minimal. Overall, perceived risks of redenomination events in the eurozone declined considerably in 2013.

Conduct risk

Definition

Conduct risk is the risk that the behaviour of the Group and its staff towards its customers, or in the markets in which it operates, leads to reputational damage or financial loss or both. The damage or loss could be as a result of breaches of regulatory rules or laws, or of failing to meet customers' or regulators' expectations of the Group.

Sources of risk

Activities through which conduct risk may arise include: product design; marketing and sales; complaint handling; staff training and competence; and handling of confidential and non-public price sensitive information.

Governance structure

Effective conduct risk management is a commercial imperative for the Group: customers, clients and counterparties demand it as a precursor to building trust. It also reflects the developing regulatory environment in the UK, with the establishment of the Financial Conduct Authority, and the increasing focus of overseas regulators on conduct risk.

The Group's compliance functions are responsible for the appropriate management of conduct risk, including Anti-Money Laundering (AML); Sanctions and Terrorist Financing (STF); and Anti-Bribery and Corruption (ABC). In doing so, they design, implement and maintain a management framework, the objective of which is the consistent identification, assessment, monitoring, and reporting of conduct risk.

A conduct risk governance structure, within which all divisions are represented by senior business leaders, provides clarity on roles, responsibilities and accountabilities for conduct risk. Key elements of the governance structure are set out below.

The Conduct Risk Committee: Operating under delegated authority from the Executive Risk Forum (ERF), it has responsibility for the governance, leadership and strategic oversight of the Group-wide conduct agenda. It can escalate significant issues to the ERF and the Board Risk Committee. (Refer to page 176).

The Compliance Management Team: a sub-committee of the Conduct Risk Committee, it has the authority to act on conduct risk matters such as: risk appetite; risk management strategy and framework; and risk profile and policy.

The Board receives updates on conduct risk via monthly risk reports.

Risk management and measurement

The Group has established a defined and measurable appetite for conduct risk to ensure commercial decisions take into account any conduct risk implications.

Placing conduct risk at the centre of the Group's philosophy promotes a customer oriented culture that informs and challenges business strategy, delivers fair outcomes, and promotes behaviours consistent with regulatory and legal standards across its retail and wholesale markets.

Throughout 2013, the foundations of the Group's conduct risk framework continued to be delivered. Key milestones included:

- The completion of the phased roll-out of the Group's conduct risk policies, using policy chapters to explain Group-wide conduct responsibilities;
- The development and delivery of awareness initiatives and targeted conduct risk training for each policy to assist businesses and executives in embedding the understanding of conduct risk, and to provide the necessary clarity for staff on their conduct risk requirements;
- Completion of Group-wide gap analysis and benchmarking exercise with respect to each of the conduct risk policy chapters, recording identified issues and developing and implementing remediation plans;
- Establishing a central assurance function in Group Conduct and Regulatory Affairs, covering all elements of the Group's conduct risk policies, including AML, STF and ABC; and
- Establishing effective leadership and a supporting governance framework, with the participation of all divisions, to oversee the Group's conduct agenda.

In 2013, the Group continued to focus on strengthening the capabilities of its compliance functions, at both Group and divisional level through investment in training. To do so, it facilitated training on conduct risk, primarily through computer-based Group Policy Learning modules. Each module addresses the regulatory content of relevant Group Policy Standards.

Other risks* continued

Conduct risk continued

Risk mitigation

Assurance and monitoring activities are essential to ensure that the Group can demonstrate compliance with existing rules and regulations, assess whether it is managing its conduct risks appropriately, and determine whether key controls are effective. In 2013, the Group Conduct and Regulatory Affairs assurance function provided Group-wide assurance over specific compliance topics, as well as thematic process reviews.

Pension risk

Definition

Pension risk is the risk arising from contractual or other liabilities to, or with respect to, the Group's pension schemes, whether established for its employees or for those of a related company or otherwise. It also means the risk that the Group may make payments or other contributions to, or with respect to, a pension scheme because of a moral obligation, or because it considers that it needs to do so for some other reason.

Sources of risk

The Group has exposure to pension risk through its defined benefit schemes worldwide. The five largest schemes, which represent around 96% of the Group's pension liabilities, are the Royal Bank of Scotland Group Pension Fund ('main scheme'), the Ulster Bank Pension Scheme (Republic of Ireland), the Ulster Bank Pension Scheme, the Royal Bank of Scotland Americas Pension Plan and the Royal Bank of Scotland International Pension Trust. The main scheme is the principal source of pension risk.

Pension scheme liabilities vary with changes in long-term interest rates and inflation as well as with pensionable salaries, the longevity of scheme members and changes in legislation. Meanwhile, pension scheme assets vary with changes in interest rates, inflation expectations, credit spreads, exchange rates and equity and property prices. The Group is exposed to the risk that the market value of the schemes' assets - together with future returns and any additional future contributions - becomes insufficient to meet liabilities as they fall due. In such circumstances, the Group could be obliged (or may choose) to make additional contributions to the schemes or be required to hold additional capital to mitigate this risk.

Governance

The main scheme operates under a trust deed. The trustee is responsible for the investment of the main scheme's assets which are held separately from the assets of the Group. The Group and the trustee must agree on the plan to fund the main scheme. The corporate trustee, RBS Pension Trustee Limited, is a wholly owned subsidiary of The Royal Bank of Scotland plc. The trustee board currently comprises six directors selected by the Group and three directors nominated by members.

The Pension Risk Committee, acting as a sub-committee of the Group Asset and Liability Management Committee (GALCO), considers the Group's view of pension risk. The Pension Risk Committee considers mechanisms that could potentially be used for managing risk within the funds as well as financial strategy and employee welfare implications. It also reviews actuarial assumptions from a sponsor perspective as appropriate. The Pension Risk Committee is a key component of pension risk management and serves as a formal link between the Group and the Investment Executive, which acts on behalf of the trustee of the Group's largest pension schemes, where risk management, asset strategy and financing issues are discussed. The Investment Executive also consults with the Group to obtain its view on the appropriate level of risk within the pension fund.

For further information on the Group's risk governance, see page 176.

Risk management

Risk appetite and investment policy for the schemes are defined by the trustee with quantitative and qualitative input from actuaries and investment advisers.

As the sponsor of its defined benefit pension schemes, the Group manages the risk it faces using a pension risk management framework. This encompasses risk monitoring, modelling, stress testing and reporting. As sponsor, the Group maintains an independent view of the risk inherent in its pension funds. In addition to the scrutiny provided by the Pension Risk Committee, the Group also achieves this through regular pension risk monitoring and reporting to the Group Board, Group Executive Committee and Group Board Risk Committee on the material pension schemes that the Group has an obligation to support.

Risk measurement

Pension risk reporting is submitted to the Group Board monthly in the RBS Risk Management Report. The report includes an assessment of the sensitivities of the Group's pension schemes to interest rates and inflation, a breakdown of the assets by class, and measurement of the overall deficit or surplus position based on the latest data.

Throughout 2013, various pension risk stress-testing initiatives were undertaken, focused both on internally defined scenarios and on scenarios to meet integrated PRA stress testing requirements.

Risk mitigation

The trustee has taken measures partially to mitigate inflation and interest rate risks both by investing in suitable physical assets and by entering into inflation and interest rate swaps. The main scheme also uses derivatives to manage the allocation of the portfolio to different asset classes and to manage risk within asset classes. The assets of the main scheme, which represent 85% of Group pension plan assets at 31 December 2013, are invested in a diversified portfolio of quoted and private equity, government and corporate fixed interest and index-linked bonds, and other assets including property and hedge funds.

*unaudited

Business review Risk and balance sheet management

Risk is also mitigated in other ways. In October 2006, the main scheme was closed to new employees. In November 2009, the Group confirmed that it was making changes to the main scheme and a number of other defined benefit schemes including the introduction of a limit of 2% per annum (or the annual change in the Consumer Price Index, if lower) to the amount of any salary increase that will count for pensionable purposes.

In October 2012, the Group confirmed that it was offering employees the choice between an increase to the charge made through its flexible benefits programme for membership of the main scheme by 5% of salaries or an increase in their Normal Pension Age from 60 to 65 in respect of service from October 2012 with no additional charge.

The table below shows the sensitivity of the Main scheme's assets and liabilities (measured according to IAS 19 'Employee Benefits') to changes in interest rates and equity values at the year end, taking account of the current asset allocation and hedging arrangements.

	Change in value of assets £m	Change in value of liabilities £m	Increase in net pension obligations £m
At 31 December 2013			
Fall in nominal swap yields of 0.25% at all durations with no change in credit spreads or real swap yields	217	333	(116)
Fall in real swap yields of 0.25% at all durations with no change in credit spreads or nominal swap yields	595	895	(300)
Fall in credit spreads of 0.25% at all durations with no change in nominal or real swap yields	60	1,245	(1,185)
Fall in equity values of 10%	(894)	—	(894)
At 31 December 2012			
Fall in nominal swap yields of 0.25% at all durations with no change in credit spreads or real swap yields	76	255	(179)
Fall in real swap yields of 0.25% at all durations with no change in credit spreads or nominal swap yields	578	995	(417)
Fall in credit spreads of 0.25% at all durations with no change in nominal or real swap yields	71	1,261	(1,190)
Fall in equity values of 10%	(862)	—	(862)
At 31 December 2011			
Fall in nominal swap yields of 0.25% at all durations with no change in credit spreads or real swap yields	106	200	(94)
Fall in real swap yields of 0.25% at all durations with no change in credit spreads or nominal swap yields	557	911	(354)
Fall in credit spreads of 0.25% at all durations with no change in nominal or real swap yields	104	1,118	(1,014)
Fall in equity values of 10%	(935)	—	(935)

Business review Risk and balance sheet management

Other risks* continued

Operational risk

Definition

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems, or external events.

It arises from day-to-day operations and is relevant to every aspect of the Group's business.

Sources of risk

Operational risk may arise from a failure to manage appropriately the Group's operations, transactions and security. It may arise from other forms of human error, an inability to deliver change on time or adequately, or from the unavailability of technology services, or the loss of customer data. It could also result from a liability or a loss arising from a defective transaction. A failure to take appropriate measures to protect assets or to take account of changes in law, are sources of risk. Fraud and theft are important sources of operational risk, as is the impact of natural and man-made disasters.

Governance structure

The Group operates with an independent Operational Risk Second Line of Defence function comprising both a central team and teams based in each business. The function plays a leadership role by providing a forward-looking, value-adding capability, working with the business to achieve a robust risk management culture across the bank. The Group Head of Operational Risk reports to the Group Chief Risk Officer.

The Operational Risk function is responsible for the design and maintenance of the operational risk framework. The Operational Risk Policy and associated standards are incorporated in the Group Policy Framework and provide direction for the consistent identification, assessment, management, monitoring and reporting of operational risk.

The Operational Risk Executive Committee, which is a sub-committee of the Group Risk Committee, acts on all operational risk matters. It is responsible for identifying and managing emerging operational risks, and for reviewing and monitoring operational risk profile strategies and frameworks across the Group, ensuring they are in line with risk appetite.

Risk management

Risk appetite

The Group's operational risk appetite statement is agreed by the Group Board. It comprises a number of specific measures of risk, including operational risk capital adequacy, earnings volatility based on the relationship between operational risk losses and the Group's estimated gross income. It also includes metrics covering control environment performance. Further refinement of the appetite measure is planned for 2014.

To confirm that the Group operates within the set risk appetite, the high-level statement is aligned with the strategic risk objectives of the Group. Group-level measures have been set and cascaded to divisions and supported by additional tolerances and key indicators.

Operational risk appetite measures and frameworks are reviewed annually at the ERF.

The objective of operational risk management is not to remove operational risk altogether, but to manage it to an acceptable level, taking into account the cost of minimising the risk against the resultant reduction in exposure. Strategies to manage operational risk include avoidance, transfer, acceptance and mitigation by controls.

The operational risk cycle comprises four stages:

- Identification of risks
- Assessment or measurement of the scale of risks
- Management or control of risks to prevent their recurrence or minimise the potential impact
- Monitoring and reporting of risks.

Although the operational risk tools encompass all stages of the risk cycle, they can be broadly categorised as follows:

Identification and assessment

Risk assessments are used to identify and assess material operational risks and key controls across all business areas. To provide a consistent categorisation of risks and controls across the Group and to support identification of risk concentrations, all risks and controls are mapped to the Group-wide risk taxonomy and the control catalogue.

The process is designed to confirm that risks are effectively managed and prioritised in line with the stated risk appetite. Controls are tested frequently to verify and validate that they remain fit for purpose and operate effectively. Risk assessments are typically conducted in a workshop environment, bringing together subject matter experts and key stakeholders from across the divisions and key functions.

In 2013, the focus was on the continued implementation and embedding of risk assessments across the Group. This included the strengthening of links between risk assessments and other elements of the Group operational risk framework.

New product risk assessment

The Group's new product risk assessment process is used to ensure that risks for all new products (and material variations to existing products) are adequately identified and assessed before their launch. The assessment documentation and review includes the requirement to demonstrate that the product provides fair outcomes for customers.

The Group New Business Forum reviews and challenges proposed high risk products to ensure material risks have been adequately identified and assessed so that new products are launched in line with the Group's risk appetite and strategy.

Enhancements made during 2013 include the introduction of an improved product pipeline to provide more detail on product review and sign-off, and enhanced reporting to the Group New Business Forum to allow challenges to the risk classification of products assessed as low-risk by divisions.

*unaudited

Business review Risk and balance sheet management

Risk measurement

Scenario analysis is used to assess the impact of extreme but plausible operational risks. It provides a forward-looking basis for managing risk exposures, with a structured and consistent approach to scenario scoping and measurement. In 2013, the portfolio of scenarios was further enhanced with greater coverage of the material risks to which the Group is exposed.

Scenario analysis is an important component in the operational risk framework, providing senior management with valuable insight into risk exposures that could significantly affect the Group's financial performance or reputation. Scenarios also provide an important link between operational risk management and measurement as a key input into the calculation of Economic Capital, and into the Group's stress testing and reverse stress testing processes.

Scenarios are run in a workshop environment, bringing business and risk and control experts together, thereby providing a deeper understanding of risk exposures and allowing management to make more informed decisions on taking action.

The Group further refined its approach to assessing the impact of the economic cycle on its operational risk losses by specifically assessing the impact of the PRA's published Anchor 5 scenario, which describes the impact of a series of country-specific shocks around the world on expected levels of operational risk losses and capital adequacy requirements for operational risk.

The impact of the PRA Anchor 5 scenario on the Group's operational risk capital, as calculated under the standardised approach, was also projected based on the outputs of the Group's stress-testing exercises. Operational risk impacts are also assessed based on additional economic stress scenarios developed internally. This is used as part of the overall stress input to capital planning and ICAAP.

Operational risk is measured utilising a top-down assessment of risk through scenario analysis along with a bottom-up assessment of risk and controls.

Scenario analysis is the frequency and impact assessment of extreme but plausible operational risk exposures, which assess the Group's vulnerability against future unexpected loss. Scenarios, along with internal and external loss data, are a key input into the capital model and are expected to influence the capital outcome significantly as they drive the tail of the severity distribution.

Risk and control assessments examine the financial and non-financial risk impact. The risk impact is assessed on both an expected and exceptional loss basis for the following 12-month period, and a risk appetite decision made.

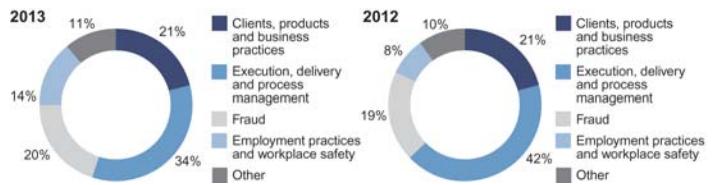

Event and loss data management

Event and loss data management covers a set of standard requirements for the management of operational risk events and loss data. It also provides for clear and consistent communication of operational risk events that meet defined threshold criteria to the Group's senior management. The Group has continued to focus on the timely and accurate capture of operational risk losses; the use of a single Group-wide repository; and the escalation of material operational risk events.

All losses and recoveries associated with an operational risk event are reported based on the date of each financial impact. A single event can have multiple losses (or recoveries) which may take some time to crystallise. Losses and recoveries will also have been booked in 2013 on events which occurred, or were identified in, prior years.

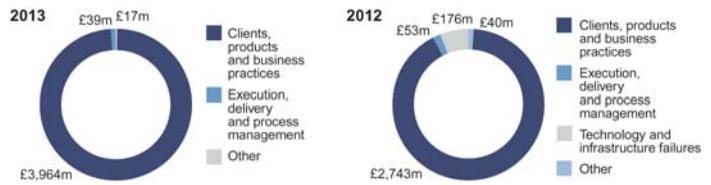

Number of events (net loss greater than £10,000)

At 31 December 2013, four categories accounted for around 90% of all operational risk events. These were: (i) clients, products and business practices; (ii) execution, delivery and process management; (iii) fraud; and (iv) employment practices and workplace safety. This proportion was broadly in line with 2012.

Value of events (net loss greater than £10,000)

At 31 December 2013, events aligned with clients, products and business practices accounted for 99% of the losses (compared to 91% in 2012). The losses in this category were as a result of new conduct-related provisions, further increased provisions relating to Payment Protection Insurance, Interest Rate Hedging Products, and regulatory settlements.

A small number of operational risk events contribute a high percentage of the total losses. In 2013, less than 1% of the events contributed around 98% of the losses. This was in line with 2012.

Capital

The Group calculates the Pillar 1 capital requirement for operational risk using the standardised approach (TSA). For 2013, the Group's minimum Pillar 1 capital requirement was £3.4 billion (2012 - £3.7 billion).

Business review Risk and balance sheet management

Other risks* continued

Operational risk continued

Monitoring and reporting

Monitoring and reporting form an integral part of all of the Group's operational risk management processes, which are designed to ensure that risks and issues are identified, escalated and managed on a timely basis. Exposures for each division are communicated through monthly risk and control reports that are discussed at divisional risk committees. The reports provide detail on the risk exposures and action plans. In 2013 the linkages between different components of the operational risk framework were improved. This has allowed better aggregation, using both qualitative and quantitative inputs from all framework elements to underpin improvements in reporting to senior committees.

Control Environment Certification

Control Environment Certification (CEC) is used by the Group Executive to review and assess its internal control framework. Members of the senior management team are required to provide a semi-annual assessment of the robustness of the Group's internal control environment including:

- Compliance with the requirements of the UK Corporate Governance Code;
- Appropriateness of the risk frameworks, culture and governance structures of each division to help ensure the Group operates within risk appetite;
- Adequacy of reporting on the material risks for the business against appetite; and
- Compliance with the Group Policy Framework and key divisional and functional policy standards.

CEC outcomes are reported to the Board, the Group Audit Committee and the Board Risk Committee, and shared with external auditors.

Risk mitigation

Where a risk has been deemed to be outside of risk appetite, the business unit must decide whether this is acceptable or not. Where it is deemed unacceptable, an action plan to reduce the exposure is prepared and is monitored to conclusion through the operational risk issues management process.

The objective of the operational risk issues management framework is the adoption of a consistent approach to the management of issues and actions to mitigate risks outside appetite. This element of the operational risk framework continues to be enhanced in areas such as analysis of common issues on an aggregated basis across the Group to identify emerging trends and improvements to the quality of data captured.

The Group purchases insurance to provide the business with financial protection against specific losses and to comply with statutory or contractual requirements, providing protection against financial loss once a risk has crystallised.

Regulatory risk

Definition

Regulatory risk is the risk of material loss or liability, legal or regulatory sanctions, or reputational damage, resulting from the failure to comply with (or adequately plan for changes to) relevant official sector policy, laws, regulations, or major industry standards, in any location in which the Group operates.

Sources of risk

The sources of regulatory risk arise from the Group's regulatory, business or operating environment and from how the Group responds to them.

Governance structure

The Group's Regulatory Affairs team ("Regulatory Affairs") maintains well-established policies and supporting processes to ensure timely identification of, and effective responses to, changes in official requirements affecting the Group. The function also maintains a structured and open engagement with the Group's regulators. Regulatory Affairs underpin a range of other policies and processes that address ongoing compliance with regulatory obligations (refer to the section on Conduct Risk for further information).

Group Board and Executive Committee oversight of changes to regulatory requirements is supported by a Prudential Regulatory Developments Executive Steering Group (ESG), which was formed in early 2010 to provide focus on a range of key regulatory developments and the Group's responses.

The ESG is augmented by more specialised groups which cover prudential, wholesale market and retail conduct issues as well as by an RBS Americas regional forum. These bodies identify and manage regulatory developments, by cascading information and coordinating activity. Their activity includes: prioritisation, allocation of responsibility, short-term tactical mitigants, longer-term strategic responses, sharing best practice, discussion of policy views, and escalation of the need for implementation projects.

A divisional Heads of Regulatory Developments Committee supports the maintenance and continuous development of the relevant policy, known as the Political, Legislative and Regulatory Environment Policy Standard, and supporting documents, together with associated processes, tools and governance. It also oversees the Group's regulatory developments operating framework to ensure it meets the needs of all divisions and functions, as well as the maintenance of the policy known as the Group Relationships with Regulators Policy Standard.

Similarly, the Regulatory Relations Forum, chaired by Regulatory Affairs, has global coverage with representatives from all divisions and regions. It facilitates the sharing of key regulatory engagements and trends across the Group's operations.

In addition, Regulatory Affairs ensures appropriate governance and reporting of all material regulatory reviews and other regulatory developments worldwide to relevant Group committees. These committees include the Group Board, the Group Audit Committee, and the Board Risk Committee.

*unaudited

Business review Risk and balance sheet management

Risk management and measurement

The Group believes that maintaining a strong regulatory risk framework is fundamental to ensuring sustainable growth, rebuilding its reputation and maintaining stakeholder confidence.

Regulatory Affairs' two policies are supported by risk appetite statements and by relevant benchmarking activity against the Group's peer banks.

These are framed by the Group's stated regulatory risk and compliance risk appetite, which says there is no appetite for material or widespread breaches of rules, expectations, regulations or laws, individually or in aggregate. It recognises, however, that genuine errors occur, and so the Group accepts limited, non material regulatory risk and subsequent loss.

This is reflected in the Political, Legislative and Regulatory Environment Policy Standard, which requires that all likely changes in official policy, legislation, regulation or other requirements must be identified, and assessed for potential impact, using an internal classification system.

The regulatory risk and compliance risk appetite is also reflected in the Group Relationships with Regulators Policy Standard, which states that all significant /material contacts with regulators must be identified and managed effectively and that all information provided to the regulators must be accurate, consistent and delivered within agreed timescales.

The level of regulatory risk remained high during 2013, as policymakers and regulators continued to strengthen regulation and supervision in response to the events of 2007/2008. This can be measured in high levels of interaction with supervisory authorities such as meetings, requests for information, visits and investigations, as well as in policy developments and proposals for new rules. At 31 December 2013 the Group was managing 45 "High Impact" regulatory or legislative policy initiatives, and a further 63 "Medium-High" Impact initiatives. In 2013 as a whole, the Group had also reviewed over 305 consultations in its core markets.

Against the backdrop of intensified regulatory pressure, Regulatory Affairs has increased the size of its team, as well as improved and refined its operating model, tools, systems and processes.

A "Centres of Excellence" model was adopted in July 2013. This has brought together divisional and functional resources to manage issues more efficiently, using specialisms in existing teams and managing issues cross-divisionally.

Internal communications on regulatory issues were strengthened. This involved staff seminars and the publication of key information on internal websites, including the weekly Regulatory Affairs Flash Report, covering key regulatory developments and supervisory interactions.

Quarterly reporting to the Group Audit Committee captures all material regulatory reviews and investigations as well as other regulatory developments worldwide. The reporting also tracks the status of, and trends in, key regulatory relationships.

*unaudited

Risk mitigation

The early identification and effective management of changes in legislation and regulation, as well as other requirements that may affect the Group, are critical to the successful mitigation of regulatory risk.

All regulatory and compliance changes are managed so as to ensure timely compliance readiness. Those assessed as having a "High" or "Medium-High" impact are managed especially closely with the aim of mitigating the impact through, for instance, changes to strategy or business activities, or external engagement.

RBS Regulatory Affairs also communicates information on regulatory developments and follow-up engagement with client-facing businesses and functions, helping them identify and execute any required mitigating changes to strategy or business models. The key regulatory policies are kept under annual review.

Reputational risk

Definition

Reputational risk is the risk of brand damage and/or financial loss owing to a failure to meet stakeholders' expectations of the Group's conduct and performance. Stakeholders include customers, investors, rating agencies, employees, suppliers, government, politicians, regulators, special interest groups, consumer groups, media and the general public. Brand damage can be detrimental to the business in a number of ways. It can hamper efforts to build or sustain business relationships with customers, affect staff morale, and reduce access to funding sources.

Sources of risk

Reputational risk can arise across a range of actions taken (or, in some cases, not taken) by the Group and individuals, as well as its wider conduct, policies and practices.

Governance structure

The Group Board has the ultimate responsibility for managing the Group's reputation, although all parts of the Group have responsibility for any reputational impact arising from their operations, including relationships with customers. The Board has set the Group's Purpose, Vision and Values (PVV), which outline a desired reputation for the Group "to be trusted, respected and valued by our customers, shareholders and communities".

Directors and senior executives are actively engaged in key strategic and transactional decisions that can have a reputational impact, for example

- Key reputational issues associated with the Group's strategic plans are discussed at Board level.
- The Board Risk Committee (BRC) oversees reputational issues and is directly engaged in strategic reputational management decisions (e.g. the customer redress policy following the Group's IT incident).
- The Group Sustainability Committee (GSC) reviews reputational issues from a customer or sector perspective. It is responsible for reviewing the Group's sustainability strategy, values and policies and aligning the Group's approach to environmental, social and ethical (ESE) issues.

Business review Risk and balance sheet management

Other risks* continued

Reputational risk continued

The Board's oversight of reputational issues is supported by structures and committees to ensure that key reputational issues are discussed at appropriate levels across the Group:

- Each division has reputational filters to provide the "first line of defence" for sensitive transactions or customers. Divisions have also established committees or forums to deliberate on customers, transactions or issues that may present a reputational risk for the division. For example, the remit of the International Banking Global Capital & Sighting Committee includes a requirement to assess key reputational sensitivities associated with client transactions against defined risk appetite.
- The ESE risk management function provides guidance and sets policy to avoid reputational risk to the bank related to the Group's business engagements and lending to customers in some sensitive industry sectors, such as mining. The function is supported by additional resource in the business divisions.
- The Group Risk Committee (GRC) reviews reputational issues from an organisational perspective. Its remit covers material and/or enterprise-wide risk and control matters across the Group, including reputational risk, as well as a review of the overall risk culture, capability and commitment across the Group.

Risk management and measurement

The reputational risk management framework is aligned with the Group's strategic objectives, its risk appetite its focus on serving customers well, its risk appetite and the Group's PVV. It is designed to embed, at different points of decision-making processes, a series of reputational filters and controls that examine products, services and activities through the lens of sustainability, transparency and fairness.

The Group has put the focus on "serving customers well" at the heart of its strategic objectives that, combined with a safe and sound bank, will build a culture and reputation in line with the Group's stakeholder expectations. By serving customers well, RBS aims to be trusted, respected and valued – a sustainable model of how banks serve society. Legacy issues remain to be worked through, but dealing with them in a transparent manner is a necessary part of the ability to move forward.

The Group's four corporate values (serving customers, working together, thinking long-term and doing the right thing) build on the advances made so far (e.g. strengthened governance and controls) to deliver the required cultural and behavioural change for the long term, with a set of supporting tangible measures. Key tools designed to embed the values include a revised code of conduct, a simple "YES-check" guide to decisions that need to be taken every day by employees and various training and accreditation programmes. Values will also be a core part of performance measures to endorse behaviours that benefit customers, manage risk and deliver long-term shareholder value.

The monthly risk report to the Group Board contains a view of key risks, including a reputational risk impact assessment of each key risk. In addition, the divisions report on relevant barometers of reputational risk and actions to manage reputational events according to the source. The annual Group Sustainability report also covers progress on the Group's sustainability principles.

Emerging reputational issues are identified and assessed by a dedicated cross-divisional reputational risk working group, and escalated through the appropriate governance channels where necessary.

Risk mitigation

Several of the Group policies address key sources of reputational risk. These policies are implemented in accordance with the Group Policy Framework through divisional and functional policy standard owners. The effectiveness of these policies within each business unit is reported through the CEC process semi-annually. Reputational aspects also form a core part of the RBS conduct risk framework, with a series of enhanced policies being developed in line with the Group's conduct risk appetite.

Business risk

Definition

Business risk is the risk that the Group suffers losses as a result of adverse variances in its revenues and/or costs related to its business plan and strategy. Such variances may be caused by internal factors such as volatility in pricing, sales volumes, and input costs or external factors such as the Group's exposure to macroeconomic, regulatory and industry risks.

Sources of risk

Business risk exists at all levels of the organisation and is generated at the transaction level. It is affected by other risks the Group faces, which could contribute to any adverse changes in the Group's revenues or costs. They include funding risk, volatility in the cost of funding, non-traded interest rate risk, inflation risk, operational risk, strategic risk, regulatory risk, conduct risk and reputational risk.

Governance structure

The Group Board has ultimate responsibility for business risk through the achievement of the Group's business plan. The primary responsibility for divisional financial performance rests with the divisional CEO supported by divisional ExCo and functions.

Responsibility for the management of business risk lies primarily with the Group's divisions, with oversight by Group Finance. The divisions are responsible for delivery of their business plans and the management of such factors as pricing, sales volumes, marketing spend and other factors that can introduce volatility into earnings.

*unaudited

Business review Risk and balance sheet management

Risk management and measurement

The Group seeks to minimise its exposure to business risk, subject to its wider strategic objectives.

Business risk is identified and managed at product and transaction level. Estimated revenue and costs, including the potential range of outcomes, are key elements in the design of any new product or investment decision. All policies that ultimately seek to manage and control financial impacts at the product and transaction level are therefore relevant to business risk management including policies on conduct, treasury and investment spend.

Business risk is reported, assessed and challenged at every governance level within the organisation. Revenue and costs are reported within divisional business line and divisional finance teams maintain a record of financial performance against plans, reporting this on a regular basis to divisional CFOs and to Group functions. Group Finance challenges divisional financial results and reports performance against plan to the Board and executive committees with a particular focus on revenue generation, cost management initiatives and risk mitigation.

Business risk is reviewed and assessed through the Group's planning cycles and performance management processes.

In the planning cycles, expected and potential scenarios for revenues and costs are determined, on a bottom-up basis, through plans reflecting expectations of the external environment and the Group's strategic priorities. These scenarios are tested against a range of sensitivities and stresses to identify the key risk drivers behind any potential volatility, together with management actions to address and manage them.

Group Risk operates a top-down stress testing process in parallel to the Group's planning cycles, considering both severe and extreme stress scenarios. The stress test outcomes form a core part of the assessment of earnings and capital adequacy risk appetite and are approved by the Board. The measurement of change in profit and loss of the divisions under stress thereby acts as a measure of business risk. Divisions also conduct their own bottom-up stress testing exercises to assess financial performance of their businesses under stress.

In 2013, the measurement of business risk was further enhanced through greater use of downside scenarios, improved granularity of stress testing, new revenue models in some of the main divisions and the development of an economic capital related business risk measure.

Business risk is incorporated in the Group's risk appetite target for earnings volatility, and an assessment of volatility in revenues and costs is a key component in determining whether the Group and its underlying businesses are within risk appetite. Each division is responsible for the implementation of its business plan and the management of associated risks within approved risk appetite targets.

Expected profiles for revenues and costs are determined, on a bottom-up basis, through plans reflecting expectations of the external environment and the Group's strategic priorities. These profiles are tested against a range of sensitivities and stresses to identify the key risk drivers behind any potential volatility, along with management actions to address and manage them.

Risk mitigation

The Group operates a forecast process which identifies projected changes in, or risks to, key financial metrics and ensures appropriate actions are taken.

During 2013, the Group responded to the business risk challenges that it continues to face, focusing on the management of net interest margin in order to sustain and grow revenues. In addition, it introduced cost management programmes to deliver substantial savings and flexibility in the cost base.

Strategic risk

Definition

The risk that the Group will make inappropriate strategic choices, or that there will be changes in the external environment to which the Group fails to adapt its strategies.

Sources of risk

Strategic risk arises from three principal sources:

- Inadequate or inaccurate analysis of current and prospective operating conditions in the Group's markets including macroeconomic performance, customer and competitor behaviours and actions, regulatory developments and technological impacts;
- Inadequate or inaccurate understanding of the Group's existing capabilities and positioning and ability to implement chosen strategies; and
- Significant unanticipated changes in the Group's operating environment.

Failure to manage strategic risk could have a wide-ranging impact on the Group. Effects could include damage to the Group's customer franchises, and lower revenues, profitability and returns to shareholders. Strategic risk is viewed as material, given the current uncertain economic climate and the potential impact of regulatory changes in the medium term.

Governance structure

The Group's strategic planning process is managed by Group Strategy and Corporate Finance. As part of that process, each division develops a strategic plan for its business within a framework set by the Group's senior management. Divisional plans are then consolidated at Group level, and both divisional and Group plans are reviewed, challenged and assessed against risk appetite. The consolidated plan is reviewed and formally signed off by the Group Board once a year.

*unaudited

Business review Risk and balance sheet management

Other risks* continued

Strategic risk continued

Strategic plans are developed by each division on an annual cycle managed centrally, and are aggregated into a Group plan reviewed and challenged by the Group Chief Executive, Group Finance Director and Group Director of Strategy and Corporate Finance before presentation to the Group Board. The Board has ultimate responsibility for approving strategic plans, initiatives and changes to strategic direction. In addition to the annual cycle, each division presents a more detailed individual "Deep Dive" review of key dimensions of its strategy at a Group Board meeting at different points during the year.

Risk management and measurement

The Group seeks to reduce strategic risk by employing a disciplined strategic framework based on five enduring tests (leading customer franchises, returns, risk, sustainable growth, connectivity) and by assigning responsibility for strategy development to line management. Key strategies are scrutinised and approved by the Group Board. This is intended to maximise the capture of market and customer insight while providing independent scrutiny and challenge. Strategic plans contain analysis of current and expected operating conditions, current and targeted competitive and market positioning, key strategic initiatives, financial and customer targets and milestones. Upside and downside risks to the strategic plans are identified.

In 2013, the Group began to focus on reducing strategic risk through a wide-ranging review to analyse core activities and formulate an appropriate plan, including rationalisation where necessary, to address the business challenges of the next five years

Responsibility for the management of the bank's strategic risks resides mainly with the individual divisions. Divisional management tracks progress on the initiatives and action plans to deliver the strategy through a range of key performance indicators such as financial performance, risk metrics, market shares and numbers of customers, satisfaction scores.

Strategic progress is also monitored through quarterly performance review meetings between divisional CEOs and the Group Chief Executive, Group Finance Director and Group Director of Strategy and Corporate Finance. While there is no formal Group statement on Strategic Risk appetite, the Group's strategy is approved by the Group Board with consideration of the risks in pursuing that strategy.

A wide variety of financial, risk, customer and market metrics are used to monitor business performance and thus, *inter alia*, the effectiveness of chosen strategies. Any deviations from the expected values are analysed to determine drivers which could be strategic, environmental or management.

Risk mitigation

A full sensitivity analysis of the strategic plan is undertaken at the end of the strategic and financial planning process, to assess the robustness of the plan under stressed conditions represented by a variety of scenarios. In certain cases, following consideration of an opportunity, the Group may decide not to pursue that opportunity as a result of a perceived strategic risk.

Developments in 2014

In November 2013, the Group announced its intention to undertake a comprehensive business review. Over the remainder of 2013 and into the early months of 2014, it completed the review and developed a strategic plan, the objective of which is to position the Group as a UK-focused retail and corporate bank that earns its customers' trust by serving them better than any other bank. Key to achieving this is combining customer groups with similar needs into three new businesses and reducing significantly the Group's costs and complexity. While the Group is confident that the plan is appropriate, it may have underestimated the risks arising from concentrating its activities in the UK or misunderstood the needs of its customers or the strength of its competitive position.

Even if the strategy proves to be appropriate, the Group may not succeed in implementing it, particularly as doing so will make additional demands on management at a time of significant regulatory change. Finally, given the rapidity with which technology is changing its competitive environment, the Group may find that its strategy does not go far enough to enable it to compete effectively.

Independent auditor's report to the members of The Royal Bank of Scotland Group plc

Opinion on financial statements of The Royal Bank of Scotland Group plc

In our opinion:

- the financial statements give a true and fair view of the state of the Group's and of the company's affairs as at 31 December 2013 and of the Group's loss for the year then ended;
- the consolidated financial statements have been properly prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union;
- the company financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006 and, as regards the Group financial statements, Article 4 of the IAS Regulation.

The financial statements comprise the accounting policies, the consolidated and company balance sheets as at 31 December 2013, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated and company statements of changes in equity and the consolidated and company cash flow statements for the year ended 31 December 2013, the related Notes 1 to 42 on the consolidated financial statements, the related Notes 1 to 16 on the company financial statements and the information identified as "audited" in the Risk and balance sheet management section of the Business review. The financial reporting framework that has been applied in their preparation is applicable law and IFRSs as adopted by the European Union and, as regards the parent company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

Separate opinion in relation to IFRSs as issued by the IASB

As explained in the accounting policies the Group, in addition to complying with its legal obligation to apply IFRSs as adopted by the European Union, has also applied IFRSs as issued by the International Accounting Standards Board (IASB).

In our opinion the Group financial statements comply with IFRSs as issued by the IASB.

Going concern

As required by the Listing Rules we have reviewed the directors' statement on page 96 that the Group is a going concern. We confirm that

- we have not identified material uncertainties related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern which we believe would need to be disclosed in accordance with IFRSs as adopted by the European Union; and
- we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Group's ability to continue as a going concern.

Independent auditor's report to the members of The Royal Bank of Scotland Group plc

Our assessment of risks of material misstatement

The assessed risks of material misstatement described below are those that had the greatest effect on our audit strategy, the allocation of resources in the audit and directing the efforts of the engagement team:

Our assessment of the risks of material misstatement	Our response to those risks
<p>The calculation of the Group's loan impairment provisions requires management to make significant judgements on whether impairment events have occurred which result in the need for a provision, on the amount of these provisions, and on the estimate of loan losses that have been incurred but not yet specifically identified.</p> <p>A number of the loans held in GRG and in Ulster Bank require particularly judgemental estimates to be made of the value of collateral assets in illiquid markets.</p> <p>In November 2013 the Group announced the transfer of approximately £38 billion of assets, predominantly loans, held in Ulster Bank, Non-Core, UK Corporate and International Banking into the RBS Capital Restructuring Group ("RCR") on 1 January 2014 in order to manage the run-down of those assets on an accelerated timescale. The faster run-down of such loans led to revisions to expected cash flows and an increased impairment charge for the year.</p>	<p>We undertook an assessment of loan impairment provisioning practices across the Group to compare them with the requirements of IFRS and tested the key controls over the processes used to calculate impairment provisions, including testing the controls over the information used in the provisioning processes.</p> <p>For the collective and latent loan impairment provisions we tested samples of the data used in the models together with the calculations in and the output from the models. We also challenged management on the level of specific provisions by assessing for a sample of loans (including a sample of those being transferred into RCR) whether or not provisions booked had been recognised in accordance with IFRS.</p> <p>Where appropriate, our work involved assessing third party valuations of collateral and external expert reports on borrowers' business plans and enterprise valuations to determine whether appropriate valuation methodologies and assumptions were employed and to assess the objectivity of the external experts used, including assessing whether any inappropriate restrictions had been placed on their work.</p>
<p>The valuation of the Group's financial instruments, held at fair value, is based on a combination of market data and financial models which often require a considerable number of inputs. Many of these inputs are obtained from readily available data for liquid markets. Where such observable data are not readily available, such as in the case of level 3 assets, then estimates need to be developed which can involve significant judgement.</p>	<p>We tested the key controls over the Group's financial instrument valuation processes. Our work included testing a sample of the underlying models and assumptions used, by reference to trade data as well as peer group comparison, where available.</p> <p>In addition for a sample of transactions the year end valuations were recalculated by our valuation specialists using our own independent models.</p>
<p>The estimation of the provisions held in relation to the ongoing regulatory investigations and litigation affecting the Group, including the mortgage-backed securities and securities related litigation, payment protection insurance and interest rate hedging products mis-selling, is highly judgemental given the uncertainties in relation to future regulatory and legal judgements, as well the uncertainties around key assumptions used to calculate these provisions such as average redress costs and the volumes of future complaints.</p> <p>For certain claims it is not possible reliably to estimate whether and what amounts will be paid out and in those situations disclosures are provided on the status of these claims and the possible outcomes as set out in Note 32 to the financial statements.</p>	<p>We assessed the legal advice and correspondence with regulators received in connection with legal proceedings, investigations and regulatory matters which the Group is party to. Where appropriate we additionally engaged in direct enquiry with the Group's external legal counsel.</p> <p>For redress costs we challenged the adequacy of provisions recognised by critically assessing the key assumptions used in the provision models, where possible comparing the assumptions to available peer and historic data.</p> <p>We also challenged the appropriateness of the disclosures provided in relation to these matters, including those where a reliable estimate of the liability could not be calculated.</p>
<p>Identified deficiencies in the privileged access controls over a number of significant applications that run on the Group's information technology systems, could have had a negative impact on the Group's controls and financial reporting systems at a number of divisions.</p>	<p>Where these deficiencies affected specific applications within our audit scope we extended our control testing to provide assurance over both compensating controls and the completeness and accuracy of management information used in key controls. In addition and where appropriate we extended the scope of our substantive procedures over the year-end balance sheet.</p>

Independent auditor's report to the members of The Royal Bank of Scotland Group plc

Our assessment of the risks of material misstatement	Our response to those risks
The assessment of the appropriateness of the carrying value of deferred taxation, goodwill, and other intangible assets, is highly judgemental as these valuations depend upon assumptions on the future profitability of the divisions of the Group as described in more detail in notes 17 and 23 to the financial statements.	For each cash generating unit or legal entity as appropriate, we critically assessed the forecasts of the cash flows and the appropriateness of the key assumptions used; including forecast taxable profits, growth rates and discount rates, in order to challenge management's calculation of the recoverable amount of deferred taxation, goodwill and intangible assets.

The Audit Committee's consideration of these risks is set out on page 54.

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We apply the concept of materiality both in planning and performing our audit and in evaluating the effect of misstatements on our audit and on the financial statements. For the purposes of determining whether the financial statements are free from material misstatement we define materiality as the magnitude of misstatements that make it probable that the economic decisions of a reasonably knowledgeable person relying on the financial statements would be changed or influenced.

We determined planning materiality for the Group to be £350 million, which was calculated as 0.6% of the total equity of the Group which also represented 4% of the Group's loss for the year. Our materiality was based on the equity of the Group as this was considered to provide a more normalised basis given the significant volatility over recent years in the Group's profits and losses.

We agreed with the Audit Committee that we would report to the Committee all audit differences in excess of £10 million, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

An overview of the scope of our audit

Our Group audit scope is based on an analysis of required work in each of the Group's divisions. Within each division an assessment is made by geography and legal entity of those operations where full scope audits are required and those where the extent of our testing is more limited and focused on the risks of material misstatement in the Group financial statements. As a result of these assessments audit work was undertaken in 19 countries, which accounted for 98% of the Group's total assets and 85% of its total revenue.

The Group audit team continued to follow a programme of planned visits that has been designed so that the Senior Statutory Auditor or his designate visits each division at least once a year.

Opinion on other matters prescribed by the Companies Act 2006

In our opinion:

- the part of the Directors' remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006; and
- the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

Adequacy of explanations received and accounting records

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns.

We have nothing to report in respect of these matters.

Independent auditor's report to the members of The Royal Bank of Scotland Group plc

Directors' remuneration

Under the Companies Act 2006 we are also required to report if in our opinion certain disclosures of directors' remuneration have not been made or the part of the Directors' remuneration report to be audited is not in agreement with the accounting records and returns. Under the Listing Rules we are required to review certain elements of the Directors' remuneration report. We have nothing to report arising from these matters or our review.

Corporate governance statement

Under the Listing Rules we are also required to review the part of the Corporate governance statement relating to the company's compliance with nine provisions of the UK Corporate Governance Code. We have nothing to report arising from our review.

Our duty to read other information in the Annual Report

Under the ISAs (UK and Ireland), we are required to report to you if, in our opinion, information in the annual report is:

- materially inconsistent with the information in the audited financial statements; or
- apparently materially incorrect based on, or materially inconsistent with, our knowledge of the Group acquired in the course of performing our audit; or
- otherwise misleading.

In particular, we are required to consider whether we have identified any inconsistencies between our knowledge acquired during the audit and the directors' statement that they consider the annual report is fair, balanced and understandable and whether the annual report appropriately discloses those matters that we communicated to the audit committee which we consider should have been disclosed. We confirm that we have not identified any such inconsistencies or misleading statements.

Respective responsibilities of directors and auditor

As explained more fully in the Statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Group's and the parent company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements.

In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Kari Hale (Senior Statutory Auditor)

At 31 December	867	10,596	18,929
Own shares held			
At 1 January	(213)	(769)	(808)
Disposal of own shares	75	441	20
Shares issued under employee share schemes	1	115	19
At 31 December	(137)	(213)	(769)
Owners' equity at 31 December	58,742	68,678	75,367

*Restated

Consolidated statement of changes in equity for the year ended 31 December 2013

	2013 £m	2012* £m	2011* £m
Non-controlling interests (see Note 25)			
At 1 January	1,770	686	1,171
Currency translation adjustments and other movements	(6)	(18)	(54)
Profit/(loss) attributable to non-controlling interests			
- continuing operations	83	(24)	(14)
- discontinued operations	37	(112)	42
Dividends paid	(5)	—	(40)
Movements in available-for-sale securities			
- unrealised gains	8	3	1
- realised losses	21	22	2
- tax	(1)	—	(1)
- recycled to profit or loss on disposal of businesses (3)	(5)	—	—
Equity raised	—	875	—
Equity withdrawn and disposals	(1,429)	(23)	(421)
Transfer from retained earnings	—	361	—
At 31 December	473	1,770	686
 Total equity at 31 December	 59,215	 70,448	 76,053

Total comprehensive loss recognised in the statement of changes in equity is attributable to:

Non-controlling interests	137	(129)	(24)
Preference shareholders	349	273	—
Paid-in equity holders	49	28	—
Ordinary and B shareholders	(10,724)	(7,269)	(756)
	(10,189)	(7,097)	(780)

*Restated

Notes:

- (1) Paid-in equity was increased by £548 million on adoption of IFRS 10 - see page 377.
- (2) Net of tax - £35 million charge.
- (3) Net of tax - £1 million charge.

The accompanying notes on pages 391 to 496, the accounting policies on pages 377 to 389 and the audited sections of the Business review: Risk and balance sheet management on pages 174 to 364 form an integral part of these financial statements.

Consolidated cash flow statement for the year ended 31 December 2013

Accounting policies

1. Presentation of accounts

The accounts are prepared on a going concern basis (see the Report of the directors, page 96) and in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee of the IASB as adopted by the European Union (EU) (together IFRS). The EU has not adopted the complete text of IAS 39 'Financial Instruments: Recognition and Measurement'; it has relaxed some of the standard's hedging requirements. The Group has not taken advantage of this relaxation: its financial statements are prepared in accordance with IFRS as issued by the IASB.

The company is incorporated in the UK and registered in Scotland and its accounts are presented in accordance with the Companies Act 2006. With the exception of investment property and certain financial instruments as described in Accounting policies 9, 15, 17 and 19 below, the accounts are presented on an historical cost basis.

In accordance with IFRS 5, Direct Line Group (DLG) was classified as a discontinued operation in 2012, and prior periods re-presented accordingly. From 13 March 2013, DLG was classified as an associate and at 31 December 2013 the Group's interest in DLG was transferred to disposal groups.

The Group adopted a number of new and revised IFRSs effective 1 January 2013:

IFRS 11 'Joint Arrangements', which supersedes IAS 31 'Interests in Joint Ventures', distinguishes between joint operations and joint ventures. Joint operations are accounted for by the investor recognising its assets and liabilities including its share of any assets held and liabilities incurred jointly and its share of revenues and costs. Joint ventures are accounted for in the investor's consolidated accounts using the equity method. IFRS 11 requires retrospective application.

IAS 27 'Separate Financial Statements' comprises those parts of the existing IAS 27 that deal with separate financial statements. IAS 28 'Investments in Associates and Joint Ventures' covers joint ventures as well as associates; both must be accounted for using the equity method. The mechanics of the equity method are unchanged.

IFRS 12 'Disclosure of Interests in Other Entities' mandates the disclosures in annual financial statements in respect of investments in subsidiaries, joint arrangements, associates and structured entities that are not controlled by the Group.

IFRS 13 'Fair Value Measurement' sets out a single IFRS framework for defining and measuring fair value. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It also requires disclosures about fair value measurements.

'Disclosures - Offsetting Financial Assets and Financial Liabilities (Amendments to IFRS 7)' amended IFRS 7 to require disclosures about the effects and potential effects on an entity's financial position of offsetting financial assets and financial liabilities and related arrangements.

Amendments to IAS 1 'Presentation of Items of Other Comprehensive Income' require items that will never be recognised in profit or loss to be presented separately in other comprehensive income from those items that are subject to subsequent reclassification.

'Annual Improvements 2009-2011 Cycle' also made a number of minor changes to IFRSs.

Implementation of the standards and amendments to standards above has not had a material effect on the financial statements of the Group or the company.

IAS 19 'Employee Benefits' (revised) requires: the immediate recognition of all actuarial gains and losses; interest cost to be calculated on the net pension liability or asset at the long-term bond rate; and all past service costs to be recognised immediately when a scheme is curtailed or amended. Implementation of IAS 19 resulted in an increase in the loss after tax of £84 million for the year ended 31 December 2012 (2011 - £154 million) with a corresponding increase in other comprehensive income. This also resulted in an increase in the loss per ordinary and equivalent B share of 0.8p for the year ended 31 December 2012 (2011 - 1.4p). Prior periods have been restated.

IFRS 10 'Consolidated Financial Statements' replaces SIC-12 'Consolidation - Special Purpose Entities' and the consolidation elements of the existing IAS 27 'Consolidated and Separate Financial Statements'. IFRS 10 adopts a single definition of control: a reporting entity controls another entity when the reporting entity has the power to direct the activities of that other entity so as to vary returns for the reporting entity. IFRS 10 requires retrospective application. Following implementation of IFRS 10, certain entities that have trust preferred securities in issue are no longer consolidated by the Group. As a result there was a reduction in Non-controlling interests of £0.5 billion with a corresponding increase in Owners' equity (Paid-in equity) as at 31 December 2012. This resulted in an increase in the loss attributable to non-controlling interests of £13 million for the year ended 31 December 2012 (2011 - nil), with a corresponding increase in the profit attributable to paid-in equity holders. There was no effect on the profit/(loss) attributable to ordinary and B shareholders. Prior periods have been restated accordingly.

2. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the company and entities (including certain structured entities) that are controlled by the Group. The Group controls another entity (a subsidiary) when it is exposed, or has rights, to variable returns from its involvement with that entity and has the ability to affect those returns through its power over the other entity; power generally arises from holding a majority of voting rights. On acquisition of a subsidiary, its identifiable assets, liabilities and contingent liabilities are included in the consolidated accounts at their fair value. A subsidiary is included in the consolidated financial statements from the date it is controlled by the Group until the date the Group ceases to control it through a sale or a significant change in circumstances. Changes in the Group's interest in a subsidiary that do not result in the Group ceasing to control that subsidiary are accounted for as equity transactions.

All intergroup balances, transactions, income and expenses are eliminated on consolidation. The consolidated accounts are prepared under uniform accounting policies.

Accounting policies

3. Revenue recognition

Interest income on financial assets that are classified as loans and receivables, available-for-sale or held-to-maturity and interest expense on financial liabilities other than those measured at fair value are determined using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability (or group of financial assets or liabilities) and of allocating the interest income or interest expense over the expected life of the asset or liability. The effective interest rate is the rate that exactly discounts estimated future cash flows to the instrument's initial carrying amount. Calculation of the effective interest rate takes into account fees payable or receivable that are an integral part of the instrument's yield, premiums or discounts on acquisition or issue, early redemption fees and transaction costs. All contractual terms of a financial instrument are considered when estimating future cash flows.

Financial assets and financial liabilities held for trading or designated as at fair value through profit or loss are recorded at fair value. Changes in fair value are recognised in profit or loss.

Commitment and utilisation fees are determined as a percentage of the outstanding facility. If it is unlikely that a specific lending arrangement will be entered into, such fees are taken to profit or loss over the life of the facility otherwise they are deferred and included in the effective interest rate on the advance.

Fees in respect of services are recognised as the right to consideration accrues through the provision of the service to the customer. The arrangements are generally contractual and the cost of providing the service is incurred as the service is rendered. The price is usually fixed and always determinable. The application of this policy to significant fee types is outlined below.

Payment services - this comprises income received for payment services including cheques cashed, direct debits, Clearing House Automated Payments (the UK electronic settlement system) and BACS payments (the automated clearing house that processes direct debits and direct credits). These are generally charged on a per transaction basis. The income is earned when the payment or transaction occurs. Charges for payment services are usually debited to the customer's account monthly or quarterly in arrears. Income is accrued at period end for services provided but not yet charged.

Card related services - fees from credit card business include:

- Commission received from retailers for processing credit and debit card transactions: income is accrued to the income statement as the service is performed.
- Interchange received: as issuer, the Group receives a fee (interchange) each time a cardholder purchases goods and services. The Group also receives interchange fees from other card issuers for providing cash advances through its branch and automated teller machine networks. These fees are accrued once the transaction has taken place.
- An annual fee payable by a credit card holder is deferred and taken to profit or loss over the period of the service i.e. 12 months.

Investment management fees - fees charged for managing investments are recognised as revenue as the services are provided. Incremental costs that are directly attributable to securing an investment management contract are deferred and charged as expense as the related revenue is recognised.

Insurance premiums - see Accounting policy 12.

4. Assets held for sale and discontinued operations

A non-current asset (or disposal group) is classified as held for sale if the Group will recover its carrying amount principally through a sale transaction rather than through continuing use. A non-current asset (or disposal group) classified as held for sale is measured at the lower of its carrying amount and fair value less costs to sell. If the asset (or disposal group) is acquired as part of a business combination it is initially measured at fair value less costs to sell. Assets and liabilities of disposal groups classified as held for sale and non-current assets classified as held for sale are shown separately on the face of the balance sheet. The results of discontinued operations - comprising the post-tax profit or loss of discontinued operations and the post-tax gain or loss recognised either on measurement to fair value less costs to sell or on disposal of the discontinued operation - are shown as a single amount on the face of the income statement; an analysis of this amount is presented in Note 20 on the accounts. A discontinued operation is a cash generating unit or a group of cash generating units that either has been disposed of, or is classified as held for sale, and (a) represents a separate major line of business or geographical area of operations, (b) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or (c) is a subsidiary acquired exclusively with a view to resale.

5. Employee benefits

Short-term employee benefits, such as salaries, paid absences, and other benefits are accounted for on an accruals basis over the period in which the employees provide the related services. Employees may receive variable compensation satisfied by cash, by debt instruments issued by the Group or by RBSG shares. The treatment of share-based compensation is set out in Accounting policy 26. Variable compensation that is settled in cash or debt instruments is charged to profit or loss over the period from the start of the year to which the variable compensation relates to the expected settlement date taking account of forfeiture and clawback criteria.

The Group provides post-retirement benefits in the form of pensions and healthcare plans to eligible employees.

Contributions to defined contribution pension schemes are recognised in profit or loss when payable.

For defined benefit schemes, the defined benefit obligation is measured on an actuarial basis using the projected unit credit method and discounted at a rate determined by reference to market yields at the end of the reporting period on high quality corporate bonds of equivalent term and currency to the scheme liabilities. Scheme assets are measured at their fair value. The difference between scheme assets and scheme liabilities – the net defined benefit asset or liability - is recognised in the balance sheet. A defined benefit asset is limited to the present value of any economic benefits available to the Group in the form of refunds from the plan or reduced contributions to it.

Accounting policies

The charge to profit or loss for pension costs (recorded in operating expenses) comprises:

- the current service cost
- interest, computed at the rate used to discount scheme liabilities, on the net defined benefit liability or asset
- past service cost resulting from a scheme amendment or curtailment
- gains or losses on settlement.

A curtailment occurs when the Group significantly reduces the number of employees covered by a plan. A plan amendment occurs when the Group introduces, or withdraws, a defined benefit plan or changes the benefits payable under an existing defined benefit plan. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when benefits are withdrawn or changed so that the present value of the defined benefit obligation decreases). A settlement is a transaction that eliminates all further obligation for part or all of the benefits.

Actuarial gains and losses (i.e. gains or and losses on re-measuring of the net defined benefit asset or liability) are recognised in full in the period in which they arise in other comprehensive income.

6. Intangible assets and goodwill

Intangible assets acquired by the Group are stated at cost less accumulated amortisation and impairment losses. Amortisation is charged to profit or loss over the assets' estimated economic lives using methods that best reflect the pattern of economic benefits and included in Depreciation and amortisation. These estimated useful economic lives are:

Core deposit intangibles	6 to 10 years
Other acquired intangibles	5 to 10 years
Computer software	3 to 12 years

Expenditure on internally generated goodwill and brands is written-off as incurred. Direct costs relating to the development of internal-use computer software are capitalised once technical feasibility and economic viability have been established. These costs include payroll, the costs of materials and services, and directly attributable overheads. Capitalisation of costs ceases when the software is capable of operating as intended. During and after development, accumulated costs are reviewed for impairment against the benefits that the software is expected to generate. Costs incurred prior to the establishment of technical feasibility and economic viability are expensed as incurred as are all training costs and general overheads. The costs of licences to use computer software that are expected to generate economic benefits beyond one year are also capitalised.

Intangible assets include goodwill arising on the acquisition of subsidiaries and joint ventures. Goodwill on the acquisition of a subsidiary is the excess of the fair value of the consideration transferred, the fair value of any existing interest in the subsidiary and the amount of any non-controlling interest measured either at fair value or at its share of the subsidiary's net assets over the Group's interest in the net fair value of the subsidiary's identifiable assets, liabilities and contingent liabilities. Goodwill arises on the acquisition of a joint venture when the cost of investment exceeds the Group's share of the net fair value of the joint venture's identifiable assets and liabilities. Goodwill is measured at initial cost less any subsequent impairment losses. Goodwill arising on the acquisition of associates is included within their carrying amounts. The gain or loss on the disposal of a subsidiary, associate or joint venture includes the carrying value of any related goodwill.

7. Property, plant and equipment

Items of property, plant and equipment (except investment property - see Accounting policy 9) are stated at cost less accumulated depreciation and impairment losses. Where an item of property, plant and equipment comprises major components having different useful lives, they are accounted for separately.

Depreciation is charged to profit or loss on a straight-line basis so as to write-off the depreciable amount of property, plant and equipment (including assets owned and let on operating leases) over their estimated useful lives. The depreciable amount is the cost of an asset less its residual value. Freehold land is not depreciated. The estimated useful lives of the Group's property, plant and equipment are:

Freehold buildings	50 years
Long leasehold property (leases with more than 50 years to run)	50 years
Short leaseholds	unexpired period of the lease
Property adaptation costs	10 to 15 years
Computer equipment	up to 5 years
Other equipment	4 to 15 years

The residual value and useful life of property, plant and equipment are reviewed at each balance sheet date and updated for any changes to previous estimates.

8. Impairment of intangible assets and property, plant and equipment

At each reporting date, the Group assesses whether there is any indication that its intangible assets, or property, plant and equipment are impaired. If any such indication exists, the Group estimates the recoverable amount of the asset and the impairment loss if any. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired.

Accounting policies

If an asset does not generate cash flows that are independent from those of other assets or groups of assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. For the purposes of impairment testing, goodwill acquired in a business combination is allocated to each of the Group's cash-generating units or groups of cash-generating units expected to benefit from the combination. The recoverable amount of an asset or cash-generating unit is the higher of its fair value less cost to sell and its value in use. Value in use is the present value of future cash flows from the asset or cash-generating unit discounted at a rate that reflects market interest rates adjusted for risks specific to the asset or cash-generating unit that have not been taken into account in estimating future cash flows. If the recoverable amount of an intangible or tangible asset is less than its carrying value, an impairment loss is recognised immediately in profit or loss and the carrying value of the asset reduced by the amount of the loss. A reversal of an impairment loss on intangible assets (excluding goodwill) or property, plant and equipment is recognised as it arises provided the increased carrying value is not greater than it would have been had no impairment loss been recognised. Impairment losses on goodwill are not reversed.

9. Investment property

Investment property comprises freehold and leasehold properties that are held to earn rentals or for capital appreciation or both. Investment property is not depreciated but is stated at fair value. Fair value is based on current prices for similar properties in the same location and condition. Any gain or loss arising from a change in fair value is recognised in profit or loss. Rental income from investment property is recognised on a straight-line basis over the term of the lease in Other operating income. Lease incentives granted are recognised as an integral part of the total rental income.

10. Foreign currencies

The Group's consolidated financial statements are presented in sterling which is the functional currency of the company.

Group entities record transactions in foreign currencies in their functional currency - the currency of the primary economic environment in which they operate - at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the relevant functional currency at the foreign exchange rates ruling at the balance sheet date. Foreign exchange differences arising on the settlement of foreign currency transactions and from the translation of monetary assets and liabilities are reported in income from trading activities except for differences arising on cash flow hedges and hedges of net investments in foreign operations (see Accounting policy 24).

Non-monetary items denominated in foreign currencies that are stated at fair value are translated into the relevant functional currency at the foreign exchange rates ruling at the dates the values are determined. Translation differences arising on non-monetary items measured at fair value are recognised in profit or loss except for differences arising on available-for-sale non-monetary financial assets, for example equity shares, which are recognised in other comprehensive income unless the asset is the hedged item in a fair value hedge.

Assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into sterling at foreign exchange rates ruling at the balance sheet date. Income and expenses of foreign operations are translated into sterling at average exchange rates unless these do not approximate to the foreign exchange rates ruling at the dates of the transactions. Foreign exchange differences arising on the translation of a foreign operation are recognised in other comprehensive income. The amount accumulated in equity is reclassified from equity to profit or loss on disposal or partial disposal of a foreign operation.

11. Leases

As lessor

Contracts with customers to lease assets are classified as finance leases if they transfer substantially all the risks and rewards of ownership of the asset to the customer; all other contracts with customers to lease assets are classified as operating leases.

Finance lease receivables are included in the balance sheet, within Loans and advances to banks and Loans and advances to customers, at the amount of the net investment in the lease being the minimum lease payments and any unguaranteed residual value discounted at the interest rate implicit in the lease. Finance lease income is allocated to accounting periods so as to give a constant periodic rate of return before tax on the net investment and included in Interest receivable. Unguaranteed residual values are subject to regular review; if there is a reduction in their value, income allocation is revised and any reduction in respect of amounts accrued is recognised immediately.

Rental income from operating leases is recognised in income on a straight-line basis over the lease term unless another systematic basis better represents the time pattern of the asset's use. Operating lease assets are included within Property, plant and equipment and depreciated over their useful lives (see Accounting policy 7). Operating lease rentals receivable are included in Other operating income.

As lessee

The Group's contracts to lease assets are principally operating leases. Operating lease rental expense is included in Premises and equipment costs and recognised as an expense on a straight-line basis over the lease term unless another systematic basis better represents the benefit to the Group.

Accounting policies

12. General insurance

Premiums earned - insurance and reinsurance premiums receivable for the whole period of cover provided by contracts incepted during the year are adjusted by an unearned premium provision, which represents the proportion of the premiums that relate to periods of insurance after the balance sheet date. Unearned premiums are calculated over the period of exposure under the policy, on a daily basis, 24ths basis or allowing for the estimated incidence of exposure under policies.

Insurance claims - insurance claims are recognised in the accounting period in which the loss occurs. Provision is made for the full cost of settling outstanding claims at the balance sheet date, including claims incurred but not yet reported at that date. Outstanding claims provisions are not discounted for the time value of money except for claims to be settled by periodical payments. Claims handling expenses are also included.

Deferred acquisition costs - acquisition costs relating to new and renewing insurance policies are matched with the earning of the premiums to which they relate. A proportion of acquisition costs incurred during the year are deferred to the subsequent accounting period to match the extent to which premiums written during the year are unearned at the balance sheet date. The principal acquisition costs deferred are direct advertising expenditure, third party administration fees, commission paid and costs associated with telesales and underwriting staff.

Reinsurance - the Group cedes insurance risk in the normal course of business. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated on a basis consistent with the outstanding claims provision or settled claims associated with the reinsurer's policies and are in accordance with the related reinsurance contract. A reinsurance bad debt provision is assessed in respect of reinsurance debtors.

13. Provisions

The Group recognises a provision for a present obligation resulting from a past event when it is more likely than not that it will be required to transfer economic benefits to settle the obligation and the amount of the obligation can be estimated reliably.

Provision is made for restructuring costs, including the costs of redundancy, when the Group has a constructive obligation to restructure. An obligation exists when the Group has a detailed formal plan for the restructuring and has raised a valid expectation in those affected by starting to implement the plan or announcing its main features.

If the Group has a contract that is onerous, it recognises the present obligation under the contract as a provision. An onerous contract is one where the unavoidable costs of meeting the Group's contractual obligations exceed the expected economic benefits. When the Group vacates a leasehold property, a provision is recognised for the costs under the lease less any expected economic benefits (such as rental income).

Contingent liabilities are possible obligations arising from past events, whose existence will be confirmed only by uncertain future events, or present obligations arising from past events that are not recognised because either an outflow of economic benefits is not probable or the amount of the obligation cannot be reliably measured. Contingent liabilities are not recognised but information about them is disclosed unless the possibility of any outflow of economic benefits in settlement is remote.

14. Tax

Income tax expense or income, comprising current tax and deferred tax, is recorded in the income statement except income tax on items recognised outside profit or loss which is credited or charged to other comprehensive income or to equity as appropriate.

Current tax is income tax payable or recoverable in respect of the taxable profit or loss for the year arising in profit or loss, other comprehensive income or equity. Provision is made for current tax at rates enacted or substantively enacted at the balance sheet date.

Deferred tax is the tax expected to be payable or recoverable in respect of temporary differences between the carrying amount of an asset or liability for accounting purposes and its carrying amount for tax purposes. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that they will be recovered. Deferred tax is not recognised on temporary differences that arise from initial recognition of an asset or a liability in a transaction (other than a business combination) that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is calculated using tax rates expected to apply in the periods when the assets will be realised or the liabilities settled, based on tax rates and laws enacted, or substantively enacted, at the balance sheet date.

Deferred tax assets and liabilities are offset where the Group has a legally enforceable right to offset and where they relate to income taxes levied by the same taxation authority either on an individual Group company or on Group companies in the same tax group that intend, in future periods, to settle current tax liabilities and assets on a net basis or on a gross basis simultaneously.

15. Financial assets

On initial recognition, financial assets are classified into held-to-maturity investments; held-for-trading; designated as at fair value through profit or loss; loans and receivables; or available-for-sale financial assets. Regular way purchases of financial assets classified as loans and receivables are recognised on settlement date; all other regular way transactions in financial assets are recognised on trade date.

Held-to-maturity investments - a financial asset may be classified as a held-to-maturity investment only if it has fixed or determinable payments, a fixed maturity and the Group has the positive intention and ability to hold to maturity. Held-to-maturity investments are initially recognised at fair value plus directly related transaction costs. They are subsequently measured at amortised cost using the effective interest method (see Accounting policy 3) less any impairment losses.

Accounting policies

Held-for-trading - a financial asset is classified as held-for-trading if it is acquired principally for sale in the near term, or forms part of a portfolio of financial instruments that are managed together and for which there is evidence of short-term profit taking, or it is a derivative (not in a qualifying hedge relationship). Held-for-trading financial assets are recognised at fair value with transaction costs being recognised in profit or loss. Subsequently they are measured at fair value. Gains and losses on held-for-trading financial assets are recognised in profit or loss as they arise.

Designated as at fair value through profit or loss - financial assets may be designated as at fair value through profit or loss only if such designation (a) eliminates or significantly reduces a measurement or recognition inconsistency; or (b) applies to a group of financial assets, financial liabilities or both, that the Group manages and evaluates on a fair value basis; or (c) relates to an instrument that contains an embedded derivative which is not evidently closely related to the host contract. Financial assets that the Group designates on initial recognition as being at fair value through profit or loss are recognised at fair value, with transaction costs being recognised in profit or loss, and are subsequently measured at fair value. Gains and losses on financial assets that are designated as at fair value through profit or loss are recognised in profit or loss as they arise.

Loans and receivables - non-derivative financial assets with fixed or determinable repayments that are not quoted in an active market are classified as loans and receivables, except those that are classified as available-for-sale or as held-for-trading, or designated as at fair value through profit or loss. Loans and receivables are initially recognised at fair value plus directly related transaction costs. They are subsequently measured at amortised cost using the effective interest method (see Accounting policy 3) less any impairment losses.

Available-for-sale financial assets - financial assets that are not classified as held-to-maturity; held-for-trading; designated as at fair value through profit or loss; or loans and receivables are classified as available-for-sale. Financial assets can be designated as available-for-sale on initial recognition. Available-for-sale financial assets are initially recognised at fair value plus directly related transaction costs. They are subsequently measured at fair value. Unquoted equity investments whose fair value cannot be measured reliably are carried at cost and classified as available-for-sale financial assets. Impairment losses and exchange differences resulting from retranslating the amortised cost of foreign currency monetary available-for-sale financial assets are recognised in profit or loss together with interest calculated using the effective interest method (see Accounting policy 3) as are gains and losses attributable to the hedged risk on available-for-sale financial assets that are hedged items in fair value hedges (see Accounting policy 24). Other changes in the fair value of available-for-sale financial assets and any related tax are reported in other comprehensive income until disposal, when the cumulative gain or loss is reclassified from equity to profit or loss.

Reclassifications - held-for-trading and available-for-sale financial assets that meet the definition of loans and receivables (non-derivative financial assets with fixed or determinable payments that are not quoted in an active market) may be reclassified to loans and receivables if the Group has the intention and ability to hold the financial asset for the foreseeable future or until maturity. The Group typically regards the foreseeable future as twelve months from the date of reclassification. Additionally, held-for-trading financial assets that do not meet the definition of loans and receivables may, in rare circumstances, be transferred to available-for-sale financial assets or to held-to-maturity investments. Reclassifications are made at fair value. This fair value becomes the asset's new cost or amortised cost as appropriate. Gains and losses recognised up to the date of reclassification are not reversed.

Fair value - the Group's approach to determining the fair value of financial instruments measured at fair value is set out in the section of Critical accounting policies and key sources of estimation uncertainty entitled Fair value - financial instruments; further details are given in Note 11.

16. Impairment of financial assets

The Group assesses at each balance sheet date whether there is any objective evidence that a financial asset or group of financial assets classified as held-to-maturity, available-for-sale or loans and receivables is impaired. A financial asset or portfolio of financial assets is impaired and an impairment loss incurred if there is objective evidence that an event or events since initial recognition of the asset have adversely affected the amount or timing of future cash flows from the asset.

Financial assets carried at amortised cost - if there is objective evidence that an impairment loss on a financial asset or group of financial assets classified as loans and receivables or as held-to-maturity investments has been incurred, the Group measures the amount of the loss as the difference between the carrying amount of the asset or group of assets and the present value of estimated future cash flows from the asset or group of assets discounted at the effective interest rate of the instrument at initial recognition. For collateralised loans and receivables, estimated future cash flows include cash flows that may result from foreclosure less the costs of obtaining and selling the collateral, whether or not foreclosure is probable.

Accounting policies

Where, in the course of the orderly realisation of a loan, it is exchanged for equity shares or property, the exchange is accounted for as the sale of the loan and the acquisition of equity securities or investment property. Where the Group's interest in equity shares following the exchange is such that the Group controls an entity, that entity is consolidated. Impairment losses are assessed individually for financial assets that are individually significant and individually or collectively for assets that are not individually significant. In making collective impairment assessments, financial assets are grouped into portfolios on the basis of similar risk characteristics. Future cash flows from these portfolios are estimated on the basis of the contractual cash flows and historical loss experience for assets with similar credit risk characteristics. Historical loss experience is adjusted, on the basis of observable data, to reflect current conditions not affecting the period of historical experience. Impairment losses are recognised in profit or loss and the carrying amount of the financial asset or group of financial assets reduced by establishing an allowance for impairment losses. If, in a subsequent period, the amount of the impairment loss reduces and the reduction can be ascribed to an event after the impairment was recognised, the previously recognised loss is reversed by adjusting the allowance. Once an impairment loss has been recognised on a financial asset or group of financial assets, interest income is recognised on the carrying amount using the rate of interest at which estimated future cash flows were discounted in measuring impairment.

Impaired loans and receivables are written off, i.e. the impairment provision is applied in writing down the loan's carrying value partially or in full, when the Group concludes that there is no longer any realistic prospect of recovery of part or all of the loan. For loans that are individually assessed for impairment, the timing of write off is determined on a case-by-case basis. Such loans are reviewed regularly and write offs will be prompted by bankruptcy, insolvency, renegotiation and similar events.

Except for US retail portfolios, where write off of the irrecoverable amount takes place within 60 - 180 days, the typical time frames from initial impairment to write off for the Group's collectively-assessed portfolios are:

- Retail mortgages: write off occurs within five years, and is accelerated where accounts are closed earlier.
- Credit cards: write off of the irrecoverable amount takes place at 12 months; the rest is expected to be recovered over a further three years following which any remaining amounts outstanding are written off.
- Overdrafts and other unsecured loans: write offs occur within six years.
- Business and commercial loans: write offs of commercial loans are determined in the light of individual circumstances; the period does not exceed five years. Business loans are generally written off within five years.

Amounts recovered after a loan has been written off are credited to the loan impairment charge for the period in which they are received.

Financial assets carried at fair value - when a decline in the fair value of a financial asset classified as available-for-sale has been recognised directly in other comprehensive income and there is objective evidence that it is impaired, the cumulative loss is reclassified from equity to profit or loss. The loss is measured as the difference between the amortised cost of the financial asset and its current fair value. Impairment losses on available-for-sale equity instruments are not reversed through profit or loss, but those on available-for-sale debt instruments are reversed, if there is an increase in fair value that is objectively related to a subsequent event.

17. Financial liabilities

On initial recognition, financial liabilities are classified into held-for-trading; designated as at fair value through profit or loss; or amortised cost. Issues of financial liabilities measured at amortised cost are recognised on settlement date; all other regular way transactions in financial liabilities are recognised on trade date.

Held-for-trading - a financial liability is classified as held-for-trading if it is incurred principally for repurchase in the near term, or forms part of a portfolio of financial instruments that are managed together and for which there is evidence of short-term profit taking, or it is a derivative (not in a qualifying hedge relationship). Held-for-trading financial liabilities are recognised at fair value with transaction costs being recognised in profit or loss. Subsequently they are measured at fair value. Gains and losses are recognised in profit or loss as they arise.

Designated as at fair value through profit or loss - financial liabilities may be designated as at fair value through profit or loss only if such designation (a) eliminates or significantly reduces a measurement or recognition inconsistency; or (b) applies to a group of financial assets, financial liabilities or both that the Group manages and evaluates on a fair value basis; or (c) relates to an instrument that contains an embedded derivative which is not evidently closely related to the host contract.

Financial liabilities that the Group designates on initial recognition as being at fair value through profit or loss are recognised at fair value, with transaction costs being recognised in profit or loss, and are subsequently measured at fair value. Gains and losses on financial liabilities that are designated as at fair value through profit or loss are recognised in profit or loss as they arise.

Financial liabilities designated as at fair value through profit or loss principally comprise structured liabilities issued by the Group: designation significantly reduces the measurement inconsistency between these liabilities and the related derivatives carried at fair value.

Amortised cost - all other financial liabilities are measured at amortised cost using the effective interest method (see Accounting policy 3).

Fair value - the Group's approach to determining the fair value of financial instruments measured at fair value is set out in the section of Critical accounting policies and key sources of estimation uncertainty entitled Fair value - financial instruments; further details are given in Note 11.

Accounting policies

18. Financial guarantee contracts

Under a financial guarantee contract, the Group, in return for a fee, undertakes to meet a customer's obligations under the terms of a debt instrument if the customer fails to do so. A financial guarantee is recognised as a liability; initially at fair value and, if not designated as at fair value through profit or loss, subsequently at the higher of its initial value less cumulative amortisation and any provision under the contract measured in accordance with Accounting policy 13. Amortisation is calculated so as to recognise fees receivable in profit or loss over the period of the guarantee.

19. Loan commitments

Provision is made for loan commitments, other than those classified as held-for-trading, if it is probable that the facility will be drawn and the resulting loan will be recognised at a value less than the cash advanced. Syndicated loan commitments in excess of the level of lending under the commitment approved for retention by the Group are classified as held-for-trading and measured at fair value.

20. Derecognition

A financial asset is derecognised when the contractual right to receive cash flows from the asset has expired or when it has been transferred and the transfer qualifies for derecognition. A transfer requires that the Group either (a) transfers the contractual rights to receive the asset's cash flows; or (b) retains the right to the asset's cash flows but assumes a contractual obligation to pay those cash flows to a third party. After a transfer, the Group assesses the extent to which it has retained the risks and rewards of ownership of the transferred asset. The asset remains on the balance sheet if substantially all the risks and rewards have been retained. It is derecognised if substantially all the risks and rewards have been transferred. If substantially all the risks and rewards have been neither retained nor transferred, the Group assesses whether or not it has retained control of the asset. If the Group has retained control of the asset, it continues to recognise the asset to the extent of its continuing involvement; if the Group has not retained control of the asset, it is derecognised.

A financial liability is removed from the balance sheet when the obligation is discharged, or cancelled, or expires. On the redemption or settlement of debt securities (including subordinated liabilities) issued by the Group, the Group derecognises the debt instrument and records a gain or loss being the difference between the debt's carrying amount and the cost of redemption or settlement. The same treatment applies where the debt is exchanged for a new debt issue that has terms substantially different from those of the existing debt. The assessment of whether the terms of the new debt instrument are substantially different takes into account qualitative and quantitative characteristics including a comparison of the present value of the cash flows under the new terms with the present value of the remaining cash flows of the original debt issue discounted at the effective interest rate of the original debt issue.

21. Sale and repurchase transactions

Securities subject to a sale and repurchase agreement under which substantially all the risks and rewards of ownership are retained by the Group continue to be shown on the balance sheet and the sale proceeds recorded as a financial liability. Securities acquired in a reverse sale and repurchase transaction under which the Group is not exposed to substantially all the risks and rewards of ownership are not recognised on the balance sheet and the consideration paid is recorded as a financial asset.

Securities borrowing and lending transactions are usually secured by cash or securities advanced by the borrower. Borrowed securities are not recognised on the balance sheet or lent securities derecognised. Cash collateral given or received is treated as a loan or deposit; collateral in the form of securities is not recognised. However, where securities borrowed are transferred to third parties, a liability for the obligation to return the securities to the stock lending counterparty is recorded.

22. Netting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Group currently has a legally enforceable right to set off the recognised amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. The Group is party to a number of arrangements, including master netting agreements, that give it the right to offset financial assets and financial liabilities but where it does not intend to settle the amounts net or simultaneously and therefore the assets and liabilities concerned are presented gross.

23. Capital instruments

The Group classifies a financial instrument that it issues as a liability if it is a contractual obligation to deliver cash or another financial asset, or to exchange financial assets or financial liabilities on potentially unfavourable terms and as equity if it evidences a residual interest in the assets of the Group after the deduction of liabilities. The components of a compound financial instrument issued by the Group are classified and accounted for separately as financial assets, financial liabilities or equity as appropriate.

Incremental costs and related tax that are directly attributable to an equity transaction are deducted from equity.

The consideration for any ordinary shares of the company purchased by the Group (treasury shares) is deducted from equity. On the cancellation of treasury shares their nominal value is removed from equity and any excess of consideration over nominal value is treated in accordance with the capital maintenance provisions of the Companies Act. On the sale or reissue of treasury shares the consideration received and related tax are credited to equity, net of any directly attributable incremental costs.

Accounting policies

24. Derivatives and hedging

Derivative financial instruments are initially recognised, and subsequently measured, at fair value. The Group's approach to determining the fair value of financial instruments is set out in the section of Critical accounting policies and key sources of estimation uncertainty entitled Fair value - financial instruments; further details are given in Note 11.

A derivative embedded in a contract is accounted for as a stand-alone derivative if its economic characteristics are not closely related to the economic characteristics of the host contract; unless the entire contract is measured at fair value with changes in fair value recognised in profit or loss.

Gains and losses arising from changes in the fair value of derivatives that are not the hedging instrument in a qualifying hedge are recognised as they arise in profit or loss. Gains and losses are recorded in Income from trading activities except for gains and losses on those derivatives that are managed together with financial instruments designated at fair value; these gains and losses are included in Other operating income.

The Group enters into three types of hedge relationship: hedges of changes in the fair value of a recognised asset or liability or firm commitment (fair value hedges); hedges of the variability in cash flows from a recognised asset or liability or a highly probable forecast transaction (cash flow hedges); and hedges of the net investment in a foreign operation.

Hedge relationships are formally designated and documented at inception. The documentation identifies the hedged item and the hedging instrument and details the risk that is being hedged and the way in which effectiveness will be assessed at inception and during the period of the hedge. If the hedge is not highly effective in offsetting changes in fair values or cash flows attributable to the hedged risk, consistent with the documented risk management strategy, hedge accounting is discontinued. Hedge accounting is also discontinued if the Group revokes the designation of a hedge relationship.

Fair value hedge - in a fair value hedge, the gain or loss on the hedging instrument is recognised in profit or loss. The gain or loss on the hedged item attributable to the hedged risk is recognised in profit or loss and, where the hedged item is measured at amortised cost, adjusts the carrying amount of the hedged item. Hedge accounting is discontinued if the hedge no longer meets the criteria for hedge accounting; or if the hedging instrument expires or is sold, terminated or exercised; or if hedge designation is revoked. If the hedged item is one for which the effective interest rate method is used, any cumulative adjustment is amortised to profit or loss over the life of the hedged item using a recalculated effective interest rate.

Cash flow hedge - in a cash flow hedge, the effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income and the ineffective portion in profit or loss. When the forecast transaction results in the recognition of a financial asset or financial liability, the cumulative gain or loss is reclassified from equity to profit or loss in the same periods in which the hedged forecast cash flows affect profit or loss. Otherwise the cumulative gain or loss is removed from equity and recognised in profit or loss at the same time as the hedged transaction. Hedge accounting is discontinued if the hedge no longer meets the criteria for hedge accounting; if the hedging instrument expires or is sold, terminated or exercised; if the forecast transaction is no longer expected to occur; or if hedge designation is revoked. On the discontinuance of hedge accounting (except where a forecast transaction is no longer expected to occur), the cumulative unrealised gain or loss is reclassified from equity to profit or loss when the hedged cash flows occur or, if the forecast transaction results in the recognition of a financial asset or financial liability, when the hedged forecast cash flows affect profit or loss. Where a forecast transaction is no longer expected to occur, the cumulative unrealised gain or loss is reclassified from equity to profit or loss immediately.

Hedge of net investment in a foreign operation - in the hedge of a net investment in a foreign operation, the portion of foreign exchange differences arising on the hedging instrument determined to be an effective hedge is recognised in other comprehensive income. Any ineffective portion is recognised in profit or loss. Non-derivative financial liabilities as well as derivatives may be the hedging instrument in a net investment hedge. On disposal or partial disposal of a foreign operation, the amount accumulated in equity is reclassified from equity to profit or loss.

25. Associates and joint ventures

Associates and joint ventures are entities that the Group does not control but either shares control (joint ventures) or has significant control over its operating and financial policies (associates). Investments in associates and interests in joint ventures are recognised using the equity method. They are stated initially at cost, including attributable goodwill, and subsequently adjusted for post-acquisition changes in the Group's share of net assets.

Accounting policies

26. Share-based compensation

The Group operates a number of share-based compensation schemes under which it awards RBSG shares and share options to its employees. Such awards are generally subject to vesting conditions: conditions that vary the amount of cash or shares to which an employee is entitled. Vesting conditions include service conditions (requiring the employee to complete a specified period of service) and performance conditions (requiring the employee to complete a specified period of service and specified performance targets to be met). Other conditions to which an award is subject are non-vesting conditions (such as a requirement to save throughout the vesting period).

The cost of employee services received in exchange for an award of shares or share options granted is measured by reference to the fair value of the shares or share options on the date the award is granted and takes into account non-vesting conditions and market performance conditions (conditions related to the market price of RBSG shares): an award is treated as vesting irrespective of whether any market performance condition or non-vesting condition is met. The fair value of options granted is estimated using valuation techniques which incorporate exercise price, term, risk-free interest rates, the current share price and its expected volatility. The cost is expensed on a straight-line basis over the vesting period (the period during which all the specified vesting conditions must be satisfied) with a corresponding increase in equity in an equity-settled award, or a corresponding liability in a cash-settled award. The cost is adjusted for vesting conditions (other than market performance conditions) so as to reflect the number of shares or share options that actually vest.

If an award is modified, the original cost continues to be recognised as if there had been no modification. Where modification increases the fair value of the award, this increase is recognised as an expense over the modified vesting period. A new award of shares or share options is treated as the modification of a cancelled award if, on the date the new award is granted, the Group identifies them as replacing the cancelled award. The cancellation of an award through failure to meet non-vesting conditions triggers an immediate expense for any unrecognised element of the cost of an award.

27. Cash and cash equivalents

In the cash flow statement, cash and cash equivalents comprises cash and deposits with banks with an original maturity of less than three months together with short-term highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of change in value.

Critical accounting policies and key sources of estimation uncertainty

The reported results of the Group are sensitive to the accounting policies, assumptions and estimates that underlie the preparation of its financial statements. UK company law and IFRS require the directors, in preparing the Group's financial statements, to select suitable accounting policies, apply them consistently and make judgements and estimates that are reasonable and prudent. In the absence of an applicable standard or interpretation, IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors', requires management to develop and apply an accounting policy that results in relevant and reliable information in the light of the requirements and guidance in IFRS dealing with similar and related issues and the IASB's 'Conceptual Framework for Financial Reporting'. The judgements and assumptions involved in the Group's accounting policies that are considered by the Board to be the most important to the portrayal of its financial condition are discussed below. The use of estimates, assumptions or models that differ from those adopted by the Group would affect its reported results.

Pensions

The Group operates a number of defined benefit pension schemes as described in Note 4 on the accounts. The assets of the schemes are measured at their fair value at the balance sheet date. Scheme liabilities are measured using the projected unit credit method, which takes account of projected earnings increases, using actuarial assumptions that give the best estimate of the future cash flows that will arise under the scheme liabilities. These cash flows are discounted at the interest rate applicable to high-quality corporate bonds of the same currency and term as the liabilities. Any recognisable surplus or deficit of scheme assets over liabilities is recorded in the balance sheet as an asset (surplus) or liability (deficit).

In determining the value of scheme liabilities, financial and demographic assumptions are made including price inflation, pension increases, earnings growth and the longevity of scheme members. A range of assumptions could be adopted in valuing the schemes' liabilities. Different assumptions could significantly alter the amount of the surplus or deficit recognised in the balance sheet and the pension cost charged to the income statement. The assumptions adopted for the Group's pension schemes are set out in Note 4 on the accounts, together with sensitivities of the balance sheet and income statement to changes in those assumptions.

A pension asset of £214 million and a liability of £3,210 million were recognised on the balance sheet at 31 December 2013 (2012 - asset £144 million; liability £3,884 million; 2011 - asset £188 million, liability £2,239 million).

Accounting policies

Goodwill

The Group capitalises goodwill arising on the acquisition of businesses, as discussed in Accounting policy 6. The carrying value of goodwill as at 31 December 2013 was £10,139 million (2012 - £11,266 million; 2011 - £12,424 million).

Goodwill is the excess of the cost of an acquired business over the fair value of its net assets. The determination of the fair value of assets and liabilities of businesses acquired requires the exercise of management judgement; for example those financial assets and liabilities for which there are no quoted prices, and those non-financial assets where valuations reflect estimates of market conditions, such as property. Different fair values would result in changes to the goodwill arising and to the post-acquisition performance of the acquisition. Goodwill is not amortised but is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired.

For the purposes of impairment testing, goodwill acquired in a business combination is allocated to each of the Group's cash generating units or groups of cash-generating units expected to benefit from the combination. Goodwill impairment testing involves the comparison of the carrying value of a cash-generating unit or group of cash-generating units with its recoverable amount. The recoverable amount is the higher of the unit's fair value and its value in use. Value in use is the present value of expected future cash flows from the cash generating unit or group of cash-generating units. Fair value is the amount obtainable for the sale of the cash-generating unit in an arm's length transaction between knowledgeable, willing parties.

Impairment testing inherently involves a number of judgmental areas: the preparation of cash flow forecasts for periods that are beyond the normal requirements of management reporting; the assessment of the discount rate appropriate to the business; estimation of the fair value of cash-generating units; and the valuation of the separable assets of each business whose goodwill is being reviewed. Sensitivity to changes in assumptions are discussed in Note 17 on page 445.

Provisions for liabilities

As set out in Note 22, at 31 December 2013 the Group recognised provisions for liabilities in respect of Payment Protection Insurance, £926 million (2012 - £895 million; 2011 - £745 million), Interest Rate Hedging Products, £1,077 million (2012 - £676 million; 2011 - nil), LIBOR investigations, £416 million (2012 - £381 million; 2011 - nil) and other regulatory proceedings and litigation, £2,168 million (2012 - £368 million; 2011 - £241 million). Provisions are liabilities of uncertain timing or amount, and are recognised when there is a present obligation as a result of a past event, the outflow of economic benefit is probable and the outflow can be estimated reliably. Judgement is involved in determining whether an obligation exists, and in estimating the probability, timing and amount of any outflows. Where the Group can look to another party such as an insurer to pay some or all of the expenditure required to settle a provision, any reimbursement is recognised when, and only when, it is virtually certain that it will be received.

Payment Protection Insurance - the Group has established a provision for redress payable in respect of the mis-selling of Payment Protection Insurance policies. The provision is management's best estimate of the anticipated costs of redress and related administration expenses. The determination of appropriate assumptions to underpin the provision requires significant judgement by management. The principal assumptions underlying the provision together with sensitivities to changes in those assumptions are given in Note 22.

Interest Rate Hedging Products - the Group has agreed to a redress exercise and past business reviews in relation to the sale of Interest Rate Hedging Products to some small and medium sized businesses classified as retail clients. The ultimate cost of this exercise to the Group is uncertain. Estimating the liability depends on a number of assumptions. These assumptions and the sensitivity of the provision to changes in them are discussed in Note 22.

Provisions for litigation - the Group and members of the Group are party to legal proceedings in the United Kingdom, the United States and other jurisdictions, arising out of their normal business operations. The measurement and recognition of liabilities in respect of litigation involves a high degree of management judgement. Before the existence of a present obligation as the result of a past event can be confirmed, numerous facts may need to be established, involving extensive and time-consuming discovery, and novel or unsettled legal questions addressed. Once it is determined there is an obligation, assessing the probability of economic outflows and estimating the amount of any liability can be very difficult. In many proceedings, it is not possible to determine whether any loss is probable or to estimate the amount of any loss. Furthermore, for an individual matter, there can be a wide range of possible outcomes and often it is not practicable to quantify a range of such outcomes. The Group's outstanding litigation is periodically assessed in consultation with external professional advisers, where appropriate, to determine the likelihood of the Group incurring a liability. A detailed description of the Group's material legal proceedings and a discussion of the nature of the associated uncertainties are given in Note 32.

Tax contingencies - determining the Group's income tax charge and its provisions for income taxes necessarily involves a significant degree of estimation and judgement. The tax treatment of some transactions is uncertain and tax computations are yet to be agreed with the tax authorities in a number of jurisdictions. The Group recognises anticipated tax liabilities based on all available evidence and, where appropriate, in the light of external advice. Any difference between the final outcome and the amounts provided will affect current and deferred income tax assets and liabilities in the period when the matter is resolved.

Accounting policies

Deferred tax

The Group makes provision for deferred tax on temporary differences where tax recognition occurs at a different time from accounting recognition. Deferred tax assets of £3,478 million were recognised as at 31 December 2013 (2012 - £3,443 million; 2011 - £3,878 million).

The Group has recognised deferred tax assets in respect of losses, principally in the UK, and temporary differences. Deferred tax assets are recognised in respect of unused tax losses to the extent that it is probable that there will be future UK taxable profits against which the losses can be utilised. Business projections indicate that sufficient future taxable income will be available against which to offset these recognised deferred tax assets within eight years (2012 and 2011 - six years). Deferred tax assets of £4,942 million (2012 - £3,827 million; 2011 - £3,246 million) have not been recognised in respect of tax losses carried forward where the availability of future taxable profits is uncertain. Further details about the Group's deferred tax assets are given in Note 23.

Loan impairment provisions

The Group's loan impairment provisions are established to recognise incurred impairment losses in its portfolio of loans classified as loans and receivables and carried at amortised cost. A loan is impaired when there is objective evidence that events since the loan was granted have affected expected cash flows from the loan. Such objective evidence, indicative that a borrower's financial condition has deteriorated, can include for loans that are individually assessed: the non-payment of interest or principal; debt renegotiation; probable bankruptcy or liquidation; significant reduction in the value of any security; breach of limits or covenants; and deteriorating trading performance and, for collectively assessed portfolios: the borrowers' payment status and observable data about relevant macroeconomic measures.

The impairment loss is the difference between the carrying value of the loan and the present value of estimated future cash flows at the loan's original effective interest rate.

At 31 December 2013, loans and advances to customers classified as loans and receivables totalled £364,772 million (2012 - £397,846 million; 2011 - £427,805 million) and customer loan impairment provisions amounted to £25,153 million (2012 - £21,136 million; 2011 - £19,760 million). Loan impairment provisions charged to profit or loss in 2013 amounted to £8,427 million (2012 - £5,292 million; 2011 - £7,241 million). These include loan impairment provisions in respect of loans to be transferred to RBS Capital Resolution Group. These loans are expected to be exited within three years and impairment provisions in respect of these loans have been reassessed in the light of this change in recovery strategy.

There are two components to the Group's loan impairment provisions: individual and collective.

Individual component - all impaired loans that exceed specific thresholds are individually assessed for impairment. Individually assessed loans principally comprise the Group's portfolio of commercial loans to medium and large businesses. Impairment losses are recognised as the difference between the carrying value of the loan and the discounted value of management's best estimate of future cash repayments and proceeds from any security held. These estimates take into account the customer's debt capacity and financial flexibility; the level and quality of its earnings; the amount and sources of cash flows; the industry in which the counterparty operates; and the realisable value of any security held. Estimating the quantum and timing of future recoveries involves significant judgement. The size of receipts will depend on the future performance of the borrower and the value of security, both of which will be affected by future economic conditions; additionally, collateral may not be readily marketable. The actual amount of future cash flows and the date they are received may differ from these estimates and consequently actual losses incurred may differ from those recognised in these financial statements.

Collective component - this is made up of two elements: loan impairment provisions for impaired loans that are below individual assessment thresholds (collectively assessed provisions) and for loan losses that have been incurred but have not been separately identified at the balance sheet date (latent loss provisions). Collectively assessed provisions are established on a portfolio basis using a present value methodology taking into account the level of arrears, security, past loss experience, credit scores and defaults based on portfolio trends. The most significant factors in establishing these provisions are the expected loss rates and the related average life. These portfolios include mortgages, credit card receivables and other personal lending. The future credit quality of these portfolios is subject to uncertainties that could cause actual credit losses to differ materially from reported loan impairment provisions. These uncertainties include the economic environment, notably interest rates and their effect on customer spending, the unemployment level, payment behaviour and bankruptcy trends. Latent loss provisions are held against estimated impairment losses in the performing portfolio that have yet to be identified as at the balance sheet date. To assess the latent loss within its portfolios, the Group has developed methodologies to estimate the time that an asset can remain impaired within a performing portfolio before it is identified and reported as such.

Fair value - financial instruments

Financial instruments classified as held-for-trading or designated as at fair value through profit or loss and financial assets classified as available-for-sale are recognised in the financial statements at fair value. All derivatives are measured at fair value. Gains or losses arising from changes in the fair value of financial instruments classified as held-for-trading or designated as at fair value through profit or loss are included in the income statement. Unrealised gains and losses on available-for-sale financial assets are recognised directly in equity unless an impairment loss is recognised.

Accounting policies

Financial instruments measured at fair value include:

Loans and advances (held-for-trading and designated as at fair value through profit or loss) - principally comprise reverse repurchase agreements (reverse repos) and cash collateral.

Debt securities (held-for-trading, designated as at fair value through profit or loss and available-for-sale) - debt securities include those issued by governments, municipal bodies, mortgage agencies and financial institutions as well as corporate bonds, debentures and residual interests in securitisations.

Equity securities (held-for-trading, designated as at fair value through profit or loss and available-for-sale) - comprise equity shares of companies or corporations both listed and unlisted.

Deposits by banks and customer accounts (held-for-trading and designated as at fair value through profit or loss) - deposits measured at fair value principally include repurchase agreements (repos) and cash collateral.

Debt securities in issue (held-for-trading and designated as at fair value through profit or loss) - principally comprise medium term notes.

Short positions (held-for-trading) - arise in dealing and market making activities where debt securities and equity shares are sold which the Group does not currently possess.

Derivatives - these include swaps (currency swaps, interest rate swaps, credit default swaps, total return swaps and equity and equity index swaps), forward foreign exchange contracts, forward rate agreements, futures (currency, interest rate and equity) and options (exchange-traded options on currencies, interest rates and equities and equity indices and OTC currency and equity options, interest rate caps and floors and swaptions).

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. It also uses the assumptions that market participants would use when pricing the asset or liability. In determining fair value the Group maximises the use of relevant observable inputs and minimises the use of unobservable inputs.

Where the Group manages a group of financial assets and financial liabilities on the basis of its net exposure to either market risks or credit risk, it measures the fair value of a group of financial assets and financial liabilities on the basis of the price that it would receive to sell a net long position (i.e. an asset) for a particular risk exposure or to transfer a net short position (i.e. a liability) for a particular risk exposure in an orderly transaction at the measurement date under current market conditions.

Credit valuation adjustments are made when valuing derivative financial assets to incorporate counterparty credit risk. Adjustments are also made when valuing financial liabilities measured at fair value to reflect the Group's own credit standing.

Where the market for a financial instrument is not active, fair value is established using a valuation technique. These valuation techniques involve a degree of estimation, the extent of which depends on the instrument's complexity and the availability of market-based data. More details about the Group's valuation methodologies and the sensitivity to reasonably possible alternative assumptions of the fair value of financial instruments valued using techniques where at least one significant input is unobservable are given in Note 11 on pages 412 to 432.

Accounting developments

International Financial Reporting Standards

A number of IFRSs and amendments to IFRS were in issue at 31 December 2013 that had effective dates of 1 January 2014 or later.

Effective for 2014

'Offsetting Financial Assets and Financial Liabilities (Amendments to IAS 32)' adds application guidance to IAS 32 to address inconsistencies identified in applying some of the standard's criteria for offsetting financial assets and financial liabilities.

'Investment Entities (amendments to IFRS 10, IFRS 12 and IAS 27)' applies to investment entities; such entities should measure their subsidiaries (other than those that provide services related to the entity's investment activities) at fair value through profit or loss.

IFRIC 21 'Levies' provides guidance on accounting for levies payable to public authorities if certain conditions are met on a particular date.

IAS 36 'Recoverable Amount Disclosures for Non-Financial Assets (Amendments to IAS 36)' align IAS 36's disclosure requirements about recoverable amounts with IASB's original intentions.

IAS 39 'Novation of Derivatives and Continuation of Hedge Accounting (Amendments to IAS 39)' provides relief from discontinuing hedge accounting when novation of a derivative designated as a hedging instrument meets certain criteria.

The implementation of these requirements is not expected to have a material effect on the Group's financial statements.

Accounting policies

Effective after 2014

IAS 19 'Defined Benefit Plans: Employee Contributions' was issued in November 2013. This amendment distinguishes the accounting for employee contributions that are related to service from those that are independent of service. It is effective for annual periods beginning on or after 1 July 2014.

Annual Improvements to IFRS 2010 - 2012 and 2011 - 2013 cycles were issued in December 2013. There are a number of minor changes to IFRS that will not have a material effect on the Group's financial statements. All amendments are effective for annual periods beginning on or after 1 July 2014.

In November 2009, the IASB issued IFRS 9 'Financial Instruments' simplifying the classification and measurement requirements in IAS 39 in respect of financial assets. The standard reduces the measurement categories for financial assets to two: fair value and amortised cost. A financial asset is classified on the basis of the entity's business model for managing the financial asset and the contractual cash flow characteristics of the financial asset. Only assets with contractual terms that give rise to cash flows on specified dates that are solely payments of principal and interest on principal and which are held within a business model whose objective is to hold assets in order to collect contractual cash flows are classified as amortised cost. All other financial assets are measured at fair value. Changes in the value of financial assets measured at fair value are generally taken to profit or loss.

In October 2010, IFRS 9 was updated to include requirements in respect of the classification and measurement of liabilities. These do not differ markedly from those in IAS 39 except for the treatment of changes in the fair value of financial liabilities that are designated as at fair value through profit or loss attributable to own credit; these must be presented in other comprehensive income.

In November 2013, the IASB published IFRS 9 'Financial Instruments (Hedge Accounting and amendments to IFRS 9, IFRS 7 and IAS 39)'. These amendments introduce a new hedge accounting model. The classification of hedges into fair value, cash flow and net investment hedges has been retained. The changes to the current hedge accounting framework include:

- Hedge effectiveness testing is prospective only based on the hedging objective.
- A risk component can be designated as the hedged item, for financial items and non-financial items, provided it is separately identifiable and reliably measureable.
- The time value of an option, the forward element of a forward contract and any foreign currency basis spread can be excluded from the designation of a financial instrument as the hedging instrument and accounted for as hedging costs.

The amendments also:

- revised IFRS 9 to allow an entity to elect to apply its requirement to present changes in the fair value of liabilities designated as at fair value through profit or loss attributable to own credit risk in other comprehensive income without applying the other requirements of the standard; otherwise all phases of IFRS 9 must be applied from the same effective date.
- removed from IFRS 9 the effective date of 1 January 2015.

At its February 2014 meeting the IASB tentatively agreed on 1 January 2018 as the effective date for IFRS 9.

IFRS 9 makes major changes to the framework for financial instrument accounting. The Group is assessing its effect which will depend on the results of IASB's reconsideration of classification and measurement and the final requirements for the impairment of financial assets expected to be published in 2014.

Notes:

- (1) The analysis of income from trading activities is based on how the business is organised and the underlying risks managed. Income from trading activities comprises gains and losses on financial instruments held for trading, both realised and unrealised, interest income and dividends and the related funding costs. The types of instruments include:
 - Foreign exchange: spot foreign exchange contracts, currency swaps and options, emerging markets and related hedges and funding.
 - Interest rate: interest rate swaps, forward foreign exchange contracts, forward rate agreements, interest rate options, interest rate futures and related hedges and funding.
 - Credit: asset-backed securities, corporate bonds, credit derivatives and related hedges and funding.
 - Equities: equities, equity derivatives and related hedges and funding.
 - Commodities: commodities, commodity contracts and related hedges and funding.
- (2) In January 2013, the Group redeemed certain senior unsecured securities for cash resulting in losses of £51 million. In June 2013, the Group redeemed certain mortgage backed debt securities in exchange for cash resulting in gains totalling £242 million. In July 2013, the Group redeemed certain unsecured subordinated debt securities resulting in a gain of £13 million. In December 2013, the Group redeemed £987 million of senior unsecured debt resulting in a loss of £29 million. In March 2012 and September 2012, the Group redeemed certain notes resulting in net gains totalling £454 million being credited to profit or loss. In June 2011, the Group redeemed certain mortgage backed debt securities in exchange for cash, resulting in gains totalling £255 million being credited to profit or loss.
- (3) Measured as the change in fair value from movements in the year in the credit risk premium payable by the Group.
- (4) Includes income from activities other than banking and insurance.

*Restated

Note:

(1) Includes Bank levy, Payment Protection Insurance costs, Interest Rate Hedging Products redress and related costs, and regulatory and legal actions, which are discussed in more detail below.

Bank levy

The UK bank levy was charged at a rate of 0.13% on chargeable liabilities in excess of £20 billion, and amounted to £200 million for 2013 (2012 - 0.088%, £175 million; 2011 - average 0.075%, £300 million).

Payment Protection Insurance (PPI)

To reflect current experience of PPI complaints received, the Group increased its provision for PPI by £900 million in 2013 (2012 - £1,110 million; 2011 - £850 million), bringing the cumulative charge taken to £3.1 billion, of which £2.2 billion (70%) in redress had been paid by 31 December 2013. Of the £3.1 billion cumulative charge, £2.8 billion relates to redress and £0.3 billion to administrative expenses. The eventual cost is dependent upon complaint volumes, uphold rates and average redress costs.

Assumptions relating to these are inherently uncertain and the ultimate financial impact may be different from the amount provided. The Group will continue to monitor the position closely and refresh its assumptions as more information becomes available.

Interest Rate Hedging Products (IRHP) redress and related costs

Following an industry-wide review conducted in conjunction with the Financial Services Authority (now being dealt with by the Financial Conduct Authority (FCA)), a charge of £700 million was booked in 2012 for redress in relation to certain interest rate hedging products sold to small and medium-sized businesses classified as retail clients under FSA rules. £575 million was earmarked for client redress and £125 million for administrative expenses. The estimate for administrative costs was increased by £50 million in Q1 2013 following development of the plan for administering this process in accordance with FSA guidelines. The provision was further increased in Q4 2013 by £500 million, reflecting both higher volumes and anticipated redress payments, recalibration of our methodology based on experience during Q4 2013 and additional administration charges. The cumulative charge for IRHP is £1.3 billion, of which £1.0 billion relates to redress and £0.3 billion relates to administrative expenses. Customers may also be entitled to be compensated for any consequential losses they may have suffered. The Group is not able to measure reliably any liability it may have and has accordingly not made any provision.

Notes on the consolidated accounts

3 Operating expenses continued

The Group expects to complete its review of sales of IRHP and provide basic redress to all customers who are entitled to it by the end of 2014. On 23 October 2013, the Group announced that it would split redress payments for all customers who may have been mis-sold IRHP. Customers will receive redress monies without having to wait for the assessment of any additional consequential loss claims which are outside the allowance for such claims included in the 8% interest on redress due.

The Group continues to monitor the level of provision given the uncertainties over the number of transactions that will qualify for redress and the nature and cost of that redress.

Integration costs included in operating expenses comprise expenditure incurred in respect of cost reduction and revenue enhancement programmes.

	2013 £m	2012 £m	2011 £m
Staff costs	—	—	38
Premises and equipment	1	(2)	6

	489	1,244	765

Divestment costs included in operating expenses comprise:

	2013 £m	2012 £m	2011 £m
Staff costs	86	111	84
Premises and equipment	2	(2)	11
Other administrative expenses	77	62	50
	165	171	145

Regulatory and legal actions

The Group is party to certain legal proceedings and regulatory investigations and continues to co-operate with a number of regulators. All such matters are periodically reassessed with the assistance of external professional advisers, where appropriate, to determine the likelihood of the Group incurring a liability and to evaluate the extent to which a reliable estimate of any liability can be made. An additional charge of £2,394 million was booked in 2013, primarily in respect of matters related to mortgage-backed securities and securities related litigation following recent third party litigation settlements and regulatory decisions.

Notes on the consolidated accounts

The average number of persons employed, rounded to the nearest hundred, in the continuing operations of the Group during the year, excluding temporary staff, was 117,100 (2012 - 123,500; 2011 - 129,200); on the same basis there were 3,700 people employed in discontinued operations (2012 - 15,000; 2011 - 15,100). The average number of temporary employees during 2013 was 10,300 (2012 - 10,900; 2011 - 11,400). The number of persons employed in the continuing operations of the Group at 31 December, excluding temporary staff, were as follows:

	2013	2012	2011
UK Retail	25,300	27,600	29,500
UK Corporate	13,300	13,000	13,400
Wealth	4,800	5,000	5,300
International Banking	4,100	4,100	5,000
Ulster Bank	4,700	4,400	4,400
US Retail & Commercial	18,700	19,200	20,000
Retail & Commercial	70,900	73,300	77,600
Markets	9,400	9,900	12,400
Central items	6,700	5,900	5,300
Non-Core	1,100	2,900	4,100
Business Services	26,600	26,700	27,500
Integration and restructuring	200	500	600
Total	114,900	119,200	127,500
UK	68,700	71,200	76,600
USA	21,400	22,300	23,100
Europe	8,400	9,200	9,800
Rest of the World	16,400	16,500	18,000
Total	114,900	119,200	127,500

There were no people employed in discontinued operations at 31 December 2013 (2012 - 14,300; 2011 - 15,100).

Share-based payments

As described in the Remuneration report on page 88, the Group grants share-based awards to employees principally on the following bases:

Award plan	Eligible employees	Nature of award (1)	Vesting conditions (2)	Settlement
Sharesave	UK, Republic of Ireland, Channel Islands, Gibraltar and Isle of Man	Option to buy shares under employee savings plan	Continuing employment or leavers in certain circumstances	2014 to 2019
Deferred performance awards	All	Awards of ordinary shares	Continuing employment or leavers in certain circumstances	2014 to 2016
Restricted share awards	Senior employees	Awards of conditional shares	Continuing employment or leavers in certain circumstances and/or achievement of performance conditions	2014 to 2015
Long-term incentives (3)	Senior employees	Awards of conditional shares or share options	Continuing employment or leavers in certain circumstances and/or achievement of performance conditions	2014 to 2019

Notes:

(1) Awards are equity-settled unless international comparability is better served by cash-settled awards.

(2) All awards have vesting conditions and therefore some may not vest.

(3) Long-term incentives include the Executive Share Option Plan, the Long-Term Incentive Plan and the Medium-Term Performance Plan.

(4) The strike price of options and the fair value on granting awards of fully paid shares is the average market price over the five trading days preceding grant date.

Notes on the consolidated accounts

3 Operating expenses continued

At 31 December	320	94	13	375	98	20	345	58	37

Notes on the consolidated accounts

The market value of awards exercised in 2013 was £37 million (2012 - £10 million; 2011 - £5 million). There are vested options over 13 million shares exercisable up to 2019 (2012 - 18 million shares up to 2019; 2011 - 5 million shares up to 2019).

At 31 December 2013, a provision of £1 million had been made in respect of 0.1 million options over shares that may be cash-settled (2012 - £1 million in respect of 0.1 million share awards and 0.3 million options over shares; 2011 - £3 million in respect of 0.4 million share awards and 1.4 million options over shares).

The fair value of options granted in 2013 was determined using a pricing model that included: expected volatility of shares determined at the grant date based on historic volatility over a period of up to seven years; expected option lives that equal the vesting period; no dividends on equity shares; and a risk-free interest rate determined from the UK gilt rates with terms matching the expected lives of the options.

Variable compensation awards

The following tables analyse the Group and Markets variable compensation awards for 2013 (1).

	Group			Markets

 - (2) Cash payments to all employees are limited to £2,000.
 - (3) Excludes other performance related compensation.
 - (4) Reported operating profit excluding the impact of RCR and before variable compensation expense and one-off and other items.

Notes on the consolidated accounts

4 Pensions

The Group sponsors a number of pension schemes in the UK and overseas whose assets are independent of the Group's finances.

The Royal Bank of Scotland Group Pension Fund (the "Main scheme") operates under UK trust law and is managed and administered on behalf of its members in accordance with the terms of the trust deed, the scheme rules and UK legislation (principally the Pension Schemes Act 1993, the Pensions Act 1995 and the Pensions Act 2004). Under UK legislation a defined benefit pension scheme is required to meet the statutory funding objective of having sufficient and appropriate assets to cover its liabilities. Pension fund trustees are required to: prepare a statement of funding principles; obtain regular actuarial valuations and reports; put in place a recovery plan addressing any funding shortfall; and send regular summary funding statements to members of the scheme.

The Main scheme corporate trustee is RBS Pension Trustee Limited (RBSPT), a wholly owned subsidiary of National Westminster Bank Plc. RBSPT is the legal owner of the Main scheme assets which are held separately from the assets of the Group. The Board of RBSPT comprises four trustee directors nominated by members selected from eligible active staff and pensioner members who apply and six appointed by the Group. The Board is responsible for operating the scheme in line with its formal rules and pensions law. It has a duty to act in the best interests of all scheme members, including pensioners and those who are no longer employed by the Group, but who still have benefits in the scheme.

Similar governance principles apply to the Group's other pension schemes, although different legislative frameworks apply to the Group's overseas schemes.

The Main scheme, accounting for 86% (2012 and 2011 - 85%) of the Group's retirement benefit obligations, was closed to new entrants in 2006. Since 2009, pensionable salary increases in the Main scheme and certain other UK and Irish schemes have been limited to 2% per annum or CPI inflation if lower. Also, with effect from 1 October 2012, the normal pension age for future benefits was increased to 65 unless members elected to make a contribution to maintain a normal pension age of 60.

The Group's defined benefit schemes generally provide a pension of one-sixtieth of final pensionable salary for each year of service prior to retirement up to a maximum of 40 years. Employees making additional contributions can secure additional benefits.

Since October 2006, new UK entrants may join The Royal Bank of Scotland Retirement Savings Plan, a defined contribution pension scheme.

The Group also provides post-retirement benefits other than pensions, principally through subscriptions to private healthcare schemes in the UK and the US and unfunded post-retirement benefit plans. Provision for the costs of these benefits is charged to the income statement over the average remaining future service lives of eligible employees. The amounts are not material.

Interim valuations of the Group's schemes under IAS 19 'Employee Benefits' were prepared at 31 December with the support of independent actuaries, using the following assumptions:

Principal actuarial assumptions (weighted average)	Main scheme			All schemes		
	2013 %	2012* %	2011* %	2013 %	2012* %	2011* %
Discount rate (1)	4.7	4.5	5.0	4.5	4.4	5.2
Expected return on plan assets (1)	4.7	4.5	5.0	4.5	4.4	5.2
Rate of increase in salaries	1.8	1.8	1.8	1.8	1.7	2.0
Rate of increase in pensions in payment	3.1	2.8	3.0	2.9	2.6	2.9
Inflation assumption	3.3	2.9	3.0	3.2	2.8	3.0

*Restated

Note:

(1) The discount rate and the expected return on plan assets for the Main scheme as at 31 December 2013 is 4.65%.

Notes on the consolidated accounts

Discount rate

The Group discounts its defined benefit pension obligations at discount rates determined by reference to the yield on 'high quality' corporate bonds.

The sterling yield curve (applied to 92% of the Group's defined benefit obligations) is constructed by reference to yields on 'AA' corporate bonds from which a single discount rate is derived based on a cash flow profile similar in structure and duration to the pension obligations. Significant judgement is required when setting the criteria for bonds to be included in the population from which the yield curve is derived. The criteria include issue size, quality of pricing and the exclusion of outliers. Judgement is also required in determining the shape of the yield curve at long durations: a constant credit spread relative to gilts is assumed.

Prior to 2012 the discount rate was determined by reference to the upper quartile yield on the iBoxx over 15 year sterling corporate bond index, less a margin determined by reference to the shape of the yield curve and the spread of yields among the index's constituents.

Discount rates for other currencies are derived using a variety of methodologies. In the case of US dollar defined benefit obligations, a matching portfolio of high-quality 'AA' corporate bonds is used for the first 30 years' cash flows; cash flows beyond 30 years are discounted using a yield curve determined in a similar way to the UK. For euro defined benefit obligations, a similar approach to the UK has been used at 31 December 2013. However, at longer durations, rates are derived by extrapolating yields on 'A' and 'AAA' corporate bonds to derive equivalent 'AA' yields. Prior to 2012, extrapolation was not used at longer durations and different criteria were used to determine the reference pool of 'AA' bonds.

Notes on the consolidated accounts

4 Pensions continued

The assets of the Main scheme, which represent 85% of plan assets at 31 December 2013 (2012 - 85%; 2011 - 84%), are invested in a diversified portfolio of quoted and private equity, government and corporate fixed-interest and index-linked bonds, and other assets including property and hedge funds.

The Main scheme also employs derivative instruments, where appropriate, to achieve a desired asset class exposure or to match assets more closely to liabilities. The value of assets shown reflects the actual physical assets held by the scheme, with any derivative holdings valued on a mark-to-market basis.

The Main scheme's holdings of derivative instruments are summarised in the table below:

	2013			2012			2011		
	Notional amounts £m	Fair value Assets £m	Liabilities £m	Notional amounts £m	Fair value Assets £m	Liabilities £m	Notional amounts £m	Fair value Assets £m	Liabilities £m

Equity and bond futures	1,904	71	2	2,109	16	17	3,745	80	10
Currency forwards	9,182	66	—	8,551	41	—	2,078	8	—
Equity and bond call options	4,102	108	63	963	94	—	814	67	4
Equity and bond put options	4,071	11	90	963	13	31	665	11	—

The investment strategy of other schemes is similar to that of the Main scheme, adjusted to take account of the nature of liabilities, risk appetite of the trustees, size of the scheme and any local regulatory constraints. The use of derivative instruments outside the Main scheme is not material.

Swaps are part of the management of the inflation and interest rate sensitivity of the Main scheme liabilities. They have been executed at prevailing market rates and within standard market bid/offer spreads. The majority of swaps are with The Royal Bank of Scotland plc and National Westminster Bank Plc (the "banks"). At 31 December 2013, the gross notional value of the swaps was £31,664 million (2012 - £28,541 million; 2011 - £22,918 million) and had a net positive fair value of £624 million (2012 - £370 million; 2011 - £431 million) to the scheme.

Collateral is required on all swap transactions with those between the banks and the Main scheme on terms that do not allow the banks to re-hypothecate. The banks had delivered £633 million of collateral at 31 December 2013 (2012 - £521 million; 2011 - £375 million).

Ordinary shares of the company with a fair value of £4 million (2012 - £4 million; 2011 - £3 million) are held by the Group's Main scheme which also holds other financial instruments issued by the Group with a value of £416 million (2012 - £610 million; 2011 - £424 million).

Post-retirement mortality assumptions (Main scheme)	2013	2012	2011
Longevity at age 60 for current pensioners (years)			
Males	27.6	27.3	27.2
Females	29.5	29.2	29.1
Longevity at age 60 for future pensioners currently aged 40 (years)			
Males	28.6	29.4	29.3
Females	30.8	31.0	30.9

4 Pensions continued

The pension charge to the income statement comprises:

	2013 £m	2012* £m	2011* £m
Continuing operations	510	487	554
Discontinued operations	—	30	1
	510	517	555

*Restated

Curtailment gains of £4 million were recognised in 2013 arising from changes to pension benefits in a subsidiary's scheme (2012 - £9 million; 2011 - nil). Settlement gains of £3 million were recognised in 2013 in respect of subsidiaries' schemes (2012 - £32 million; 2011 - nil).

The weighted average duration of the Main scheme's defined benefit obligation at 31 December 2013 is 18.0 years (2012 - 19.2 years; 2011 - 18.2 years).

The defined benefit obligation is attributable to the different classes of scheme members in the following proportions (Main scheme):

	2013 %	2012 %	2011 %
Active	19.5	23.8	24.8
Deferred	38.4	32.4	30.9
Pensioner	42.1	43.8	44.3
	100.0	100.0	100.0

Following the legal separation of ABN AMRO Bank N.V. on 1 April 2010, ABN AMRO's principal pension scheme in the Netherlands was transferred to the State of the Netherlands. At 31 December 2009, this scheme had fair value of plan assets of £8,118 million and present value of defined benefit obligations of £8,298 million. The principal actuarial assumptions at 31 December 2009 were: discount rate 5.25%; expected return on plan assets (weighted average) 5.25%; rate of increase in salaries 2.5%; rate of increase in pensions in payment 2.0%; and inflation assumption 2.0%.

The Group and the Trustees of the Main scheme agreed the funding valuation as at 31 March 2010 in 2011. It showed that the value of liabilities exceeded the value of assets by £3.5 billion as at 31 March 2010, a ratio of assets to liabilities of 84%. In order to eliminate this deficit, the Group agreed to pay additional contributions each year over the period 2011 to 2018. Contributions started at £375 million per annum in 2011, increasing to £400 million per annum in 2013 and from 2016 onwards will be further increased in line with price inflation. These contributions are in addition to the regular annual contributions of around £250 million for future accrual of benefits.

A funding valuation as at 31 March 2013 is currently in progress and is expected to be concluded by 30 June 2014.

The Group expects to contribute a total of £785 million to its defined benefit pension schemes in 2014 (Main scheme - £633 million). Of the net liabilities of schemes in deficit, £155 million relates to unfunded schemes.

History of defined benefit schemes	Main scheme					All schemes				
	2013 £m	2012* £m	2011* £m	2010* £m	2009* £m	2013 £m	2012* £m	2011* £m	2010* £m	2009* £m
Fair value of plan assets	24,272	22,441	21,111	19,110	16,603	28,488	26,370	25,086	22,816	27,925
Present value of defined benefit obligations	26,958	25,648	22,955	21,092	18,675	31,484	30,110	27,137	24,999	30,830

*Restated

Notes on the consolidated accounts

The table below sets out the sensitivities of the pension cost for the year and the present value of defined benefit obligations at 31 December to a change in the principal actuarial assumptions:

	Main scheme						All schemes					
	in pension cost for year			(Decrease)/increase in obligation at 31 December			in pension cost for year			(Decrease)/increase in obligation at 31 December		
	2013 £m	2012 £m	2011 £m	2013 £m	2012 £m	2011 £m	2013 £m	2012 £m	2011 £m	2013 £m	2012 £m	2011 £m
0.25% increase in the discount rate	(66)	(66)	(65)	(1,187)	(1,199)	(1,019)	(80)	(80)	(75)	(1,379)	(1,392)	(1,181)
0.25% increase in inflation	52	60	59	895	995	911	58	66	65	1,000	1,129	1,040
0.25% additional rate of increase in pensions in payment	42	39	37	758	690	618	48	45	42	844	782	691
0.25% additional rate of increase in deferred pensions	18	20	21	329	297	285	21	23	23	383	342	322
0.25% additional rate of increase in salaries	9	6	6	83	95	56	12	9	9	110	125	79
Longevity increase of one year	35	33	34	728	647	566	39	38	40	801	727	671

Pension costs and liabilities are calculated on the central assumptions and under the relevant sensitivity scenarios. The sensitivity to pension costs/liabilities is the difference between these calculations.

5 Auditor's remuneration

Amounts paid to the Group's auditors for statutory audit and other services are set out below. All audit-related and other services are approved by the Group Audit Committee and are subject to strict controls to ensure the external auditor's independence is unaffected by the provision of other services. The Group Audit Committee recognise that for certain assignments the auditors are best placed to perform the work economically; for other work the Group selects the supplier best placed to meet its requirements. The Group's auditors are permitted to tender for such work in competition with other firms where the work is permissible under audit independence rules.

The analysis of auditor's remuneration is as follows:

	2013 £m	2012 £m
Fees payable for the audit of the Group's annual accounts	4.0	4.0
Fees payable to the auditor and its associates for other services to the Group		
- the audit of the company's subsidiaries	22.1	24.4
- audit-related assurance services (1)	3.8	4.6
Total audit and audit-related assurance services fees	29.9	33.0
Taxation compliance services	0.2	0.2
Taxation advisory services	0.1	0.1
Other assurance services	2.3	2.2
Corporate finance services (2)	0.8	5.7
Consulting services	0.2	1.5
Total other services	3.6	9.7
Fees payable to the auditor and its associates in respect of audits of associated pension schemes	0.5	0.5
Total	34.0	43.2

Notes:

- (1) Comprises fees of £0.9 million (2012 - £1.0 million) in relation to reviews of interim financial information, £2.3 million (2012 - £2.9 million) in respect of reports to the Group's regulators in the UK and overseas, £0.3 million (2012 - £0.5 million) in respect of internal controls assurance and £0.3 million (2012 - £0.2 million) in relation to non-statutory audit opinions.
- (2) Comprises fees of £0.8 million (2012 - £1.6 million) in respect of work performed by the auditors as reporting accountants on debt and equity issuances undertaken by the Group, including securitisations. The figure for 2012 includes £4.1 million in respect of reporting accountant services in connection with divestments by the Group, which was not repeated in 2013.

Notes on the consolidated accounts

6 Tax	2013 £m	2012* £m	2011* £m
Current tax			
Charge for the year	(307)	(495)	(168)
Over/(under) provision in respect of prior years	121	(63)	141
	(186)	(558)	(27)

- Australia	—	(191)	—
- Ireland	—	(203)	—
Adjustments in respect of prior years (2)	251	(47)	199
Actual tax charge	(382)	(441)	(1,075)

*Restated

Notes:

- (1) In recent years the UK Government has steadily reduced the rate of UK corporation tax, with the latest enacted rates standing at 21% with effect from 1 April 2014 and 20% with effect from 1 April 2015. The closing deferred tax assets and liabilities have been calculated in accordance with the rates enacted at the balance sheet date.
- (2) Prior year adjustments include releases of tax provisions in respect of structured transactions and investment disposals and adjustments to reflect submitted tax computations in the UK and overseas.

Preference shareholders			
Non-cumulative preference shares of US\$0.01	226	153	—
Non-cumulative preference shares of €0.01	121	115	—
Non-cumulative preference shares of £1	2	5	—
Paid-in equity holders			
Interest on securities classified as equity, net of tax	49	28	—
Total (1)	<u>398</u>	<u>301</u>	—

*Restated

Notes:

- (1) Discretionary dividends on certain non-cumulative preference shares and discretionary distributions on certain innovative securities recommenced in May 2012.
- (2) Between 1 January 2014 and the date of approval of these accounts, dividends amounting to US\$107 million and £0.4 million have been declared in respect of equity preference shares for payment on 31 March 2014.

8 Ordinary dividends

The company did not pay an ordinary dividend in 2013, 2012 or 2011.

9 Earnings per ordinary and equivalent B share

Earnings per ordinary and equivalent B share have been calculated based on the following:

	2013 £m	2012* £m	2011* £m
Earnings			
Loss attributable to ordinary and B shareholders	(8,995)	(6,055)	(2,151)
(Profit)/loss from discontinued operations attributable to ordinary and B shareholders	(111)	60	(306)
Loss from continuing operations attributable to ordinary and B shareholders	<u>(9,106)</u>	<u>(5,995)</u>	<u>(2,457)</u>
 Weighted average number of shares (millions)			
Ordinary shares outstanding during the year	6,096	5,902	5,722
Equivalent B shares in issue during the year	5,100	5,100	5,100
Weighted average number of ordinary shares and equivalent B shares outstanding during the year	<u>11,196</u>	<u>11,002</u>	<u>10,822</u>

*Restated

Notes on the consolidated accounts

10 Financial instruments - classification

The following tables analyse the Group's financial assets and liabilities in accordance with the categories of financial instruments in IAS 39 with assets and liabilities outside the scope of IAS 39 shown separately.

2013	Designated as at fair value through profit or loss		Hedging derivatives £m	Available- for-sale £m	Loans and receivables £m	Other financial instruments (amortised cost) £m	Finance leases £m	Non financial assets/ liabilities £m	Total £m

Notes on the consolidated accounts

Amounts included in the consolidated income statement:

	2013 £m	2012 £m	2011 £m
(Losses)/gains on financial assets/liabilities designated as at fair value through profit or loss	(113)	(2,612)	1,761
(Losses)/gains on disposal or settlement of loans and receivables	(248)	(76)	59

Notes:

- (1) Includes items in the course of collection from other banks of £1,454 million (2012 - £1,531 million; 2011 - £1,470 million).
- (2) The change in fair value of loans and advances to customers designated as at fair value through profit or loss attributable to changes in credit risk was a £5 million credit for the year and cumulatively a credit of £3 million (2012 - £22 million credit, cumulative £44 million credit; 2011 - £31 million charge, cumulative £71 million credit).
- (3) Includes items in the course of transmission to other banks of £828 million (2012 - £521 million; 2011 - £506 million).
- (4) The carrying amount of other customer accounts designated as at fair value through profit or loss is £412 million (2012 - £305 million; 2011 - £166 million) higher than the principal amount. No amounts have been recognised in profit or loss for changes in credit risk associated with these liabilities as the changes are immaterial, measured as the change in fair value from movements in the period in the credit risk premium payable. The amounts include investment contracts with a carrying value of nil (2012 - nil; 2011 - £38 million).
- (5) Comprises bonds and medium term notes of £63,959 million (2012 - £88,723 million; 2011 - £129,780 million) and certificates of deposit and other commercial paper of £3,860 million (2012 - £5,869 million; 2011 - £32,841 million).

The tables below present information on financial assets and liabilities that are offset in the balance sheet under IFRS or subject to enforceable master netting agreement together with financial collateral received or given.

	Gross £m	IFRS offset £m	Balance sheet £m	Effect of master netting agreement/similar agreements £m	Cash collateral £m	Other financial collateral £m	Net amount after the effect of netting arrangements and related collateral £m

Reclassification of financial instruments

In 2008 and 2009, the Group reclassified financial assets from the held-for-trading (HFT) and available-for-sale (AFS) categories into the loans and receivables (LAR) category (as permitted by paragraph 50D of IAS 39 as amended) and from the HFT category into the AFS category (as permitted by paragraph 50B of IAS 39 as amended).

The tables below show the carrying value, fair value and the effect on profit or loss of these reclassifications undertaken by the Group. There have been no further reclassifications.

	Carrying value £m	Fair value £m	Amount recognised in the income statement		Amount that would have been recognised had reclassification not occurred £m	Reduction/ (increase) in profit or loss as a result of reclassification £m
			Income £m	Impairment (losses) /releases £m		
2013						
Reclassified from HFT to LAR						
Loans	1,417	1,160	(28)	(13)	42	83

Notes:

(1) £113 million (2012 - £171 million; 2011 - £152 million) was taken to AFS reserves.

(2) £1 million (2012 - £1 million; 2011 - £24 million) would have been taken to AFS reserves if reclassification had not occurred.

Notes on the consolidated accounts

11 Financial instruments - valuation

Valuation of financial instruments carried at fair value

Control environment

The Group's control environment for the determination of the fair value of financial instruments includes formalised protocols for the review and validation of fair values independent of the businesses entering into the transactions. There are specific controls to ensure consistent pricing policies and procedures, incorporating disciplined price verification. The Group ensures that appropriate attention is given to bespoke transactions, structured products, illiquid products and other instruments which are difficult to price.

A key element of the control environment is the independent price verification (IPV) process. Valuations are first performed by the business which entered into the transaction. Such valuations may be directly from available prices, or may be derived using a model and variable model inputs. These valuations are reviewed, and if necessary amended, by a team independent of those trading the financial instruments, in the light of available pricing evidence.

A new IPV quality hierarchy was implemented with detailed classifications linked to the fair value hierarchy principles as laid out in IFRS 13 'Fair value measurement'. The new hierarchy classifies IPV differences into fair value levels 1, 2 and 3 with the valuation uncertainty risk increasing as the levels rise from 1 to 3. These differences are then further classified into high, medium, low and indicative depending on the quality of the independent data available to validate the prices. Valuations are revised if they are outside agreed thresholds for each of the levels.

IPV is performed at a frequency to match the availability of independent data. For liquid instruments, the standard is to perform IPV daily. The minimum frequency of review in the Group is monthly for exposures in the regulatory trading book and quarterly for exposures in the regulatory banking book. Monthly meetings are held between the business and the support functions to discuss the results of the IPV and reserves. The IPV control includes formalised reporting and escalation of any valuation differences in breach of established thresholds. The Global Pricing Unit (GPU) determines IPV policy, monitors adherence to that policy and performs additional independent reviews on highly subjective valuation issues for Markets and Non-Core.

In 2013, the Group made a significant and ongoing investment into further enhancing its control environment. This included continuing investment in global IPV and reserving tools which partly automated the IPV and reserves process into a single central portal. System developments included implementing a rules based approach which ensures consistency across portfolios and the use of hierarchy of independent data inputs.

Valuation models are subject to a review process which requires different levels of model documentation, testing and review, depending on the complexity of the model and the size of the Group's exposure. A key element of the control environment for model use is a Modelled Product Review Committee, made up of valuations experts from several functions within the Group. This committee sets the policy for model documentation, testing and review, and prioritises models with significant exposure for review by the Group's Quantitative Research Centre (QuaRC). Potential valuation uncertainty is a key input in determining model review priorities at these meetings. The QuaRC team within Group Risk, which is independent of the trading businesses, assesses the appropriateness of the application of the model to the product, the mathematical robustness of the model, and where appropriate, considers alternative modelling approaches.

The Management Valuation Control Committees meet formally on a monthly basis to discuss independent pricing, reserving and valuation issues relating to both Markets and Non-Core exposures. All material methodology changes require review and ratification by these committees. The committees, which include valuation specialists representing several independent review functions, comprise Market Risk, QuaRC, Finance and senior business representatives.

The Group Executive Valuation Committee discusses the issues escalated by the Modelled Product Review Committee, Markets and Non-Core Management Valuations Control Committees and other relevant issues. This committee covers key material and subjective valuation issues within the trading businesses and provides a ratification to the appropriateness of areas with high levels of residual valuation uncertainty. Committee members include the Group Finance Director, the Group Chief Accountant, the Group Head of Market Risk, the Markets Chief Financial Officer, the Non-Core Chief Financial Officer, the Head of QuaRC, the Head of GPU and representation from Front Office Trading and Finance.

Valuation issue, adjustments and reserves are reported to Markets, Non-Core and Group audit committees. Key judgmental issues are described in the reports submitted to these Audit Committees.

Market risk metrics such as value-at-risk (VaR) and stressed value-at-risk (SVaR) cover financial instruments in Markets and Non-Core. The Group has a framework to quantify those market risks not adequately captured by standard market risk framework such as VaR and SVaR - Risks not in VaR. Refer to pages 323 to 329 for details.

New products

The Group has formal review procedures owned by Group Operational Risk to ensure that new products, asset classes and risk types are appropriately reviewed to ensure, amongst other things, that valuation is appropriate. The scope of this process includes new business, markets, models, risks and structures.

Notes on the consolidated accounts

Valuation hierarchy

There is a process to review and control the classification of financial instruments into the three level hierarchy established by IFRS 13. Some instruments may not easily fall into a level of the fair value hierarchy and judgment may be required as to which level the instrument is classified.

Initial classification of a financial instrument is carried out by the Business Unit Control team following the principles in IFRS. The Business Unit Control team base their judgment on information gathered during the IPV process for instruments which include the sourcing of independent prices and model inputs. The quality and completeness of the information gathered in the IPV process gives an indication as to the liquidity and valuation uncertainty of an instrument.

These initial classifications are reviewed and challenged by GPU and are also subject to senior management review. Particular attention is paid to instruments crossing from one level to another, new instrument classes or products, instruments that are generating significant profit and loss and instruments where valuation uncertainty is high.

Valuation techniques

The Group derives fair value of its instruments differently depending on whether the instrument is a non-modelled or a modelled product.

Non-modelled products

Non-modelled products are valued directly from a price input and are typically valued on a position by position basis and include cash, equities and most debt securities.

Modelled products

Modelled products are those that are valued using a pricing model, ranging in complexity from comparatively vanilla products such as interest rate swaps and options (e.g. interest rate caps and floors) through to more complex derivatives. The valuation of modelled products requires an appropriate model and inputs into this model. Sometimes models are also used to derive inputs (e.g. to construct volatility surfaces). The Group uses a number of modelling methodologies.

Inputs to valuation models

Values between and beyond available data points are obtained by interpolation and extrapolation. When utilising valuation techniques, the fair value can be significantly affected by the choice of valuation model and by underlying assumptions concerning factors such as the amounts and timing of cash flows, discount rates and credit risk. The principal inputs to these valuation techniques are as follows:

- Bond prices - quoted prices are generally available for government bonds, certain corporate securities and some mortgage-related products.
- Credit spreads - where available, these are derived from prices of credit default swaps or other credit based instruments, such as debt securities. For others, credit spreads are obtained from pricing services.
- Interest rates - these are principally benchmark interest rates such as the London Interbank Offered Rate (LIBOR), Overnight Index Swaps rate (OIS) and other quoted interest rates in the swap, bond and futures markets.
- Foreign currency exchange rates - there are observable markets both for spot and forward contracts and futures in the world's major currencies.
- Equity and equity index prices - quoted prices are generally readily available for equity shares listed on the world's major stock exchanges and for major indices on such shares.
- Commodity prices - many commodities are actively traded in spot and forward contracts and futures on exchanges in London, New York and other commercial centres.
- Price volatilities and correlations - volatility is a measure of the tendency of a price to change with time. Correlation measures the degree which two or more prices or other variables are observed to move together. If they move in the same direction there is positive correlation; if they move in opposite directions there is negative correlation. Volatility is a key input in valuing options and in the valuation of certain products such as derivatives with multiple underlying variables that are correlation-dependent. Volatility and correlation values are obtained from broker quotations, pricing services or derived from option prices.
- Prepayment rates - the fair value of a financial instrument that can be prepaid by the issuer or borrower differs from that of an instrument that cannot be prepaid. In valuing prepayable instruments that are not quoted in active markets, the Group considers the value of the prepayment option.
- Counterparty credit spreads - adjustments are made to market prices (or parameters) when the creditworthiness of the counterparty differs from that of the assumed counterparty in the market price (or parameters).
- Recovery rates/loss given default - these are used as an input to valuation models and reserves for asset-backed securities and other credit products as an indicator of severity of losses on default. Recovery rates are primarily sourced from market data providers or inferred from observable credit spreads.

Notes on the consolidated accounts

11 Financial instruments - valuation continued

The Group uses consensus prices for the source of independent pricing for some instruments. The consensus service encompasses the equity, interest rate, currency, commodity, credit, property, fund and bond markets, providing comprehensive matrices of vanilla prices and a wide selection of exotic products. Markets and Non-Core contribute to consensus pricing services where there is a significant interest either from a positional point of view or to test models for future business use. Data sourced from consensus pricing services is used for a combination of control processes including direct price testing, evidence of observability and model testing. In practice this means that the Group submits prices for all material positions for which a service is available. Data from consensus services are subject to the same level of quality review as other inputs used for IPV process.

In order to determine a reliable fair value, where appropriate, management applies valuation adjustments to the pricing information gathered from the above sources. The sources of independent data are reviewed for quality and are applied in the IPV processes using a formalised input quality hierarchy. These adjustments reflect the Group's assessment of factors that market participants would consider in setting a price. Furthermore, on an ongoing basis, the Group assesses the appropriateness of any model used. To the extent that the price provided by internal models does not represent the fair value of the instrument, for instance in highly stressed market conditions, the Group makes adjustments to the model valuation to calibrate to other available pricing sources.

Where unobservable inputs are used, the Group may determine a range of possible valuations derived from differing stress scenarios to determine the sensitivity associated with the valuation. When establishing the fair value of a financial instrument using a valuation technique, the Group considers adjustments to the modelled price which market participants would make when pricing that instrument. Such adjustments include the credit quality of the counterparty and adjustments to compensate for model limitations.

Valuation reserves

When valuing financial instruments in the trading book, adjustments are made to mid-market valuations to cover bid-offer spread, liquidity and credit risk. The valuation framework used to determine the fair value of uncollateralised derivative exposures was refined during the year in line with market developments. The weightings applied to the expected losses and gains in the credit valuation adjustments (CVA) and own credit adjustments (OCA) calculations have been removed. Funding valuation adjustments (FVA) now reflect the counterparty contingent nature of the exposures. FVA is also now considered the primary adjustment applied to liabilities; the extent to which OCA and FVA overlap is eliminated from OCA. The following table shows CVA and other valuation reserves.

Credit valuation adjustments

Credit valuation adjustments represent an estimate of the adjustment to fair value that a market participant would make to incorporate the counterparty credit risk inherent in derivative exposures.

	2013 £m	2012 £m	2011 £m
Credit valuation adjustments			
- monoline insurers and credit derivative product companies (CDPC)	99	506	2,232
- other counterparties	1,667	2,308	2,254
	1,766	2,814	4,486
Other valuation reserves			
- bid-offer	513	625	806
- funding valuation adjustment	424	475	552
- product and deal specific	745	763	1,040
- other	8	134	306
	1,690	1,997	2,704
Valuation reserves			
	3,456	4,811	7,190

The table below analyses CVA relating to other counterparties by rating and sector.

	2013 £m
Ratings:	
AAA	104
AA to AA+	13
A to AA-	168
BBB- to A-	446
Non-investment grade	936
	1,667
Sector:	
Banks	89
Other financial institutions	199
Corporate	1,126
Government	253
	1,667

Notes on the consolidated accounts

Key points

- Monoline and CDPC: reduced exposures during the year, tighter credit spreads and exchange rate movements contributed to the decrease in CVA.
- Other counterparties: the decrease in CVA during the year was driven by tighter credit spreads, reduction in exposure due to market movements together with realised default losses and reserve releases on certain exposures following restructuring. The net impact of updates to counterparty ratings and recovery rate assumptions also contributed to the decrease. This was partially offset by an increase in CVA due to methodology refinements.
- The decrease in bid-offer reserves during the year reflects risk reduction.
- Reduction in exposure due to market moves together with the impact of methodology refinements contributed to the decrease in FVA. This was partially offset by additional funding related reserves and uncollateralised derivatives in Q4 2013.

Monoline insurers

The Group's exposure to monolines is predominately credit default swaps (CDSs) referencing ABS held directly or synthetically.

For the majority of trades the gross mark-to-market of the monoline protection is determined directly from the fair value price of the underlying reference instrument. However, for the remainder of the trades the gross mark-to-market is determined using industry standard models.

The CVA methodology uses market implied probability of defaults and internally assessed recovery rates to determine the level of expected loss on monoline exposures of different maturities. The probability of default is calculated with reference to market observable credit spreads and recovery levels. CVA is calculated at a trade level by applying the expected loss corresponding to each trade's expected maturity, to the gross mark-to-market of the monoline protection. The expected maturity of each trade reflects the scheduled notional amortisation of the underlying reference instruments and whether payments due from the monoline are received at the point of default or over the life of the underlying reference instruments.

Credit derivative product companies (CDPC)

A CDPC is a company that sells protection on credit derivatives. CDPCs are similar to monoline insurers, however they are not regulated as insurers. The Group's exposure to CDPCs is predominantly due to tranches of credit derivatives ("tranches"). A tranche references a portfolio of loans and bonds and provides protection against total portfolio default losses exceeding a certain percentage of the portfolio notional (the attachment point) up to another percentage (the detachment point).

The gross mark-to-market of the CDPC protection is determined using industry standard models. The table above includes valuation adjustments of £34 million relating to certain CDPCs which reflect trade restructuring levels of similar exposures in 2012. For trades facing other CDPCs, the CVA methodology is different to that outlined above for monolines, as there are no market observable credit spreads and recovery levels for these entities. The level of expected loss on these CDPC exposures is estimated with reference to risk mitigation strategies.

Other counterparties

The CVA for all other counterparties is calculated on a portfolio basis reflecting an estimate of the amount a third party would charge to assume the credit risk.

Where a positive exposure exists to a counterparty that is considered to be close to default, the CVA is calculated by applying expected losses to the current level of exposure. Otherwise, expected losses are applied to estimated potential future positive exposures which are modelled to reflect the volatility of the market factors which drive the exposures and the correlation between those factors.

Potential future positive exposures arising from vanilla products (including interest rate and foreign exchange derivatives) are modelled using the Group's core counterparty risk systems. The majority of the Group's CVA held in relation to other counterparties arises on these vanilla products together with exposures to counterparties which are considered to be close to default. The exposures arising from all other product types are modelled and assessed separately. The potential future positive exposure to each counterparty is the aggregate of the exposures arising on the underlying product types.

Expected losses are determined from market implied probabilities of default and internally assessed recovery levels. The probability of default is calculated with reference to observable credit spreads and observable recovery levels. For counterparties where observable data do not exist, the probability of default is determined from the credit spreads and recovery levels of similarly rated entities. Weightings that were previously applied in the expected losses calculation were removed during 2013 in line with market developments.

The correlation between exposure and counterparty risk is also incorporated within the CVA calculation where this risk is considered significant. The risk primarily arises on credit derivative trades where the default risk of the referenced entity is correlated with the counterparty risk. The risk also arises on trades with emerging market counterparties where the gross mark-to-market value of the trade, and therefore the counterparty exposure, increases as the strength of the local currency declines.

Collateral held under a credit support agreement is factored into the CVA calculation. In such cases where the Group holds collateral against counterparty exposures, CVA is held to the extent that residual risk remains.

Notes on the consolidated accounts

11 Financial instruments - valuation continued

Bid-offer, liquidity and other reserves

Fair value positions are adjusted to bid or offer levels, by marking individual cash positions directly to bid or offer or by taking bid-offer reserves calculated on a portfolio basis for derivatives exposures. The bid-offer approach is based on current market spreads and standard market bucketing of risk.

Risk data are used as the primary sources of information within bid-offer calculations and are aggregated when they are more granular than market standard buckets. Bid-offer adjustments for each risk factor (including delta (the degree to which the price of an instrument changes in response to a change in the price of the underlying), vega (the degree to which the price of an instrument changes in response to the volatility in the price of the underlying), correlation (the degree to which prices of different instruments move together)) are determined by aggregating similar risk exposures arising on different products. Additional basis bid-offer reserves are taken where these are charged in the market. Risk associated with non-identical underlying exposures is not netted down unless there is evidence that the cost of closing the combined risk exposure is less than the cost of closing on an individual basis.

Bid-offer spreads vary by maturity and risk type to reflect different spreads in the market. For positions where there is no observable quote, the bid-offer spreads are widened in comparison to proxies to reflect reduced liquidity or observability. Bid-offer methodologies may also incorporate liquidity triggers whereby wider spreads are applied to risks above pre-defined thresholds.

As permitted by IFRS 13, netting is applied on a portfolio basis to reflect the value at which the Group believes it could exit the portfolio, rather than the sum of exit costs for each of the portfolio's individual trades. This is applied where the asset and liability positions are managed as a portfolio for risk and reporting purposes. For example, netting is applied where long and short risk in two different maturity buckets can be closed out in a single market transaction at less cost than by way of two separate transactions (calendar netting). This reflects the fact that to close down the portfolio, the net risk can be settled rather than each long and short trade individually.

Vanilla risk on exotic products is typically reserved as part of the overall portfolio based calculation e.g. delta and vega risk on exotic products are included within the delta and vega bid-offer calculations. Aggregation of risk arising from different models is in line with the Group's risk management practices; the model review control process considers the appropriateness of model selection in this respect.

Product related risks such as correlation risk, attract specific bid-offer reserves. Additional reserves are provided for exotic products to ensure overall reserves match market close-out costs. These market close-out costs inherently incorporate risk decay and cross-effects (taking into account how changes in one risk factor may affect other inputs rather than treating all risk factors independently) that are unlikely to be adequately reflected in a static hedge based on vanilla instruments. Where there is limited bid-offer information for a product, the pricing approach and risk management strategy are taken into account when assessing the reserve.

The discount rates applied to derivative cash-flows in determining fair value reflect any underlying collateral agreements. Collateralised derivatives are generally discounted at the relevant OIS rates at an individual trade level. Uncollateralised derivatives are discounted with reference to funding levels by applying a funding spread over benchmark interest rates on a portfolio basis (funding valuation adjustment).

Funding valuation adjustment (FVA)

Funding valuation adjustments represent an estimate of the adjustment to fair value that a market participant would make to incorporate funding costs and benefits that arise in relation to uncollateralised derivative exposures.

Funding levels are applied to estimated potential future exposures, the modelling of which is consistent with the approach used in the calculation of CVA relating to Other counterparties. The counterparty contingent nature of the exposures is now reflected in the calculation.

Amounts deferred on initial recognition

On initial recognition of financial assets and liabilities valued using valuation techniques incorporating information other than observable market data, any difference between the transaction price and that derived from the valuation technique is deferred. Such amounts are recognised in profit or loss over the life of the transaction; when market data becomes observable; or when the transaction matures or is closed out as appropriate. At 31 December 2013, net gains of £205 million (2012 - £153 million; 2011 - £161 million) were carried forward. During the year, net gains of £134 million (2012 - £39 million; 2011 - £89 million) were deferred and £82 million (2012 - £47 million; 2011 - £95 million) recognised in the income statement.

Own credit

The Group takes into account the effect of its own credit standing when valuing financial liabilities recorded at fair value in accordance with IFRS. Own credit spread adjustments are made when valuing issued debt held at fair value, including issued structured notes, and derivatives. An own credit adjustment is applied to positions where it is believed that counterparties would consider the Group's creditworthiness when pricing trades.

For issued debt and structured notes this adjustment is based on debt issuance spreads above average inter-bank rates (at a range of tenors). Secondary senior debt issuance spreads are used in the calculation of the own credit adjustment applied to senior debt.

The fair value of the Group's derivative financial liabilities has also been adjusted to reflect the Group's own credit risk (DVA). Expected gains are applied to estimated potential future negative exposures, the modelling of which is consistent with the approach used in calculation of CVA relating to Other counterparties. Expected gains are determined from market implied probabilities of default and recovery levels. Weightings that were previously applied in the expected gains calculation were removed during the period in line with market developments. FVA is also now considered the primary adjustment applied to derivative liabilities; the extent to which DVA and FVA overlap is eliminated from DVA.

The own credit adjustment for fair value does not alter cash flows, is not used for performance management, is disregarded for regulatory capital reporting processes and will reverse over time as the liabilities mature.

Notes on the consolidated accounts

The reserve movement between periods will not equate to the reported profit or loss for own credit. The balance sheet reserves are stated by conversion of underlying currency balances at spot rates for each period whereas the income statement includes intra-period foreign exchange sell-offs and excludes the impact of the methodology refinements relating to derivative financial liabilities.

The methodology refinements also related to other valuation adjustments, and the impact of the refinements was reported as part of the reported profit or loss for the other valuation adjustments.

The effect of change in credit spreads could reverse in future periods provided the liability is not repaid at a premium or a discount.

The cumulative own credit adjustment (OCA) recorded on securities held-for-trading (HFT), designated as at fair value through profit or loss (DFV) and derivative liabilities are set out below.

Cumulative own credit adjustment (CR)/DR (1)	Debt securities in issue (1)			Subordinated liabilities DFV £m	Total £m	Derivatives £m	Total £m
	HFT £m	DFV £m	Total £m				
2013	(467)	(33)	(500)	256	(244)	96	(148)
2012	(648)	56	(592)	362	(230)	259	29
2011	882	2,647	3,529	679	4,208	602	4,810

Carrying values of underlying liabilities

	£bn	£bn	£bn	£bn	£bn
2013	8.6	15.8	24.4	0.9	25.3
2012	10.9	23.6	34.5	1.1	35.6
2011	11.5	35.7	47.2	0.9	48.1

Note:

(1) Includes wholesale and retail note issuances.

Key points

- The cumulative OCA decreased during the year due to tightening of RBS credit spreads.
- Senior issued debt OCA is determined by reference to secondary debt issuance spreads. The five year spread tightened to 92 basis points (31 December 2012 - 102 basis points; 31 December 2011 - 451 basis points). As senior debt classified as DFV includes greater proportion of longer term debt, the impact of spread tightening and discounting is more significant, resulting in a credit balance at 31 December 2013.
- The cumulative OCA relating to derivatives decreased during the year due to tightening of RBS CDS spreads and the net impact of methodology refinements.

Notes on the consolidated accounts

Notes:

- (1) Residential mortgage-backed securities.
- (2) Commercial mortgage-backed securities.
- (3) Collateralised debt obligations.
- (4) Collateralised loan obligations.
- (5) Sensitivity represents the favourable and unfavourable effect on the income statement or the statement of comprehensive income due to reasonably possible changes to valuations using reasonably possible alternative inputs in the Group's valuation techniques or models. Level 3 sensitivities are calculated at a sub-portfolio level and hence these aggregated figures do not reflect the correlation between some of the sensitivities. In particular, for some portfolios, the sensitivities may be negatively correlated where a downward movement in one asset would produce an upward movement in another, but due to the additive presentation above, this correlation cannot be shown.
- (6) Transfers between levels are deemed to have occurred at the beginning of the quarter in which the instruments were transferred.
- (7) Level 1: valued using unadjusted quoted prices in active markets, for identical financial instruments. Examples include G10 government securities, listed equity shares, certain exchange-traded derivatives and certain US agency securities.

Level 2: valued using techniques based significantly on observable market data. Instruments in this category are valued using:

- (a) quoted prices for similar instruments or identical instruments in markets which are not considered to be active; or
- (b) valuation techniques where all the inputs that have a significant effect on the valuations are directly or indirectly based on observable market data.

The type of instruments that trade in markets that are not considered to be active, but are based on quoted market prices, banker dealer quotations, or alternative pricing sources with reasonable levels of price transparency and those instruments valued using techniques include non-G10 government securities, most government agency securities, investment-grade corporate bonds, certain mortgage products, including CLOs, most bank loans, repos and reverse repos, less liquid listed equities, state and municipal obligations, most notes issued, and certain money market securities and loan commitments and most OTC derivatives.

Level 3: instruments in this category have been valued using a valuation technique where at least one input which could have a significant effect on the instrument's valuation, is not based on observable market data. Where inputs can be observed from market data without undue cost and effort, the observed input is used. Otherwise, the Group determines a reasonable level for the input. Financial instruments primarily include cash instruments which trade infrequently, certain syndicated and commercial mortgage loans, certain emerging markets instruments, unlisted equity shares, certain residual interests in securitisations, majority of CDOs, other mortgage-backed products and less liquid debt securities, certain structured debt securities in issue, and OTC derivatives where valuation depends upon unobservable inputs such as certain credit and exotic derivatives. No gain or loss is recognised on the initial recognition of a financial instrument valued using a technique incorporating significant unobservable data.

Key points

- Level 3 instruments are primarily in Markets, comprising instruments held in the normal course of business, and Non-Core, relating to legacy securities and derivatives positions.
- Level 3 assets of £6.8 billion represented 1.3% of the total (31 December 2012 - £10.4 billion, 1.4%), a decrease of £3.6 billion. This reflected sales, maturities and amortisation of instruments, particularly securities in Non-Core.
- Level 3 liabilities decreased by £0.3 billion to £4.6 billion primarily related to settlements of instruments.
- The favourable and unfavourable effects of reasonably possible alternative assumptions on level 3 instruments carried at fair value were £0.7 billion (31 December 2012 - £1.0 billion) and £0.5 billion (31 December 2012 - £0.7 billion) respectively.
- Improvements in IPV methodology (see page 412) resulted in £0.4 billion assets and £0.5 billion liabilities, principally derivatives transfers from level 3 to level 2. Transfers from level 2 to level 3 comprised: derivatives (assets £0.9 billion and liabilities £0.5 billion), debt securities in issue of £0.3 billion and debt securities of £0.2 billion relating to securities, primarily ABS, in Non-Core. Market illiquidity towards the end of June was a major cause for the transfers. There were no significant transfers between level 1 and level 2.

Notes on the consolidated accounts

11 Financial instruments - valuation continued

Valuation techniques

The table below shows a breakdown of valuation techniques and the ranges for those unobservable inputs used in valuation models and techniques that have a material impact on the valuation of Level 3 financial instruments. The table excludes unobservable inputs where the impact on valuation is less significant. Movements in the underlying input may have a favourable or unfavourable impact on the valuation depending on the particular terms of the contract and the exposure. For example an increase in the credit spread of a bond would be favourable for the issuer and unfavourable for the note holder. Whilst we indicate where we consider that there are significant relationships between the inputs, these inter-relationships will be affected by macro economic factors including interest rates, foreign exchange rates or equity index levels.

Financial instruments	Level 3 (£bn)		Valuation technique	Unobservable inputs	Range	
	Assets	Liabilities			Low	High
Loans	0.5	0.2	Price based	Price (2)	80%	100%
			Discounted cash flow model (DCF)	Credit spreads (3)	0bps	831bps
				Recovery rates (4)	10%	67%
				Yield (2)	8%	24%
				Probability of default (5)	5%	20%
Deposits	0.1		Option pricing	Volatility (6)	27%	30%
Debt securities

			Option pricing model	Volatility (6)	6%	26%
Interest rate	1.4	0.6	Option pricing model	Correlation (9)	(55%)	100%
			DCF	CPR (7)	2%	20%
Equities and commodities	0.8	Option pricing model	Volatility (6)		16%	40%
Credit	0.8	Price based	Price (2)	0%	100%	
		DCF based on defaults and recoveries	Recovery rates (4)	0%	100%	
			Upfront points (10)	2%	100%	
			Credit spreads (3)	35bps	725bps	

For the notes to this table refer to the following page.

Notes on the consolidated accounts

Notes:

- (1) Level 3 structured issued debt securities of £1.3 billion are not included in the table above as valuation is consistent with the valuation of the embedded derivative component.
- (2) Price and yield: There may be a range of price based information used for evaluating the value of an instrument. This may be a direct comparison of one instrument or portfolio with another or movements in a more liquid instrument may be used to indicate the movement in the value of less liquid instrument. The comparison may also be indirect in that adjustments are made to the price to reflect differences between the pricing source and the instrument being valued, for example different maturity, credit quality, seniority or expected payouts. Similarly to price, an instrument's yield may be compared to other instruments either directly or indirectly. Prices move inversely to yields.
- (3) Credit spreads and discount margins: Credit spreads and margins express the return required over a benchmark rate or index to compensate for the credit risk associated with a cash instrument. A higher credit spread would indicate that the underlying instrument has more credit risk associated with it. Consequently, investors require a higher yield to compensate for the higher risk. The discount rate comprises credit spread or margin plus the benchmark rate; it is used to value future cash flows.
- (4) Recovery rate: Reflects market expectations about the return of principal for a debt instrument or other obligations after a credit event or on liquidation. Recovery rates tend to move conversely to credit spreads.
- (5) Probability of default: This is a measure of the expected rate of losses in an underlying portfolio of mortgages or other receivables. The higher the probability of default the lower the value of the underlying portfolio. The cumulative losses tend to move conversely to prepayment rates and in line with constant default rates. The higher the rate, the higher the expected number of defaults and therefore the expected losses. An increase in the default rate is likely to reduce the value of an asset.
- (6) Volatility: A measure of the tendency of a price to change with time.
- (7) Conditional prepayment rate: The measure of the rate at which underlying mortgages or loans are prepaid. An increase in prepayment rates in a portfolio may increase or decrease its value depending upon the credit quality and payment terms of the underlying loans. For example an increase in prepayment rate of a portfolio of high credit quality underlying assets may reduce the value and size of the portfolio whereas for lower credit quality underlyings it may increase the value.
- (8) EBITDA (earnings before interest, tax, depreciation and amortisation) multiple: This is a commonly used valuation technique for equity holdings. The EBITDA of a company is used as a proxy for the future cash flows and when multiplied by an appropriate factor gives an estimate for the value of the company.
- (9) Correlation: Measures the degree by which two prices or other variables are observed to move together. If they move in the same direction there is positive correlation; if they move in opposite directions there is negative correlation. Correlations typically include relationships between: default probabilities of assets in a basket (a group of separate assets), exchange rates, interest rates and other financial variables.
- (10) Upfront points: These are similar to credit spreads in that a higher figure is a measure of increased credit risk. A credit derivative price can be quoted on either credit spread or upfront points basis and the two can be considered a near equivalent from a risk perspective. As with credit spreads higher upfront points indicate that the underlying entity has a higher credit risk associated with it.
- (11) The Group does not have any material liabilities measured at fair value that are issued with an inseparable third party credit enhancement.

The level 3 sensitivities above are calculated at a trade or low level portfolio basis. They are not calculated on an overall portfolio basis and therefore do not reflect the likely overall potential uncertainty on the whole portfolio. The figures are aggregated and do not reflect the correlated nature of some of the sensitivities. In particular, for some of the portfolios the sensitivities may be negatively correlated where a downwards movement in one asset would produce an upwards movement in another, but due to the additive presentation of the above figures this correlation cannot be displayed. The actual potential downside sensitivity of the total portfolio may be less than the non-correlated sum of the additive figures as shown in the above table.

Judgmental issues

The diverse range of products traded by the Group results in a wide range of instruments that are classified into level 3 of the hierarchy. Whilst the majority of these instruments naturally fall into a particular level, for some products an element of judgment is required. The majority of the Group's financial instruments carried at fair value are classified as level 2: inputs are observable either directly (i.e. as a price) or indirectly (i.e. derived from prices).

Active and inactive markets

A key input in the decision making process for the allocation of assets to a particular level is liquidity. In general, the degree of valuation uncertainty depends on the degree of liquidity of an input. For example, a derivative can be placed into level 2 or level 3 dependent upon the liquidity of level 3 inputs.

Where markets are liquid or very liquid, little judgment is required. However, when the information regarding the liquidity in a particular market is not clear, a judgment may need to be made. This can be made more difficult as assessing the liquidity of a market may not always be straightforward. For an equity traded on an exchange, daily volumes of trading can be seen, but for an over-the counter (OTC) derivative assessing the liquidity of the market with no central exchange can be more difficult.

A key related issue is where a market moves from liquid to illiquid or vice versa. Where this change is considered to be temporary, the classification is not changed. For example, if there is little market trading in a product on a reporting date but at the previous reporting date and during the intervening period the market has been considered to be liquid, the instrument will continue to be classified in the same level in the hierarchy. This is to provide consistency so that transfers between levels are driven by genuine changes in market liquidity and do not reflect short term or seasonal effects.

Interaction with the IPV process

The determination of an instrument's level cannot be made at a global product level as a single product type can be in more than one level. For example, a single name corporate credit default swap could be in level 2 or level 3 depending on whether the reference counterparty is liquid or illiquid.

Notes on the consolidated accounts

11 Financial instruments - valuation continued

The breadth and depth of this data allows a rules based quality assessment to be made of market activity, liquidity and pricing uncertainty, which assists with the process of allocation to an appropriate level. Where suitable independent pricing information is not readily available, the quality assessment will result in the instrument to be considered as level 3.

As part of the Group's IPV process, data are gathered at a trade level from market trading activity, trading systems, pricing services, consensus pricing providers, brokers and research material amongst other sources.

Modelled products

For modelled products the market convention is to quote these trades through the model inputs or parameters as opposed to a cash price equivalent. A mark-to-market is derived from the use of the independent market inputs calculated using the Group's model.

The decision to classify a modelled asset as level 2 or 3 will be dependent upon the product/model combination, the currency, the maturity, the observability and quality of input parameters and other factors. All these need to be assessed to classify the asset.

An assessment is made of each input into a model. There may be multiple inputs into a model and each is assessed in turn for observability and quality. As part of the process of classifying the quality of IPV results the IPV quality classifications have been designed to follow the accounting level classifications, although with a further level of granularity. For example there are a number of different IPV quality levels that equate to a level 2 classification and so on.

If an input fails the observability or quality tests then the instrument is considered to be in level 3 unless the input can be shown to have an insignificant effect on the overall valuation of the product.

The majority of derivative instruments are classified as level 2 as they are vanilla products valued using observable inputs. The valuation uncertainty on these is considered to be low and both input and output testing may be available. Examples of these products would be vanilla interest rate swaps, foreign exchange swaps and liquid single name credit derivatives.

Non-modelled products

Non-modelled products are generally quoted on a price basis and can therefore be considered for each of the 3 levels. This is determined by the market activity, liquidity and valuation uncertainty of the instruments which is in turn measured from the availability of independent data used by the IPV process to allocate positions to IPV quality levels.

The availability and quality of independent pricing information is considered during the classification process. An assessment is made regarding the quality of the independent information. For example where consensus prices are used for non-modelled products, a key assessment of the quality of a price is the depth of the number of prices used to provide the consensus price. If the depth of contributors falls below a set hurdle rate, the instrument is considered to be level 3. This hurdle rate is that used in the IPV process to determine the IPV quality rating. However, where an instrument is generally considered to be illiquid, but regular quotes from market participants exist, these instruments may be classified as level 2 depending on frequency of quotes, other available pricing and whether the quotes are used as part of the IPV process or not.

For some instruments with a wide number of available price sources, there may be differing quality of available information and there may be a wide range of prices from different sources. In these situations an assessment is made as to which source is the highest quality and this will be used to determine the classification of the asset. For example, a tradable quote would be considered a better source than a consensus price.

Instruments that cross levels

Some instruments will predominantly be in one level or the other, but others may cross between levels. For example, a cross currency swap may be between very liquid currency pairs where pricing is readily observed in the market and will therefore be classified as level 2. The cross currency swap may also be between two illiquid currency pairs in which case the swap would be placed into level 3. Defining the difference between liquid and illiquid may be based upon the number of consensus providers the consensus price is made up from and whether the consensus price can be supplemented by other sources.

Level 3 portfolios and sensitivity methodologies

For each of the portfolio categories shown in the tables above, there follows a description of the types of products that comprise the portfolio and the valuation techniques that are applied in determining fair value, including a description of valuation techniques used for levels 2 and 3 and inputs to those models and techniques. Where reasonably possible alternative assumptions of unobservable inputs used in models would change the fair value of the portfolio significantly, the alternative inputs are indicated. Where there have been significant changes to valuation techniques during the year a discussion of the reasons for this are also included.

Overview of sensitivity methodologies

Reasonably possible alternative assumptions of unobservable inputs are determined based on a 95% confidence interval. The assessments recognise different favourable and unfavourable valuation movements where appropriate. Each unobservable input within a product is considered separately and sensitivity is reported on an additive basis.

Notes on the consolidated accounts

Alternative assumptions are determined with reference to all available evidence including consideration of the following: quality of independent pricing information taking into account consistency between different sources, variation over time, perceived tradability or otherwise of available quotes; consensus service dispersion ranges; volume of trading activity and market bias (e.g. one-way inventory); day 1 profit or loss arising on new trades; number and nature of market participants; market conditions; modelling consistency in the market; size and nature of risk; length of holding of position; and market intelligence.

Loans and advances to customers

Loans in level 3 primarily comprise loans to emerging market counterparties and, legacy commercial and residential mortgages.

Loans to emerging market counterparties

The trades in each loan structure are valued using curves using a proxy methodology. Each curve consists of the independent proxy value and various basis adjustments, such as those relating to loan-CDS basis, credit basis, tenor and liquidity. For the low and high valuation scenarios for the structures, these different bases are flexed within the range that each one is deemed to span. The resultant maximum and minimum scenario curves are used to value the assets and liabilities in the structure separately. The low valuation scenario is the one that minimises the assets and maximises the liabilities. The high valuation scenario is the converse.

Commercial mortgages

These senior and mezzanine commercial mortgages are loans secured on commercial land and buildings that were originated or acquired by the Group for securitisation. Senior commercial mortgages carry a variable interest rate and mezzanine or more junior commercial mortgages may carry a fixed or variable interest rate. Factors affecting the value of these loans may include, but are not limited to, loan type, underlying property type and geographic location, loan interest rate, loan-to-value ratios, debt service coverage ratios, prepayment rates, cumulative loan loss information, yields, investor demand, market volatility since the last securitisation and credit enhancement. Where observable market prices for a particular loan are not available, the fair value will typically be determined with reference to observable market transactions in other loans or credit related products including debt securities and credit derivatives. Assumptions are made about the relationship between the loan and the available benchmark data.

Residential mortgages

These pools of residential mortgages were mostly acquired for securitisation before the 2008 financial crisis. Factors that affect the value, or liquidation level, of these loans are geographic location, current loan-to-value, condition of the home, and availability of eligible buyers. The loans are serviced by various mortgage servicers. Operations and the Front Office monitor the performance of these loans and the valuations are tested against an estimated recovery level as part of the IPV process. The market for non-agency securitisation remains extremely weak and is restricted to new issue prime loans.

Debt securities

Level 3 debt securities principally comprise asset-backed securities.

Residential mortgage-backed securities (RMBS)

RMBS where the underlying assets are US agency-backed mortgages and there is regular trading are generally classified as level 2 in the fair value hierarchy. RMBS are also classified as level 2 when regular trading is not prevalent in the market, but similar executed trades or third-party data including indices, broker quotes and pricing services can be used to substantiate the fair value. RMBS are classified as level 3 when trading activity is not available and a model with significant unobservable data is utilised.

In determining whether an instrument is similar to that being valued, the Group considers a range of factors, principally: the lending standards of the brokers and underwriters that originated the mortgages, the lead manager of the security, the issue date of the respective securities, the underlying asset composition (including origination date, loan to value ratios, historic loss information and geographic location of the mortgages), the credit rating of the instrument, and any credit protection that the instrument may benefit from, such as insurance wraps or subordinated tranches. Where there are instances of market observable data for several similar RMBS tranches, the Group considers the extent of similar characteristics shared with the instrument being valued, together with the frequency, tenor and nature of the trades that have been observed. This method is most frequently used for US and UK RMBS. RMBS of Dutch and Spanish originated mortgages guaranteed by those governments are valued using the credit spreads of the respective government debt and certain assumptions made by the Group, or based on observable prices from Bloomberg or consensus pricing services.

The Group primarily uses an industry standard model to project the expected future cash flows to be received from the underlying mortgages and to forecast how these cash flows will be distributed to the various holders of the RMBS. This model utilises data provided by the servicer of the underlying mortgage portfolio, layering on assumptions for mortgage prepayments, probability of default, expected losses and yield. The Group uses data from third-party sources to calibrate its assumptions, including pricing information from third party pricing services, independent research, broker quotes, and other independent sources. An assessment is made of third party data source to determine its applicability and reliability. The Group adjusts the model price with a liquidity premium to reflect the price that the instrument could be traded in the market and may also make adjustments for model deficiencies.

The fair value of securities within each class of asset changes on a broadly consistent basis in response to changes in given market factors. However, the extent of the change, and therefore the range of reasonably possible alternative assumptions, may be either more or less pronounced, depending on the particular terms and circumstances of the individual security. The Group believes that probability of default was the least transparent input into Alt-A and prime RMBS modelled valuations (and most sensitive to variations).

Commercial mortgage-backed securities (CMBS)

CMBS are valued using an industry standard model and the inputs, where possible, are corroborated using observable market data.

Notes on the consolidated accounts

11 Financial instruments - valuation continued

Collateralised debt obligations (CDO)

CDOs purchased from third-parties are valued using independent, third-party quotes or independent lead manager indicative prices. For super senior CDOs which have been originated by the Group no specific third-party information is available. The valuation of these super senior CDOs therefore takes into consideration outputs from a proprietary model, market data and appropriate valuation adjustments.

A collateral net asset value methodology using dealer buy side price is used to determine an upper bound for super senior CDO valuations. An ABS index implied collateral valuation is also used to provide a market calibrated valuation data point. Both the ABS index implied valuation and the collateral net asset value methodology apply an assumed immediate liquidation approach.

Collateralised loan obligations (CLO)

To determine the fair value of CLOs purchased from third parties, the Group uses third party broker or lead manager quotes as the primary pricing source. These quotes are benchmarked to consensus pricing sources where they are available.

For CLOs originated and still held by the Group, the fair value is determined using a correlation model based on a Monte Carlo simulation. The main model inputs are credit spreads and recovery rates of the underlying assets and their correlation. A credit curve is assigned to each underlying asset based on prices from third party dealer quotes and cash flow profiles, sourced from an industry standard model. Losses are calculated taking into account the attachment and detachment point of the exposure. Where the correlation inputs to this model are not observable, CLOs are classified as level 3.

Other asset-backed and corporate debt securities

Where observable market prices for a particular debt security are not available, the fair value will typically be determined with reference to observable market transactions in other related products, such as similar debt securities or credit derivatives. Assumptions are made about the relationship between the individual debt security and available benchmark data. Where significant management judgment has been applied in identifying the most relevant related product, or in determining the relationship between the related product and the instrument itself, the instrument is classified as level 3.

Equity shares

Private equity investments include unit holdings and limited partnership interests primarily in corporate private equity funds, debt funds and fund of hedge funds. Externally managed funds are valued using recent prices where available. Where not available, the fair value of investments in externally managed funds is generally determined using statements or other information provided by the fund managers.

The Group considers that valuations may rely significantly on the judgments and estimates made by the fund managers, particularly in assessing private equity components. Given the decline in liquidity in world markets, and the level of subjectivity, these are included in level 3.

Derivatives

Derivatives are priced using quoted prices for the same or similar instruments where these are available. However, the majority of derivatives are valued using pricing models. Inputs for these models are usually observed directly in the market, or derived from observed prices. However, it is not always possible to observe or corroborate all model inputs. Unobservable inputs used are based on estimates taking into account a range of available information including historic analysis, historic traded levels, market practice, comparison to other relevant benchmark observable data and consensus pricing data.

Credit derivatives

The Group's other credit derivatives include vanilla and bespoke portfolio tranches, gap risk products and certain other unique trades.

Valuation of single name credit derivatives is carried out using industry standard models. Where single name derivatives have been traded and there is a lack of independent data or the quality of the data is weak, these instruments are classified into level 3. These assets will be priced using the Group's standard credit derivative model using a proxy curve based upon a suitable alternative single name curve, a cash based product or a sector based curve. Where the sector based curve is used, the proxy will be chosen taking maturity, rating, seniority, geography and internal credit review on recoveries into account. Sensitivities for these instruments will be based upon the selection of reasonable alternative assumptions which may include adjustments to the credit curve and recovery rate assumptions.

The bespoke portfolio tranches are synthetic tranches referenced to a bespoke portfolio of corporate names on which the Group purchases credit protection. Bespoke portfolio tranches are valued using Gaussian Copula, a standard method which uses observable market inputs (credit spreads, index tranche prices and recovery rates) to generate an output price for the tranche by way of a mapping methodology. In essence this method takes the expected loss of the tranche expressed as a fraction of the expected loss of the whole underlying portfolio and calculates which detachment point on the liquid index, and hence which correlation level, coincides with this expected loss fraction. Where the inputs to this valuation technique are observable in the market, bespoke tranches are considered to be level 2 assets. Where inputs are not observable, bespoke tranches are considered to be level 3 assets. However, all transactions executed with a CDPC counterparty are considered level 3 as the credit valuation adjustment applied to these exposures is a significant component of these valuations.

Gap risk products are leveraged trades, with the counterparty's potential loss capped at the amount of the initial principal invested. Gap risk is the probability that the market will move discontinuously too quickly to exit a portfolio and return the principal to the counterparty without incurring losses, should an unwind event be triggered. This optionality is embedded within these portfolio structures and is very rarely traded outright in the market. Gap risk is not observable in the markets and, as such, these structures are deemed to be level 3 instruments.

Notes on the consolidated accounts

Other unique trades are valued using a specialised model for each instrument and the same market data inputs as all other trades where applicable. By their nature, the valuation is also driven by a variety of other model inputs, many of which are unobservable in the market. Where these instruments have embedded optionality they are valued using a variation of the Black-Scholes option pricing formula, and where they have correlation exposure they are valued using a variant of the Gaussian Copula model. The volatility or unique correlation inputs required to value these products are generally unobservable and the instruments are therefore deemed to be level 3 instruments.

Equity derivatives

Equity derivative products are analysed into equity exotic derivatives and equity hybrids. Exotic equity derivatives have payouts based on the performance of one or more stocks, equity funds or indices. Most payouts are based on the performance of a single asset and are valued using observable market option data. Unobservable equity derivative trades are typically complex basket options on stocks. Such basket option payouts depend on the performance of more than one equity asset and require correlations for their valuation. Valuation is then performed using industry standard valuation models, with unobservable correlation inputs calculated by reference to correlations observed between similar underlyings.

Equity hybrids have payouts based on the performance of a basket of underlyings where underlyings are from different asset classes. Correlations between these different underlyings are typically unobservable with no market information on closely related assets available. Where no market for the correlation input exists, these inputs are based on historical time series.

Interest rate and commodity derivatives

Interest rate and commodity options provide a payout (or series of payouts) linked to the performance of one or more underlying, including interest rates, foreign exchange rates and commodities.

Exotic options do not trade in active markets except in a small number of cases. Consequently, the Group uses models to determine fair value using valuation techniques typical for the industry. These techniques can be divided firstly into modelling approaches and secondly, into methods of assessing appropriate levels for model inputs. The Group uses a variety of proprietary models for valuing exotic trades.

Exotic valuation inputs include the correlation between interest rates, foreign exchange rates and commodity prices. Correlations for more liquid rate pairs are valued using independently sourced consensus pricing levels. Where a consensus pricing benchmark is unavailable, these instruments are classified as level 3.

The carrying value of debt securities in issue is represented partly by underlying cash and partly through a derivative component. The classification of the amount in level 3 is driven by the derivative component and not by the cash element.

Other financial instruments

In addition to the portfolios discussed above, there are other financial instruments which are held at fair value determined from data which are not market observable, or incorporating material adjustments to market observed data.

Other considerations

Valuation adjustments

CVA applied to derivative exposures to other counterparties and own credit adjustments applied to derivative liabilities (DVA) are calculated on a portfolio basis. Whilst the methodology used to calculate each of these adjustments references certain inputs which are not based on observable market data, these inputs are not considered to have a significant effect on the net valuation of the related portfolios. The classification of the derivative portfolios which the valuation adjustments are applied to is not determined by the observability of the valuation adjustments, and any related sensitivity does not form part of the level 3 sensitivities presented.

Funding related adjustments

The discount rates applied to derivative cash-flows in determining fair value reflect any underlying collateral agreements. Collateralised derivative exposures are generally discounted at the relevant OIS rates whilst funding valuation adjustments are applied to uncollateralised derivative exposures. Whilst these adjustments reference certain inputs which are not based on observable market data, these inputs are not considered to have a significant effect on the valuation of the individual trades. The classification of derivatives is not determined by the observability of these adjustments, and any related sensitivity does not form part of the level 3 sensitivities presented.

Own credit - issued debt

For structured notes issued the own credit adjustment is based on debt issuance spreads above average inter-bank rates at the reporting date (at a range of tenors). Whilst certain debt issuance spreads are not based on observable market data, these inputs are not considered to have a significant effect on the valuation of individual trades. Neither the classification of structured notes issued nor any related valuation sensitivities are determined by the observability of the debt issuance spreads.

The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Quoted market values are used where available; otherwise, fair values have been estimated based on discounted expected future cash flows and other valuation techniques. These techniques involve uncertainties and require assumptions and judgments covering prepayments, credit risk and discount rates. Furthermore there is a wide range of potential valuation techniques. Changes in these assumptions would significantly affect estimated fair values. The fair values reported would not necessarily be realised in an immediate sale or settlement.

The fair values of intangible assets, such as core deposits, credit card and other customer relationships are not included in the calculation of these fair values as they are not financial instruments.

The assumptions and methodologies underlying the calculation of fair values of financial instruments at the balance sheet date are as follows:

For certain short-term financial instruments: cash and balances at central banks, items in the course of collection from other banks, settlement balances, items in the course of transmission to other banks, customer demand deposits and notes in circulation, fair value approximates to carrying value.

Loans and advances to banks and customers

In estimating the fair value of loans and advances to banks and customers measured at amortised cost, the Group's loans are segregated into appropriate portfolios reflecting the characteristics of the constituent loans. Two principal methods are used to estimate fair value:

- (a) Contractual cash flows are discounted using a market discount rate that incorporates the current spread for the borrower or where this is not observable, the spread for borrowers of a similar credit standing. This method is used for portfolios where counterparties have external ratings: large corporate loans in UK Corporate and institutional and corporate lending in International Banking and Markets.
- (b) Expected cash flows (unadjusted for credit losses) are discounted at the current offer rate for the same or similar products. This approach is adopted for lending portfolios in UK Retail, Ulster Bank, US Retail & Commercial and Wealth and SME loans in UK Corporate reflecting the homogeneous nature of these portfolios.

For certain portfolios where there are very few or no recent transactions, such as Ulster Bank's portfolio of lifetime tracker mortgages, a bespoke approach is used based on available market data.

Debt securities

Fair values are determined using discounted cash flow valuation techniques.

Deposits by banks and customer accounts

Fair values of deposits are estimated using discounted cash flow valuation techniques.

Debt securities in issue and subordinated liabilities

Fair values are determined using quoted prices where available or by reference to valuation techniques, adjusting for own credit spreads where appropriate.

Notes on the consolidated accounts

12 Financial instruments - maturity analysis

Remaining maturity

Assets and liabilities by contractual cash flow maturity

The tables below show the contractual undiscounted cash flows receivable and payable, up to a period of 20 years, including future receipts and payments of interest of financial assets and liabilities by contractual maturity. The balances in the following tables do not agree directly with the consolidated balance sheet, as the tables include all cash flows relating to principal and future coupon payments, presented on an undiscounted basis. The tables have been prepared on the following basis:

Financial assets have been reflected in the time band of the latest date on which they could be repaid, unless earlier repayment can be demanded by the Group. Financial liabilities are included at the earliest date on which the counterparty can require repayment, regardless of whether or not such early repayment results in a penalty. If the repayment of a financial instrument is triggered by, or is subject to, specific criteria such as market price hurdles being reached, the asset is included in the time band that contains the latest date on which it can be repaid, regardless of early repayment.

The liability is included in the time band that contains the earliest possible date on which the conditions could be fulfilled, without considering the probability of the conditions being met.

For example, if a structured note is automatically prepaid when an equity index exceeds a certain level, the cash outflow will be included in the less than three months period, whatever the level of the index at the year end. The settlement date of debt securities in issue, issued by certain securitisation vehicles consolidated by the Group, depends on when cash flows are received from the securitised assets. Where these assets are prepayable, the timing of the cash outflow relating to securities assumes that each asset will be prepaid at the earliest possible date. As the repayments of assets and liabilities are linked, the repayment of assets in securitisations is shown on the earliest date that the asset can be prepaid, as this is the basis used for liabilities.

The principal amounts of financial assets and liabilities that are repayable after 20 years or where the counterparty has no right to repayment of the principal are excluded from the table, as are interest payments after 20 years.

Held-for-trading assets of £452.1 billion and liabilities of £423.3 billion (2012 - £666.5 billion assets and £628.2 billion liabilities; 2011 - £763.3 billion assets and £708.0 billion liabilities) have been excluded from the following tables in view of their short-term nature.

Commitments (2)	239,963	—	—	—	—	—
	264,849	—	—	—	—	—

Notes:

(1) The Group is only called upon to satisfy a guarantee when the guaranteed party fails to meet its obligations. The Group expects most guarantees it provides to expire unused.

(2) The Group has given commitments to provide funds to customers under undrawn formal facilities, credit lines and other commitments to lend subject to certain conditions being met by the counterparty. The Group does not expect all facilities to be drawn, and some may lapse before drawdown.

13 Financial assets - impairments

The following table shows the movement in the provision for impairment losses on loans and advances.

	Individually assessed £m	Collectively assessed £m	Latent £m	2013 £m	2012 £m	2011 £m
At 1 January	12,749	6,541	1,960	21,250	19,883	18,182

Notes:

(1) Impairment provisions individually assessed.

(2) Impairment provisions individually assessed on balances of £26,939 million (2012 - £26,797 million; 2011 - £29,058 million).

	Carrying value 2013 £m			Carrying value 2012 £m			Carrying value 2011 £m		
	Debt securities	Equity shares	Available-for-sale securities	Debt securities	Equity shares	Available-for-sale securities	Debt securities	Equity shares	Available-for-sale securities
Loans and receivables									
Debt securities				585			1,008		234
				760			1,264		1,164

The following table shows financial and non-financial assets, recognised on the Group's balance sheet, obtained during the year by taking possession of collateral or calling on other credit enhancements.

	2013 £m	2012 £m	2011 £m
Residential property	18	67	60
Other property	13	46	73
Cash	44	49	56
Other assets	2	1	2
	77	163	191

In general, the Group seeks to dispose of property and other assets not readily convertible into cash, obtained by taking possession of collateral, as rapidly as the market for the individual asset permits.

Notes on the consolidated accounts

14 Derivatives

Companies in the Group transact derivatives as principal either as a trading activity or to manage balance sheet foreign exchange, interest rate and credit risk.

The Group enters into fair value hedges, cash flow hedges and hedges of net investments in foreign operations. The majority of the Group's interest rate hedges relate to the management of the Group's non-trading interest rate risk. The Group manages this risk within approved limits. Residual risk positions are hedged with derivatives principally interest rate swaps. Suitable larger financial instruments are fair value hedged; the remaining exposure, where possible, is hedged by derivatives documented as cash flow hedges and qualifying for hedge accounting. The majority of the Group's fair value hedges involve interest rate swaps hedging the interest rate risk in recognised financial assets and financial liabilities. Cash flow hedges relate to exposures to the variability in future interest payments and receipts on forecast transactions and on recognised financial assets and financial liabilities. The Group hedges its net investments in foreign operations with currency borrowings and forward foreign exchange contracts.

For cash flow hedge relationships of interest rate risk, the hedged items are actual and forecast variable interest rate cash flows arising from financial assets and financial liabilities with interest rates linked to LIBOR, EURIBOR or the Bank of England Official Bank Rate. The financial assets are customer loans and the financial liabilities are customer deposits and LIBOR linked medium-term notes and other issued securities. At 31 December 2013, variable rate financial assets of £74 billion (2012 - £61 billion; 2011 - £49 billion) and variable rate financial liabilities of £10 billion (2012 - £9 billion; 2011 - £13 billion) were hedged in such cash flow hedge relationships.

For cash flow hedging relationships, the initial and ongoing prospective effectiveness is assessed by comparing movements in the fair value of the expected highly probable forecast interest cash flows with movements in the fair value of the expected changes in cash flows from the hedging interest rate swap. Prospective effectiveness is measured on a cumulative basis i.e. over the entire life of the hedge relationship. The method of calculating hedge ineffectiveness is the hypothetical derivative method. Retrospective effectiveness is assessed by comparing the actual movements in the fair value of the cash flows and actual movements in the fair value of the hedged cash flows from the interest rate swap over the life to date of the hedging relationship.

For fair value hedge relationships of interest rate risk, the hedged items are typically government bonds, large corporate fixed-rate loans, fixed rate finance leases, fixed rate medium-term notes or preference shares classified as debt. At 31 December 2013, fixed rate financial assets of £23 billion (2012 - £25 billion; 2011 - £33 billion) and fixed rate financial liabilities of £34 billion (2012 - £39 billion; 2011 - £41 billion) were hedged by interest rate swaps in fair value hedge relationships.

The initial and ongoing prospective effectiveness of fair value hedge relationships is assessed on a cumulative basis by comparing movements in the fair value of the hedged item attributable to the hedged risk with changes in the fair value of the hedging interest rate swap. Retrospective effectiveness is assessed by comparing the actual movements in the fair value of the hedged items attributable to the hedged risk with actual movements in the fair value of the hedging derivative over the life to date of the hedging relationship.

The following table shows the notional amounts and fair values of the Group's derivatives.

	2013			2012			2011

Gross gains of £76 million (2012 - £166 million; 2011 - £152 million) and gross losses of £4 million (2012 and 2011 - £2 million) were realised on the sale of available-for-sale equity shares in continuing operations. Gross gains of nil (2012 - £23 million; 2011 - nil) were realised on the sale of available-for-sale equity shares in discontinued operations.

Dividend income from available-for-sale equity shares was £87 million (2012 - £59 million; 2011 - £54 million).

Unquoted equity investments whose fair value cannot be reliably measured are carried at cost and classified as available-for-sale financial assets. They include capital stock (redeemable at cost) in the Federal Home Loan Bank and the Federal Reserve Bank of £0.6 billion (2012 and 2011 - £0.7 billion) that the Group's banking subsidiaries in the US are required to hold; and a number of individually small shareholdings in unlisted companies. Disposals in the year generated gains of £3 million (2012 and 2011 - £2 million).

The Group's goodwill acquired in business combinations is reviewed annually at 30 September for impairment by comparing the recoverable amount of each cash-generating unit (CGU) to which goodwill has been allocated with its carrying value.

Impairment testing involves the comparison of the carrying value of a CGU or group of CGUs with its recoverable amount. Recoverable amount is the higher of fair value and value in use. Value in use is the present value of expected future cash flows from the CGU or group of CGUs. Fair value is the price that would be received to sell an asset in an orderly transaction between market participants.

Impairment testing inherently involves a number of judgmental areas: the preparation of cash flow forecasts for periods that are beyond the normal requirements of management reporting; the assessment of the discount rate appropriate to the business; estimation of the fair value of CGUs; and the valuation of the separable assets of each business whose goodwill is being reviewed. Sensitivity to the more significant variables in each assessment are presented in the tables on the following page.

The recoverable amounts for all CGUs at 30 September 2013 were based on the value in use test, using management's latest five-year forecasts. The long-term growth rates have been based on respective country nominal GDP growth rates. The risk discount rates are based on observable market long-term government bond yields and average industry betas adjusted for an appropriate risk premium.

Notes on the consolidated accounts

In the light of downward revisions to its forecast financial performance, goodwill attributable to International Banking (IB) was tested for impairment as at 31 December 2013: recoverable amount was its value in use and the discount rate used in the calculation of value in use was 9.5% (30 September 2012 - 12.2%). The results showed IB goodwill in its entirety was impaired and an impairment loss of £1.1 billion has been recognised in profit or loss.

The Group will accelerate the divestment of RBS Citizens Financial Group, the Group's US banking subsidiary. A partial initial public offering is now planned for 2014 and the Group intends to fully divest the business by the end of 2016. Notwithstanding this planned course of action, the recoverable amount of the US Retail & Commercial CGU remains its value in use.

Direct Line Group was reclassified as a disposal group in 2012 and its goodwill was assessed as part of its fair value at 31 December 2012.

The results of the annual impairment test for 2011 are presented using the Group's 2011 reportable segments which differ as a result of the changes to the Group's structure implemented during 2012. The change in reportable segments in 2012 did not impact the impairment tests performed in 2011.

The analysis of goodwill by operating segment is shown in Note 38.

The carrying value of goodwill and amount by which it is exceeded by the recoverable amount is set out below by division along with the key assumptions applied in calculating the recoverable amount and sensitivities to changes in those assumptions.

	Goodwill £bn	Assumptions		Recoverable amount exceeded carrying value £bn	Consequential impact of 1% adverse movement in		Consequential impact of 5% adverse movement	
		Terminal growth rate %	Pre-tax discount rate %		Discount rate £bn	Terminal growth rate £bn	in forecast pre-tax earnings £bn

Net book value at 31 December	4,468	2,119	159	973	1,444	2,705	11,868

Investment property valuations principally employ present value techniques that discount expected cash flows. Expected cash flows reflect rental income, occupancy and residual market values; valuations are sensitive to changes in these factors. The fair value measurement of non-specialised properties in locations where the market for such properties is active and transparent are categorised as level 2 (46%); otherwise investment property fair value measurements are categorised as level 3 (54%).

Valuations were carried out by qualified surveyors who are members of the Royal Institution of Chartered Surveyors, or an equivalent overseas body; property with a fair value of £985 million was valued by independent valuers.

The fair value of investment properties includes £271 million of depreciation since purchase (2012 - £186 million; 2011 - £146 million).

Rental income from investment properties was £244 million (2012 - £267 million; 2011 - £270 million). Direct operating expenses of investment properties were £91 million (2012 - £125 million; 2011 - £110 million).

Property, plant and equipment, excluding investment properties, include £42 million (2012 - £35 million; 2011 - £186 million) assets in the course of construction.

Notes on the consolidated accounts

20 Discontinued operations and assets and liabilities of disposal groups

The Group sold the first tranche of ordinary shares representing 34.7% of the share capital of Direct Line Insurance Group plc (DLG) in October 2012 via an Initial Public Offering. On 13 March 2013, the Group sold a further 16.8% of ordinary shares in DLG and ceded control. This fulfilled the Group's plan to cede control of DLG by the end of 2013 and is a step toward complete disposal by the end of 2014, as required by the European Commission. Consequently, DLG is treated as a discontinued operation until 12 March 2013 and as an associate thereafter.

On 20 September 2013, the Group sold a further 20% of ordinary shares in DLG and at 31 December held 28.5% of the issued ordinary share capital of DLG.

Other discontinued operations reflect the results of RFS Holdings attributable to the State of the Netherlands and Santander following the legal separation of ABN AMRO Bank N.V. on 1 April 2010. The profit from discontinued operations includes a gain of £37 million (2012 - £112 million loss; 2011 - £42 million profit) attributable to non-controlling interests.

Notes on the consolidated accounts

(b) Cash flows attributable to discontinued operations

Notes on the consolidated accounts

20 Discontinued operations and assets and liabilities of disposal groups continued

DLG is included in disposal groups at 31 December 2013 and 2012.

In addition, disposal groups at 31 December 2013 include the Chicago area retail branches, small business operations and select middle market relationships in the Chicago market which form part of RBS Citizens Financial Group and the interest in associates in DLG. No adjustment was required to the carrying value of these assets and liabilities on reclassification. In accordance with IFRS 5 'Non-current Assets Held for Sale and Discontinued Operations', comparatives have not been restated.

At 31 December 2011, disposal groups comprised the RBS Aviation Capital business which was sold in the second half of 2012 and the RBS England and Wales and NatWest Scotland branch-based businesses, along with certain SME and corporate activities across the UK ('UK branch-based businesses').

Allocated goodwill of £80 million was written off against operating expenses in respect of the UK branch-based businesses. No adjustment was made in respect of the RBS Aviation Capital business.

Following Santander's withdrawal from the proposed sale of the UK branch-based businesses in October 2012, the Group concluded that a sale within 12 months was no longer highly probable; accordingly at 31 December 2012 the assets and liabilities of the UK branch-based businesses ceased to be classified as a disposal group. No adjustment was required to the carrying value of these assets and liabilities on reclassification. In accordance with IFRS 5 'Non-current Assets Held for Sale and Discontinued Operations', comparatives were not restated.

(d) Direct Line Group assets and liabilities

General insurance business assets and liabilities

	2013 £m	2012 £m	2011 £m
Loans and advances to banks	—	2,036	2,579
Loans and advances to customers	—	881	893
Debt securities and equity shares	—	7,156	7,992
Derivatives	—	12	—
Intangible assets	—	750	1,065
Property, plant and equipment	—	222	132
Interests in associates	879	—	—
Prepayments, accrued income and other assets	—	1,640	1,200
Assets of disposal group	879	<u>12,697</u>	—
Assets separately consolidated		<u>13,861</u>	
Derivatives	—	4	—
Insurance liabilities	—	6,193	6,233
Subordinated liabilities	—	529	—
Accruals, deferred income and other liabilities	—	2,541	2,739
Liabilities of disposal group	—	<u>9,267</u>	—
Liabilities separately consolidated		<u>8,972</u>	

The Group's interest in DLG at 31 December 2013 is recognised under equity accounting, being the fair value of its share of net equity on 13 March 2013 plus the subsequent attributable comprehensive income, less the dividends received by the Group, less the share of net assets attributable to the subsequent disposal on 20 September 2013. At 31 December 2012, DLG's carrying amount exceeded its fair value less costs to sell (based on the quoted price for DLG shares on 31 December 2012) by £394 million and goodwill attributable to DLG was written down by this amount. The write down was recorded in other expenses within discontinued operations.

Notes:

(1) The principal assumptions underlying the Group's provision in respect of PPI sales are: assessment of the total number of complaints that the Group will receive; the proportion of these that will result in redress; and the average cost of such redress. The number of complaints has been estimated from an analysis of the Group's portfolio of PPI policies sold by vintage and by product. Estimates of the percentage of policyholders that will lodge complaints (the take up rate) and of the number of these that will be upheld (the uphold rate) have been established based on recent experience, guidance in the FSA policy statements and expected rate of responses from proactive customer contact. The average redress assumption is based on recent experience and the calculation rules in the FSA statement.

The table below shows the sensitivity of the provision to changes in the principal assumptions (all other assumptions remaining the same).

Assumption	Actual to date	Current assumptions	Sensitivity	
			Change in assumption %	Consequential change in provision £m
Take up rate	36%	38%	+/-5	+/-45
Uphold rate (1)	84%	83%	+/-5	+/-30
Average redress	£1,733	£1,646	+/-5	+/-26

Note:

(1) Uphold rates exclude claims where no PPI policy was held.

Interest that will be payable on successful complaints has been included in the provision as has the estimated cost to the Group of administering the redress process. The Group expects the majority of the cash outflows associated with this provision to have occurred by the end of 2014. There are uncertainties as to the eventual cost of redress which will depend on actual complaint volumes, take up and uphold rates and average redress costs.

Background information in relation to PPI claims is given in Note 32.

Notes on the consolidated accounts

22 Accruals, deferred income and other liabilities continued

(2) The Group has estimated £1,250 million for its liability in respect of the sale of Interest Rate Hedging Products based on experience, having now agreed a substantial number of outcomes with the independent skilled person appointed to review all decisions. The provision includes redress that will be paid to customers, interest payable on customer redress, the cost to the Group of exiting the hedging positions and the cost of undertaking the review. It does not include provision for any consequential losses that customers may have suffered as the Group is unable to reliably measure any liability it may have for such losses.

The principal assumptions underlying the Group's provision are:

- the proportion of relevant customers that will not opt in to the review
- the number of transactions that qualify for redress
- the nature of the redress (in particular whether a product is terminated or replaced with an alternative product and/or a different profile)
- the cost of the review

Assumption	Sensitivity	
	Change in assumption %	Consequential change in provision £m
Proportion of relevant customers that will not opt in to the review	+/-5	+/-47
Proportion of customer transactions qualifying for redress	+/-5	+/-71
Average redress	+/-5	+/-71

Uncertainties remain over the number of transactions that will qualify for redress and the nature and cost of that redress.

Background information in relation to Interest Rate Hedging Products claims is given in Note 32.

- (3) The Group has provided for customer redress in relation to certain other retail products. None of these provisions are individually material.
- (4) On 6 February 2013, the Group reached agreement with the FSA, the US Department of Justice and the Commodity Futures Trading Commission in relation to the setting of LIBOR and other trading rates, including financial penalties of £381 million and a provision for this amount was recognised in 2012. The Group continues to cooperate with other governmental and regulatory authorities and, as a result of progress on these matters in 2013, the provision was increased by £315 million. For further details see Note 32.
- (5) The Group is subject to a number of investigations by regulatory and other authorities. Details of these investigations and a discussion of the nature of the associated uncertainties are given in Note 32.
- (6) Arising out of its normal business operations, the Group is party to legal proceedings in the United Kingdom, the United States and other jurisdictions. Litigation provisions at 31 December 2012 related to a number of proceedings; no individual provision was material. An additional charge of £2,050 million was recorded in 2013 as a result of greater levels of certainty on expected outcomes, primarily in respect of matters relating to mortgage-backed securities and securities-related litigation following third party litigation settlements and regulatory decisions. Detailed descriptions of the Group's legal proceedings and discussion of the associated uncertainties are given in Note 32.
- (7) In June 2012, the Group experienced a technology incident that affected its transaction batch processing. Provisions of £175 million were charged during 2012 to meet the waiver of fees and interest; redress for customers of the Group; and other costs principally staff costs. These costs have now been settled.
- (8) The property provisions principally comprise provisions for onerous lease contracts. Provision is made for future rentals payable in respect of vacant leasehold property and for any shortfall where leased property is sub-let at a rental lower than the lease rentals payable by the Group.

	2,496	3,231	3,294

Notes on the consolidated accounts

23 Deferred tax continued

UK tax losses

Under UK tax rules, tax losses do not expire and can be carried forward indefinitely.

The Royal Bank of Scotland plc - the deferred tax asset in respect of tax losses brought forward at 1 January 2013 related mainly to trading losses that arose in the UK branch of RBS N.V. These were transferred following the transfer of the majority of the activities of the UK branch of RBS N.V. to The Royal Bank of Scotland plc. The UK branch tax losses attributable to credit market write-downs during the financial crisis were principally incurred between 2007 and 2009.

The Royal Bank of Scotland plc reported a taxable profit in 2011 and tax losses in 2012 and 2013. The taxable loss for 2012 reflected the reversal of previous own credit gains offset by core banking profitability. In 2013, core profitability remains strong; the UK tax losses of £3 billion are attributable to the loan impairment charges arising from the RCR accelerated recovery strategy recorded in the final quarter of the year and significant regulatory and conduct provisions. The additional restructuring costs anticipated by the latest strategic plan will constrain the utilisation of carried forward tax losses in the near-term. Consequently a reduction in the carrying value of deferred tax assets of £701 million has been recorded in 2013. In addition, deferred tax has not been recognised in respect of excess 2013 UK taxable losses of £750 million, representing an unprovided deferred tax asset of £150 million. The Group expects that the recognised deferred tax asset in respect of tax losses amounting to £8,465 million will be recovered within eight years. A 20% reduction in forecast profits would extend the recovery period by a year.

National Westminster Bank Plc - the deferred tax asset in respect of tax losses at 31 December 2013 relates to residual unrelieved trading losses that arose between 2009 and 2013. 60% of the losses that arose were relieved against taxable profits arising in other UK Group companies. Based on the Group's strategic plan, the residual carried forward losses will be fully utilised against future taxable profits of the company by the end of 2018. A 20% reduction in forecast profits would extend the recovery period by one year.

24 Subordinated liabilities

Dated loan capital
Undated loan capital
Preference shares

	2013 £m	2012 £m	2011 £m
Dated loan capital	17,597	20,210	19,654
Undated loan capital	5,376	5,488	5,549
Preference shares	1,039	1,075	1,116
	24,012	26,773	26,319

In March 2012, the Group exchanged certain subordinated debt securities for new subordinated debt securities. The exchanges involving instruments classified as liabilities all met the criteria in IFRS for treatment as the extinguishment of the original liability and the recognition of a new financial liability.

The Group has now resumed payments on all discretionary non-equity capital instruments following the end of the European Commission ban in 2012 for RBSG and 2013 for RBS N.V. Future coupons and dividends on hybrid capital instruments will only be paid subject to, and in accordance with, the terms of the relevant instruments.

Overseas tax losses

Ulster Bank Ireland - a deferred tax asset has been recognised in respect of £592 million of total tax losses of £11,575 million carried forward at 31 December 2013. These losses arose principally as a result of significant impairment charges reflecting deteriorating economic conditions in the Republic of Ireland. Impairment charges are expected to reduce in the future. Based on the Group's strategic plan, the losses on which a deferred tax asset has been recognised will be utilised against future taxable profits of the company by the end of 2018. A 20% reduction in forecast profits would extend the recovery period by one year.

RBS Citizens Financial Group - a deferred tax asset of £11 million has been recognised in respect of total tax losses of £32 million carried forward at 31 December 2013. Based on the Group's strategic plan, the losses on which a deferred tax asset has been recognised will be utilised against future taxable profits in 2014. A 20% reduction in forecast profits would not extend the recovery period beyond 2014.

Unrecognised deferred tax

Deferred tax assets of £4,942 million (2012 - £3,827 million; 2011 - £3,246 million) have not been recognised in respect of tax losses carried forward of £28,099 million (2012 - £20,432 million; 2011 - £16,691 million) in jurisdictions where doubt exists over the availability of future taxable profits. Of these losses, £187 million expire within one year, £1,901 million within five years and £8,673 million thereafter. The balance of tax losses carried forward has no time limit.

Deferred tax liabilities of £186 million (2012 - £214 million; 2011 - £249 million) have not been recognised in respect of retained earnings of overseas subsidiaries and held-over gains on the incorporation of overseas branches. Retained earnings of overseas subsidiaries are expected to be reinvested indefinitely or remitted to the UK free from further taxation. No taxation is expected to arise in the foreseeable future in respect of held-over gains. Changes to UK tax legislation largely exempts overseas dividends received on or after 1 July 2009 from UK tax.

Certain preference shares issued by the company are classified as liabilities; these securities remain subject to the capital maintenance rules of the Companies Act 2006.

Notes on the consolidated accounts

The following tables analyse the remaining contractual maturity of subordinated liabilities by the final redemption date and by the next call date.

Notes:

- (1) On-lent to The Royal Bank of Scotland plc on a subordinated basis.
- (2) Partially repurchased following completion of an exchange offer in March 2012.
- (3) In the event of certain changes in tax laws, dated loan capital issues may be redeemed in whole, but not in part, at the option of the issuer, at the principal amount thereof plus accrued interest, subject to prior regulatory approval.
- (4) Except as stated above, claims in respect of the Group's dated loan capital are subordinated to the claims of other creditors. None of the Group's dated loan capital is secured.
- (5) Interest on all floating rate subordinated notes is calculated by reference to market rates.

For the notes to this table refer to the following page.

Notes on the consolidated accounts

24 Subordinated liabilities continued

Notes:

- (1) On-lent to The Royal Bank of Scotland plc on a subordinated basis
- (2) Subordinated notes issued to limited partnerships that have in turn issued partnership preferred securities to trusts that have issued trust preferred securities to investors. On maturity of the notes, the partnerships are required to reinvest in eligible capital instruments issued by the group. Prior to the implementation of IFRS 10, the limited partnerships and the trusts were consolidated, and the trust preferred securities included within subordinated liabilities.
- (3) Preferred securities in issue are: €391 million RBS Capital Trust A, 6.467% non-cumulative trust preferred securities.
- (4) Preferred securities in issue are: US\$486 million RBS Capital Trust B, 6.8% non-cumulative trust preferred securities.
- (5) Preferred securities in issue are: US\$318 million RBS Capital Trust I, 4.709% non-cumulative trust preferred securities.
- (6) Preferred securities in issue are: US\$394 million RBS Capital Trust II, 6.425% non-cumulative trust preferred securities.
- (7) Unconditionally guaranteed by the Royal Bank of Scotland Group plc
- (8) Guaranteed by the company. The company can satisfy interest payment obligations by issuing sufficient ordinary shares to appointed Trustees to enable them, on selling these shares, to settle the interest payment.
- (9) Exchangeable at the option of the issuer into 8.392% (gross) non-cumulative preference shares of £1 each of National Westminster Bank Plc at any time.
- (10) Preferred securities in issue are: US\$1,285 million Trust Preferred V, 5.9%
- (11) Preferred securities in issue are: US\$200 million Trust Preferred VI, 6.25%
- (12) Preferred securities in issue are: US\$1,800 million Trust Preferred VII, 6.08%
- (13) Except as stated above, claims in respect of the Group's undated loan capital are subordinated to the claims of other creditors. None of the Group's undated loan capital is secured.
- (14) In the event of certain changes in tax laws, undated loan capital issues may be redeemed in whole, but not in part, at the option of the Group, at the principal amount thereof plus accrued interest, subject to prior regulatory approval.
- (15) Interest on all floating rate subordinated notes is calculated by reference to market rates.

Notes:

- (1) One dividend access share in issue.
- (2) In June 2012, the ordinary shares of 25p each were initially sub-divided into 59,554,319,127 ordinary shares of 10p each and 59,554,319,127 deferred shares of 15p each. The deferred shares created by virtue of the sub-division were cancelled with the nominal value transferred to capital redemption reserve. The 59,554,319,127 ordinary shares of 10p were consolidated into 5,955,431,912 ordinary shares of £1 each.

Ordinary shares

There is no authorised share capital under the company's constitution. The directors have the authority to issue £17.7 billion nominal of ordinary shares in connection with a conversion of B shares. At 31 December 2013 they had a remaining authority granted at the 2013 Annual General Meeting to issue up to £227 million nominal of ordinary shares other than by pre-emption to existing shareholders.

During 2013, the company issued 53.7 million ordinary shares of £1 each in connection with employee share schemes.

In July 2013, the company allotted and issued 43.0 million new ordinary shares of £1 each at a subscription price of 314.188 pence each, the gross proceeds being £135 million.

In September 2013, the company allotted and issued 20.5 million new ordinary shares of £1 each at a subscription price of 341.898 pence each the gross proceeds being £70 million.

In December 2013, the company allotted and issued 15.1 million new ordinary shares of £1 each at a subscription price of 331.309 pence each, the gross proceeds being £50 million.

B shares and dividend access share

In December 2009, the company entered into an acquisition and contingent capital agreement with HM Treasury. HM Treasury agreed to acquire at 50p per share 51 billion B shares with a nominal value of £0.01 each and a dividend access share with a nominal value of £0.01; these shares were issued to HM Treasury on 22 December 2009. Net proceeds were £25.1 billion.

The B shares do not generally carry voting rights at general meetings of ordinary shareholders. Following the subdivision and consolidation of ordinary shares in 2012 and subject to anti-dilution adjustments, each B share is entitled to one tenth of the cash dividend of an ordinary share and may be converted at any time at the option of the holder into ordinary shares at the rate of ten B shares for each ordinary share.

HM Treasury has agreed not to convert its B shares into ordinary shares to the extent that its holding of ordinary shares following the conversion would represent more than 75% of the company's issued ordinary share capital.

The dividend access share entitles the holder to dividends equal to the greater of 7% of the aggregate issue price of B shares issued to HM Treasury and 250% of the ordinary dividend rate multiplied by the number of B shares issued, less any dividends paid on the B shares and on ordinary shares issued on conversion. Dividends on the dividend access share are discretionary unless a dividend has been paid on the ordinary shares, in which case dividends became mandatory.

The dividend access share does not generally carry voting rights at general meetings of ordinary shareholders and is not convertible into ordinary shares.

Preference shares

Under IFRS certain of the Group's preference shares are classified as debt and are included in subordinated liabilities on the balance sheet.

Other securities

Certain of the Group's subordinated securities in the legal form of debt are classified as equity under IFRS.

These securities entitle the holders to interest which may be deferred at the sole discretion of the company. Repayment of the securities is at the sole discretion of the company on giving between 30 and 60 days notice.

Non-cumulative preference shares

Non-cumulative preference shares entitle the holders thereof (subject to the terms of issue) to receive periodic non-cumulative cash dividends at specified fixed rates for each Series payable out of distributable profits of the company.

The non-cumulative preference shares are redeemable at the option of the company, in whole or in part from time to time at the rates detailed in the table below plus dividends otherwise payable for the then current dividend period accrued to the date of redemption.

Notes on the consolidated accounts

Class of preference share	Number of shares in issue	Interest rate	Redemption date on or after	Redemption price per share	Debt/equity (1)
Non-cumulative preference shares of US\$0.01					
Series F	6.3 million	7.65%	31 March 2007	US\$25	Debt
Series H	9.7 million	7.25%	31 March 2004	US\$25	Debt
Series L	30.0 million	5.75%	30 September 2009	US\$25	Debt
Series M	23.1 million	6.40%	30 September 2009	US\$25	Equity
Series N	22.1 million	6.35%	30 June 2010	US\$25	Equity
Series P	9.9 million	6.25%	31 December 2010	US\$25	Equity
Series Q	20.6 million	6.75%	30 June 2011	US\$25	Equity
Series R	10.2 million	6.125%	30 December 2011	US\$25	Equity
Series S	26.4 million	6.60%	30 June 2012	US\$25	Equity

Series 3	9,429	7.0916%	29 September 2017	€50,000	Equity
Non-cumulative convertible preference shares of £0.01					
Series 1	14,866	7.387%	31 December 2010	£1,000	Debt
Non-cumulative preference shares of £1					
Series 1	54,442	3 month LIBOR + 2.33%	5 October 2012	£1,000	Equity

Note:

(1) Those preference shares where the Group has an obligation to pay dividends are classified as debt; those where distributions are discretionary are classified as equity. The conversion rights attaching to the convertible preference shares may result in the Group delivering a variable number of equity shares to preference shareholders; these convertible preference shares are treated as debt.

In the event that the non-cumulative convertible preference shares are not redeemed on or before the redemption date, the holder may convert them into ordinary shares in the company at the prevailing market price.

Under existing arrangements, no redemption or purchase of any non-cumulative preference shares may be made by the company without the prior consent of the Prudential Regulation Authority.

On a winding-up or liquidation of the company, the holders of the non-cumulative preference shares are entitled to receive, out of any surplus assets available for distribution to the company's shareholders (after payment of arrears of dividends on the cumulative preference shares up to the date of repayment) pari passu with the cumulative preference shares and all other shares of the company ranking pari passu with the non-cumulative preference shares as regards participation in the surplus assets of the company, a liquidation distribution per share equal to the applicable redemption price detailed in the table above, together with an amount equal to dividends for the then current dividend period accrued to the date of payment, before any distribution or payment may be made to holders of the ordinary shares as regards participation in the surplus assets of the company.

Except as described above, the holders of the non-cumulative preference shares have no right to participate in the surplus assets of the company. Holders of the non-cumulative preference shares are not entitled to receive notice of or attend general meetings of the company except if any resolution is proposed for adoption by the shareholders of the company to vary or abrogate any of the rights attaching to the non-cumulative preference shares or proposing the winding-up or liquidation of the company. In any such case, they are entitled to receive notice of and to attend the general meeting of shareholders at which such resolution is to be proposed and are entitled to speak and vote on such resolution (but not on any other resolution). In addition, in the event that, prior to any general meeting of shareholders, the company has failed to pay in full the three most recent quarterly dividend payments due on the non-cumulative dollar preference shares (other than Series U), the two most recent semi-annual dividend payments due on the non-cumulative convertible dollar preference shares and the most recent dividend payments due on the non-cumulative euro preference shares, the non-cumulative sterling preference shares, the Series U non-cumulative dollar preference shares and the non-cumulative convertible sterling preference shares, the holders shall be entitled to receive notice of, attend, speak and vote at such meeting on all matters together with the holders of the ordinary shares. In these circumstances only, the rights of the holders of the non-cumulative preference shares so to vote shall continue until the company shall have resumed the payment in full of the dividends in arrears.

Notes on the consolidated accounts

26 Share capital continued

The Group has now resumed payments on all discretionary non-equity capital instruments following the end of the European Commission ban in 2012 for RBSG and 2013 for RBS N.V. Future coupons and dividends on hybrid capital instruments will be paid subject to, and in accordance with, the terms of the relevant instruments.

27 Other equity

Paid-in equity - comprises equity instruments issued by the company other than those legally constituted as shares.

	£m

	979

Notes:

- (1) Subordinated notes issued to limited partnerships that have in turn issued partnership preferred securities to trusts that have issued trust preferred securities to investors. The trust preferred securities are redeemable only at the issuer's option and dividends are payable at the Group's discretion. On maturity of the subordinated notes, the partnerships are required to reinvest in eligible capital instruments issued by the Group. Prior to the implementation of IFRS 10, the limited partnerships and the trusts were consolidated and the trust preferred securities recorded as non-controlling interests.
- (2) Preferred securities in issue - US\$357 million RBS Capital Trust III, fixed/floating non-cumulative trust preferred securities.
- (3) Preferred securities in issue - US\$276 million RBS Capital Trust IV, floating rate non-cumulative trust preferred securities.
- (4) Preferred securities in issue - €166 million RBS Capital Trust C, fixed/floating rate non-cumulative trust preferred securities.
- (5) Preferred securities in issue - £93 million RBS Capital Trust D, fixed/floating rate non-cumulative trust preferred securities.

Merger reserve - the merger reserve comprises the premium on shares issued to acquire NatWest, less goodwill amortisation charged under previous GAAP, and the premium arising on shares issued to acquire Aonach Mor Limited, less amounts realised through subsequent share redemptions by Aonach Mor Limited. No share premium was recorded in the company financial statements through the operation of the merger relief provisions of the Companies Act.

Capital redemption reserve - under UK companies legislation, when shares are redeemed or purchased wholly or partly out of the company's profits, the amount by which the company's issued share capital is diminished must be transferred to the capital redemption reserve. The capital maintenance provisions of UK companies legislation apply to the capital redemption reserve as if it were part of the company's paid up share capital.

Contingent capital reserve - in December 2009, HM Treasury agreed to subscribe for up to 16 billion B shares of £0.01 each at 50p per share subject to certain conditions including the Group's Core Tier 1 capital ratio falling below 5%. The fair value of the consideration payable by the company on entering into this agreement amounted to £1,458 million to be settled in instalments; of this £1,208 million was debited to the contingent capital reserve. The reserve and £320 million in respect of the final instalment were transferred to Retained earnings on cancellation of the above contingent capital arrangements on 16 December 2013.

Own shares held - at 31 December 2013, 34 million ordinary shares of £1 each of the company (2012 - 51 million; 2011 - 164 million) were held by Employee Share Trusts in respect of share awards and options granted to employees. The 17 million reduction during the year relates to the sale of surplus shares to help neutralise any impact on Core Tier 1 capital as a result of the recommencement of capital and dividend payments on the Group's hybrid capital instruments, together with ordinary shares delivered in satisfaction of the exercise of options, the vesting of share awards and for equity funding of employee incentive awards under the employee share plans.

The Group optimises capital efficiency by maintaining reserves in subsidiaries, including regulated entities. Certain preference shares and subordinated debt are also included within regulatory capital. The remittance of reserves to the company or the redemption of shares or subordinated capital by regulated entities may be subject to maintaining the capital resources required by the relevant regulator.

UK law prescribes that only the reserves of the company are taken into account for the purpose of making distributions and in determining the permissible applications of the share premium account.

The Group provides asset finance to its customers through acting as a lessor. It purchases plant, equipment and intellectual property, renting them to customers under lease arrangements that, depending on their terms, qualify as either operating or finance leases.

Notes on the consolidated accounts

29 Structured entities

A structured entity (SE) is an entity that has been designed such that voting or similar rights are not the dominant factor in deciding who controls the entity, for example when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. SEs are usually established for a specific, limited purpose, they do not carry out a business or trade and typically have no employees. They take a variety of legal forms - trusts, partnerships and companies - and fulfil many different functions. As well as being a key element of securitisations, SEs are also used in fund management activities to segregate custodial duties from the fund management advice.

The Group applies IFRS 10 'Consolidated Financial Statements' in determining whether or not to consolidate an SE. Entities, including SEs, are consolidated where the Group has power over the investee; exposure, or rights, to variable returns from its involvement with the entity; and the ability to use its power over the entity to affect the amount of the Group's returns.

Consolidated structured entities

Securitisations

In a securitisation, assets, or interests in a pool of assets, are transferred generally to an SE which then issues liabilities to third party investors. The majority of securitisations are supported through liquidity facilities or other credit enhancements. The Group arranges securitisations to facilitate client transactions and undertakes own asset securitisations to sell or to fund portfolios of financial assets. The Group also acts as an underwriter and depositor in securitisation transactions in both client and proprietary transactions.

The Group's involvement in client securitisations takes a number of forms. It may: sponsor or administer a securitisation programme; provide liquidity facilities or programme-wide credit enhancement; and purchase securities issued by the vehicle.

Own asset securitisations

In own-asset securitisations, the pool of assets held by the SE is either originated by the Group, or (in the case of whole loan programmes) purchased from third parties.

The table below analyses the asset categories for those own-asset securitisations where the transferred assets continue to be recorded on the Group's balance sheet.

Asset type	2013					2012					2011

	48,948				58,086				102,356						

Notes:

(1) Debt securities retained by the Group may be pledged with central banks.

(2) Corporate, social housing and student loans.

Commercial paper conduits

The Group consolidates a number of asset-backed commercial paper (ABCP) conduits. A conduit is an SE that issues commercial paper and uses the proceeds to purchase or fund a pool of assets. The commercial paper is secured on the assets and is redeemed by further commercial paper issuance, repayment of assets or funding from liquidity facilities. Commercial paper is typically short-dated, usually up to three months. At 31 December 2013 assets held by the conduits totalled £1.6 billion (2012 - £3.6 billion; 2011 - £13.1 billion). At 31 December 2013 and at 31 December 2012 the conduits were funded entirely by the Group.

Covered bond programme

Certain loans and advances to customers have been assigned to bankruptcy remote limited liability partnerships to provide security for issues of debt securities by the Group. The Group retains all of the risks and rewards of these loans, the partnerships are consolidated, the loans retained on the Group's balance sheet and the related covered bonds included within debt securities in issue. At 31 December 2013, £16,177 million of mortgages provided security for debt securities in issue of £9,041 million (2012: mortgages £15,990 million, bonds £10,139 million; 2011: mortgages £15,441 million, bonds £9,107 million).

Guarantees	—	83	—	9	92	
Total exposure	838	36,155	715	1,673	39,381	

Notes:

- (1) Income from interests in unconsolidated structured entities includes interest receivable, changes in fair value and other income less impairments that may be required.
- (2) A sponsored entity is a structured entity established by the Group where the Group provides liquidity and/or credit enhancements or provides ongoing services to the entity. The Group can act as sponsor for its own or for customers' transactions.
- (3) In 2013 the Group transferred £2,119 million of assets into sponsored structured entities which are not consolidated by the Group and for which the Group held no interest at 31 December 2013. The income arising from these entities was £192 million.

Notes on the consolidated accounts

30 Asset transfers

Under IAS 39 a financial asset is transferred if the Group either (a) transfers the contractual rights to receive the asset's cash flows; or (b) retains the right to the asset's cash flows but assumes a contractual obligation to pay those cash flows to a third party. Following a transfer the financial asset will be derecognised; not derecognised and retained in full on the Group's balance sheet; or continue to be recognised on the balance sheet to the extent of the Group's continuing involvement.

Transfers that do not qualify for derecognition

Securities repurchase agreements and lending transactions

The Group enters into securities repurchase agreements and securities lending transactions under which it transfers securities in accordance with normal market practice.

Generally, the agreements require additional collateral to be provided if the value of the securities falls below a predetermined level. Under standard terms for repurchase transactions in the UK and US markets, the recipient of collateral has an unrestricted right to sell or repledge it, subject to returning equivalent securities on settlement of the transaction.

Securities sold under repurchase transactions are not derecognised if the Group retains substantially all the risks and rewards of ownership. The fair value (and carrying value) of securities transferred under such repurchase transactions included on the balance sheet, are set out below. All of these securities could be sold or repledged by the holder.

Assets subject to securities repurchase agreements or security lending transactions

	2013 £m	2012 £m	2011 £m
Debt securities	55,554	91,173	79,480
Equity shares	5,310	6,772	6,534

Transfers that continue to be recognised to the extent of the Group's continuing involvement (IAS 39)

In certain securitisations of US residential mortgages, substantially all the risks and rewards have been neither transferred nor retained, but the Group has retained control of the assets and continues to recognise the assets to the extent of its continuing involvement, as defined by IAS 39, which takes the form of retaining certain subordinated bonds issued by the securitisation vehicles.

These interests relate predominantly to mortgage-backed securities which were re-securitised. Retained interests are generally not held to maturity and are typically sold after settlement of the securitisation. Retained interests may be subordinated to other investors' interests. Third party investors and securitisation trusts have no recourse to the Group's other assets for failure of debtors to perform on the securitised loans or securities, effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. The value of the retained interest varies and is subject to credit, interest rate, prepayment, and other risks of the transferred assets. In the ordinary course of business, the Group does not provide any other financial support to the securitisation trusts other than holding these retained interests.

At 31 December 2013, securitised assets were £0.3 billion (2012 - £0.4 billion; 2011 - £0.6 billion); retained interest at fair value £59 million (2012 - £61 million; 2011 - £72 million); subordinated assets £35 million (2012 - £1 million; 2011 - £3 million); and related liabilities £35 million (2012 - £1 million; 2011 - £3 million).

Transfers that qualify for derecognition but in which the Group has continuing involvement (IFRS 7)

The Group has transferred and derecognised certain assets but it has continuing involvement, as defined in IFRS 7, through holdings of debt securities with a carrying value at 31 December 2013 of £389 million and fair value of £345 million (31 December 2012: carrying value - £398 million; fair value - £339 million). Income for 2013 was £11 million (2012 - £13 million).

Assets pledged as collateral

The Group pledges collateral with its counterparties in respect of derivative liabilities and bank and other borrowings.

Assets pledged against liabilities

	2013 £m	2012 £m	2011 £m
Loans and advances to banks	10,342	12,784	19,691

Derivatives	42,691	60,434	82,356
	48,711	75,743	91,388

Notes on the consolidated accounts

31 Capital resources

The Group's regulatory capital resources in accordance with PRA definitions were as follows:

	2013 £m	2012 £m	2011 £m
<i>Shareholders' equity (excluding non-controlling interests)</i>			
Shareholders' equity	58,742	68,678	75,367
Preference shares - equity	(4,313)	(4,313)	(4,313)
Other equity instruments	(979)	(979)	(979)
	53,450	63,386	70,075

Total regulatory capital	63,659	66,800	60,708

Note:

(1) From 1 January 2013 material holdings in insurance companies are deducted 50% from Tier 1 and 50% from Tier 2.

It is the Group's policy to maintain a strong capital base, to expand it as appropriate and to utilise it efficiently throughout its activities to optimise the return to shareholders while maintaining a prudent relationship between the capital base and the underlying risks of the business. In carrying out this policy, the Group has regard to the supervisory requirements of the PRA. The PRA uses risk asset ratio (RAR) as a measure of capital adequacy in the UK banking sector, comparing a bank's capital resources with its risk-weighted assets (the assets and off-balance sheet exposures are 'weighted' to reflect the inherent credit and other risks); by international agreement, the RAR should be not less than 8% with a Tier 1 component of not less than 4%. The Group has complied with the PRA's capital requirements throughout the year.

A number of subsidiaries and sub-groups within the Group, principally banking and insurance entities, are subject to various individual regulatory capital requirements in the UK and overseas. Furthermore, the payment of dividends by subsidiaries and the ability of members of the Group to lend money to other members of the Group may be subject to restrictions such as local regulatory or legal requirements, the availability of reserves and financial and operating performance.

Notes on the consolidated accounts

32 Memorandum items

Contingent liabilities and commitments

The amounts shown in the table below are intended only to provide an indication of the volume of business outstanding at 31 December 2013. Although the Group is exposed to credit risk in the event of non-performance of the obligations undertaken by customers, the amounts shown do not, and are not intended to, provide any indication of the Group's expectation of future losses.

	Less than 1 year £m	More than 1 year but less than 3 years £m	More than 3 years but less than 5 years £m	Over 5 years £m	2013 £m	2012 £m	2011 £m
Contingent liabilities							
Guarantees and assets pledged as collateral security	9,144	3,541	5,802	1,692	20,179	19,164	25,032
Other contingent liabilities	2,840	1,258	582	1,311	5,991	10,697	10,912
	11,984	4,799	6,384	3,003	26,170	29,861	35,944
Commitments (1)							
Undrawn formal standby facilities, credit lines and other commitments to lend

- one year and over	9,943	44,214	66,174	15,123	135,454	132,347	139,871
Other commitments	2,598	136	44	15	2,793	1,976	2,912
	90,133	44,350	66,218	15,138	215,839	217,784	242,875
Contingent liabilities and commitments	102,117	49,149	72,602	18,141	242,009	247,645	278,819

Note:

(1) Includes liquidity facilities provided to Group sponsored conduits.

Banking commitments and contingent obligations, which have been entered into on behalf of customers and for which there are corresponding obligations from customers, are not included in assets and liabilities. The Group's maximum exposure to credit loss, in the event of non-performance by the other party and where all counterclaims, collateral or security proves valueless, is represented by the contractual nominal amount of these instruments included in the table above. These commitments and contingent obligations are subject to the Group's normal credit approval processes.

Contingent liabilities

Guarantees - the Group gives guarantees on behalf of customers. A financial guarantee represents an irrevocable undertaking that the Group will meet a customer's obligations to third parties if the customer fails to do so. The maximum amount that the Group could be required to pay under a guarantee is its principal amount as disclosed in the table above. The Group expects most guarantees it provides to expire unused.

Other contingent liabilities - these include standby letters of credit, supporting customer debt issues and contingent liabilities relating to customer trading activities such as those arising from performance and customs bonds, warranties and indemnities.

Commitments

Commitments to lend - under a loan commitment the Group agrees to make funds available to a customer in the future. Loan commitments, which are usually for a specified term may be unconditionally cancellable or may persist, provided all conditions in the loan facility are satisfied or waived. Commitments to lend include commercial standby facilities and credit lines, liquidity facilities to commercial paper conduits and unutilised overdraft facilities.

Other commitments - these include documentary credits, which are commercial letters of credit providing for payment by the Group to a named beneficiary against presentation of specified documents, forward asset purchases, forward deposits placed and undrawn note issuance and revolving underwriting facilities, and other short-term trade related transactions.

Notes on the consolidated accounts

Contractual obligations for future expenditure not provided for in the accounts

The following table shows contractual obligations for future expenditure not provided for in the accounts at the year end.

	2013 £m	2012 £m	2011 £m
Operating leases			
Minimum rentals payable under non-cancellable leases (1)			
- within 1 year	348	399	468
- after 1 year but within 5 years	1,143	1,253	1,453
- after 5 years	2,144	2,286	2,714
	3,635	3,938	4,635
Property, plant and equipment			
Contracts to buy assets to be leased under operating leases (2)	—	—	2,607
Other capital expenditure	38	37	35
	38	37	2,642
Contracts to purchase goods or services (3)			
	1,162	959	1,130
	4,835	4,934	8,407

Notes:

(1) Predominantly property leases.

(2) Amount related to RBS Aviation Capital which was sold in 2012. Included £486 million due within one year.

(3) Of which due within 1 year: £373 million (2012 - £444 million; 2011 - £483 million).

Trustee and other fiduciary activities

In its capacity as trustee or other fiduciary role, the Group may hold or place assets on behalf of individuals, trusts, companies, pension schemes and others. The assets and their income are not included in the Group's financial statements. The Group earned fee income of £462 million (2012 - £476 million; 2011 - £502 million) from these activities.

The Financial Services Compensation Scheme

The Financial Services Compensation Scheme (FSCS), the UK's statutory fund of last resort for customers of authorised financial services firms, pays compensation if a firm is unable to meet its obligations. The FSCS funds compensation for customers by raising management expenses levies and compensation levies on the industry. In relation to protected deposits, each deposit-taking institution contributes towards these levies in proportion to their share of total protected deposits on 31 December of the year preceding the scheme year (which runs from 1 April to 31 March), subject to annual maxima set by the Prudential Regulation Authority. In addition, the FSCS has the power to raise levies on a firm that has ceased to participate in the scheme and is in the process of ceasing to be authorised for the costs that it would have been liable to pay had the FSCS made a levy in the financial year it ceased to be a participant in the scheme.

The FSCS has borrowed from HM Treasury to fund compensation costs associated with the failure of Bradford & Bingley, Heritable Bank, Kaupthing Singer & Friedlander, Landsbanki 'Icesave' and London Scottish Bank plc. The interest rate on these borrowings is subject to a floor being the higher of 12 month LIBOR plus 100 basis points or the relevant gilt rate for the equivalent cost of borrowing from HMT. The FSCS and HM Treasury have agreed that the period of these loans will reflect the expected timetable for recoveries from the estates of Bradford & Bingley and the other failed banks. The FSCS will levy the deposit taking sector for its share of the balance of the principal outstanding for the non-Bradford & Bingley loan prior to the FSCS loan facility with HMT expiring in March 2016. In addition, the FSCS recently announced HMT's intention to collect an interim payment relating to resolution costs for Dunfermline Building Society of £100 million. The capital element of the levy is expected to rise to £399 million (£363 million in the 2013/14 scheme year).

The Group has accrued £144 million for its share of estimated FSCS levies for the 2013/14 and 2014/15 scheme years.

Litigation, investigations and reviews

Arising out of their normal business operations, the Group and certain members of the Group are party to legal proceedings and the subject of investigation and other regulatory and governmental action in the United Kingdom, the United States and other jurisdictions.

The Group recognises a provision for a liability in relation to these matters when it is probable that an outflow of economic benefits will be required to settle an obligation resulting from past events, and a reliable estimate can be made of the amount of the obligation. While the outcome of the legal proceedings, investigations and regulatory and governmental matters in which the Group is involved is inherently uncertain, the directors believe that, based on the information available to them, appropriate provisions have been made in respect of legal proceedings, investigations and regulatory and governmental matters as at 31 December 2013 (see Note 22). The litigation provision reflects in large part the £1.9 billion provision taken in the last quarter of 2013 primarily related to mortgage-backed securities and securities related litigation and investigations. The future outflow of resources in respect of any matter may ultimately prove to be substantially greater than or less than the aggregate provision that the Group has recognised.

In many proceedings, it is not possible to determine whether any loss is probable or to estimate the amount of any loss. Numerous legal and factual issues may need to be resolved, including through potentially lengthy discovery and determination of important factual matters, and by addressing novel or unsettled legal questions relevant to the proceedings in question, before a liability can be reasonably estimated for any claim. The Group cannot predict if, how, or when such claims will be resolved or what the eventual settlement, fine, penalty or other relief, if any, may be, particularly for claims that are at an early stage in their development or where claimants seek substantial or indeterminate damages.

There are also situations where the Group may enter into a settlement agreement. This may occur in order to avoid the expense, management distraction or reputational implications of continuing to contest liability, even for those matters for which the Group believes it has credible defences and should prevail on the merits. The uncertainties inherent in all such matters affect the amount and timing of any potential outflows for both matters with respect to which provisions have been established and other contingent liabilities.

Other than those discussed below, no member of the Group is or has been involved in governmental, legal or regulatory proceedings (including those which are pending or threatened) that are material individually or in aggregate.

Litigation

Shareholder litigation

RBS and certain of its subsidiaries, together with certain current and former officers and directors were named as defendants in purported class actions filed in the United States District Court for the Southern District of New York involving holders of RBS preferred shares (the Preferred Shares litigation) and holders of American Depository Receipts (the ADR claims).

In the Preferred Shares litigation, the consolidated amended complaint alleged certain false and misleading statements and omissions in public filings and other communications during the period 1 March 2007 to 19 January 2009, and variously asserted claims under Sections 11, 12 and 15 of the US Securities Act of 1933, as amended (Securities Act). The putative class is composed of all persons who purchased or otherwise acquired Group Series Q, R, S, T and/or U non-cumulative dollar preference shares issued pursuant or traceable to the 8 April 2005 US Securities and Exchange Commission (SEC) registration statement. In September 2012, the Court dismissed the Preferred Shares litigation with prejudice. On 25 September 2013, the United States Court of Appeals for the Second Circuit (Second Circuit Court of Appeals) affirmed the lower Court's dismissal of the litigation. The deadline for plaintiffs to appeal from the Second Circuit Court of Appeals to the United States Supreme Court has expired.

With respect to the ADR claims, a consolidated amended complaint asserting claims under Sections 10 and 20 of the US Securities Exchange Act of 1934 and Sections 11, 12 and 15 of the Securities Act was filed in November 2011 on behalf of all persons who purchased or otherwise acquired the Group's American Depository Receipts (ADRs) from issuance through 20 January 2009. In September 2012, the Court dismissed the ADR claims with prejudice. On 5 August 2013, the Court denied the plaintiffs' motions for reconsideration and for leave to re-plead their case. The plaintiffs have appealed the dismissal of this case to the Second Circuit Court of Appeals, and that appeal is in the process of being briefed by the parties.

Additionally, between March and July 2013, claims were issued in the High Court of Justice of England and Wales by sets of current and former shareholders, against the Group (and in one of those claims, also against certain former individual officers and directors) alleging that untrue and misleading statements and/or improper omissions were made in connection with the rights issue announced by the Group on 22 April 2008 in breach of the Financial Services and Markets Act 2000. On 30 July 2013 these and other similar threatened claims were consolidated by the Court via a Group Litigation Order. The Group's defence to the claims was filed on 13 December 2013.

Notes on the consolidated accounts

Other securitisation and securities related litigation in the United States
Group companies have been named as defendants in their various roles as issuer, depositor and/or underwriter in a number of claims in the United States that relate to the securitisation and securities underwriting businesses. These cases include actions by individual purchasers of securities and purported class action suits. Together, the pending individual and class action cases involve the issuance of more than US\$67 billion of mortgage-backed securities (MBS) issued primarily from 2005 to 2007. Although the allegations vary by claim, in general, plaintiffs in these actions claim that certain disclosures made in connection with the relevant offerings contained materially false or misleading statements and/or omissions regarding the underwriting standards pursuant to which the mortgage loans underlying the securities were issued. Group companies remain as defendants in more than 40 lawsuits brought by purchasers of MBS, including the purported class actions identified below.

Among these MBS lawsuits are four cases filed on 2 September 2011 by the US Federal Housing Finance Agency (FHFA) as conservator for the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac). The primary FHFA lawsuit remains pending in the United States District Court for the District of Connecticut, and it relates to approximately US\$32 billion of MBS for which Group entities acted as sponsor/depositor and/or lead underwriter or co-lead underwriter. Of these approximately US\$10.5 billion were outstanding at 31 December 2013 with cumulative losses of approximately US\$0.9 billion (being the loss of principal value suffered by security holders). On 30 September 2013, the Court denied the defendants' motion to dismiss FHFA's amended complaint in this case. Discovery is ongoing.

The other three FHFA lawsuits (against Ally Financial Group, Countrywide Financial Corporation and Nomura) name RBS Securities Inc. as a defendant by virtue of the fact that it was an underwriter of some of the securities at issue. Two of these cases are part of a coordinated proceeding in the United States District Court for the Southern District of New York in which discovery is underway. The third case (the Countrywide matter) is pending in the United States District Court for the Central District of California. Two other FHFA lawsuits (against JP Morgan and Morgan Stanley) in which RBS Securities Inc. was an underwriter defendant have been settled without any contribution from RBS Securities Inc.

Other MBS lawsuits against Group companies include three cases filed by the National Credit Union Administration Board (on behalf of US Central Federal Credit Union, Western Corporate Federal Credit Union, Southwest Corporate Federal Credit Union, and Members United Corporate Federal Credit Union) and six cases filed by the Federal Home Loan Banks of Boston, Chicago, Indianapolis, Seattle and San Francisco.

The purported MBS class actions in which Group companies are defendants include New Jersey Carpenters Health Fund v. Novastar Mortgage Inc. et al. and In re IndyMac Mortgage-Backed Securities Litigation. A third MBS class action, New Jersey Carpenters Vacation Fund et al. v. The Royal Bank of Scotland plc et al., has been settled in principle for US\$275 million subject to documentation and court approval. There is a provision that fully covers the settlement amount. The case relates to more than US\$15 billion of the issued MBS that are the subject of MBS claims pending against Group companies. The outcome in this case should not be seen as indicative of how other MBS lawsuits may be resolved.

RBS Securities Inc. was also a defendant in Luther v. Countrywide Financial Corp. et al. and related class action cases (the "Luther Litigation"). On 5 December 2013, the court granted final approval of a US\$500 million settlement of plaintiffs' claims to be paid by Countrywide without contribution from RBS Securities Inc. Several members of the settlement class are appealing the court-approved settlement to the United States Court of Appeals for the Ninth Circuit.

Certain other institutional investors have threatened to bring claims against the Group in connection with various mortgage-related offerings. The Group cannot predict whether any of these individual investors will pursue these threatened claims (or their outcome), but expects that several may. If such claims are asserted and were successful, the amounts involved may be material.

In many of these actions, the Group has or will have contractual claims to indemnification from the issuers of the securities (where a Group company is underwriter) and/or the underlying mortgage originator (where a Group company is issuer). The amount and extent of any recovery on an indemnification claim, however, is uncertain and subject to a number of factors, including the ongoing creditworthiness of the indemnifying party.

London Interbank Offered Rate (LIBOR)

Certain members of the Group have been named as defendants in a number of class actions and individual claims filed in the US with respect to the setting of LIBOR and certain other benchmark interest rates. The complaints are substantially similar and allege that certain members of the Group and other panel banks individually and collectively violated various federal laws, including the US commodities and antitrust laws, and state statutory and common law, as well as contracts, by manipulating LIBOR and prices of LIBOR-based derivatives in various markets through various means.

Most of the USD LIBOR-related actions in which Group companies are defendants, including all purported class actions relating to USD LIBOR, have been transferred to a coordinated proceeding in the United States District Court for the Southern District of New York. In the coordinated proceeding, consolidated class action complaints were filed on behalf of (1) exchange-based purchaser plaintiffs, (2) over-the-counter purchaser plaintiffs, and (3) corporate debt purchaser plaintiffs. On 29 March 2013, the Court dismissed plaintiffs' antitrust claims, claims under RICO (Racketeer Influenced and Corrupt Organizations Act), and certain state law claims, but declined to dismiss certain other claims. Discovery is stayed. Over 35 other USD LIBOR-related actions involving RBS have been stayed pending further order from the Court.

Notes on the consolidated accounts

32 Memorandum items continued

Certain members of the Group have also been named as defendants in class actions relating to (i) JPY LIBOR and Euroyen TIBOR (the "Yen action") and (ii) Euribor (the "Euribor action"), both of which are pending in the United States District Court for the Southern District of New York.

Details of LIBOR investigations and their outcomes affecting the Group are set out under 'Investigations and reviews' below.

Credit Default Swap Antitrust Litigation

Certain members of the Group, as well as a number of other financial institutions, are defendants in a consolidated antitrust class action pending in the United States District Court for the Southern District of New York. The plaintiffs generally allege that defendants violated the U.S. antitrust laws by restraining competition in the market for credit default swaps through various means and thereby causing inflated bid-ask spreads for credit default swaps.

FX antitrust litigation

Certain members of the Group, as well as a number of other financial institutions, have been named as defendants in multiple antitrust class action complaints filed in the United States District Court for the Southern District of New York since November 2013. The plaintiffs generally allege that the defendants violated the U.S. antitrust laws, state statutes, and the common law by conspiring to manipulate the foreign exchange market by manipulating benchmark foreign exchange rates.

Madoff

In December 2010, Irving Picard, as trustee for the bankruptcy estates of Bernard L. Madoff and Bernard L. Madoff Investment Securities LLC., filed a clawback claim against The Royal Bank of Scotland N.V. (RBS N.V.) in New York bankruptcy court. In the operative complaint, filed in August 2012, the trustee seeks to recover US\$75.8 million in redemptions that RBS N.V. allegedly received from certain Madoff feeder funds and US\$162.1 million that RBS N.V. allegedly received from its swap counterparties at a time when RBS N.V. allegedly 'knew or should have known of Madoff's possible fraud'. The Trustee alleges that those transfers were preferences or fraudulent conveyances under the US bankruptcy code and New York law and he asserts the purported right to claw them back for the benefit of Madoff's estate. A further claim, for US\$21.8 million, was filed in October 2011.

Thornburg adversary proceeding

RBS Securities Inc. and certain other Group companies, as well as several other financial institutions, are defendants in an adversary proceeding filed in the U.S. bankruptcy court in Maryland by the trustee for TMST, Inc. (formerly known as Thornburg Mortgage, Inc.). The trustee seeks recovery of transfers made under certain restructuring agreements as, among other things, avoidable fraudulent and preferential conveyances and transfers.

Complex Systems

RBS N.V. is a defendant in an action pending in the United States District Court for the Southern District of New York filed by Complex Systems, Inc (CSI). The plaintiff alleges that RBS N.V. has since late 2007 been using the plaintiff's back-office trade finance processing software without a valid licence, in violation of the US Copyright Act. On 17 October 2013, the Court granted summary judgment to CSI on the issue of liability. The plaintiff was seeking in excess of US\$300 million in alleged profits that the plaintiff claimed was attributable to RBS N.V.'s use of the disputed software, but on 8 November 2013, the Court barred the plaintiff from recovering any such profits although the plaintiff continues to seek actual damages of an unspecified amount. On 25 October 2013, the plaintiff filed a motion for a permanent injunction against RBS N.V.'s further use of the software, and a hearing on that motion, which RBS N.V. opposes, has been scheduled for 14 March 2014.

CPDO Litigation

CPDO claims have been served on RBS N.V. in England, the Netherlands and Australia relating to the sale of a type of structured financial product known as a constant proportion debt obligation (CPDO). In November 2012, the Federal Court of Australia issued a judgment against RBS N.V. and others in one such case. It held that RBS N.V. and others committed certain wrongful acts in connection with the rating and sale of the CPDO. In March 2013, RBS N.V. was ordered to pay A\$19.7 million. RBS N.V. has appealed this decision and the appeal is due to be heard in March 2014. The judgment may potentially have significance to the other claims served and to any future similar claims.

Investigations and reviews

The Group's businesses and financial condition can be affected by the fiscal or other policies and actions of various governmental and regulatory authorities in the United Kingdom, the European Union, the United States and elsewhere. The Group has engaged, and will continue to engage, in discussions with relevant governmental and regulatory authorities, including in the United Kingdom, the European Union, the United States and elsewhere, on an ongoing and regular basis regarding operational, systems and control evaluations and issues including those related to compliance with applicable anti-bribery, anti-money laundering and sanctions regimes. It is possible that any matters discussed or identified may result in investigatory or other action being taken by governmental and regulatory authorities, increased costs being incurred by the Group, remediation of systems and controls, public or private censure, restriction of the Group's business activities or fines. Any of the events or circumstances mentioned below could have a material adverse effect on the Group, its business, authorisations and licences, reputation, results of operations or the price of securities issued by it.

The Group is co-operating fully with the investigations and reviews described below.

Notes on the consolidated accounts

LIBOR, other trading rates and foreign exchange rates

On 6 February 2013, the Group announced settlements with the Financial Services Authority in the United Kingdom, the United States Commodity Futures Trading Commission and the United States Department of Justice (DOJ) in relation to investigations into submissions, communications and procedures around the setting of the London Interbank Offered Rate (LIBOR). RBS agreed to pay penalties of £87.5 million, US\$325 million and US\$150 million to these authorities respectively to resolve the investigations. As part of the agreement with the DOJ, RBS plc entered into a Deferred Prosecution Agreement in relation to one count of wire fraud relating to Swiss Franc LIBOR and one count for an antitrust violation relating to Yen LIBOR. In addition, on 12 April 2013, RBS Securities Japan Limited entered a plea of guilty to one count of wire fraud relating to Yen LIBOR and on 6 January 2014, the US District Court for the District of Connecticut entered a final judgment in relation to the conviction of RBS Securities Japan Limited pursuant to the plea agreement. On 12 April 2013, RBS Securities Japan Limited received a business improvement order from Japan's Financial Services Agency requiring RBS to take remedial steps to address certain matters, including inappropriate conduct in relation to Yen LIBOR.

RBS Securities Japan Limited is taking steps to address the issues raised in compliance with that order. In June 2013, RBS was listed amongst the 20 banks found by the Monetary Authority of Singapore (MAS) to have deficiencies in the governance, risk management, internal controls and surveillance systems relating to benchmark submissions following a finding by the MAS that certain traders made inappropriate attempts to influence benchmarks in the period 2007 - 2011. RBS was ordered at that time to set aside additional statutory reserves with MAS of SGD1.2 billion and to formulate a remediation plan. RBS has submitted its remediation plan to the MAS.

The Group is co-operating with investigations and new and ongoing requests for information by various other governmental and regulatory authorities, including in the UK, US and Asia, into its submissions, communications and procedures relating to a number of trading rates, including LIBOR and other interest rate settings, ISDAFIX and non-deliverable forwards. The Group is also under investigation by competition authorities in a number of jurisdictions stemming from the actions of certain individuals in the setting of LIBOR and other trading rates, as well as interest rate-related trading.

In December 2013, the Group agreed to pay settlement penalties of approximately EUR 260 million and EUR 131 million to resolve investigations by the European Commission into Yen LIBOR competition infringements and EURIBOR competition infringements respectively.

In addition, various governmental and regulatory authorities have commenced investigations into foreign exchange trading activities apparently involving multiple financial institutions. The Group has received enquiries from certain of these authorities including the FCA. The Group is reviewing communications and procedures relating to certain currency exchange benchmark rates as well as foreign exchange trading activity. At this stage, the Group cannot estimate reliably what effect, if any, the outcome of the investigation may have on the Group.

Technology incident in June 2012

On 19 June 2012, the Group was affected by a technology incident, as a result of which the processing of certain customer accounts and payments were subject to considerable delay. The cause of the incident has been investigated by independent external counsel with the assistance of third party advisors. The Group agreed to reimburse customers for any loss suffered as a result of the incident and the Group made a provision of £175 million in 2012.

The incident, the Group's handling of the incident, and the systems and controls surrounding the processes affected, are the subject of regulatory investigations in the UK and in the Republic of Ireland.

On 9 April 2013, the UK Financial Conduct Authority (FCA) announced that it had commenced an enforcement investigation into the incident. This is a joint investigation conducted by the FCA together with the UK Prudential Regulation Authority (PRA). The FCA and PRA will reach their conclusions in due course and will decide whether or not to initiate enforcement action following that investigation. While the outcomes of the FCA and PRA investigations will be separate, the regulators have indicated that they will endeavour to co-ordinate the timescales of their respective investigations. Separately the Central Bank of Ireland has initiated an investigation.

Interest rate hedging products

In June 2012, following an industry wide review, the FSA announced that the Group and other UK banks had agreed to a redress exercise and past business review in relation to the sale of interest rate hedging products to some small and medium sized businesses who were classified as retail clients or private customers under FSA rules. On 31 January 2013, the FSA issued a report outlining the principles to which it wished the Group and other UK banks to adhere in conducting the review and redress exercise.

The Group will provide fair and reasonable redress to non-sophisticated customers classified as retail clients or private customers, who were mis-sold interest rate hedging products. In relation to non-sophisticated customers classified as retail clients or private customers who were sold interest rate products other than interest rate caps on or after 1 December 2001 up to 29 June 2012, the Group is required to (i) make redress to customers sold structured collars; and (ii) write to customers sold other interest rate hedging products offering a review of their sale and, if it is appropriate in the individual circumstances, the Group will propose fair and reasonable redress on a case by case basis. Furthermore, non-sophisticated customers classified as retail clients or private customers who have purchased interest rate caps during the period on or after 1 December 2001 to 29 June 2012 will be entitled to approach the Group and request a review.

The redress exercise and the past business review are being scrutinised by an independent reviewer, who will review and agree any redress, and will be overseen by the FCA.

Notes on the consolidated accounts

32 Memorandum items continued

In addition to the redress exercise that is being overseen by the FCA, the Group is also dealing with a large number of active claims by customers who are eligible to be considered under the FCA redress programme as well as customers who are outside of such scope due to their sophistication. The Group is encouraging those customers that are eligible, to seek redress under the redress scheme overseen by the FCA. To the extent that claims are brought, the Group believes it has strong grounds for defending these claims.

The Group has decided to undertake a similar exercise and past business review in relation to the sale of interest rate hedging products to retail designated small and medium sized businesses in the Republic of Ireland and to customers of RBS International.

The Group has made provisions totalling £1.25 billion to date for this matter, including £550 million in 2013, of which £0.2 billion has been utilised at 31 December 2013.

Retail banking

Since initiating an inquiry into retail banking in the European Union (EU) in 2005, the European Commission (EC) continues to keep retail banking under review. In late 2010 the EC launched an initiative pressing for greater transparency of bank fees and is currently proposing to legislate for increased harmonisation of terminology across Member States. The Group cannot predict the outcome of these actions at this stage.

FSA mystery shopping review

On 13 February 2013, the FSA announced the results of a mystery shopping review it undertook into the investment advice offered by banks and building societies to retail clients. As a result of that review the FSA announced that firms involved were cooperative and agreed to take immediate action. The Group was one of the firms involved. The action required includes a review of the training provided to advisers, considering whether changes are necessary to advice processes and controls for new business, and undertaking a past business review to identify any historic poor advice (and where breaches of regulatory requirements are identified, to put this right for customers). The Group will be required to appoint an independent third party to either carry out or oversee this work. The scope and terms of the past business review and the appointment of the independent third party remain under discussion. The Group cannot predict the outcome of this review at this stage.

Card Protection Plan Limited

On 22 August 2013, the FCA announced that Card Protection Plan Limited ("CPP") and 13 banks and credit card issuers, including the Group, had agreed to a compensation scheme in relation to the sale of card and/or identity protection insurance to certain retail customers. CPP has now written to affected policyholders to confirm the details of the proposed scheme, which requires approval by a policyholder vote and by the High Court of England and Wales. A creditors' meeting was held on 7 January 2014, at which the creditors voted in favour of the proposed scheme. The Group has made appropriate levels of provision based on its estimate of ultimate exposure.

Tomlinson Report

On 25 November 2013, a report by Lawrence Tomlinson, entrepreneur in residence at the UK government's Department for Business Innovation and Skills, was published (Tomlinson Report). The Tomlinson Report was critical of the Group's Global Restructuring Group's treatment of SMEs. The Tomlinson Report has been passed to the PRA and FCA. On 29 November 2013, the FCA announced that an independent skilled person will be appointed under Section 166 of the Financial Services and Markets Act to review the allegations in the report. On 17 January 2014, Promontory Financial Group and Mazars were appointed as the skilled person. The Group will fully cooperate with the FCA in its investigation.

In response to the Tomlinson Report, the Bank has instructed Clifford Chance to conduct an independent review of the principal allegation made in the Tomlinson Report: the Group's Global Restructuring Group was alleged to be culpable of systemic and institutional behaviour in artificially distressing otherwise viable businesses and through that putting businesses into insolvency. Clifford Chance is due to submit a report to the Board by the end of the first quarter of 2014.

Multilateral interchange fees

In 2007, the EC issued a decision that, while interchange is not illegal per se, MasterCard's multilateral interchange fee (MIF) arrangements for cross border payment card transactions with MasterCard and Maestro branded consumer credit and debit cards in the EEA were in breach of competition law. MasterCard was required to withdraw (i.e. set to zero) the relevant cross-border MIF by 21 June 2008. MasterCard appealed against the decision to the General Court in March 2008, with the Group intervening in the appeal proceedings. The General Court heard MasterCard's appeal in July 2011 and issued its judgment in May 2012, upholding the EC's original decision. MasterCard has appealed further to the Court of Justice and the Group has intervened in these appeal proceedings.

The appeal hearing took place on 4 July 2013 and the Advocate General's (AG) opinion (which is a non binding opinion and provided to the Court in advance of its final decision) was published on 30 January 2014. The AG opinion proposes that the Court should dismiss MasterCard's appeal. The Court's decision is awaited. MasterCard negotiated interim cross border MIF levels to apply for the duration of the General Court proceedings. These MIF levels remain in place during the appeal before the Court of Justice.

On 9 April 2013, the EC announced it was opening a new investigation into interbank fees payable in respect of payments made in the EEA by MasterCard cardholders from non-EEA countries.

Notes on the consolidated accounts

In March 2008, the EC opened a formal inquiry into Visa's MIF arrangements for cross border payment card transactions with Visa branded debit and consumer credit cards in the EEA. In April 2009 the EC announced that it had issued Visa with a formal Statement of Objections. In April 2010 Visa announced it had reached an agreement with the EC as regards immediate cross border debit card MIF rates only and in December 2010 the commitments were finalised for a four year period commencing December 2010 under Article 9 of Regulation 1/2003. In July 2012 Visa made a request to re-open the settlement in order to modify the fee. The EC rejected the request and in October 2012 Visa filed an appeal to the General Court seeking to have that decision annulled. That appeal is ongoing. The EC is continuing its investigations into Visa's cross border MIF arrangements for deferred debit and credit transactions. On 31 July 2012 the EC announced that it had issued Visa with a supplementary Statement of Objections regarding consumer credit cards in the EEA. On 14 May 2013, the EC announced it had reached an agreement with Visa regarding immediate cross border credit card MIF rates. The agreement has now been market tested and its final publication is awaited.

In addition, the EC has proposed a draft regulation on interchange fees for card payments. The draft regulation is subject to a consultation process, prior to being finalised and enacted. It is currently expected that the regulation will be enacted by the end of 2014/early 2015 at the earliest. The draft regulation proposes the capping of both cross-border and domestic MIF rates for debit and credit consumer cards, to take place in two phases. The draft regulation also sets out other proposals for reform including to the Honour All Cards Rule so merchants will be required to accept all cards with the same level of MIF but not cards with different MIF levels.

In the UK, the Office of Fair Trading (OFT) has ongoing investigations into domestic interchange fees applicable in respect of Visa and MasterCard consumer and commercial credit and debit card transactions. The OFT has not made a finding of an infringement of competition law and has not issued a Statement of Objections to any party in connection with those investigations. In February 2013 the OFT confirmed that while reserving its right to do so, it does not currently expect to issue Statements of Objections in respect of these investigations (if at all) prior to the handing down of the judgment of the Court of Justice in the matter of MasterCard's appeal against the EC's 2007 infringement decision.

The outcomes of these ongoing investigations, proceedings and proposed regulation are not yet known, but they may have a material adverse effect on the structure and operation of four party card payment schemes in general and, therefore, on the Group's business in this sector.

Payment Protection Insurance

The FSA conducted a broad industry thematic review of Payment Protection Insurance (PPI) sales practices and in September 2008, the FSA announced that it intended to escalate its level of regulatory intervention. Substantial numbers of customer complaints alleging the mis-selling of PPI policies have been made to banks and to the Financial Ombudsman Service (FOS) and many of these are being upheld by the FOS against the banks.

The FSA published a final policy statement in August 2010 imposing significant changes with respect to the handling of complaints about the mis-selling of PPI. In October 2010, the British Bankers' Association (BBA) filed an application for judicial review of the FSA's policy statement and of related guidance issued by the FOS. In April 2011 the High Court issued judgment in favour of the FSA and the FOS and in May 2011 the BBA announced that it would not appeal that judgment. The Group then reached agreement with the FSA on a process for implementation of its policy statement and for the future handling of PPI complaints. Implementation of the agreed processes is currently under way. The Group has made provisions totalling £3.1 billion to date for this matter, including £900 million in 2013, of which £2.2 billion has been utilised at 31 December 2013.

Personal current accounts/retail banking

In July 2008, the OFT published a market study report into Personal Current Accounts (PCAs) raising concerns as regards the way the market was functioning. In October 2009 the OFT summarised initiatives agreed with industry to address these concerns. In December 2009, the OFT published a further report in which it stated that it continued to have significant concerns about the operation of the PCA market in the UK, in particular in relation to unarranged overdrafts, and that it believed that fundamental changes were required for the market to work in the best interests of bank customers. In March 2010, the OFT announced that it had secured agreement from the banks on four industry-wide initiatives designed to address its concerns, namely minimum standards on the operation of opt-outs from unarranged overdrafts, new working groups on information sharing with customers, best practice for PCA customers in financial difficulties and incurring charges, and PCA providers to publish their policies on dealing with PCA customers in financial difficulties. The OFT also announced that it would conduct six-monthly reviews and would also review the market again fully in 2012 and undertake a brief analysis on barriers to entry.

The first six-monthly review was completed in September 2010. The OFT noted progress in switching, transparency and unarranged overdrafts for the period March to September 2010 and highlighted further changes it wanted to see in the market. In March 2011, the OFT published the next update report in relation to PCAs. This noted further progress in improving consumer control over the use of unarranged overdrafts. In particular, the Lending Standards Board had led on producing standards and guidance to be included in a revised Lending Code. The OFT stated it would continue to monitor the market and would consider the need for, and appropriate timing of, further update reports in light of other developments, in particular the work of the UK Government's Independent Commission on Banking (ICB).

Additionally, in May 2010, the OFT announced its review of barriers to entry. The review concerned retail banking and banking for small and medium size enterprises (SMEs) (up to £25 million turnover). The OFT published its report in November 2010. It advised that it expected its review to be relevant to the ICB, the FSA, HM Treasury and the Department for Business, Innovation and Skills and to the devolved governments in the UK. The OFT did not indicate whether it would undertake any further work. The report maintained that barriers to entry remain, in particular regarding switching, branch networks and brands. At this stage, it is not possible to estimate the effect of the OFT's report and recommendations regarding barriers to entry upon the Group.

Notes on the consolidated accounts

32 Memorandum items continued

On 13 July 2012, the OFT launched its planned full review of the PCA market. The review was intended to consider whether the initiatives agreed by the OFT with banks to date have been successful and whether the market should be referred to the Competition Commission (CC) for a fuller market investigation.

The OFT's PCA report was published on 25 January 2013. The OFT acknowledged some specific improvements in the market since its last review but concluded that further changes are required to tackle ongoing concerns, including a lack of switching, the ability of consumers to compare products and the complexity of overdraft charges. However, the OFT recognised at the time it published the report that a number of major developments were expected over the coming months including divestment of branches, improvements in account switching and assistance to customers to compare products and services. Therefore the OFT decided not to refer the market to the CC but said that it expected to return to the question of a referral to the CC in 2015, or before. The OFT also announced that it will be carrying out behavioural economic research on the way consumers make decisions and engage with retail banking service, and will study the operation of payment systems as well as the SME banking market.

SME banking market study

The OFT announced its market study on competition in banking for SMEs in England and Wales, Scotland and Northern Ireland on 19 June 2013. The OFT has been seeking views on the scope of the market study and on 27 September 2013 published an update paper setting out its proposed scope. The OFT expects to report on the market study in early 2014.

Credit default swaps (CDS) investigation

The Group is a party to the EC's antitrust investigation into the CDS information market. The Group is co-operating fully with the EC's investigation and in July 2013 received a Statement of Objections from the EC. The EC has raised concerns that a number of banks, Markit and ISDA may have jointly prevented exchanges from entering the CDS market. At this stage, the Group cannot estimate reliably what effect the outcome of the investigation may have on the Group, which may be material.

Securitisation and collateralised debt obligation business

In the United States, the Group is involved in reviews, investigations and proceedings (both formal and informal) by federal and state governmental law enforcement and other agencies and self-regulatory organisations relating to, among other things, issuance, underwriting and trading in mortgage-backed securities, collateralised debt obligations (CDOs), and synthetic products. In connection with these inquiries, Group companies have received requests for information and subpoenas seeking information about, among other things, the structuring of CDOs, financing to loan originators, purchase of whole loans, sponsorship and underwriting of securitisations, due diligence, representations and warranties, communications with ratings agencies, disclosure to investors, document deficiencies, trading activities and repurchase requests.

On 7 November 2013, the Group announced that it had settled with the US Securities and Exchange Commission ('the SEC') over its investigation of RBS Securities Inc. relating to due diligence conducted in connection with a 2007 offering of residential mortgage-backed securities and corresponding disclosures. Pursuant to the settlement, RBS Securities Inc., without admitting or denying the SEC's allegations, consented to the entry of a final judgment ordering certain relief, including an injunction and the payment of approximately US\$153 million in disgorgement, penalties, and interest. The settlement was subsequently approved by the United States District Court for the District of Connecticut. The Group co-operated fully with the SEC throughout the investigation.

Also in October 2010, the SEC commenced an inquiry into document deficiencies and repurchase requests with respect to certain securitisations, and in January 2011, this was converted to a formal investigation. Among other matters, the investigation seeks information related to document deficiencies and remedial measures taken with respect to such deficiencies. The investigation also seeks information related to early payment defaults and loan repurchase requests.

In 2007, the New York State Attorney General issued subpoenas to a wide array of participants in the securitisation and securities industry, focusing on the information underwriters obtained from the independent firms hired to perform due diligence on mortgages. The Group completed its production of documents requested by the New York State Attorney General in 2008, principally producing documents related to loans that were pooled into one securitisation transaction. In May 2011, at the New York State Attorney General's request, representatives of the Group attended an informal meeting to provide additional information about the Group's mortgage securitisation business. The investigation is ongoing and the Group continues to provide the requested information.

US mortgages - loan repurchase matters

The Group's Markets business in North America has been a purchaser of non-agency US residential mortgages in the secondary market, and an issuer and underwriter of non-agency residential mortgage-backed securities (RMBS). Markets did not originate or service any US residential mortgages and it was not a significant seller of mortgage loans to government sponsored enterprises (GSEs) (e.g. the Federal National Mortgage Association and the Federal Home Loan Mortgage Association).

Notes on the consolidated accounts

In issuing RMBS, Markets generally assigned certain representations and warranties regarding the characteristics of the underlying loans made by the originator of the residential mortgages; however, in some circumstances, Markets made such representations and warranties itself. Where Markets has given those or other representations and warranties (whether relating to underlying loans or otherwise), Markets may be contractually required to repurchase such loans or indemnify certain parties against losses for certain breaches of such representations and warranties. In certain instances where it is required to repurchase loans or related securities, Markets may be able to assert claims against third parties who provided representations or warranties to Markets when selling loans to it, although the ability to recover against such parties is uncertain. Between the start of 2009 and 31 December 2013, Markets received approximately US\$741 million in repurchase demands in respect of loans made primarily from 2005 to 2008 and related securities sold where obligations in respect of contractual representations or warranties were undertaken by Markets. However, repurchase demands presented to Markets are subject to challenge and rebuttal by Markets.

RBS Citizens Financial Group, Inc (RBS Citizens) has not been an issuer or underwriter of non-agency RMBS. However, RBS Citizens is an originator and servicer of residential mortgages, and it routinely sells such mortgage loans in the secondary market and to GSEs. In the context of such sales, RBS Citizens makes certain representations and warranties regarding the characteristics of the underlying loans and, as a result, may be contractually required to repurchase such loans or indemnify certain parties against losses for certain breaches of the representations and warranties concerning the underlying loans. Between the start of 2009 and 31 December 2013, RBS Citizens received US\$208 million in repurchase demands in respect of loans originated primarily since 2003. However, repurchase demands presented to RBS Citizens are subject to challenge and rebuttal by RBS Citizens.

Although there has in recent times been disruption in the ability of certain financial institutions operating in the United States to complete foreclosure proceedings in respect of US mortgage loans in a timely manner or at all (including as a result of interventions by certain states and local governments), to date, RBS Citizens has not been materially impacted by such disruptions and the Group has not ceased making foreclosures.

The Group cannot currently estimate what the ultimate exposure may be with respect to repurchase demands. Furthermore, the Group is unable to estimate the extent to which the matters described above will impact it, and future developments may have an adverse impact on the Group's net assets, operating results or cash flows in any particular period.

RBS Citizens consent orders

The activities of RBS Citizens' two US bank subsidiaries - RBS Citizens, N.A. and Citizens Bank of Pennsylvania - are subject to extensive US laws and regulations concerning unfair or deceptive acts or practices in connection with customer products. Certain of the bank subsidiaries' practices with respect to overdraft protection and other consumer products have not met applicable standards. The bank subsidiaries have implemented and are continuing to implement changes to bring their practices in conformity with applicable laws and regulations. In April 2013, the bank subsidiaries consented to the issuance of orders by their respective primary federal banking regulators, the Office of the Comptroller of the Currency (OCC) and the Federal Deposit Insurance Corporation (FDIC) (the Consent Orders). In the Consent Orders (which are publicly available and will remain in effect until terminated by the regulators), the bank subsidiaries neither admitted nor denied the regulators' findings that they had engaged in deceptive marketing and implementation of the bank's overdraft protection programme, checking rewards programmes, and stop-payment process for pre-authorised recurring electronic fund transfers.

The Consent Orders require the bank subsidiaries to pay a total of US\$10 million in civil monetary penalties, to develop plans to provide restitution to affected customers (the amount of which is anticipated to be approximately US\$8 million), to cease and desist any operations in violation of Section 5 of the Federal Trade Commission Act, and to submit to the regulators periodic written progress reports regarding compliance with the Consent Orders.

In addition, RBS Citizens, N.A. agreed to take certain remedial actions to improve its compliance risk management systems and to create a comprehensive action plan designed to achieve compliance with the Consent Order. Restitution plans have been prepared and submitted for approval, and RBS Citizens, N.A. has submitted for approval and is in the process of implementing its action plan for compliance with the Consent Order, as well as updated policies, procedures and programmes related to its compliance risk management systems. In addition to the above, the bank subsidiaries could face further formal administrative enforcement actions from their federal supervisory agencies, including the assessment of civil monetary penalties and restitution, relating to issues arising from other consumer products.

Governance and risk management consent order

On 27 July 2011, the Group agreed with the Board of Governors of the Federal Reserve System, the New York State Banking Department, the Connecticut Department of Banking, and the Illinois Department of Financial and Professional Regulation to enter into a consent Cease and Desist Order (the Order) to address deficiencies related to governance, risk management and compliance systems and controls in RBS plc and RBS N.V. branches. In the Order, the Group agreed to create the following written plans or programmes:

- a plan to strengthen board and senior management oversight of the corporate governance, management, risk management, and operations of the Group's U.S. operations on an enterprise-wide and business line basis,
- an enterprise-wide risk management programme for the Group's U.S. operations,

Notes on the consolidated accounts

32 Memorandum items continued

- a plan to oversee compliance by the Group's U.S. operations with all applicable U.S. laws, rules, regulations, and supervisory guidance,
- a Bank Secrecy Act/anti-money laundering compliance programme for the RBS plc and RBS N.V. branches in the U.S. (the U.S. Branches) on a consolidated basis,
- a plan to improve the U.S. Branches' compliance with all applicable provisions of the Bank Secrecy Act and its rules and regulations as well as the requirements of Regulation K of the Federal Reserve,
- a customer due diligence programme designed to reasonably ensure the identification and timely, accurate, and complete reporting by the U.S. Branches of all known or suspected violations of law or suspicious transactions to law enforcement and supervisory authorities, as required by applicable suspicious activity reporting laws and regulations, and
- a plan designed to enhance the U.S. Branches' compliance with OFAC requirements.

The Order (which is publicly available) identified specific items to be addressed, considered, and included in each proposed plan or programme. The Group also agreed in the Order to adopt and implement the plans and programmes after approval by the regulators, to fully comply with the plans and programmes thereafter, and to submit to the regulators periodic written progress reports regarding compliance with the Order. The Group has created, submitted, and adopted plans and/or programmes to address each of the areas identified above. In connection with the Group's efforts to implement these plans and programmes, it has, among other things, made investments in technology, hired and trained additional personnel, and revised compliance, risk management, and other policies and procedures for the Group's U.S. operations. The Group continues to test the effectiveness of the remediation efforts undertaken by the Group to ensure they are sustainable and meet regulators' expectations. Furthermore, the Group continues to work closely with the regulators in its efforts to fulfil its obligations under the Order, which will remain in effect until terminated by the regulators.

The Group may become subject to formal and informal supervisory actions and may be required by its US banking supervisors to take further actions and implement additional remedial measures with respect to these and additional matters. The Group's activities in the United States may be subject to significant limitations and/or conditions.

US dollar processing consent order

The Group's operations include businesses outside the United States that are responsible for processing US dollar payments. On 11 December 2013 the Group and The Royal Bank of Scotland plc announced that they had reached a settlement with the Board of Governors of the Federal Reserve System (Fed), the New York State Department of Financial Services (DFS), and the Office of Foreign Assets Control (OFAC) with respect to The Royal Bank of Scotland plc's historical compliance with US economic sanction regulations outside the US. In settlement with the above authorities, The Royal Bank of Scotland plc agreed to pay US\$100 million in total, including US\$50 million to the Fed, of which US\$33 million was deemed to satisfy the OFAC penalty, and US\$50 million to DFS.

As part of the settlement, the Group and The Royal Bank of Scotland plc entered into a consent Cease and Desist Order with the Fed (the Order) indicating, among other things, that: (a) the Group and The Royal Bank of Scotland plc lacked adequate risk management and legal review policies and procedures to ensure that activities conducted outside the United States comply with applicable OFAC regulations; (b) from at least 2005 to 2008, certain business lines within The Royal Bank of Scotland plc developed and implemented policies and procedures for processing U.S. dollar-denominated funds transfers through unaffiliated U.S. financial institutions involving parties subject to OFAC Regulations that omitted relevant information from payment messages necessary for the U.S. financial institutions to determine whether these transactions were carried out in a manner consistent with U.S. law; and (c) the Group continues to implement improvements in its oversight and compliance programme for activities involving offices outside the United States that impact the ability of U.S. financial institutions to comply with applicable OFAC sanctions. In the Order (which is publicly available), the Group agreed to create an OFAC compliance programme to ensure compliance with OFAC regulations by the Group's global business lines outside of the United States, and to adopt, implement, and comply with the programme. The programme is to be submitted to the Federal Reserve Bank of Boston (Reserve Bank) for approval by 11 March 2014.

Sixty days after approval of the programme, the Group is to complete a global OFAC risk assessment and submit it to the Reserve Bank and the FCA. The Group also agreed in the Order to hire an independent consultant (subject to approval by the Reserve Bank and the FCA) to conduct an annual OFAC compliance review involving a review of compliance policies and their implementation and an appropriate risk-focused sampling of U.S. dollar payments. The Order further requires the Group to submit quarterly written progress reports to the Reserve Bank detailing the form and manner of all actions taken to secure compliance with the Order.

It was also announced that the US Department of Justice and the New York County District Attorney's Office had concluded their parallel criminal investigations and do not intend to take any action against The Royal Bank of Scotland plc.

US/Swiss tax programme

In August 2013, the DOJ announced a programme for Swiss banks (the Programme), to settle the long-running dispute between the US tax authorities and Switzerland regarding the role of Swiss banks in concealing the assets of US tax payers in offshore accounts. The Programme provides Swiss banks with an opportunity to obtain resolution, through non-prosecution agreements or non-target letters, concerning their status in connection with the DOJ's investigations.

Coutts & Co AG (Coutts), a member of the Group incorporated in Switzerland, has notified the DOJ that it intends to participate in the Programme based on the possibility that some of its clients may not have declared their assets in compliance with US tax laws. The Programme requires a detailed review of all US related accounts. The review is due to be completed and the results presented to the DOJ later in 2014.

Notes on the consolidated accounts

33 Net cash (outflow)/inflow from operating activities	2013 £m	2012* £m	2011* £m

37 Analysis of cash and cash equivalents

	2013 £m	2012 £m	2011 £m
At 1 January			
- cash	91,658	109,888	102,573
- cash equivalents	41,183	42,767	49,957
	132,841	152,655	152,530
Net cash (outflow)/inflow	(11,664)	(19,814)	125
At 31 December	121,177	132,841	152,655
Comprising:			
Cash and balances at central banks	82,659	79,290	79,269
Treasury bills and debt securities	702	772	3,172
Loans and advances to banks	37,816	52,779	70,214
Cash and cash equivalents	121,177	132,841	152,655

Note:
(1) Includes cash collateral posted with bank counterparties in respect of derivative liabilities of £10,342 million (2012 - £12,784 million; 2011 - £19,691 million).

Certain members of the Group are required by law or regulation to maintain balances with the central banks in the jurisdictions in which they operate. These balances are set out below.

	2013	2012	2011
Bank of England	£0.6bn	£0.4bn	£0.4bn
US Federal Reserve	US\$1.2bn	US\$1.2bn	US\$1.2bn
De Nederlandsche Bank	€0.2bn	€0.4bn	€1.0bn

Notes on the consolidated accounts

38 Segmental analysis

(a) Divisions

The directors manage the Group primarily by class of business and present the segmental analysis on that basis. This includes the review of net interest income for each class of business - interest receivable and payable for all reportable segments is therefore presented net. Segments charge market prices for services rendered to other parts of the Group; funding charges between segments are determined by Group Treasury, having regard to commercial demands. The segment measure is operating profit/(loss).

The ceding of control which resulted from the partial disposal of the Group's shareholding in Direct Line Group (DLG) has resulted in the Group no longer treating DLG as an operating segment. Comparative data have been restated.

The Group's reportable segments are on a divisional basis as follows:

UK Retail offers a comprehensive range of banking products and related financial services to the personal market. It serves customers through a number of channels including: the RBS and NatWest network of branches and ATMs in the United Kingdom, telephony, online and mobile.

UK Corporate is a leading provider of banking, finance and risk management services to the corporate and SME sector in the United Kingdom. It offers a full range of banking products and related financial services through a nationwide network of relationship managers, and also through telephone and internet channels. The product range includes invoice finance through the RBSIF brand and asset finance through the Lombard brand.

Wealth provides private banking and investment services in the UK through Coutts & Co and Adam & Company, offshore banking through RBS International, NatWest Offshore and Isle of Man Bank, and international private banking through Coutts & Co Ltd.

International Banking serves the world's largest companies with a leading client proposition focused on financing, risk management and transaction services. It serves as the delivery channel for Markets products to international corporate clients. The division also serves international subsidiaries of clients from other RBS Group divisions (e.g. UK Corporate, Ulster Bank and US Retail & Commercial) through its international network.

Ulster Bank is a leading retail and commercial bank in Northern Ireland and the Republic of Ireland. It provides a comprehensive range of financial services through both its Retail Banking division, which provides loan and deposit products through a network of branches and direct channels, and its Corporate Banking division, which provides services to businesses and corporate customers.

US Retail & Commercial provides financial services primarily through the Citizens and Charter One brands. US Retail & Commercial is engaged in retail and corporate banking activities through its branch network in 12 states in the United States and through non-branch offices in other states.

Markets is a leading origination, sales and trading business across debt finance, fixed income and currencies. The division offers a unified service to the Group's corporate and institutional clients. The Markets' origination, sales and research teams build strong ongoing client partnerships, provide market perspective and access, and work with the division's trading and structuring teams to meet the client's objectives across financing, risk management, investment, securitisation and liquidity.

A new strategy for the Markets division was announced in June 2013 enabling RBS to concentrate on its core customers' needs where the Markets business is strongest. Markets is now focused on our core fixed income capabilities across rates, foreign exchange, asset backed products, credit and debit capital markets, while de-emphasising some more capital intensive structured product areas.

Central Functions comprises Group and corporate functions, such as treasury, finance, risk management, legal, communications and human resources. The Centre manages the Group's capital resources and Group-wide regulatory projects and provides services to the operating divisions.

Non-Core managed separately assets that the Group intended to run off or dispose of. The division contained a range of businesses and asset portfolios primarily from the legacy GBM businesses, higher risk profile asset portfolios including excess risk concentrations, and other illiquid portfolios. It also included a number of other portfolios and businesses including regional markets businesses that the Group had concluded were no longer strategic.

Notes on the consolidated accounts

39 Directors' and key management remuneration

	2013 £'000	2012 £'000
Directors' remuneration		
Non-executive directors - emoluments	1,208	1,218
Chairman and executive directors		
- emoluments	3,632	3,825
- contributions and allowances in respect of money purchase schemes	348	436
	5,188	5,479
- amounts receivable under long-term incentive plans	—	1,223
	5,188	6,702

No directors are accruing benefits under defined benefit schemes (2012 - nil). One director is accruing benefits under a money purchase scheme (2012 - one).

The executive directors may participate in the company's long-term incentive plans, executive share option and sharesave schemes and details of their interests in the company's shares arising from their participation are given in the Directors' remuneration report. Details of the remuneration received by each director is also given in the Directors' remuneration report.

Compensation of key management

The aggregate remuneration of directors and other members of key management during the year was as follows:

	2013 £'000	2012 £'000
Short-term benefits	30,590	32,540
Post-employment benefits	238	699
Termination benefits	2,033	—
Share-based payments	13,003	24,533
	45,864	57,772

40 Transactions with directors and key management

(a) At 31 December 2013, amounts outstanding in relation to transactions, arrangements and agreements entered into by authorised institutions in the Group, as defined in UK legislation, were £850,762 in respect of loans to seven persons who were directors of the company at any time during the financial period.

(b) For the purposes of IAS 24 'Related Party Disclosures', key management comprise directors of the company and members of the Group Management Committee. The captions in the Group's primary financial statements include the following amounts attributable, in aggregate, to key management:

	2013 £'000	2012 £'000
Loans and advances to customers	10,750	11,748
Customer accounts	33,279	36,250

Key management have banking relationships with Group entities which are entered into in the normal course of business and on substantially the same terms, including interest rates and security, as for comparable transactions with other persons of a similar standing or, where applicable, with other employees. These transactions did not involve more than the normal risk of repayment or present other unfavourable features.

Notes on the consolidated accounts

41 Related parties

UK Government

On 1 December 2008, the UK Government through HM Treasury became the ultimate controlling party of The Royal Bank of Scotland Group plc. The UK Government's shareholding is managed by UK Financial Investments Limited, a company wholly owned by the UK Government. As a result, the UK Government and UK Government controlled bodies became related parties of the Group.

The Group enters into transactions with many of these bodies on an arm's length basis. The principal transactions during 2013, 2012 and 2011 were: Bank of England facilities and the issue of debt guaranteed by the UK Government discussed below and the Asset Protection Scheme which the Group exited on 18 October 2012 having paid total premiums of £2.5 billion. In addition, the redemption of non-cumulative sterling preference shares and the placing and open offer in April 2009 was underwritten by HM Treasury and, in December 2009, B shares were issued to HM Treasury and a contingent capital agreement concluded with HM Treasury (see Note 27). Other transactions include the payment of: taxes principally UK corporation tax (page 404) and value added tax; national insurance contributions; local authority rates; and regulatory fees and levies (including the bank levy (page 393) and FSCS levies (page 473)); together with banking transactions such as loans and deposits undertaken in the normal course of banker-customer relationships.

Bank of England facilities

The Group also participates in a number of schemes operated by the Bank of England available to eligible banks and building societies.

- Open market operations - these provide market participants with funding at market rates on a tender basis in the form of short and long-term repos on a wide range of collateral and outright purchases of high-quality bonds to enable them to meet the reserves that they must hold at the Bank of England.
- The special liquidity scheme - this was launched in April 2008 to allow financial institutions to swap temporarily illiquid assets for treasury bills, with fees charged based on the spread between 3-month LIBOR and the 3-month gilt repo rate. The scheme officially closed on 30 January 2012.

At 31 December 2013, the Group had no amounts outstanding under these facilities (2012 and 2011 - nil).

Members of the Group that are UK authorised institutions are required to maintain non-interest bearing (cash ratio) deposits with the Bank of England amounting to 0.11% of their eligible liabilities. They also have access to Bank of England reserve accounts: sterling current accounts that earn interest at the Bank of England Rate.

Government credit and asset-backed securities guarantee schemes

These schemes guarantee eligible debt issued by qualifying institutions for a fee. The fee, payable to HM Treasury is based on a per annum rate of 25 (asset-backed securities guarantee scheme) and 50 (credit guarantee scheme) basis points plus 100% of the institution's median five-year credit default swap spread during the twelve months to 1 July 2008. The asset-backed securities scheme closed to new issuance on 31 December 2009 and the credit guarantee scheme on 28 February 2010.

At 31 December 2013, the Group had no debt outstanding guaranteed by the UK Government (2012 - nil; 2011 - £21.3 billion).

National Loan Guarantee Scheme

The Group participated in the National Loan Guarantee Scheme (NLGS), providing loans and facilities to eligible customers at a discount of one percent. It did not issue any guaranteed debt under the scheme and consequently, it was not committed to providing a particular volume of reduced rate facilities. At 31 December 2013 the Group had no amounts outstanding under the scheme (2012 - £898 million). The NLGS was superseded by the Funding for Lending Scheme.

The Funding for Lending Scheme

The Funding for Lending Scheme was launched in July 2012. Under the scheme UK banks and building societies are able to borrow UK treasury bills from the Bank of England in exchange for eligible collateral during the drawdown period (1 August 2012 to 31 January 2014). Borrowing is limited to 5% of the participant's stock of loans to the UK non-financial sector as at 30 June 2012, plus any expansion in lending from that date to the end of 2013. Eligible collateral comprises all collateral eligible for the Bank of England's discount window facility. The term of each transaction is four years from the date of drawdown. The price for borrowing UK treasury bills under the scheme depends on the participant's net lending to the UK non-financial sector between 30 June 2012 and the end of 2013. If lending is maintained or expanded over that period, the fee is 0.25% per year on the amount borrowed. If lending declines, the fee increases by 0.25% for each 1% fall in lending, up to a maximum fee of 1.5%. As at 31 December 2013, the Group had no amounts outstanding under the scheme (2012 - £749 million).

Other related parties

- (a) In their roles as providers of finance, Group companies provide development and other types of capital support to businesses. These investments are made in the normal course of business and on arm's length terms. In some instances, the investment may extend to ownership or control over 20% or more of the voting rights of the investee company. However, these investments are not considered to give rise to transactions of a materiality requiring disclosure under IAS 24.
- (b) The Group recharges The Royal Bank of Scotland Group Pension Fund with the cost of administration services incurred by it. The amounts involved are not material to the Group.
- (c) In accordance with IAS 24, transactions or balances between Group entities that have been eliminated on consolidation are not reported.
- (d) The captions in the primary financial statements of the parent company include amounts attributable to subsidiaries. These amounts have been disclosed in aggregate in the relevant notes to the financial statements.

Notes on the consolidated accounts

42 Post balance sheet events

RBS Capital Resolution

In November 2013, the Group announced the creation of RBS Capital Resolution (RCR), to manage a pool of assets with particularly high long term capital intensity and/or potentially volatile outcomes in stressed environments. RCR became operational on 1 January 2014 with a portfolio of £29 billion assets.

Sale of selected Chicago-area operations of RBS Citizens

On 7 January 2014, the Group announced that RBS Citizens Financial Group, Inc. had reached agreement to sell its Chicago-area retail branches, small business operations and select middle market relationships in the Chicago market to U.S. Bank National Association, a subsidiary of U.S. Bancorp. The sale includes 94 Charter One branches in the Chicago area, \$5.3 billion in local deposits and \$1.1 billion in locally originated loans for a deposit premium of approximately \$315 million, or 6 percent of deposits. The transaction is subject to regulatory approval and is anticipated to close in mid-2014.

Disposal of Structured Retail Investor Products and Equity Derivatives Businesses

On 19 February 2014, the Group announced that it had reached agreement with BNP Paribas S.A. for the disposal of assets and liabilities related to its structured retail investor products and equity derivatives businesses, and associated market-making activities. The disposal is subject to competition approval and will be implemented on a phased basis during 2014 and 2015. The consideration is not material.

Strategic review

In November 2013, the Group announced that it was undertaking a comprehensive business review of its customer-facing businesses, IT and operations and organisational and decision making structures.

As described on page 8, the Group has announced the results of its Strategic review, resulting in it being realigned into three businesses: Personal & Business Banking, Commercial & Private Banking, and Corporate & institutional Banking. In addition, the Group will be rationalising and simplifying its systems, based on a target architecture with improved resilience.

Direct Line Insurance Group (DLG)

On 26 February 2014 RBS announced that it had entered into a placing agreement to complete the sale of its residual interest in DLG (except for 4.2 million shares held to satisfy long term incentive plan awards granted by RBS to DLG management). Accordingly, on settlement of the placing, the Group will have completed the disposal as required by the European Commission.

Other than as detailed above, there have been no significant events between 31 December 2013 and the date of approval of these accounts which would require a change to or additional disclosure in the accounts.

Parent company financial statements and notes

1 Presentation of accounts

The accounts are prepared on a going concern basis (see the Report of the directors, page 99) and in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee of the IASB as adopted by the European Union (EU) (together IFRS). The company's financial statements are prepared in accordance with IFRS as issued by the IASB and are presented in accordance with the Companies Act 2006.

The company is incorporated in the UK and registered in Scotland. The accounts are prepared on the historical cost basis except that derivative financial instruments are stated at fair value. Recognised financial assets and financial liabilities in fair value hedges are adjusted for changes in fair value in respect of the risk that is hedged.

The accounting policies that are applicable to the company are included in the Group accounting policies which are set out on pages 377 to 389 of the Group financial statements, except that it has no policy regarding 'Basis of consolidation' and that the company's investment in its subsidiaries are stated at cost less any impairment.

2 Profit dealt with in the accounts of the company

As permitted by section 408(3) of the Companies Act 2006, the primary financial statements of the company do not include an income statement or statement of comprehensive income. Condensed information is set out below.

Equity and commodity contracts	1	4	—	—	—	—	—	—	—
	164	62		511	7		1,502	79	

Included in the table above are derivatives held for hedging purposes as follows:

	2013		2012		2011	
	Assets £m	Liabilities £m	Assets £m	Liabilities £m	Assets £m	Liabilities £m
Fair value hedging						
Interest rate contracts	104	37	291	—	279	—

7 Debt securities

Debt securities comprise the partial repurchase of preferred securities issued by the trusts referred to in Notes 24 and 26 on the consolidated accounts.

Parent company financial statements and notes

8 Investments in Group undertakings

Investments in Group undertakings are carried at cost less impairment. Movements during the year were as follows:

	2013 £m	2012 £m	2011 £m
At 1 January	54,995	53,871	49,125
Currency translation and other adjustments	(23)	(37)	(2)
Additional investments in Group undertakings	1,222	3,710	4,607
Additions	—	—	761
Redemption of investments in Group undertakings	—	(29)	(50)
Disposals	(1,381)	(735)	—
Impairment of investments	—	(1,785)	(570)
At 31 December	<u>54,813</u>	<u>54,995</u>	<u>53,871</u>

The principal subsidiary undertakings of the company are shown below. Their capital consists of ordinary and preference shares which are unlisted with the exception of certain preference shares issued by NatWest and RBS Holdings N.V..

The Royal Bank of Scotland plc and RFS Holdings B.V. are directly owned by the company, and all of the other subsidiary undertakings are owned directly, or indirectly through intermediate holding companies, by these companies. All of these subsidiaries are included in the Group's consolidated financial statements and have an accounting reference date of 31 December.

	Nature of business	Country of incorporation and principal area of operation	Group interest
The Royal Bank of Scotland plc	Banking	Great Britain	100%
National Westminster Bank Plc (1)	Banking	Great Britain	100%
RBS Citizens Financial Group, Inc.	Banking	US	100%
Coutts & Company (2)	Private banking	Great Britain	100%
RBS Securities Inc.	Broker dealer	US	100%
Ulster Bank Limited (3)	Banking	Northern Ireland	100%
RBS Holdings N.V. (4)	Banking	The Netherlands	98%

Notes:

- (1) The company does not hold any of the NatWest preference shares in issue.
- (2) Coutts & Company is incorporated with unlimited liability. Its registered office is 440 Strand, London WC2R 0QS.
- (3) Ulster Bank Limited and its subsidiaries also operate in the Republic of Ireland.
- (4) RFS Holdings B.V. (RFS) owns 100% of the outstanding shares of RBS Holdings N.V. (ABN AMRO Holding N.V. prior to 1 April 2010). RBS Holdings N.V. has one direct subsidiary, The Royal Bank of Scotland N.V. (RBS N.V.), a fully operational bank within the Group. RBS N.V. is independently rated and regulated by the Dutch Central Bank. On the division of an entity by demerger, Dutch law establishes a cross liability between surviving entities in respect of the creditors at the time of the demerger. RBS N.V.'s cross liability is limited by law to the lower of its equity and the debts of ABN AMRO Bank N.V. on 1 April 2010. The likelihood of any cross liability crystallising is considered remote.

In accordance with undertakings given to the EC, the company sold the following ordinary share interests in its former wholly-owned subsidiary Direct Line Insurance Group Plc: October 2012 - 34.7%, March 2013 - 16.8% and September 2013 - 20%. The remaining investment of 28.5% at 31 December 2013 is classified as held for disposal.

The above information is provided in relation to the principal related undertakings as permitted by Section 410(2) of the Companies Act 2006. Full information on all related undertakings is included in the Annual Return delivered to the Registrar of Companies for Scotland.

- including interest on deposits	(0.34)	0.28	0.85	0.95	0.72
- excluding interest on deposits	(4.51)	(2.99)	(0.37)	0.50	(0.47)
Ratio of earnings to fixed charges only (5)					
- including interest on deposits	(0.36)	0.29	0.85	0.97	0.77
- excluding interest on deposits	(6.04)	(3.81)	(0.37)	0.58	(0.71)

*Restated

Notes:

- (1) None of the convertible securities had a dilutive effect in 2013, 2012, 2011, 2010 or 2009.
- (2) Return on average total assets represents (loss)/profit attributable to ordinary and B shareholders as a percentage of average total assets.
- (3) Return on average owners equity represents (loss)/profit attributable to equity owners expressed as a percentage of average owners equity.
- (4) Return on average ordinary and B shareholders' equity represents (loss)/profit attributable to ordinary and B shareholders expressed as a percentage of average ordinary and B shareholders' equity.
- (5) For this purpose, earnings consist of income before tax and non-controlling interests, plus fixed charges less the unremitted income of associates (share of profits less dividends received). Fixed charges consist of total interest expense, including or excluding interest on deposits and debt securities in issue, as appropriate, and the proportion of rental expense deemed representative of the interest factor (one third of total rental expenses).

The Group provides credit facilities at variable rates to its corporate and retail customers. Variable rate credit extended to the Group's corporate and commercial customers includes bullet and instalment loans, finance lease agreements and overdrafts; interest is generally charged at a margin over a benchmark rate such as LIBOR or base rate. Interest on variable rate retail loans may also be based on LIBOR or base rate; other variable rate retail lending is charged at variable interest rates set by the Group such as its mortgage standard variable rate in the UK.

Total recoveries	256	341	527	411	399

Additional information

Risk elements in lending

Risk elements in lending (REIL) comprises impaired loans and accruing loans past due 90 days or more as to principal or interest.

Impaired loans are all loans (including loans subject to forbearance) for which an impairment provision has been established; for collectively assessed loans, impairment loss provisions are not allocated to individual loans and the entire portfolio is included in impaired loans.

Accruing loans past due 90 days or more comprise loans past due 90 days where no impairment loss is expected and those awaiting individual assessment. A latent loss provision is established for the latter.

	2013 £m	2012 £m	2011 £m	2010 £m	2009 £m
Impaired loans (1)					
UK	17,480	18,412	15,576	15,738	13,572
Overseas	19,691	20,074	23,171	19,963	21,453
Total	37,171	38,486	38,747	35,701	35,025

UK	1,962	2,007	1,698	2,374	2,224
Overseas	259	634	400	523	1,000
Total	2,221	2,641	2,098	2,897	3,224
Total risk elements in lending	39,392	41,127	40,845	38,598	38,249
Closing provisions for impairment as a % of total risk elements in lending	64%	52%	49%	47%	45%
Risk elements in lending as a % of gross lending to customers excluding reverse repos (3)	9.5%	9.1%	8.6%	7.4%	5.4%

Notes:

- (1) The write-off of impaired loans affects the closing provisions for impairment as a % of total risk elements in lending (the coverage ratio). The coverage ratio reduces if the loan written off carries a higher than average provision and increases if the loan written off carries a lower than average provision.
- (2) Impaired loans at 31 December 2013 include £7,687 million (2012 - £6,009 million) of loans subject to forbearance granted during the year.
- (3) Includes disposal groups.

	2013 £m	2012 £m	2011 £m	2010 £m	2009 £m
Gross income not recognised but which would have been recognised under the original terms of impaired loans					
UK	571	665	636	579	625
Overseas	696	940	964	830	1,032
Total	1,267	1,605	1,600	1,409	1,657
Interest on impaired loans included in net interest income					
UK	196	255	235	216	230
Overseas	195	221	249	239	178
Total	391	476	484	455	408

Potential problem loans

Potential problem loans (PPL) are loans for which an impairment event has taken place but no impairment loss is expected. This category is used for advances which are not past due 90 days or revolving credit facilities where identification as 90 days overdue is not feasible.

	2013 £m	2012 £m	2011 £m	2010 £m	2009 £m
Potential problem loans	789	807	739	633	1,009

Both REIL and PPL are reported gross and take no account of the value of any security held which could reduce the eventual loss should it occur, nor of any provision marked. Therefore impaired assets which are highly collateralised, such as mortgages, will have a low coverage ratio of provisions held against the reported impaired balance.

Additional information

Financial summary continued

Forbearance

The table below shows loans granted forbearance during the year. These loans are unimpaired: either the loan was performing before and after the granting of forbearance or the loan was non-performing before but subsequently transferred to the performing book. Loans with impairment provisions subject to forbearance continue to be reported as impaired loans.

	2013 £m	2012 £m	2011 £m	2010 £m	2009 £m
Loans granted forbearance	7,901	11,196	7,674	5,758	2,698

Notes:

(1) Wholesale loans subject to forbearance include only those arrangements above thresholds set individually by the divisions, ranging from nil to £3 million.

(2) For 2013, wholesale loans subject to forbearance were £4,305 million (refer to page 244) and secured retail loans subject to forbearance were £3,596 million (refer to page 248). Unsecured retail loans subject to forbearance are not included. The balance of unsecured retail loans subject to forbearance amounts to £272 million.

Cross border exposures

Cross border exposures are loans and advances including finance leases and instalment credit receivables and other monetary assets, such as debt securities, including non-local currency claims of overseas offices on local residents.

The Group monitors the geographical breakdown of these exposures based on the country of domicile of the borrower or guarantor of ultimate risk. Cross border exposures exclude exposures to local residents in local currencies.

The table below sets out the Group's cross border exposures greater than 0.5% of the Group's total assets. None of these countries have experienced repayment difficulties that have required restructuring of outstanding debt.

Certificates of deposit and other time deposits

The following table shows details of the Group's certificates of deposit and other time deposits over \$100,000 or equivalent by remaining maturity.

2013		Within 3 months £m	Over 3 months but within 6 months £m	Over 6 months but within 12 months £m	Over 12 months £m	Total £m
UK based companies and branches						
Certificates of deposit		671	39	537	65	1,312
Other time deposits		21,575	1,776	2,579	3,505	29,435
Overseas based companies and branches						
Certificates of deposit		899	3	10	1	913
Other time deposits		8,427	2,337	1,760	1,252	13,776
		31,572	4,155	4,886	4,823	45,436

Short-term borrowings

Short-term borrowings comprise repurchase agreements, borrowings from financial institutions, commercial paper (CP) and certificates of deposit (CDs). Derivative collateral received from financial institutions is excluded from the table below, as are certain long-term borrowings.

	Repurchase agreements	Financial institutions		2013 Total	Repurchase agreements	Financial institutions		2012 Total	2011 Total
		(1,2)	CP			(1,2)	CP		
At year end									
- balance (£bn)	84	61	2	2	149	132	80	3	3
- weighted average interest rate	0.3%	0.6%	0.4%	0.6%	0.4%	0.5%	0.5%	0.3%	1.0%
								0.5%	0.8%
During the year									
- maximum balance (£bn)	172	155	3	3	333	181	103	18	20
- average balance (£bn)	130	71	3	3	207	149	82	9	11
- weighted average interest rate	0.3%	0.6%	0.4%	0.9%	0.4%	0.5%	0.6%	0.6%	1.2%
								0.5%	1.0%

Notes:

(1) Excludes derivative cash collateral of £26 billion at 31 December 2013 (2012 - £37 billion; 2011 - £41 billion), 2013 average of £31 billion (2012 - £38 billion; 2011 - £35 billion).

(2) Excludes Federal Home Loan Bank's long-term borrowings of £2 billion at 31 December 2013 (2012 and 2011 - £1 billion), 2013 average of £1 billion (2012 and 2011 - £1 billion).

Balances are generally based on monthly data. Average interest rates during the year are computed by dividing total interest expense by the average amount borrowed. Average interest rates at year end are average rates for a single day and as such may reflect one-day market distortions, which may not be indicative of generally prevailing rates.

Additional information

Other contractual cash obligations

The table below summarises the Group's other contractual cash obligations by payment date.

	0-3 months £m	3-12 months £m	1-3 years £m	3-5 years £m	5-10 years £m	10-20 years £m
2013						
Operating leases	90	258	630	513	786	1,358
Contractual obligations to purchase goods or services	107	266	189	588	12	—
	197	524	819	1,101	798	1,358
2012						
Operating leases	214	185	694	559	910	1,376
Contractual obligations to purchase goods or services	110	334	500	15	—	—
	324	519	1,194	574	910	1,376

The Group's undrawn formal facilities, credit lines and other commitments to lend were £213,046 million (2012 - £215,808 million). While the Group has given commitments to provide these funds, some facilities may be subject to certain conditions being met by the counterparty. The Group does not expect all facilities to be drawn, and some may lapse before drawdown.

Exchange rates

Except as stated, the following tables show, for the dates or periods indicated, the Noon Buying Rate in New York for cable transfers in sterling as certified for customs purposes by the Federal Reserve Bank of New York.

US dollars per £1	January 2014	December 2013	November 2013	October 2013	September 2013	August 2013
Noon Buying Rate						
High	1.6612	1.6574	1.6373	1.6224	1.6179	1.5678
Low	1.6335	1.6254	1.5916	1.5904	1.5544	1.5145
Noon Buying Rate						
Period end rate	1.6574	1.6262	1.5537	1.5392	1.6167	
Average rate for the year (1)	1.5673	1.5924	1.6105	1.5415	1.5707	
Consolidation rate (2)						
Period end rate	1.6542	1.6164	1.5475	1.5524	1.6222	
Average rate for the year	1.5646	1.5850	1.6039	1.5455	1.5657	

Notes:

- (1) The average of the Noon Buying Rates on the last US business day of each month during the year.
- (2) The rates used by the Group for translating US dollars into sterling in the preparation of its financial statements.
- (3) On 25 February 2014, the Noon Buying Rate was £1.00 = US\$1.6696.

Additional information

Supervision

United Kingdom

In April 2013, the Financial Services Authority (FSA) was replaced by two new regulators: the Prudential Regulation Authority (PRA) and the Financial Conduct Authority (FCA). At that point, the PRA became the consolidated supervisor of the Group. The PRA, an operationally independent subsidiary of the Bank of England, is responsible for promoting the safety and soundness of systemically important financial institutions in the UK. The FCA's overall objective is to ensure financial markets function well. This is supported by its operational objectives of: securing an appropriate degree of protection for consumers; protecting and enhancing the integrity of the UK financial system; and promoting effective competition in the interests of consumers.

As at 31 December 2013, 16 companies in the Group, spanning a range of financial services sectors (banking, insurance and investment business), were authorised to conduct financial activities in the UK. The UK authorised banks in the Group include The Royal Bank of Scotland plc, National Westminster Bank Plc, Coutts & Co and Ulster Bank Limited. Wholesale activities, other than Group Treasury activities, are concentrated in the Group's Markets, International Banking and UK Corporate Banking divisions, and are undertaken under the names of The Royal Bank of Scotland plc and National Westminster Bank Plc. UK retail banking activities are managed by the UK Retail division and by Ulster Bank Limited in Northern Ireland. The banking service in the Republic of Ireland is provided by Ulster Bank Ireland Limited, which is supervised by the Central Bank of Ireland.

Investment management business is principally undertaken by companies in the Wealth division, including Coutts & Co, Adam & Company Investment Management Limited, and in the Markets and International Banking divisions, through RBS Asset Management Limited and The Royal Bank of Scotland plc.

The Group is subject to extensive regulations that impose obligations on financial institutions to maintain appropriate policies, procedures and controls to ensure compliance with the rules and regulations to which they are subject.

United States

The Royal Bank of Scotland Group plc (RBSG) is both a bank holding company and a financial holding company within the meaning of the US Bank Holding Company Act of 1956. As such, it is subject to the regulation and supervision of the Board of Governors of the Federal Reserve System (the "Federal Reserve"). Among other things, the Group's direct and indirect activities and investments in the United States are limited to those that are 'financial in nature' or 'incidental' or 'complementary' to a financial activity, as determined by the Federal Reserve. The Group is also required to obtain the prior approval of the Federal Reserve before acquiring directly or indirectly, the ownership or control of more than 5% of any class of the voting shares of any US bank or holding company. Under current Federal Reserve policy, the Group is required to act as a source of financial strength for its US bank subsidiaries. Among other things, this source of strength obligation could require the Group to inject capital into any of its US bank subsidiaries if any of them became undercapitalised.

Anti-money laundering, anti-terrorism and economic sanctions regulations are a major focus of the US government for financial institutions and are rigorously enforced by the US government agencies.

The Group's US bank and non-bank subsidiaries and the Royal Bank's US branches are also subject to supervision and regulation by a variety of other US regulatory agencies. RBS Citizens N.A. is supervised by the Office of the Comptroller of the Currency, which is charged with the regulation and supervision of nationally chartered banks. RBS Citizens N.A. owns CCO Investments Services Corp., a US broker dealer subject to regulation and supervision by the US Securities and Exchange Commission (SEC) and the Financial Industry Regulatory Authority (FINRA) with respect to its securities activities. Citizens Bank of Pennsylvania is subject to the regulation and supervision of the US Federal Deposit Insurance Corporation and the Pennsylvania Department of Banking. Both banks are subject to supervision and regulation by the Consumer Financial Protection Bureau (CFPB).

RBS Citizens Financial Group, Inc. is under the supervision of the Federal Reserve as a bank holding company. The Royal Bank's New York branch is supervised by the New York State Department of Financial Services and the Federal Reserve Bank of New York, and its Connecticut branch is supervised by the Connecticut Department of Banking. Both branches are also subject to supervisory oversight by the Federal Reserve Bank of Boston.

The Group's primary US broker dealer, RBS Securities Inc. (RBSSI), formerly known as Greenwich Capital Markets, Inc., is also subject to regulation and supervision by the SEC and FINRA with respect to its securities activities. The futures activities of RBSSI are subject to regulation and oversight by the US Commodity Futures Trading Commission and the Chicago Mercantile Exchange Group-owned exchanges.

Other jurisdictions

The Group operates in over 45 countries through a network of branches, local banks and non-bank subsidiaries and these activities are subject to supervision in most cases by a local regulator or central bank.

Description of property and equipment

The Group operates from a number of locations worldwide, principally in the UK. At 31 December 2013, the Royal Bank and NatWest had 608 and 1,392 retail branches, respectively, in the UK. Ulster Bank has a footprint of 214 branches and an extensive network of business banking offices across Northern Ireland and the Republic of Ireland. US Retail & Commercial had 1,366 retail banking offices (including in-store branches) covering Connecticut, Delaware, Illinois, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island and Vermont. A substantial majority of the UK branches are owned by the Royal Bank, NatWest and their subsidiaries or are held under leases with unexpired terms of over 50 years. The Group's principal properties include its headquarters at Gogarburn, Edinburgh, its principal offices in London at 135 and 280 Bishopsgate and the Drummond House administration centre located at South Gyle, Edinburgh.

Total capital expenditure on premises (excluding investment properties), computers and other equipment in the year ended 31 December 2013 was £571 million (2012 - £801 million; 2011 - £820 million).

Additional information

Major shareholders

In December 2008, The Solicitor for the Affairs of Her Majesty's Treasury (HM Treasury) acquired 22,854 million ordinary shares representing 57.9% of the company's issued ordinary share capital. During 2009, HM Treasury acquired a further 16,791 million ordinary shares raising their holding to 70.3% of the company's issued ordinary share capital.

In December 2009, HM Treasury acquired 51 billion B shares in the company representing the entire issued B share capital. As a result of the ordinary share sub-division and consolidation which took place in June 2012, HM Treasury's holding in the company's ordinary shares became 3,964 million ordinary shares of £1 each. At 31 December 2013, HM Treasury's holding in the company's ordinary shares was 63.9%.

As far as the company is aware, there have been no significant changes in the percentage ownership of major shareholders of the company's ordinary, B and preference shares during the three years ended 26 February 2014. All shareholders within a class of the company's shares have the same voting rights.

As at 31 December 2013, almost all of the company's US\$ denominated preference shares and American Depository Shares representing ordinary shares were held by shareholders registered in the US. All other shares were predominantly held by shareholders registered outside the US.

Material contracts

The company and its subsidiaries are party to various contracts in the ordinary course of business. Material contracts include the following:

Consortium and Shareholders Agreement (CSA)

On 28 May 2007, Fortis Bank Nederland, the company, Santander and RFS Holdings entered into the CSA. Fortis Bank Nederland acceded to the CSA on 26 July 2007. On 3 October 2008, the Dutch State acquired Fortis Bank Nederland. On 24 December 2008 the Dutch State acceded to the CSA following its acquisition of the shares held by Fortis Bank Nederland in RFS Holdings pursuant to a Deed of Accession entered into between RFS Holdings, the company, Fortis Bank Nederland, Santander and the Dutch State. On 1 April 2010 the CSA was restated. It was the subject of a further amendment on 18 July 2011. On 7 November 2012, Stichting Administratiekantoor Beheer Financiële Instellingen (the Foundation) acceded to the CSA (as amended and restated) as a shareholder following its acquisition of the shares held by the Dutch State in RFS Holdings pursuant to a Deed of Accession entered into between RFS Holdings, the company, Santander, the Dutch State and the Foundation. The Dutch State remains a party to the CSA. The CSA (as amended and restated) governs the relationships amongst the parties thereto in relation to the acquisition by RFS Holdings of ABN AMRO (now RBS Holdings N.V.). The CSA (as amended and restated) details, inter alia, the equity interests in RFS Holdings, the governance of RFS Holdings, the arrangements for the transfer of certain ABN AMRO businesses, assets and liabilities to the Dutch State (previously Fortis Bank Nederland), the company and Santander, further funding obligations of the Dutch State, the company and Santander where funding is required by regulatory authorities in connection with the ABN AMRO businesses, the allocation of taxes and conduct of tax affairs and the steps that the Dutch State, the company and Santander expect to take to enable the company to become the sole shareholder of RFS Holdings.

B Share Acquisition and Contingent Capital Agreement

On 26 November 2009, the company and HM Treasury entered into the Acquisition and Contingent Capital Agreement pursuant to which HM Treasury subscribed for the initial B shares and the Dividend Access Share (the "Acquisitions") and agreed the terms of HM Treasury's subscription (the "Contingent Subscription") for an additional £8 billion in aggregate in the form of further B shares (the "Contingent B shares"), which will be issued on the same terms as the initial B shares. The Acquisitions were subject to the satisfaction of various conditions, including the company having obtained the approval of its shareholders in relation to the Acquisitions.

The company and HM Treasury further agreed the terms of the £8 billion Contingent Subscription of the Contingent B shares in the Acquisition and Contingent Capital Agreement. For a period of five years from 22 December 2009 or, if earlier, until the occurrence of a termination event or until the company's decision (with PRA (formerly FSA) consent) to terminate such Contingent Subscription (the "Contingent Period"), if the Core Tier 1 ratio of the company fell below five per cent (and if certain other conditions were met) HM Treasury would be committed to subscribe for the Contingent B shares in no fewer than two tranches of £6 billion and £2 billion (or such smaller amounts as the company and HM Treasury may agree). Any unused portion of the £8 billion could be subscribed in one or more further tranches.

On December 16, 2013, the company announced that, having received approval from the PRA, it had terminated the £8 billion Contingent Subscription. The Group was able to cancel the Contingent Subscription as a result of the actions announced in the second half of 2013 to further strengthen its capital position.

On entering into the Contingent Subscription in 2009, the company recognised the present value of the annual fees payable under the agreement (£1,208 million) as a liability and debited a contingent capital reserve within equity. Following termination of the Contingent Subscription, the outstanding final annual fee of £320 million will no longer be payable. The balance sheet liability for this fee has been extinguished with a corresponding entry to equity.

The company gave certain representations and warranties to HM Treasury on the date of the Acquisition and Contingent Capital Agreement, on the date the circular was posted to shareholders, on the first date on which all of the conditions precedent were satisfied, or waived, and on the date of the Acquisitions.

The company agreed to reimburse HM Treasury for its expenses incurred in connection with the Acquisitions.

The company agreed to a number of undertakings, including with respect to: (i) restrictions on the payment of dividends or other distributions on, and the redemption of, certain securities; (ii) expectations regarding the repurchase of the B shares by the company; (iii) negotiating in good faith to maintain the status of the B shares and Dividend Access Share as Core Tier 1 capital; and (iv) restrictions in relation to the company's share premium account.

Additional information

Material contracts continued

HM Treasury has agreed to waive its statutory pre-emption rights arising out of the B shares and the Dividend Access Share in respect of any future issue of equity securities by the company other than B shares and has agreed to vote its B shares and the Dividend Access Share, as applicable, in favour of each special resolution to disapply its pre-emption rights under the B shares and/or the Dividend Access Share then held by HM Treasury every time they arise in respect of any such future issue. The pre-emption rights arising out of the B shares and the Dividend Access Share have also been disapplied in the Articles of Association.

HM Treasury has agreed that it shall not be entitled to exercise its option to convert B shares into ordinary shares to the extent that it holds more than 75 per cent of the ordinary shares of the company or to the extent that the exercise of such option would result in it holding more than 75 per cent of the ordinary shares of the company.

HM Treasury has agreed that it shall not be entitled to vote the B shares or the Dividend Access Share to the extent that votes cast on such B shares and the Dividend Access Share, together with any other votes which HM Treasury is entitled to cast in respect of any ordinary shares held by or on behalf of HM Treasury, would exceed 75 per cent of the total votes eligible to be cast on a resolution proposed at a general meeting of the company.

For as long as it is a substantial shareholder of the company (within the meaning of the UKLA's Listing Rules), HM Treasury has undertaken not to vote on related party transaction resolutions at general meetings and to direct that its affiliates do not so vote.

State Aid Commitment Deed

As a result of the State Aid granted to the company, it was required to work with HM Treasury to submit a State Aid restructuring plan to the European Commission, which was then approved under the State Aid rules. The company agreed a series of measures which supplemented the measures in the company's strategic plan.

The Group entered into a State Aid Commitment Deed with HM Treasury which provides that the Group will comply or procure compliance with these measures and behavioural commitments. The Group agreed to do all acts and take all measures to ensure HM Treasury's compliance with its obligations under any European Commission decision approving State Aid to the Group.

The State Aid Commitment Deed also provides that if the European Commission adopts a decision that the UK Government must recover any State Aid (a "Repayment Decision") and the recovery order of the Repayment Decision has not been annulled or suspended by the Court of First Instance (now the General Court) or the European Court of Justice, then the Group must repay HM Treasury any aid ordered to be recovered under the Repayment Decision.

The State Aid Commitment Deed also provides for the Group's undertakings in respect of State Aid to be modified in certain limited circumstances. However, HM Treasury has undertaken that it will not, without the consent of the Group, agree modifications to the Group's undertakings with respect to State Aid which are significantly more onerous to the Group than those granted in order to obtain the State Aid approval.

The Group is currently in discussions with HM Treasury and the European Commission in relation to certain amendments to the terms of the State Aid approval and therefore expects to enter into a new version of the State Aid Commitment Deed in the near future

State Aid Costs Reimbursement Deed

Under the State Aid Costs Reimbursement Deed, the Group has agreed to reimburse HM Treasury for fees, costs and expenses associated with the State Aid and State Aid approval.

Sale of RBS England & Wales and NatWest Scotland branch based business

On 27 September 2013, the Group agreed a £600 million pre-IPO investment with a consortium of investors led by Corsair Capital and Centerbridge Partners, in relation to its RBS England and Wales and NatWest Scotland branch based business which centres around 314 branches in the UK. Following completion of the operational and legal separation of the business into a standalone bank to be branded Williams & Glyn, an exercise that is already well underway, the Group will pursue an Initial Public Offering (IPO). The pre-IPO investment took the form of a £600 million bond, which was issued by the Royal Bank on 21 October 2013, which will be exchangeable for a significant minority interest in Williams & Glyn at the time of IPO. The bond will convert into Williams & Glyn shares at the IPO price, subject to a minimum ownership level which will be linked to the tangible book value of Williams & Glyn prior to the IPO, and in any case no more than a stake of 49%. To the extent the maximum ownership level is reached, the bond will be partially redeemed in cash such that the investors will receive a total value of £600 million of cash and shares at the IPO price. At the IPO, subject to RBSG's consent, the investors will have the option to acquire up to 10% additionally at the IPO price, subject to their pro forma ownership being no more than 49% in aggregate. The Royal Bank Markets division provided a £270 million secured financing package to the investor-consortium in relation to the investment.

Additional information

Risk factors

Set out below are certain risk factors which could adversely affect the Group's future results, its financial condition and prospects and cause them to be materially different from what is expected. The factors discussed below and elsewhere in this report should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties facing the Group.

The Group's ability to implement its new strategic plan and achieve its capital goals depends on the success of the Group's plans to refocus on its core strengths and the timely divestment of RBS Citizens

Since the beginning of the global economic and financial crisis in 2008 and as a result of the changed global economic outlook, the Group has been engaged in a financial and core business restructuring which has been focused on achieving appropriate risk-adjusted returns under these changed circumstances, reducing reliance on wholesale funding and lowering exposure to capital-intensive businesses. A key part of the restructuring programme announced in February 2009 was to run down and sell the Group's non-core assets and businesses with a continued review of the Group's portfolio to identify further disposals of certain non-core assets and businesses. Assets identified for this purpose and allocated to the Group's Non-Core division totalled £258 billion, excluding derivatives, at 31 December 2008. By 31 December 2013, this total had reduced to £28.0 billion (31 December 2012 - £57.4 billion), excluding derivatives, as further progress was made in business disposals and portfolio sales during the course of 2013. This balance sheet reduction programme has been implemented alongside the disposals under the State Aid restructuring plan approved by the EC. During 2012 the Group implemented changes to its wholesale banking operations, including the reorganisation of its wholesale businesses and the exit and downsizing of selected existing activities (including cash equities, corporate banking, equity capital markets, and mergers and acquisitions).

During Q3 2013, the Group worked with HM Treasury as part of its assessment of the merits of creating an external "bad bank" to hold certain assets of the Group. Although the review concluded that the establishment of an external "bad bank" was not in the best interests of all stakeholders, the Group committed to take a series of actions to further de-risk its business and strengthen its capital position.

These actions include:

- The formation of the Capital Resolution Group (CRG), which is made up of four pillars: exiting the assets in RBS Capital Resolution (RCR), delivering the initial public offerings (IPO) for both RBS Citizens and Williams & Glyn and optimising the Group's shipping business;
- The creation of RCR to manage the run-down of problem assets, which totalled £29 billion at the end of 2013, with the goal of removing 55-70% of these assets over the next two years with a clear aspiration to remove all these assets from the balance sheet in three years; and
- Lifting the Group's capital targets including:
 - accelerating the divestment of RBS Citizens, the Group's US banking subsidiary, with a partial IPO now planned for 2014, and full divestment of the business intended by the end of 2016; and
 - intensifying management actions to reduce risk weighted assets.

Since the end of Q3 2013, the Group has been conducting a review of its activities which has resulted in additional changes to the Group's strategic goals. It is now intended to further simplify and downsize the Group with an increased focus on service to its customers. As part of simplifying the Group, the current divisional structure will be replaced by three new customer segments, covering Personal & Business, Commercial & Private Banking and Corporate & Institutional Banking. As part of this reorganisation of the business, the intention will be to remain in businesses where the Group can be number one for its customers. For those businesses where that is not the case, the Group will either fix, close or dispose of such businesses. This reorganisation, together with investment in technology and more efficient support functions are intended to deliver significant improvements in the Group's Return on Equity and costs: income ratio in the longer term.

Implementation of the Group's new strategic plan will require significant restructuring of the Group at the same time that it will also be implementing structural changes to comply with the Financial Services (Banking Reform) Act 2013 (the "Banking Reform Act" 2013) and its ring-fencing requirements. The level of structural change intended to be implemented within the Group over the medium term taken together with the overall scale of change to make the Group a smaller, more focused financial institution, are likely to be disruptive and increase operational risks for the Group. There can be no assurance that the Group will be able to successfully implement this new strategy together with other changes required of the Group in the time frames contemplated or at all.

The Group's ability to dispose of businesses, including RBS Citizens and the EC mandated branch divestment now known as Williams & Glyn, and assets and the price achieved for such disposals will be dependent on prevailing economic and market conditions, which remain volatile. As a result there is no assurance that the Group will be able to sell or run down (as applicable) the businesses it has planned to sell or exit or asset portfolios it is seeking to sell either on favourable economic terms to the Group or at all. Material tax or other contingent liabilities could arise on the disposal or run-down of assets or businesses and there is no assurance that any conditions precedent agreed will be satisfied, or consents and approvals required will be obtained in a timely manner, or at all. There is consequently a risk that the Group may fail to complete such disposals within time frames envisaged by the Group, its regulators and the EC.

The Group may be exposed to deteriorations in businesses or portfolios being sold between the announcement of the disposal and its completion, which period may be lengthy and may span many months. In addition, the Group may be exposed to certain risks, including risks arising out of ongoing liabilities and obligations, breaches of covenants, representations and warranties, indemnity claims, transitional services arrangements and redundancy or other transaction related costs.

The occurrence of any of the risks described above could negatively affect the Group's ability to implement its new strategic plan and achieve its capital targets and could have a material adverse effect on the Group's business, results of operations, financial condition and cash flows. There can also be no assurance that if the Group is able to execute its strategic plan that the new strategy will ultimately be successful or beneficial to the Group.

Additional information

Risk factors continued

The Group is subject to political risks

The Group and The Royal Bank of Scotland plc (“RBS” or the “Royal Bank”), its principal operating subsidiary, are both headquartered and incorporated in Scotland. The Scottish Government is holding a referendum in September 2014 on the question of Scottish independence from the UK. Although the outcome of such referendum is uncertain, subject to any mitigating factors, the uncertainties resulting from an affirmative vote in favour of independence would be likely to significantly impact the Group’s credit ratings and could also impact the fiscal, monetary, legal and regulatory landscape to which the Group is subject. Were Scotland to become independent, it may also affect Scotland’s status in the EU. The occurrence of any of the impacts above could significantly impact the Group’s costs and would have a material adverse effect on the Group’s business, financial condition, results of operations and prospects.

The Group is subject to a number of legal, regulatory and governmental actions and investigations. Unfavourable outcomes in such actions and investigations could have a material adverse effect on the Group’s operating results or reputation

The Group’s operations are diverse and complex, and it operates in legal and regulatory environments that expose it to potentially significant litigation, regulatory and governmental investigations and other regulatory risk. As a result, the Group has recently settled a number of legal and regulatory investigations and is, and may in the future be, involved in a number of legal and regulatory proceedings and investigations in the UK, the EU, the US and other jurisdictions.

The Group is involved in ongoing class action litigation, investigations into foreign exchange trading and rate setting activities, continuing LIBOR related litigation and investigations, securitisation and securities related litigation, and anti-money laundering, sanctions, mis-selling and compliance related investigations, in addition to a number of other matters. In respect of the LIBOR and other trading rate-related investigations, the Group reached settlements on 6 February 2013 with the Financial Services Authority, the Commodity Futures Trading Association and the United States Department of Justice and on 4 December 2013 with the EC. In addition, the Group and the Royal Bank reached a settlement with the Board of Governors of the Federal Reserve System, the New York State Department of Financial Services and the Office of Foreign Assets Control with respect to the Royal Bank’s historical compliance with US economic sanction regulations outside the United States. The Group continues to cooperate with these and other governmental and regulatory authorities in connection with ongoing investigations and the probable outcome is that it will incur additional financial penalties which may be material.

Legal, governmental and regulatory proceedings and investigations are subject to many uncertainties, and their outcomes, including the timing and amount of fines or settlements, which may be material, are often difficult to predict, particularly in the early stages of a case or investigation. Adverse regulatory proceedings or adverse judgments in litigation could result in restrictions or limitations on the Group’s operations or have a significant effect on the Group’s reputation, results of operations and capital position. It is expected that the Group will continue to have a material exposure to legacy litigation and regulatory matter proceedings in the medium term. For more detail on certain of the Group’s ongoing legal, governmental and regulatory proceedings, see pages 474 to 482.

The Group may be required to increase provisions in relation to ongoing legal proceedings, investigations and governmental and regulatory matters. In Q4 2013, the Group booked a £1.9 billion provision to cover various claims and conduct related matters affecting Group companies, primarily those related to mortgage-backed securities and securities related litigation, following recent third party litigation settlements and regulatory decisions. It also increased its provision for Payment Protection Insurance redress and related costs by an additional £465 million for a cumulative provision of £3.1 billion. The provision for Interest Rate Hedging Products redress and administration costs was also increased to be a cumulative provision of £1.25 billion at 31 December 2013. Significant increases in provisions may harm the Group’s reputation and may have an adverse effect on the Group’s financial condition and results of operations.

The Group, like many other financial institutions, has come under greater regulatory scrutiny in recent years and expects that environment to continue for the foreseeable future, particularly as it relates to compliance with historical, new and existing corporate governance, employee compensation, conduct of business, anti-money laundering and anti-terrorism laws and regulations, as well as the provisions of applicable sanctions programmes. Past or current failure to comply with any one or more of these laws or regulations could have a significant adverse effect on the Group’s reputation, financial condition and results of operations.

The Group could fail to attract or retain senior management, which may include members of the Board, or other key employees, and it may suffer if it does not maintain good employee relations

The Group’s ability to implement its strategy and its future success depends on its ability to attract, retain and remunerate highly skilled and qualified personnel, including its senior management, which include directors and other key employees, competitively with its peers. This cannot be guaranteed, particularly in light of heightened regulatory oversight of banks and heightened scrutiny of, and (in some cases) restrictions placed upon, management and employee compensation arrangements, in particular those in receipt of Government support (such as the Group).

In addition to the effects of such measures on the Group’s ability to retain senior management and other key employees, the marketplace for skilled personnel is more competitive, which means the cost of hiring, training and retaining skilled personnel may continue to increase. The failure to attract or retain a sufficient number of appropriately skilled personnel could place the Group at a significant competitive disadvantage and prevent the Group from successfully implementing its strategy, which could have a material adverse effect on the Group’s financial condition and results of operations.

During 2013 the Group replaced its Group Chief Executive, Group Finance Director and Chief Risk Officer and its newly appointed Group Finance Director (October 2013) resigned and a search for a new Group Finance Director is continuing. The Group’s changing strategy, particularly with respect to its Markets business and recently announced disposition of RBS Citizens, has led to the exodus of talented staff. The lack of continuity of senior management and the loss of important personnel within the Group could have an adverse impact on the implementation of the Group’s strategic objectives and regulatory commitments.

Additional information

In addition, certain of the Group's employees in the UK, continental Europe and other jurisdictions in which the Group operates are represented by employee representative bodies, including trade unions. Engagement with its employees and such bodies is important to the Group and a breakdown of these relationships could adversely affect the Group's business, reputation and results.

Operational risks are inherent in the Group's businesses

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. The Group has complex and geographically diverse operations and operational risk and losses can result from internal and external fraud, errors by employees or third parties, failure to document transactions properly or to obtain proper authorisation, failure to comply with applicable regulatory requirements and conduct of business rules (including those arising out of anti-bribery, anti-money laundering and anti-terrorism legislation, as well as the provisions of applicable sanctions programmes), equipment failures, business continuity and data security system failures, natural disasters or the inadequacy or failure of systems and controls, including those of the Group's suppliers or counterparties. Although the Group has implemented risk controls and loss mitigation actions, and substantial resources are devoted to developing efficient procedures, to identify and rectify weaknesses in existing procedures and to train staff, it is not possible to be certain that such actions have been or will be effective in controlling each of the operational risks faced by the Group. Ineffective management of operational risks could have a material adverse effect on the Group's business, financial condition and results of operations.

The Group operates in markets that are highly competitive and its business and results of operations may be adversely affected

The competitive landscape for banks and other financial institutions in the UK, the US and throughout the rest of Europe is subject to rapid change and recent regulatory and legal changes are likely to result in new market participants and changed competitive dynamics in certain key areas, such as in retail banking in the UK. The competitive landscape in the UK will be particularly influenced by the UK government's implementation of the recommendations on competition included in the final report of the Independent Commission on Banking (ICB), including ring-fencing and other customer protection measures addressed in the Banking Reform Act 2013 which became law in the United Kingdom on 18 December 2013 and will be implemented through secondary legislation due to be completed by May 2015. In order to compete effectively, certain financial institutions may seek to consolidate their businesses or assets with other parties. This consolidation, in combination with the introduction of new entrants into the markets in which the Group operates is likely to increase competitive pressures on the Group.

In addition, certain competitors may have stronger and more efficient operations, including better IT systems allowing them to implement innovative technologies for delivering services to their customers, and may have access to lower cost funding and/or be able to attract deposits on more favourable terms than the Group. Furthermore, the Group's competitors may be better able to attract and retain clients and key employees, which may have a negative impact on the Group's relative performance and future prospects. In addition, recent and future disposals and restructurings by the Group and the compensation structure and restrictions imposed on the Group may also have an impact on its ability to compete effectively.

These and other changes to the competitive landscape could adversely affect the Group's business, margins, profitability, financial condition and prospects.

The Group's businesses and performance can be negatively affected by actual or perceived global economic and financial market conditions

The Group's businesses and performance are affected by local and global economic conditions, perceptions of those conditions and future economic prospects. The outlook for the global economy over the near to medium-term is for steady growth. Prospects for the UK and the US in 2014 are the strongest among the G7. The outlook for Ireland is improving but remains challenging. Risks to growth and stability stem mainly from continued imbalances – among and within countries – and from uncertainty about how economies will respond as the extraordinary monetary policy measures implemented during the crisis are unwound. The Group's businesses and performance are also affected by financial market conditions. Capital and credit markets around the world have been relatively stable since 2012. Although the risk of sovereign default relating to certain EU member states diminished during 2013, a number of EU countries including the UK had their credit ratings downgraded, and the lingering risk of a sovereign default continues to pose a threat to capital and credit markets. In addition, in response to actions of central banks, in particular the US Federal Reserve's actions with respect to tapering of its debt purchase program, there have been short periods of rapid movements in interest rates and significant sharp falls on equity markets and further market volatility is likely as tapering continues.

Challenging economic and market conditions create a difficult operating environment for the Group's businesses, which is characterised by:

- reduced activity levels, additional write-downs and impairment charges and lower profitability, especially in combination with regulatory changes or action of market participants, which either alone or collectively may restrict the ability of the Group to access funding and liquidity;
- central bank actions to engender economic growth which have resulted in a prolonged period of low interest rates constraining, through margin compression and low returns on assets, the interest income earned on the Group's interest earning assets; and
- the risk of increased volatility in yields and asset valuations as central banks start/accelerate the process of tightening or unwinding historically unprecedented loose monetary policy or extraordinary measures. The resulting environment of uncertainty for the market and consumers will lead to challenging trading and market conditions.

In particular, should economic recovery stagnate, particularly in the Group's key markets, or the scope and severity of the adverse economic conditions currently experienced by a number of EU member states and elsewhere worsen, the risks faced by the Group would be exacerbated. Developments relating to the current economic conditions and the risk of a return to a volatile financial environment, including those discussed above, could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Additional information

Risk factors continued

The Group has significant exposure to a weakening of the nascent economic recovery in Europe

In Europe, countries such as Ireland, Italy, Greece, Portugal and Spain have been particularly affected by the recent macroeconomic and financial conditions. Although the risk of sovereign default continued to decline in 2013 due to the continuing actions of the European Central Bank (ECB) and the EU, the risk of default remains and yields on the sovereign debt of many EU member states have remained well above pre-crisis levels. This default risk raises concerns, and the possibility remains that the contagion effect spreads to other EU economies, including the UK economy, that the euro could be abandoned as a currency by one or more countries that have already adopted its use, or in an extreme scenario, that the abandonment of the euro could result in the dissolution of the European Monetary Union (EMU). This would lead to the re-introduction of individual currencies in one or more EMU member states.

The effects on the UK, European and global economies of any potential dissolution of the EMU, exit of one or more EU member states from the EMU and the redenomination of financial instruments from the euro to a different currency, are impossible to predict fully. However, if any such events were to occur they would likely:

- result in significant market dislocation;
- heighten counterparty risk;
- result in downgrades of credit ratings for European borrowers, giving rise to increases in credit spreads and decreases in security values;
- disrupt and adversely affect the economic activity of the UK and other European markets; and
- adversely affect the management of market risk and in particular asset and liability management due, in part, to redenomination of financial assets and liabilities and the potential for mismatch.

The occurrence of any of these events would have a material adverse effect on the Group's financial condition, results of operations and prospects.

The Group has significant exposure to private sector and public sector customers and counterparties in the eurozone (at 31 December 2013 principally Ireland (£39.8 billion), Germany (£31.1 billion), The Netherlands (£25.9 billion), France (£23.8 billion), Spain (£11.2 billion) and Italy (£7.1 billion)). The Group's private and public sector exposures in the eurozone have been, and may in the future be, affected by credit losses and restructuring of their terms, principal, interest and maturity. In 2011, this included an impairment loss of £1.1 billion in respect of its holding of Greek government bonds. The public sector exposure comprises exposure to central and local governments and deposits with central banks. At 31 December 2013, the Group's eurozone government debt exposure amounted to £15.9 billion (largely AFS and HFT debt securities exposure) including aggregate exposure of £2.8 billion to Ireland, Spain, Italy, Portugal, Greece and Cyprus (largely net HFT debt securities exposure to Italy and Spain).

The Group and its UK bank subsidiaries are subject to the provisions of the Banking Act 2009, as amended by the Banking Reform Act 2013, which includes special resolution powers including nationalisation and bail-in

Under the Banking Act 2009, substantial powers have been granted to HM Treasury, the Bank of England and the Prudential Regulation Authority (PRA) and Financial Conduct Authority (FCA) (together, the "Authorities") as part of a special resolution regime. These powers enable the Authorities to deal with and stabilise certain deposit-taking UK incorporated institutions that are failing, or are likely to fail, to satisfy the threshold conditions (within the meaning of section 41 of the Financial Services and Markets Act 2000 (FSMA), which are the conditions that a relevant entity must satisfy in order to obtain its authorisation to perform regulated activities). The special resolution regime consists of three stabilisation options: (i) transfer of all or part of the business of the relevant entity and/or the securities of the relevant entity to a private sector purchaser, (ii) transfer of all or part of the business of the relevant entity to a 'bridge bank' wholly owned by the Bank of England and (iii) temporary public ownership (nationalisation) of the relevant entity. If HM Treasury decides to take the Group into temporary public ownership pursuant to the powers granted under the Banking Act 2009, it may take various actions in relation to any securities without the consent of holders of the securities.

Among the changes introduced by the Banking Reform Act 2013, the Banking Act 2009 is amended to insert a bail-in option as part of the powers of the UK resolution authority which option will come into force on such date as shall be stipulated by HM Treasury. The bail-in option will be introduced as an additional power available to the Bank of England to enable it to recapitalise a failed institution by allocating losses to its shareholders and unsecured creditors in a manner that seeks to respect the hierarchy of claims in liquidation. The bail-in option includes the power to cancel a liability, to modify the form of a liability (including the power to convert a liability from one form to another) or to provide that a contract under which the institution has a liability is to have effect as if a specified right had been exercised under it, each for the purposes of reducing, deferring or cancelling the liabilities of the bank under resolution, as well as to transfer a liability. The Banking Reform Act 2013 is consistent with the range of tools that Member States will be required to make available to their resolution authorities under the Recovery and Resolution Directive (RRD), although since the RRD remains in draft form, there can be no assurance that the bail-in option added under the Banking Reform Act will not need to change to comply with the RRD.

The Group is subject to a variety of risks as a result of implementing the State Aid restructuring plan

The Group was required to obtain State Aid approval for the aid given to the Group by HM Treasury as part of the placing and open offer undertaken by the Group in December 2008, the issuance to HM Treasury of £25.5 billion of B shares in the capital of the Group which are, subject to certain terms and conditions, convertible into ordinary shares in the share capital of the Group and a contingent commitment by HM Treasury (which has now been terminated) to subscribe for up to an additional £8 billion of B Shares if certain conditions are met in addition to the Group's participation in the Asset Protection Scheme (APS) (which has now been terminated). In that context, as part of the terms of the State Aid approval, the Group, together with HM Treasury, agreed the terms of a restructuring plan.

Additional information

The Group is subject to a variety of risks as a result of implementing the State Aid restructuring plan, including required asset disposals. In particular, the Group agreed to undertake a series of measures including the disposal of a number of businesses now completed, the disposal of Direct Line Group (DLG) and the disposal of the Royal Bank branch-based business in England and Wales and the National Westminster Bank Plc (NatWest) branches in Scotland, along with the direct and other small and medium-size enterprise (SME) customers and certain mid-corporate customers across the UK. The initial sale of 34.7% of DLG through an IPO was completed in October 2012, with further sales in March and September 2013 reducing the Group's stake to 28.5% at year-end, marking the continuation of the Group's disposal strategy as part of its on-going delivery against EU-mandated commitments. In respect of the Royal Bank and NatWest branch-based business, the divestment process continues to progress following the withdrawal of its original buyer in October 2012 and a pre-IPO investment by a consortium of investors was announced in September 2013. The Group is currently in discussions with HM Treasury and the EC in relation to certain matters, including the potential retirement of the Dividend Access Share.

There is no assurance that the price that the Group receives or has received for any assets sold pursuant to the State Aid restructuring plan will be or has been at a level the Group considers adequate or which it could obtain in circumstances in which the Group was not required to sell such assets in order to implement the State Aid restructuring plan or if such sale were not subject to the restrictions contained in the terms thereof. Further, if the Group fails to complete any of the required disposals within the agreed timeframes for such disposals, or fails to negotiate extensions in respect of such disposals, under the terms of the State Aid approval, a divestiture trustee may be empowered to conduct the disposals, with the mandate to complete the disposal at no minimum price.

Furthermore, if the Group is unable to comply with the terms of the State Aid approval, it could constitute a misuse of aid. In circumstances where the EC doubts that the Group is complying with the terms of the State Aid approval, it may open a formal investigation. At the conclusion of any such investigation, if the EC decided that there had been misuse of aid, it could issue a decision requiring HM Treasury to recover the misused aid, which could have a material adverse impact on the Group.

In implementing the State Aid restructuring plan, the Group has lost, and will continue to lose, existing customers, deposits and other assets (both directly through sale and potentially through the impact on the rest of the Group's business arising from implementing the State Aid restructuring plan) and the potential for realising additional associated revenues and margins that it otherwise might have achieved in the absence of such disposals.

The disposal of Global Merchant Services and RBS Sempra Commodities reduced the Group's assets by approximately £13.0 billion and £2.4 billion, respectively (based on total assets immediately prior to disposal). The quantum of assets and deposits that would be included in a divestment of the Royal Bank branch-based business in England and Wales and the NatWest branches in Scotland is not certain. However, at 31 December 2013, this business included approximately £19.4 billion of assets, £23.2 billion of deposits and two million customers.

The implementation of the State Aid restructuring plan may also result in disruption to the retained business and give rise to significant strain on management, employee, operational and financial resources, impacting customers and employees and giving rise to separation costs which could be substantial.

The implementation of the State Aid restructuring plan may result in the emergence of one or more new viable competitors or a material strengthening of one or more of the Group's existing competitors in the Group's markets. The effect of this on the Group's future competitive position, revenues and margins is uncertain and there could be an adverse effect on the Group's operations and financial condition and its business generally.

The occurrence of any of the risks described above could have a material adverse effect on the Group's business, results of operations, financial condition, capital position and competitive position.

HM Treasury (or UK Financial Investments Limited (UKFI) on its behalf) may be able to exercise a significant degree of influence over the Group and any proposed offer or sale of its interests may affect the price of securities issued by the Group

The UK Government, through HM Treasury, currently holds 63.9% of the issued ordinary share capital of the Group. On 22 December 2009, the Group issued £25.5 billion of B Shares to the UK Government. The B Shares are convertible, at the option of the holder at any time, into ordinary shares. The UK Government has agreed that it shall not exercise the rights of conversion in respect of the B Shares if and to the extent that following any such conversion it would hold more than 75% of the total issued shares in the Group. Any breach of this agreement could result in the delisting of the Group from the Official List of the UK Listing Authority and potentially other exchanges where its securities are currently listed and traded. HM Treasury (or the UKFI on its behalf) may sell all or a part of the ordinary shares that it owns at any time. Any offers or sale of a substantial number of ordinary shares or securities convertible or exchangeable into ordinary shares by or on behalf of HM Treasury, or an expectation that it may undertake such an offer or sale, could negatively affect prevailing market prices for securities issued by the Group.

In addition, UKFI manages HM Treasury's shareholder relationship with the Group and, although HM Treasury has indicated that it intends to respect the commercial decisions of the Group and that the Group will continue to have its own independent board of directors and management team determining its own strategy, should its current intentions change, HM Treasury's position as a majority shareholder (and UKFI's position as manager of this shareholding) means that HM Treasury or UKFI may be able to exercise a significant degree of influence over, among other things, the election of directors and appointment of senior management, dividend policy, remuneration policy, or limiting the Group's operations. The manner in which HM Treasury or UKFI exercises HM Treasury's rights as majority shareholder could give rise to conflict between the interests of HM Treasury and the interests of other shareholders. The Board has a duty to promote the success of the Group for the benefit of its members as a whole.

Additional information

Risk factors continued

The Group is subject to other global risks

By virtue of the Group's global presence, the Group is exposed to risks arising out of geopolitical events, such as the existence of trade barriers, the implementation of exchange controls and other measures taken by sovereign governments that can hinder economic or financial activity levels. Furthermore, unfavourable political, military or diplomatic events, armed conflict, pandemics and terrorist acts and threats, and the response to them by governments could also adversely affect levels of economic activity and have an adverse effect upon the Group's business, financial condition and results of operations.

The Group's business performance could be adversely affected if its capital is not managed effectively or as a result of changes to capital adequacy and liquidity requirements

Effective management of the Group's capital is critical to its ability to operate its businesses, and to pursue its strategy of returning to standalone strength. The Group is required by regulators in the UK, the US and other jurisdictions in which it undertakes regulated activities to maintain adequate capital resources. The maintenance of adequate capital is also necessary for the Group's financial flexibility in the face of continuing turbulence and uncertainty in the global economy and specifically in its core UK, US and European markets.

The Basel Committee on Banking Supervision's package of reforms to the regulatory capital framework raises the quantity and quality of capital required to be held by a financial institution with an emphasis on Common Equity Tier 1 (CET1) capital and introduces an additional requirement for both a capital conservation buffer and a countercyclical buffer to be met with CET1 capital. The Basel Committee also has proposed that global systemically important banks (GSIBs) be subject to an additional CET1 capital requirement, depending on a bank's systemic importance. The Group has been identified by the Financial Stability Board (FSB) as a GSIB. The FSB list of GSIBs is updated annually, based on new data and changes to methodology. The November 2013 update placed the Group in the second from bottom bucket of GSIBs, subjecting it to more intensive oversight and supervision and requiring to have additional loss absorption capacity of 1.5% in CET1, to be phased in from the beginning of 2016.

The Basel III rules are dependent on local implementation. The EU legislative package of proposals to implement the changes with a new Directive and Regulation (collectively known as "CRD IV") was finalised in June 2013 paving the way for implementation of Basel III in the EU from 1 January 2014, subject to a number of transitional provisions and clarifications. A number of the requirements introduced under CRD IV will be further supplemented through the Regulatory and Implementing Technical Standards (RTSs/ITSs) produced by the European Banking Authority (EBA) which are not yet finalised. The EU rules deviate from the Basel III rules in certain aspects (e.g. in imposing an additional systemic risk buffer), and provide national flexibility to apply more stringent prudential requirements than set in the EU (or Basel) framework.

Since 1 January 2014, the Group has been required to comply with the requirements of CRD IV, the EBA's RTSs and ITSs and the PRA's Policy Statement PS 7/13 (Strengthening capital standards: implementing CRD IV, feedback and final rules). The Group must also operate by reference to the capital and leverage requirements set out by the PRA in its supervisory statement SS3/13 issued in November 2013 which is applicable to the eight major UK banks and building societies.

The provisions of PS7/13 embody PRA requirements to accelerate the introduction and phasing in of certain transitional provisions of CRD IV. The policy statement also sets out the intent of the PRA in respect of capital buffers as well as the approach to so-called Pillar 2 risks. By their nature, Pillar 2A risks, which contribute to the scaling of the Group's Individual Capital Guidance from the PRA, can include risks which the Group considers would only materialise at the point of non-viability, an example being pension obligation risk. PS7/13 does not recognise this distinction and requires that Pillar 2A risks are met by at least 56% of CET1 by 1 January 2015.

The Banking Reform Act 2013, implementing the ICB recommendations, will introduce mechanisms requiring systemically important UK banks and building societies to hold loss-absorbing capacity, in addition to the capital held to satisfy their capital requirements under CRD IV as implemented by the PRA. These requirements, as well as other recommendations of the ICB, are to be established through secondary legislation and are expected to be phased in between 2015 and 2019. The US Federal Reserve has also recently adopted new rules relating to how it will regulate the US operations of foreign banking operations such as the Group that may affect the capital requirements of the Group's operations in the US. As the implementation of the ICB recommendations is the subject of secondary legislation not yet adopted and the Federal Reserve has only recently adopted its final rules, the Group cannot predict the impact such rules will have on the Group's overall capital requirements or how they will affect the Group's compliance with applicable capital and loss absorbency requirements.

To the extent the Group has estimated the indicative impact that CRD IV rules may have on its risk-weighted assets and capital ratios, such estimates are preliminary and subject to uncertainties and may change. In particular, the estimates assume mitigating actions will be taken by the Group (such as deleveraging of legacy positions and securitisations, including RCR as well as other actions being taken to de-risk market and counterparty exposures), which may not occur as anticipated, in a timely manner, or at all.

The Basel Committee changes and other future changes to capital adequacy and liquidity requirements in the European Union, the UK, the US and in other jurisdictions in which the Group operates, including any application of increasingly stringent stress case scenarios by the regulators in the UK, the US and other jurisdictions in which the Group undertakes regulated activities, may require the Group to raise additional Tier 1 (including CET1) and Tier 2 capital by way of further issuances of securities, and may result in existing Tier 1 and Tier 2 securities issued by the Group ceasing to count towards the Group's regulatory capital, either at the same level as at present or at all.

Additional information

The requirement to raise additional CET1 capital, which could be mandated by the Group's regulators, could have a number of negative consequences for the Group and its shareholders, including impairing the Group's ability to pay dividends on, or make other distributions in respect of, ordinary shares and diluting the ownership of existing shareholders of the Group. If the Group is unable to raise the requisite Tier 1 and Tier 2 capital, it may be required to reduce further the amount of its risk-weighted assets or total assets and engage in the disposal of core and other non-core businesses, which may not occur on a timely basis or achieve prices which would otherwise be attractive to the Group.

At 31 December 2013, the Group's Tier 1 and Core Tier 1 capital ratios were 13.1% and 10.9%, respectively, calculated in accordance with PRA requirements. On a fully loaded Basel III basis, the Group's equivalent CET1 ratio was 8.6%. The Group continues to target a fully loaded Basel III CET1 ratio of approximately 11% by the end of 2015 and to be at 12% or above by the end of 2016. The Group's ability to achieve such targets will turn on a number of factors, including the implementation of the Group's strategy which calls for a significant downsizing of the Group in part through the sale of RBS Citizens in the U.S. See "Forward looking Statements" and "The Group's ability to implement its new strategic plan and achieve its capital goals depends on the success of the Group's plans to refocus on its core strengths and the timely divestment of RBS Citizens".

Any change that limits the Group's ability to manage effectively its balance sheet and capital resources going forward (including, for example, reductions in profits and retained earnings as a result of write-downs or otherwise, increases in risk-weighted assets, regulatory changes, actions by regulators, delays in the disposal of certain key assets or the inability to syndicate loans as a result of market conditions, a growth in unfunded pension exposures or otherwise), to implement its capital plan or to access funding sources, could have a material adverse effect on its financial condition and regulatory capital position.

[The Group's borrowing costs, its access to the debt capital markets and its liquidity depend significantly on its and the UK Government's credit ratings](#)

The credit ratings of RBSG, RBS and other Group members have been subject to change and may change in the future, which could impact their cost of, access to and sources of financing and liquidity. A number of UK and other European financial institutions, including RBSG, the Royal Bank and other Group members, have been downgraded multiple times during the last three years in connection with rating methodology changes, a review of systemic support assumptions incorporated into bank ratings and the likelihood, in the case of UK banks, that the UK Government is more likely in the future to make greater use of its resolution tools to allow burden sharing with debt holders. Most recently credit ratings of RBSG, the Royal Bank and other Group members were downgraded in connection with the Group's creation of RCR, coupled with concerns about execution risk, litigation risk and the potential for conduct related fines. Furthermore, subject to any mitigating factors, uncertainties resulting from an affirmative vote in favour of Scottish independence would be likely to have a negative impact on the credit ratings of RBSG and the Royal Bank.

Rating agencies continue to evaluate the rating methodologies applicable to UK and European financial institutions and any change in such rating agencies' methodologies could materially adversely affect the credit ratings of Group companies. Any further reductions in the long-term or short-term credit ratings of RBSG or one of its principal subsidiaries (particularly the Royal Bank) would increase its borrowing costs, require the Group to replace funding lost due to the downgrade, which may include the loss of customer deposits, and may also limit the Group's access to capital and money markets and trigger additional collateral requirements in derivatives contracts and other secured funding arrangements. At 31 December 2013, a simultaneous one notch long-term and associated short-term downgrade in the credit ratings of RBSG and the Royal Bank by the three main ratings agencies would have required the Group to post estimated additional collateral of £10 billion, without taking account of mitigating action by management.

Any downgrade in the UK Government's credit ratings could adversely affect the credit ratings of Group companies and may have the effects noted above. In December 2012, Standard & Poor's placed the UK's AAA credit rating on credit watch, with negative outlook and, in February 2013, Moody's downgraded the UK's credit rating one notch to Aa1. Credit ratings of RBSG, the Royal Bank, The Royal Bank of Scotland N.V. (RBS N.V.), Ulster Bank Limited and RBS Citizens are also important to the Group when competing in certain markets, such as over-the-counter derivatives. As a result, any further reductions in RBSG's long-term or short-term credit ratings or those of its principal subsidiaries could adversely affect the Group's access to liquidity and its competitive position, increase its funding costs and have a material adverse impact on the Group's earnings, cash flow and financial condition.

[The Group's ability to meet its obligations including its funding commitments depends on the Group's ability to access sources of liquidity and funding](#)

Liquidity risk is the risk that a bank will be unable to meet its obligations, including funding commitments, as they fall due. This risk is inherent in banking operations and can be heightened by a number of factors, including an over reliance on a particular source of wholesale funding (including, for example, short-term and overnight funding), changes in credit ratings or market-wide phenomena such as market dislocation and major disasters. Credit markets worldwide, including interbank markets, have experienced severe reductions in liquidity and term-funding during prolonged periods in recent years. Although credit markets continued to improve during 2013 (in part as a result of measures taken by central banks around the world, including the ECB), and the Group's overall liquidity position remained strong, certain European banks, in particular from the peripheral countries of Spain, Portugal, Greece, Italy and Ireland, remained reliant on central banks as one of their principal sources of liquidity. Although the measures taken by Central Banks have had a positive impact, the risk of volatility returning to the global credit markets remains.

Additional information

Risk factors continued

The market perception of bank credit risk has changed significantly as a result of the financial crisis and banks that are deemed by the market to be riskier have had to issue debt at a premium. Any uncertainty regarding the perception of credit risk across financial institutions may lead to reductions in levels of interbank lending and associated term maturities and may restrict the Group's access to traditional sources of funding or increase the costs of accessing such funding. The ability of the Group's regulator to bail-in senior debt which may be exercised as soon as either the provisions of the Banking Reform Act 2013 are implemented through secondary legislation or the RRD comes into effect, may also increase investors' perception of risk and hence affect the availability and cost of funding for the Group.

The Group's liquidity and funding management focuses, among other things, on maintaining a diverse and appropriate funding strategy for its assets in line with the Group's wider strategic plan. The Group has, at times, been required to rely on shorter-term and overnight funding with a consequent reduction in overall liquidity, and to increase its recourse to liquidity schemes provided by central banks. Such schemes require the pledging of assets as collateral and changes to asset valuations or eligibility criteria can negatively impact the available assets and reduce available liquidity access particularly during periods of stress when such lines may be needed most. Although conditions have improved, there have been recent periods where corporate and financial institution counterparties have reduced their credit exposures to banks and other financial institutions, limiting the availability of these sources of funding. Under certain circumstances, the Group may need to seek funds from alternative sources potentially at higher costs than has previously been the case, and/or with higher collateral or may be required to consider disposals of other assets not previously identified for disposal to reduce its funding commitments.

The Group relies on customer deposits to meet a considerable portion of its funding and it has targeted maintaining a loan to deposit ratio of around 100%. The level of deposits may fluctuate due to certain factors outside the Group's control, such as a loss of confidence, increasing competitive pressures for retail customer deposits or the encouraged or mandated repatriation of deposits by foreign wholesale or central bank depositors, which could result in a significant outflow of deposits within a short period of time. An inability to grow, or any material decrease in, the Group's deposits could, particularly if accompanied by one of the other factors described above, have a material adverse impact on the Group's ability to satisfy its liquidity needs.

The occurrence of any of the risks described above could have a material adverse impact on the Group's financial condition and results of operations.

The regulatory capital treatment of certain deferred tax assets recognised by the Group depends on there being no adverse changes to regulatory requirements

While there was no restriction on the recognition of deferred tax assets at 31 December 2013, the Capital Requirements Regulation, which took effect from 1 January 2014, requires the deduction in full from CET1 capital of deferred tax assets that rely on future profitability and do not arise from temporary differences (for example, deferred tax assets related to trading losses). Other deferred tax assets which rely on future profitability and arise from temporary differences are subject to a threshold test and only the amount in excess of the threshold is deducted from CET1 capital. The PRA has not adopted the transitional provisions in relation to the change in the treatment of deferred tax assets and therefore the threshold deduction has the potential to impact CET1 capital from 1 January 2014.

Each of the Group's businesses is subject to substantial regulation and oversight. Significant regulatory developments and changes in the approach of the Group's key regulators has had and is likely to continue to have a material adverse effect on how the Group conducts its business and on its results of operations and financial condition

The Group is subject to extensive financial services laws, regulations, corporate governance requirements, administrative actions and policies in each jurisdiction in which it operates. Many of these have been changing and are subject to further change, particularly in the current regulatory and market environment, where there have been unprecedented levels of government intervention (including nationalisations and injections of government capital), changes to the regulations governing financial institutions and reviews of the industry, in the UK, in many other European countries, the US and at the EU level.

As a result of the environment in which the Group operates, increasing regulatory focus in certain areas and ongoing and possible future changes in the financial services regulatory landscape (including requirements imposed by virtue of the Group's participation in government or regulator-led initiatives), the Group is facing greater regulation and scrutiny in the UK, the US and other countries in which it operates (including in relation to compliance with anti-bribery, anti-money laundering, anti-terrorism and other similar sanctions regimes).

Although it is difficult to predict with certainty the effect that all of the recent regulatory changes, developments and heightened levels of public and regulatory scrutiny will have on the Group, the enactment of legislation and regulations in the UK and the EU, the other parts of Europe in which the Group operates and the US (such as the bank levy and Banking Reform Act 2013 in the UK, the RRD and CRD IV or the Dodd-Frank Wall Street Reform and Consumer Protection Act in the US) has resulted in increased capital and liquidity requirements, changes in other regulatory requirements and increased operating costs and has impacted, and will continue to impact, products offerings and business models. The Group may not be able to meet increased capital requirements by reducing lending which could result in the Group being obliged to continue to deploy capital in less profitable areas than it might otherwise have chosen. Such changes may also result in an increased number of regulatory investigations and proceedings. Any of these developments could have an impact on how the Group conducts its business, applicable authorisations and licences, the products and services it offers, its reputation, the value of its assets, and a material adverse effect on its funding costs and its results of operations and financial condition.

Additional information

Areas in which, and examples of where, governmental policies, regulatory and accounting changes and increased public and regulatory scrutiny could have an adverse impact (some of which could be material) on the Group include those set out above as well as the following:

- the monetary, fiscal, interest rate and other policies of central banks and other governmental or regulatory bodies;
- requirements to separate retail banking from investment banking;
- restrictions on proprietary trading and similar activities within a commercial bank and/or a group which contains a commercial bank;
- restructuring certain of the Group's non-retail banking activities in jurisdictions outside the UK in order to satisfy local capital, liquidity and other prudential requirements;
- the design and potential implementation of government mandated recovery, resolution or insolvency regimes;
- the imposition of government imposed requirements and/or related fines and sanctions with respect to lending to the UK SME market and larger commercial and corporate entities and residential mortgage lending;
- requirements to operate in a way that prioritises objectives other than shareholder value creation;
- changes to financial reporting standards (including accounting standards), corporate governance requirements, corporate structures and conduct of business rules;
- the imposition of restrictions on the Group's ability to compensate its senior management and other employees;
- regulations relating to, and enforcement of, anti-bribery, anti-money laundering, anti-terrorism or other similar sanctions regimes;
- rules relating to foreign ownership, expropriation, nationalisation and confiscation of assets;
- other requirements or policies affecting the Group's profitability, such as the imposition of onerous compliance obligations, further restrictions on business growth, product offering, capital, liquidity or pricing;
- the introduction of, and changes to, taxes, levies or fees applicable to the Group's operations (such as the imposition of a financial transaction tax and changes in tax rates that reduce the value of deferred tax assets); and
- the regulation or endorsement of credit ratings used in the EU (whether issued by agencies in EU member states or in other countries, such as the US).

Changes in laws, rules or regulations, or in their interpretation or enforcement, or the implementation of new laws, rules or regulations, including contradictory laws, rules or regulations by key regulators in different jurisdictions, may have a material adverse effect on the Group's business, financial condition and results of operations. In addition, uncertainty and lack of international regulatory coordination as enhanced supervisory standards are developed and implemented may adversely affect the Group's ability to engage in effective business, capital and risk management planning.

The Group is subject to a number of regulatory initiatives which may adversely affect its business. The Independent Commission on Banking's final report on competition and structural reforms in the UK banking industry has been substantially adopted by the UK Government through the passage of the Banking Reform Act 2013. In addition other proposals to ring fence certain business activities and the US Federal Reserve's proposal for applying US capital, liquidity and enhanced prudential standards to certain of the Group's US operations together with the UK reforms could require structural changes to the Group's business. Any of these changes could have a material adverse effect on the Group.

The UK Government published a White Paper on Banking Reform in September 2012, outlining proposed structural reforms in the UK banking industry. The measures proposed were drawn in large part from the recommendations of the ICB, which was appointed by the UK Government in June 2010. The ICB published its final report to the Cabinet Committee on Banking Reform on 12 September 2011, which set out the ICB's views on possible reforms to improve stability and competition in UK banking. The final report made a number of recommendations, including in relation to (i) promotion of competition, (ii) increased loss absorbency (including bail-in) and (iii) the implementation of a ring-fence of retail banking operations.

The measures in relation to the promotion of competition are already largely in process, including the development of an industry mechanism to make it easier for customers to switch their personal current accounts to a different provider, which was introduced in September 2013.

Bail-in mechanisms, will, if used, affect the rights of creditors, including holders of senior and subordinated bonds, and shareholders in the event of the implementation of a resolution scheme or an insolvency and could thereby materially affect the price of such securities. Such mechanics are being implemented through the Banking Reform Act 2013 and will also be part of the RRD. The implementation of a ring-fence of retail banking operations is also included in the Banking Reform Act 2013. The Banking Reform Act 2013 provides primary enabling legislation in the short term with a view to completing the legislative framework for the ring-fence of retail banking operations by May 2015, requiring compliance as soon as practicable thereafter and setting a final deadline for full implementation by 2019.

Additional information

Risk factors continued

The impact of any final legislation on the Group is difficult to estimate with any precision at this stage. The Statutory Instruments setting out the scope of the ring-fence required by the Banking Reform Act 2013 are currently under discussion and final versions are expected to be published at some point in the summer of 2014. The PRA will have responsibility for drawing up the ring-fencing rules which will impact on the governance and operation of the ring-fenced bank. It is understood that the first consultation on the PRA rules will commence around the summer of 2014. It is also likely that ring-fencing certain of the Group's operations would require significant restructuring with the possible transfer of large numbers of customers between legal entities. Ring-fencing is also likely to entail changes to the structure of the Group's existing pension arrangements, so as to ensure that any ring-fenced and non-ring-fenced banks that may eventually be established should not be liable for each other's pension liabilities. Any such changes could result in additional costs and increased operational risks. It is possible that such ring-fencing, by itself, or taken together with the impact of other proposals contained in this legislation and other EU legislation that will apply to the Group could have a material adverse effect on the Group's structure and on the viability of certain businesses, in addition to the Group's results of operations, financial condition and prospects.

On 29 January 2014, the EC published proposals on structural measures to improve the resilience of EU credit institutions which included potential separation of certain trading activities from retail banking operations. The proposal currently contemplates that member states having already implemented ring-fencing legislation, such as the UK, may apply for a derogation from the separation of trading activities provisions included in the proposals if they can satisfy the EC that such local legislation meets the objectives and requirements set out in the EU proposal. The timeline envisaged under the proposals would be the effective separation of other trading activities to apply as of 1 July 2018.

Under the US Federal Reserve's new rules which change how it regulates the US operations of large foreign banking groups (the "FBO Rules"), foreign banking organisations with total global consolidated assets of \$50 billion or more ("Large FBOs") and Large FBOs with total US assets of \$50 billion or more (excluding assets of US branches and agencies of a Large FBO's foreign banks and certain other US subsidiaries) will have to create a separately capitalised top-tier US intermediate holding company (IHC) that would hold all US bank and non-bank subsidiaries. The IHC would be subject to US capital, liquidity and other enhanced prudential standards on a consolidated basis. Among other things, an IHC will be subject to the same US risk based and leverage capital standards that apply to a US bank holding company.

The imposition of US capital, liquidity and other enhanced prudential standards, including capital planning and stress testing requirements, on an IHC of a Large FBO such as the Group that is subject to home country capital standards on a group-wide consolidated basis would likely give rise to challenging organisational and compliance issues and could make it more difficult to manage capital and liquidity efficiently on a global, consolidated basis. The foregoing is only one example of issues that the Group may confront as a result of the application of the FBO Rules to its US operations.

As a result of the adoption of the ring-fence proposals in the UK and the potential adoption of the other proposals described above, major changes to the Group's corporate structure, its business activities conducted in the UK and the US and potentially other jurisdictions where the Group operates, as well as changes to the Group's business model, are likely to be required. The changes include ring-fencing certain core banking activities in the UK from other activities of the Group as well as restructuring other operations within the Group in order to comply with these proposed new rules and regulations. The proposals, when adopted, are expected to take an extended period of time to put into place, to be costly to implement and may lack harmonisation, all of which could have a material adverse effect on the Group's structure, reputation, results of operations, financial condition and prospects.

The Group is subject to resolution procedures under current and proposed resolution and recovery schemes which may result in various actions being taken in relation to any securities of the Group, including the write off, write-down or conversion of the Group's securities

As a result of its status as a GSIFI and in accordance with current and proposed resolution and recovery schemes and the Prudential Standards issued by the PRA on 19 December 2013 on recovery and resolution planning, the Group was required to meet certain resolution planning requirements contemplating its possible failure by the end of 2012 and 2013 and will be required to meet others in 2014. The Group made the required submissions in 2012 to the Financial Services Authority (FSA) (now the PRA) and its US business made their required submissions to the Federal Reserve and the FDIC in H1 2013 and further submissions will be required to be made in 2014. Similar to other major financial institutions, both the Group and its key subsidiaries remain engaged in a constructive dialogue on resolution and recovery planning with key national regulators and other authorities. The Prudential Standards issued by the PRA may evolve over time to ensure continued consistency with the Financial Stability Board's (FSB) recommendations and the technical standards and guidelines produced by the European Banking Authority to implement the RRD.

In addition to the powers provided by the Banking Act 2009, as amended by the Banking Reform Act 2013, that include a bail-in power which could be implemented prior to January 2015, resolution powers will also be included in the RRD. The EU Member States, the European Parliament and the EC reached a political agreement as announced on 12 December 2013 on the RRD (which remains subject to technical finalisation and formal approval by the co-legislators) and current expectations are that the RRD will be finalised during the second quarter of 2014. The draft RRD includes a "bail-in" tool, which would give the relevant supervisory authorities the power to write down or write off claims (including debt securities issued by the Group and its subsidiaries) of certain unsecured creditors of a failing institution and/or to convert certain debt claims to equity. Except for the general bail-in tool, which is now expected to be implemented by 1 January 2016, it is currently contemplated that the measures set out in the draft RRD (including the power of authorities to write off or convert Additional Tier 1 and Tier 2 instruments) will be implemented with effect from 1 January 2015.

Additional information

Such bail-in mechanism, which is anticipated to be consistent with the powers granted under the Banking Reform Act 2013, pursuant to which losses would be imposed on shareholders and, as appropriate, creditors (including senior creditors) of the Group (through write-down or conversion into equity of liabilities including debt securities) would be used to recapitalise and restore the Group to solvency as well as other options, including those as set forth in the Banking Act 2009, as amended by the Banking Reform Act 2013, following the recommendations of the ICB. The methods for implementation of any resolution and recovery scheme remain the subject of significant debate, particularly for GSIFIs with complex cross border activities. Such debate includes whether the bail-in tool may be exercised through a single point of entry at the holding company or at various levels of the corporate structure of a GSIFI.

The potential impacts of these resolution and recovery powers may include the total loss of value of securities issued by the Group and, in addition for debt holders, the possible conversion into equity securities, and under certain circumstances the inability of the Group to perform its obligations under its securities. As these resolution and recovery measures remain subject to further implementation both at the European and UK level, changes may be made in the course of the legislative process, which may affect their impact on the Group and securities issued by the Group.

[The Group's operations are highly dependent on its information technology systems](#)

The Group's operations are dependent on the ability to process a very large number of transactions efficiently and accurately while complying with applicable laws and regulations where it does business. The proper functioning of the Group's payment systems, financial and sanctions controls, risk management, credit analysis and reporting, accounting, customer service and other information technology systems, as well as the communication networks between its branches and main data processing centres, are critical to the Group's operations. Critical system failure, any prolonged loss of service availability or any material breach of data security, particularly involving confidential customer data, could cause serious damage to the Group's ability to service its clients, could result in significant compensation costs, could breach regulations under which the Group operates and could cause long-term damage to the Group's business and brand.

For example, failure to protect the Group's operations from cyber-attacks could result in the loss of customer data or other sensitive information. During 2013, the Group experienced a number of IT failures following a series of deliberate attacks which temporarily prevented RBS, RBS Citizens and NatWest customers from accessing their accounts or making payments. The Bank of England, the FCA and HM Treasury have identified cyber security as a systemic risk to the UK financial sector and highlighted the need for financial institutions to improve resilience to cyber-attacks. In addition to meeting the requirements of the Bank of England's programme of work to improve and test financial institutions' resilience to cyber-attacks due to be completed during the first quarter of 2014, the Group expects greater regulatory engagement on cyber security in the future. Although the Group has been implementing remedial actions to improve its resilience to the increasing intensity and sophistication of cyber-attacks, the Group expects to be the target of continued attacks in the future and there can be no assurance that the Group will be able to prevent all threats.

In addition, in June 2012 and more recently in November 2013, computer system failures prevented NatWest, RBS and Ulster Bank customers from accessing accounts in both the UK and Ireland. Ongoing issues relating to the failure continued for several months, requiring the Group to set aside a provision for compensation to customers who suffered losses as a result of the system failure, in addition to other related costs. See page 451. The vulnerabilities of the Group's IT systems are due to the complexity of the Group's IT infrastructure attributable in part to overlapping multiple legacy systems acquired through the Group's acquisitions and resulting gaps in how the IT systems operate, and insufficient investments in IT infrastructure in the past, creating challenges in recovering from system breakdowns.

[The Group's operations have inherent reputational risk](#)

Reputational risk, meaning the risk of brand damage and/or financial loss due to a failure to meet stakeholders' expectations of the Group's conduct and performance, is inherent in the Group's business. Stakeholders include customers, investors, rating agencies, employees, suppliers, government, politicians, regulators, special interest groups, consumer groups, media and the general public. Brand damage can be detrimental to the business of the Group in a number of ways, including its ability to build or sustain business relationships with customers, low staff morale, regulatory censure or reduced access to, or an increase in the cost of, funding. In particular, negative public opinion resulting from the actual or perceived manner in which the Group conducts its business activities, the Group's financial performance, the level of direct and indirect government support or actual or perceived practices in the banking and financial industry may adversely affect the Group's ability to keep and attract customers and, in particular, corporate and retail depositors. Modern technologies, in particular online social networks and other broadcast tools which facilitate communication with large audiences in short time frames and with minimal costs, may significantly enhance and accelerate the impact of damaging information and allegations. The Group cannot ensure that it will be successful in avoiding damage to its business from reputational risk, which may result in a material adverse effect on the Group's financial condition, results of operations and prospects.

[The Group may suffer losses due to employee misconduct](#)

The Group's businesses are exposed to risk from potential non-compliance with policies, employee misconduct or negligence and fraud, which could result in regulatory sanctions and serious reputational or financial harm to the Group. In recent years, a number of multinational financial institutions, including the Group, have suffered material losses due to the actions of employees. It is not always possible to deter employee misconduct and the precautions the Group takes to prevent and detect this activity may not always be effective.

Additional information

Risk factors continued

The Group's earnings and financial condition have been, and its future earnings and financial condition may continue to be, materially affected by depressed asset valuations resulting from poor market conditions

Severe market events have resulted in the Group recording large write-downs on its credit market exposures in recent years. Any deterioration in economic and financial market conditions or continuing weak economic growth could lead to further impairment charges and write-downs. Moreover, market volatility and illiquidity (and the assumptions, judgements and estimates in relation to such matters that may change over time and may ultimately not turn out to be accurate) make it difficult to value certain of the Group's exposures, for example, the assets included in the CRG. Valuations in future periods, reflecting, among other things, the then prevailing market conditions and changes in the credit ratings of certain of the Group's assets, may result in significant changes in the fair values of the Group's exposures, including in respect of exposures, such as credit market exposures, for which the Group has previously recorded write-downs. In addition, the value ultimately realised by the Group may be materially different from the current or estimated fair value. As part of the Group's strategy it has materially reduced the size of its balance sheet mainly through the sale and run-off of non-core assets. Certain of the Group's assets that were part of its Non-Core division together with additional assets identified as part of a HM Treasury review, form part of CRG as of 1 January 2014. In connection with the establishment of CRG, the Group has indicated its clear aspiration to remove the vast majority, if not all of these assets within three years which has led to increased impairments of £4.5 billion which were recognised in Q4 2013. Despite these impairments, these assets may be difficult to sell and could be subject to further write-downs or, when sold, realised losses. Any of these factors could require the Group to recognise further significant write-downs or realise increased impairment charges, which may have a material adverse effect on its financial condition, results of operations and capital ratios. In addition, steep falls in perceived or actual asset values have been accompanied by a severe reduction in market liquidity, as exemplified by losses in recent years arising out of asset-backed collateralised debt obligations, residential mortgage-backed securities and the leveraged loan market. In dislocated markets, hedging and other risk management strategies may not be as effective as they are in normal market conditions due in part to the decreasing credit quality of hedge counterparties.

The Group may be required to make further contributions to its pension schemes if the value of pension fund assets is not sufficient to cover potential obligations

The Group maintains a number of defined benefit pension schemes for past and a number of current employees. Pension risk is the risk that the assets of the Group's various defined benefit pension schemes which are long-term in nature do not fully match the timing and amount of the schemes' liabilities, as a result of which the Group is required or chooses to make additional contributions to the schemes. Pension scheme liabilities vary with changes to long-term interest rates, inflation, pensionable salaries and the longevity of scheme members as well as changes in applicable legislation. The schemes' assets comprise investment portfolios that are held to meet projected liabilities to the scheme members. Risk arises from the schemes because the value of these asset portfolios, returns from them and any additional future contributions to the schemes, may be less than expected and because there may be greater than expected increases in the estimated value of the schemes' liabilities.

In these circumstances, the Group could be obliged, or may choose, to make additional contributions to the schemes. Given the recent economic and financial market difficulties and the risk that such conditions may occur again over the near and medium term, the Group could experience increasing pension deficits or be required or elect to make further contributions to its pension schemes and such deficits and contributions could be significant and have an adverse impact on the Group's results of operations or financial condition. The most recent tri-annual funding valuation, at 31 March 2010 was agreed during 2011. It showed the value of liabilities exceeded the value of assets by £3.5 billion at 31 March 2010, a ratio of assets to liabilities of 84%.

In order to eliminate this deficit, the Group has been and will continue to pay additional contributions each year over the period 2011 until 2018. Contributions started at £375 million per annum in 2011, increased to £400 million per annum in 2013 and will further increase from 2016 onwards in line with price inflation. These contributions are in addition to the regular annual contributions of around £200 million for on-going accrual of benefits as well as contributions to meet the expenses of running the schemes.

The Banking Reform Act 2013 will require banks to ring-fence specific activities (principally retail and small business deposits) from certain other activities. Ring-fencing is likely to entail changes to the structure of the Group's existing defined benefit pension schemes, which could affect assessments of the schemes' deficits. Such assessments may also be affected by other measures introduced in the Banking Reform Act 2013, including the categorisation of deposits eligible for compensation under the Financial Services Compensation Scheme as preferential debts.

The financial performance of the Group has been, and continues to be, materially affected by counterparty credit quality and deteriorations could arise due to prevailing economic and market conditions and legal and regulatory developments

The Group has exposure to many different industries and counterparties, and risks arising from actual or perceived changes in credit quality and the recoverability of monies due from borrowers and counterparties are inherent in a wide range of the Group's businesses. In particular, the Group has significant exposure to certain individual counterparties in weakened business sectors and geographic markets and also has concentrated country exposure in the UK, the US and across the rest of Europe (principally Germany, The Netherlands, Ireland and France) (at 31 December 2013 credit risk assets in the UK were £320.0 billion, in North America £96.1 billion and in Western Europe (excluding the UK) £104.3 billion); and within certain business sectors, namely personal finance, financial institutions, shipping and commercial real estate (at 31 December 2013 personal finance lending amounted to £177.1 billion, lending to financial institutions was £91.0 billion, lending against ocean going vessels was £8.6 billion and commercial real estate lending was £52.6 billion). The Group expects its exposure to the UK to increase proportionately as its business becomes more concentrated in the UK, with exposures generally being reduced in other parts of its business as it continues to implement its strategy.

The credit quality of the Group's borrowers and counterparties is impacted by prevailing economic and market conditions and by the legal and regulatory landscape in their respective markets.

Additional information

A further deterioration in economic and market conditions or changes to legal or regulatory landscapes could worsen borrower and counterparty credit quality and also impact the Group's ability to enforce contractual security rights. In addition, the Group's credit risk is exacerbated when the collateral it holds cannot be realised or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure that is due to the Group, which is most likely to occur during periods of illiquidity and depressed asset valuations, such as those experienced in recent years. This has been particularly the case with respect to large parts of the Group's commercial real estate portfolio. Any such losses could have an adverse effect on the Group's results of operations and financial condition.

Concerns about, or a default by, one financial institution could lead to significant liquidity problems and losses or defaults by other financial institutions, as the commercial and financial soundness of many financial institutions may be closely related as a result of credit, trading, clearing and other relationships. Even the perceived lack of creditworthiness of, or questions about, a counterparty may lead to market-wide liquidity problems and losses for, or defaults by, the Group. This systemic risk may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges with which the Group interacts on a daily basis, all of which could have a material adverse effect on the Group's access to liquidity or could result in losses which could have a material adverse effect on the Group's financial condition, results of operations and prospects.

In certain jurisdictions in which the Group does business, particularly Ireland, additional constraints have been imposed in recent years on the ability of certain financial institutions to complete foreclosure proceedings in a timely manner (or at all), including as a result of interventions by certain states and local and national governments.

These constraints have lengthened the time to complete foreclosures, increased the backlog of repossessed properties and, in certain cases, have resulted in the invalidation of purported foreclosures.

The EU, the ECB, the International Monetary Fund and various national authorities have proposed and implemented certain measures intended to address systemic financial stresses in the Eurozone, including the creation of a European Banking Union which, through a Single Resolution Mechanism (SRM) will apply the substantive rules of bank recovery and resolution set out in the RRD. Current expectations are that the RRD, which is intended to provide supervisory authorities with common tools and powers to address banking crises pre-emptively in order to safeguard financial stability and minimise taxpayers' exposure to losses, will be finalised early in 2014. The effectiveness of these and other actions proposed and implemented at both the EU and national level to address systemic stresses in the Eurozone is not assured.

The trends and risks affecting borrower and counterparty credit quality have caused, and in the future may cause, the Group to experience further and accelerated impairment charges, increased repurchase demands, higher costs, additional write-downs and losses for the Group and an inability to engage in routine funding transactions.

Changes in interest rates, foreign exchange rates, credit spreads, bond, equity and commodity prices, basis, volatility and correlation risks and other market factors have significantly affected and will continue to affect the Group's business and results of operations

Some of the most significant market risks the Group faces are interest rate, foreign exchange, credit spread, bond, equity and commodity prices and basis, volatility and correlation risks. Changes in interest rate levels (or extended periods of low interest rates such as experienced over the past several years), yield curves (which remain depressed) and spreads may affect the interest rate margin realised between lending and borrowing costs, the effect of which may be heightened during periods of liquidity stress. Changes in currency rates, particularly in the sterling-US dollar and sterling-euro exchange rates, affect the value of assets, liabilities, income and expenses denominated in foreign currencies and the reported earnings of the Group's non-UK subsidiaries and may affect the Group's reported consolidated financial condition or its income from foreign exchange dealing. For accounting purposes, the Group values some of its issued debt, such as debt securities, at the current market price. Factors affecting the current market price for such debt, such as the credit spreads of the Group, may result in a change to the fair value of such debt, which is recognised in the income statement as a profit or loss.

The performance of financial markets affects bond, equity and commodity prices, which has caused, and may in the future cause, changes in the value of the Group's investment and trading portfolios. As part of its ongoing derivatives operations, the Group also faces significant basis, volatility and correlation risks, the occurrence of which are also impacted by the factors noted above.

While the Group has implemented risk management methods to mitigate and control these and other market risks to which it is exposed, it is difficult to predict with accuracy changes in economic or market conditions and to anticipate the effects that such changes could have on the Group's financial performance and business operations.

The value or effectiveness of any credit protection that the Group has purchased depends on the value of the underlying assets and the financial condition of the insurers and counterparties

The Group has credit exposure arising from over-the-counter derivative contracts, mainly credit default swaps (CDSs), and other credit derivatives, each of which are carried at fair value. The fair value of these CDSs, as well as the Group's exposure to the risk of default by the underlying counterparties, depends on the valuation and the perceived credit risk of the instrument against which protection has been bought. Many market counterparties have been adversely affected by their exposure to residential mortgage linked and corporate credit products, whether synthetic or otherwise, and their actual and perceived creditworthiness may deteriorate rapidly. If the financial condition of these counterparties or their actual or perceived creditworthiness deteriorates, the Group may record further credit valuation adjustments on the credit protection bought from these counterparties under the CDSs. The Group also recognises any fluctuations in the fair value of other credit derivatives. Any such adjustments or fair value changes may have a material adverse impact on the Group's financial condition and results of operations.

Additional information

Risk factors continued

In the UK and in other jurisdictions, the Group is responsible for contributing to compensation schemes in respect of banks and other authorised financial services firms that are unable to meet their obligations to customers

In the UK, the Financial Services Compensation Scheme (FSCS) was established under the FSMA and is the UK's statutory fund of last resort for customers of authorised financial services firms. The FSCS can pay compensation to customers if a firm is unable or likely to be unable, to pay claims against it and may be required to make payments either in connection with the exercise of a stabilisation power or in exercise of the bank insolvency procedures under the Banking Act 2009. The FSCS is funded by levies on firms authorised by the FCA, including the Group. In the event that the FSCS raises funds from the authorised firms, raises those funds more frequently or significantly increases the levies to be paid by such firms, the associated costs to the Group may have an adverse impact on its results of operations and financial condition. In addition, the RRD will require the establishment of national resolution funds, which will require ex ante levies on banks and investment firms to ensure that the resolution tools contemplated by the RRD can be applied effectively.

To the extent that other jurisdictions where the Group operates have introduced or plan to introduce similar compensation, contributory or reimbursement schemes (such as in the US with the Federal Deposit Insurance Corporation), the Group may make further provisions and may incur additional costs and liabilities, which may have an adverse impact on its financial condition and results of operations.

The value of certain financial instruments recorded at fair value is determined using financial models incorporating assumptions, judgements and estimates that may change over time or may ultimately not turn out to be accurate

Under International Financial Reporting Standards (IFRS), the Group recognises at fair value: (i) financial instruments classified as held-for-trading or designated as at fair value through profit or loss; (ii) financial assets classified as available-for-sale; and (iii) derivatives.

Generally, to establish the fair value of these instruments, the Group relies on quoted market prices or, where the market for a financial instrument is not sufficiently active, internal valuation models that utilise observable market data.

In certain circumstances, the data for individual financial instruments or classes of financial instruments utilised by such valuation models may not be available or may become unavailable due to prevailing market conditions. In such circumstances, the Group's internal valuation models require the Group to make assumptions, judgements and estimates to establish fair value, which are complex and often relate to matters that are inherently uncertain. These assumptions, judgements and estimates will need to be updated to reflect changing facts, trends and market conditions. The resulting change in the fair values of the financial instruments has had and could continue to have a material adverse effect on the Group's earnings and financial condition.

The Group's results could be adversely affected in the event of goodwill impairment

The Group capitalises goodwill, which is calculated as the excess of the cost of an acquisition over the net fair value of the identifiable assets, liabilities and contingent liabilities acquired. Acquired goodwill is recognised initially at cost and subsequently at cost less any accumulated impairment losses. As required by IFRS, the Group tests goodwill for impairment annually, or more frequently when events or circumstances indicate that it might be impaired. An impairment test involves comparing the recoverable amount (the higher of the value in use and fair value less cost to sell) of an individual cash generating unit with its carrying value. At 31 December 2013, the Group carried goodwill of £10.1 billion on its balance sheet. The value in use and fair value of the Group's cash generating units are affected by market conditions and the performance of the economies in which the Group operates. Where the Group is required to recognise a goodwill impairment, it is recorded in the Group's income statement, although it has no effect on the Group's regulatory capital position. Any significant write-down of goodwill could have a material adverse effect on the Group's results of operations.

The recoverability of certain deferred tax assets recognised by the Group depends on the Group's ability to generate sufficient future taxable profits

In accordance with IFRS, the Group has recognised deferred tax assets on losses available to relieve future profits from tax only to the extent that it is probable that they will be recovered. The deferred tax assets are quantified on the basis of current tax legislation and accounting standards and are subject to change in respect of the future rates of tax or the rules for computing taxable profits and allowable losses. Failure to generate sufficient future taxable profits or changes in tax legislation or accounting standards may reduce the recoverable amount of the recognised deferred tax assets. In April 2011, the UK Government commenced a staged reduction in the rate of UK corporation tax from 28% to 23% over a four-year period and further rate reductions were announced in 2012 and 2013 which will lead to a corporation tax rate of 20% by April 2015. Such changes in the applicable tax rates will reduce the recoverable amount of the recognised deferred tax assets.

Shareholder enquiries

Shareholdings in the company may be checked by visiting the Shareholder centre section of our website, rbs.com. You will need the shareholder reference number printed on your share certificate or tax voucher to gain access to this information.

Listed below are the most commonly used features on the website:

- holding enquiry - view balances, values, history, payments and reinvestments;
- address change - change your registered address;
- e-Comms sign-up - choose to receive email notification when your shareholder communications become available instead of paper communications;
- outstanding payments - reissue any uncashed payments using our online replacement service; and
- downloadable forms - including stock transfer and change of address forms.

You may also check your shareholding by contacting our Registrar:

Computershare Investor Services PLC
The Pavilions
Bridgwater Road
Bristol BS99 6ZZ
Telephone: +44 (0)870 702 0135
Fax: +44 (0)870 703 6009
Website: www.investorcentre.co.uk/contactus

Braille and audio Strategic report with additional information

Shareholders requiring a Braille or audio version of the Strategic report with additional information should contact the Registrar on +44 (0)870 702 0135.

ShareGift

The company is aware that shareholders who hold a small number of shares may be retaining these shares because dealing costs make it uneconomical to dispose of them. ShareGift, the charity share donation scheme, is a free service operated by The Orr Mackintosh Foundation (registered charity 1052686) to enable shareholders to donate shares to charity.

Donating your shares in this way will not give rise to either a gain or a loss for UK capital gains tax purposes and you may be able to reclaim UK income tax on gifted shares. Further information can be obtained from HM Revenue & Customs.

Should you wish to donate your shares to charity in this way you should contact ShareGift for further information:

ShareGift, The Orr Mackintosh Foundation
17 Carlton House Terrace, London SW1Y 5AH
Telephone: +44 (0)20 7930 3737

Share fraud warning

Fraudsters use persuasive and high-pressure tactics to lure investors into scams. They may offer to sell shares that turn out to be worthless or non-existent, or to buy shares at an inflated price in return for an upfront payment. While high profits are promised, if you buy or sell shares in this way you will probably lose your money.

- Keep in mind that firms authorised by the FCA are unlikely to contact you out of the blue with an offer to buy or sell shares.
- Do not get into a conversation, note the name of the person and firm contacting you and then end the call.
- Check the Financial Services Register at www.fca.org.uk to see if the person and firm contacting you is authorised by the FCA.
- Beware of fraudsters claiming to be from an authorised firm, copying its website or giving you false contact details.
- Use the firm's contact details listed on the Register if you want to call it back.
- Call the FCA on 0800 111 6768 if the firm does not have contact details on the Register or you are told they are out of date.
- Search the list of unauthorised firms to avoid at www.fca.org.uk/scams
- Consider that if you buy or sell shares from an unauthorised firm you will not have access to the Financial Ombudsman Service or Financial Services Compensation Scheme.
- Think about getting independent financial and professional advice before you hand over any money.
- Remember if it sounds too good to be true, it probably is.

Report a scam

If you are approached by fraudsters please tell the FCA using the share fraud reporting form at www.fca.gov.uk/scams, where you can find out more about investment scams. You can also call the FCA Consumer Helpline on 0800 111 6768. If you have already paid money to share fraudsters you should contact Action Fraud on 0300 123 2040.

Trading market

Non-cumulative dollar preference shares

On 26 March 1997, 8 February 1999, 30 September 2004, 26 August 2004, 19 May 2005, 9 November 2005, 25 May 2006, 27 December 2006, 28 June 2007, 27 September 2007 and 4 October 2007, the company issued the following series of American Depository Shares (ADSs) representing non-cumulative dollar preference shares of the company, in the United States, of which the following were outstanding at 31 December 2013:

6,255,408 Series F ("Series F ADSs") representing 6,255,408 non-cumulative dollar preference shares, Series F;

9,687,654 Series H ("Series H ADSs") representing 9,687,654 non-cumulative dollar preference shares, Series H;

30,027,877 Series L ("Series L ADSs") representing 30,027,877 non-cumulative dollar preference shares, Series L;

23,125,869 Series M ("Series M ADSs") representing 23,125,869 non-cumulative dollar preference shares, Series M;

22,113,160 Series N ("Series N ADSs") representing 22,113,160 non-cumulative dollar preference shares, Series N;

9,883,307 Series P ("Series P ADSs") representing 9,883,307 non-cumulative dollar preference shares, Series P;

20,646,938 Series Q ("Series Q ADSs") representing 20,646,938 non-cumulative dollar preference shares, Series Q;

10,163,932 Series R ("Series R ADSs") representing 10,163,932 non-cumulative dollar preference shares, Series R;

26,449,040 Series S ("Series S ADSs") representing 26,449,040 non-cumulative dollar preference shares, Series S;

51,245,839 Series T ("Series T ADSs") representing 51,245,839 non-cumulative dollar preference shares, Series T; and

10,130 Series U ("Series U ADSs") representing 10,130 non-cumulative dollar preference shares, Series U.

Each of the respective ADSs set out above represents the right to receive one corresponding preference share, and is evidenced by an American Depository Receipt (ADR) and is listed on the New York Stock Exchange, a subsidiary of NYSE Euronext (NYSE).

The ADRs evidencing the ADSs above were issued pursuant to Deposit Agreements, among the company, The Bank of New York, as depository, and all holders from time-to-time of ADRs issued thereunder. Currently, there is no non-United States trading market for any of the non-cumulative dollar preference shares. All of the non-cumulative dollar preference shares are held by the depository, as custodian, in bearer form.

In May 2010, the Group redeemed certain subordinated debt securities and equity preference shares in exchange for cash or senior debt, resulting in the number of securities in issue reducing to the amounts shown above.

At 31 December 2013, there were 54 registered shareholders of Series F ADSs, 34 registered shareholders of Series H ADSs, 21 registered shareholders of Series L ADSs, 6 registered shareholders of Series M ADSs, 13 registered shareholders of Series N ADSs, 24 registered shareholders of Series P ADSs, 9 registered shareholders of Series Q ADSs, 3 registered shareholders of Series R ADSs, 1 registered shareholder of Series S ADSs, 18 registered shareholders of Series T ADSs and 1 registered shareholder of Series U ADSs.

PROs

In August 2001, the company issued US\$1.2 billion perpetual regulatory tier one securities (PROs) in connection with a public offering in the United States. The PROs are listed on the NYSE.

ADSs representing ordinary shares

In October 2007, the company listed ADSs, each representing one ordinary share nominal value 25p each (or a right to receive one ordinary share), and evidenced by an ADR or uncertificated securities, on the NYSE. The ADSs were issued in connection with the company's bid for the outstanding share capital of ABN AMRO Holding N.V.. With effect from 7 November 2008, the ratio of one ADS representing one ordinary share changed to one ADS representing 20 ordinary shares.

At the Annual General Meeting on 30 May 2012, shareholders approved a sub-division and consolidation of the Group's ordinary shares which resulted in new ordinary shares of 100 pence each being admitted to trading in London and New York with effect from 6 June 2012. The ratio of one ADS representing 20 ordinary shares changed to one ADS representing two ordinary shares with effect from 6 June 2012. As at 31 December 2013, 30.6 million ADSs were outstanding.

The ADSs described above were issued pursuant to a Deposit Agreement, among the company, The Bank of New York Mellon, as depository, and all owners and holders from time to time of ADSs issued thereunder. The ordinary shares of the company are listed and traded on the London Stock Exchange. All ordinary shares are deposited with the principal London office of The Bank of New York Mellon, as custodian for the depository.

Shareholder information

The following table shows, for the periods indicated, the high and low sales prices for each of the outstanding ADSs representing non-cumulative dollar preference shares and PROs, as reported on the NYSE or NASDAQ.

Following the ordinary share sub-division and consolidation which took effect from 6 June 2012, the ratio of one ADS representing 20 ordinary shares changed to one ADS representing two ordinary shares.

On 25 February 2014, the closing price of the ordinary ADSs on the New York Stock Exchange was \$12.05.

Notes:

(1) Classified as subordinated liabilities.

(2) Classified as equity.

On 26 November 2009, RBS entered into a State Aid Commitment Deed with HM Treasury containing commitments and undertakings that were designed to ensure that HM Treasury was able to comply with the commitments to be given by it to the European Commission for the purposes of obtaining approval for the State aid provided to RBS. As part of these commitments and undertakings, RBS agreed not to pay discretionary coupons and dividends on its existing hybrid capital instruments for a period of two years. This period commenced on 30 April 2010 for RBS Group instruments and ended on 30 April 2012; the two year deferral period for RBS Holdings N.V. instruments commenced on 1 April 2011 and ended on 1 April 2013.

On 4 May 2012, RBS determined that it was in a position to recommence payments on RBS Group instruments. In June 2013 RBS Holdings N.V. resumed payments on its hybrid capital instruments. Future coupons and dividends on hybrid capital instruments will only be paid subject to, and in accordance with, the terms of the relevant instruments.

For further information, see Note 7 on the consolidated accounts.

Ordinary dividends

The company has not paid an ordinary dividend since 2007. In 2008, the company issued new ordinary shares by way of a capitalisation issue rather than paying an interim dividend.

Shareholder information

Taxation for US Holders

The following discussion summarises certain US federal and UK tax consequences of the ownership and disposition of ordinary shares, ADSs representing ordinary shares (ordinary ADSs), ADSs representing non-cumulative dollar preference shares (preference ADSs) or PROs by a beneficial owner that is a citizen or resident of the United States or that otherwise will be subject to US federal income tax on a net income basis in respect of the ordinary shares, ordinary ADSs, preference ADSs or PROs (a "US Holder"). This summary assumes that a US Holder is holding ordinary shares, ordinary ADSs, preference ADSs or PROs, as applicable, as capital assets. This summary does not address the tax consequences to a US Holder (i) that is resident in the UK for UK tax purposes, (ii) that carries on a trade, profession or vocation through a branch, agency or permanent establishment in the UK in connection with which their ordinary shares, ordinary ADSs, preference ADSs or PROs are held, used or acquired, or (iii) generally, that is a corporation which alone or together with one or more associated companies, controls, directly or indirectly, 10% or more of the voting stock of the company, nor does this summary address all of the tax consequences to US Holders subject to special rules, such as certain financial institutions, dealers or traders in securities who use a mark-to-market method of tax accounting, persons holding ordinary shares, ordinary ADSs, preference ADSs or PROs as part of a hedging transaction, straddle, wash sale, conversion transaction or integrated transaction or persons entering into a constructive sale with respect to such securities, persons liable for the alternative minimum tax or the 'Medicare contribution tax' on 'net investment income,' persons whose functional currency for US federal income tax purposes is not the US dollar, entities classified as partnerships for US federal income tax purposes, tax-exempt entities, persons that own or are deemed to own 10% or more of the voting stock of the company.

The statements and practices set forth below regarding US and UK tax laws, including the US/UK double taxation convention relating to income and capital gains which entered into force on 31 March 2003 (the "Treaty") and the US/UK double taxation convention relating to estate and gift taxes (the "Estate Taxation Treaty"), are based on those laws and practices as in force and as applied in practice on the date of this report. This summary is not exhaustive of all possible tax considerations and holders are advised to satisfy themselves as to the overall tax consequences, including specifically the consequences under US federal, state, local and other laws, and possible changes in taxation law, of the acquisition, ownership and disposition of ordinary shares, ordinary ADSs, preference ADSs or PROs by consulting their own tax advisers.

The following discussion assumes that the company was not for the taxable year ended 31 December 2013, and will not become in the foreseeable future, a passive foreign investment company – see 'Passive Foreign Investment Company (PFIC) considerations' on page 547.

Ordinary shares, ordinary ADSs and preference ADSs

Taxation of dividends

For the purposes of the Treaty, the Estate Taxation Treaty and the US Internal Revenue Code of 1986 as amended (the "Code"), US Holders of ordinary ADSs and preference ADSs should be treated as owners of the respective ordinary shares and the non-cumulative dollar preference shares underlying such ADSs.

The US Treasury has expressed concerns that parties to whom depositary receipts are released before shares are delivered to the depositary, or intermediaries in the chain of ownership between US holders and the issuer of the security underlying the depositary receipts, may be taking actions that are inconsistent with the claiming of foreign tax credits for US holders of depositary receipts. Such actions would also be inconsistent with the claiming of the favourable US tax rates applicable to dividends received by certain non-corporate US holders (described below). Accordingly, the availability of the favourable tax rates for dividends received by certain non-corporate US holders could be affected by actions taken by such parties or intermediaries.

The company is not required to withhold UK tax at source from dividend payments it makes or from any amount (including any amounts in respect of accrued dividends) distributed by the company. US Holders who are not resident in the UK and who do not carry on a trade, profession or vocation in the UK through a branch, agency or permanent establishment in connection with which their ordinary shares, ordinary ADSs or preference ADSs are held, used or acquired will not be subject to UK tax in respect of any dividends received on the relevant shares or ADSs.

Distributions by the company (other than certain pro-rata distributions of ordinary shares or rights to receive such shares) will constitute foreign source dividend income for US federal income tax purposes to the extent paid out of the current or accumulated earnings and profits of the company, as determined for US federal income tax purposes. Because the company does not maintain calculations of its earnings and profits under US federal income tax principles, it is expected that distributions will be reported to US Holders as dividends. Payments will not be eligible for the dividends-received deduction generally allowed to corporate US holders.

Subject to applicable limitations that vary depending upon a US Holder's particular circumstances and the discussion above regarding concerns expressed by the US Treasury, dividends paid to certain non-corporate US Holders may be taxable at the favourable rates applicable to long-term capital gain. Non-corporate US Holders should consult their own tax advisers to determine whether they are subject to any special rules that limit their ability to be taxed at these favourable rates.

Shareholder information

Dividends will be included in a US Holder's income on the date of the US Holder's (or in the case of ADSs, the depositary's) receipt of the dividend. The amount of any dividend paid in pounds sterling to be included in income by a US Holder will be the US dollar amount calculated by reference to the relevant exchange rate in effect on the date of such receipt regardless of whether the payment is in fact converted into US dollars. If the dividend is converted into US dollars on the date of receipt, the US Holder generally should not be required to recognise foreign currency gain or loss in respect of the dividend income. If the amount of such dividend is converted into US dollars after the date of receipt, the US Holder may have foreign currency gain or loss.

Taxation of capital gains

A US Holder that is not resident in the UK will not normally be liable for UK tax on capital gains realised on the disposition of an ordinary share, an ordinary ADS or a preference ADS unless at the time of the disposal, in the case of a corporate US Holder, such US Holder carries on a trade in the UK through a permanent establishment or, in the case of any other US Holder, such US Holder carries on a trade, profession or vocation in the UK through a branch or agency and, in each case, such ordinary share, ordinary ADS or preference ADS is or has been used, held or acquired by or for the purposes of such trade (or profession or vocation), carried on through such permanent establishment, branch or agency. Special rules apply to individuals who are temporarily not resident in the UK.

A US Holder will, upon the sale or other disposition of an ordinary share, an ordinary ADS or a preference ADS, or upon the redemption of preference ADS, generally recognise capital gain or loss for US federal income tax purposes (assuming that in the case of a redemption of a preference ADS, such US Holder does not own, and is not deemed to own, any ordinary shares or ordinary ADSs of the company) in an amount equal to the difference between the amount realised (excluding in the case of a redemption any amount treated as a dividend for US federal income tax purposes, which will be taxed accordingly) and the US Holder's tax basis in such share or ADS. This capital gain or loss will be long-term capital gain or loss if the US Holder held the share or ADS so sold, disposed or redeemed for more than one year. The deductibility of capital losses is subject to limitations.

A US Holder who is liable for both UK and US tax on a gain recognised on the disposal of an ordinary share, an ordinary ADS or a preference ADS may be entitled, subject to certain limitations, to credit the UK tax against its US federal income tax liability in respect of such gain.

Estate and gift tax

Subject to the discussion of the Estate Tax Treaty in the following paragraph, ordinary shares, ordinary ADSs or preference ADSs beneficially owned by an individual may be subject to UK inheritance tax (subject to exemptions and reliefs) on the death of the individual or in certain circumstances, if such shares or ADSs are the subject of a gift (including a transfer at less than market value) by such individual. Inheritance tax is not generally chargeable on gifts to individuals made more than seven years before the death of the donor. Ordinary shares, ordinary ADSs or preference ADSs held by the trustees of a settlement may also be subject to UK inheritance tax. Special rules apply to such settlements.

An ordinary share, an ordinary ADS or a preference ADS beneficially owned by an individual, whose domicile is determined to be the United States for purposes of the Estate Tax Treaty and who is not a national of the UK, will not be subject to UK inheritance tax on the individual's death or on a lifetime transfer of such share or ADS, except in certain cases where the share or ADS (i) is comprised in a settlement (unless, at the time of the settlement, the settlor was domiciled in the United States and was not a national of the UK); (ii) is part of the business property of a UK permanent establishment of an enterprise; or (iii) pertains to a UK fixed base of an individual used for the performance of independent personal services. The Estate Tax Treaty generally provides a credit against US federal estate or gift tax liability for the amount of any tax paid in the UK in a case where the ordinary share, ordinary ADS or preference ADS is subject to both UK inheritance tax and US federal estate or gift tax.

UK stamp duty and stamp duty reserve tax (SDRT)

The following is a summary of the UK stamp duty and SDRT consequences of transferring an ADS (otherwise than to the custodian on cancellation of the ADS) or of transferring an ordinary share. A transfer of an ADS executed and retained in the United States will not give rise to stamp duty and an agreement to transfer an ADS will not give rise to SDRT. Stamp duty or SDRT will normally be payable on or in respect of transfers of ordinary shares and accordingly any holder that acquires or intends to acquire ordinary shares is advised to consult its own tax adviser in relation to stamp duty and SDRT.

Shareholder information

Taxation for US Holders continued

PROs

United States

Payments of interest on a PRO (including any UK withholding tax, as to which see below) will constitute foreign source dividend income for US federal income tax purposes to the extent paid out of the current or accumulated earnings and profits of the company, as determined for US federal income tax purposes. Because the company does not maintain calculations of its earnings and profits under US federal income tax principles, it is expected that distributions will be reported to US Holders as dividends. Payments will not be eligible for the dividends-received deduction generally allowed to corporate US holders. A US Holder who is entitled under the Treaty to a refund of UK tax, if any, withheld on a payment will not be entitled to claim a foreign tax credit with respect to the refundable tax. Subject to applicable limitations that vary depending upon a US Holder's particular circumstances and the discussion above regarding concerns expressed by the US Treasury, dividends paid to certain non-corporate US Holders may be taxable at the favourable rates applicable to long-term capital gain. Non-corporate US Holders should consult their own tax advisers to determine whether they are subject to any special rules that limit their ability to be taxed at these favourable rates.

A US Holder will, upon the sale, exchange or redemption of a PRO, generally recognise capital gain or loss for US federal income tax purposes (assuming that in the case of a redemption, such US Holder does not own, and is not deemed to own, any ordinary shares or ordinary ADSs of the company) in an amount equal to the difference between the amount realised (excluding any amount in respect of mandatory interest and any missed payments which are to be satisfied on a missed payment satisfaction date, which would be treated as ordinary income) and the US Holder's tax basis in the PRO.

A US Holder who is liable for both UK and US tax on gain recognised on the disposal of PROs may be entitled, subject to certain limitations, to credit the UK tax against all or a portion of its US federal income tax liability in respect of such gain.

United Kingdom

Taxation of payments on the PROs

Payments on the PROs will constitute interest rather than dividends for UK withholding tax purposes. However, the PROs constitute 'quoted eurobonds' within the meaning of section 987 of the Income Tax Act 2007 and therefore payments of interest will not be subject to withholding or deduction for or on account of UK tax as long as the PROs remain at all times listed on a 'recognised stock exchange' within the meaning of section 1005 of the Income Tax Act 2007, such as the main market of the New York Stock Exchange. In all other cases, an amount must be withheld on account of UK income tax at the basic rate (currently 20%) subject to any direction to the contrary by HM Revenue & Customs under the Treaty and except that the withholding obligation does not apply to payments to persons who the company reasonably believes are within the charge to corporation tax or fall within various categories enjoying a special tax status (including charities and pension funds), or are partnerships consisting of such persons (unless HM Revenue & Customs directs otherwise). Where interest has been paid under deduction of UK withholding tax, US Holders may be able to recover the tax deducted under the Treaty.

However, a US Holder who is entitled under the Treaty to a refund of UK tax, if any, withheld on a payment will not be entitled to claim a foreign tax credit with respect to the refundable tax.

Any paying agent or other person by or through whom interest is paid to, or by whom interest is received on behalf of an individual, may be required to provide information in relation to the payment and the individual concerned to HM Revenue & Customs. HM Revenue & Customs may communicate this information to the tax authorities of other jurisdictions.

HM Revenue & Customs confirmed at around the time of the issue of the PROs that interest payments would not be treated as distributions for UK tax purposes by reason of (i) the fact that interest may be deferred under the terms of issue; or (ii) the undated nature of the PROs, provided that at the time an interest payment is made, the PROs are not held by a company which is 'associated' with the company or by a 'funded company'. A company will be associated with the company if, broadly speaking, it is part of the same group as the company. A company will be a 'funded company' for these purposes if there are arrangements involving that company being put in funds (directly or indirectly) by the company, or an entity associated with the company. In this respect, HM Revenue & Customs has confirmed that a company holding an interest in the PROs which incidentally has banking facilities with any company associated with the company will not be a 'funded company' by virtue of such facilities.

Interest on the PROs constitutes UK source income for UK tax purposes and, as such, may be subject to income tax by direct assessment even where paid without withholding. However, interest with a UK source received without deduction or withholding on account of UK tax will not be chargeable to UK tax in the hands of a US Holder unless, in the case of a corporate US Holder, such US Holder carries on a trade in the UK through a UK permanent establishment or in the case of other US Holders, such persons carry on a trade, profession or vocation in the UK through a branch or agency in each case in connection with which the interest is received or to which the PROs are attributable. There are also exemptions for interest received by certain categories of agents (such as some brokers and investment managers).

EU Directive on taxation of savings income

Under the European Union Council Directive 2003/48/EC on the taxation of savings income, member states of the European Union are required to provide to the tax authorities of other member states details of payments of interest and other similar income paid by a person to an individual or certain other persons resident in another member state, except that Luxembourg and Austria may instead impose a withholding system for a transitional period unless during such period they elect otherwise. On April 10, 2013, the Luxembourg Ministry of Finance announced that Luxembourg's transitional period will end with effect from January 1, 2015.

Disposal (including redemption)

A disposal (including redemption) of PROs by a non-corporate US Holder will not give rise to any liability to UK tax on capital gains unless the US Holder carries on a trade (which for this purpose includes a profession or a vocation) in the UK through a branch or agency and the PROs are, or have been, held or acquired for the purposes of that trade, carried on through such branch or agency.

Shareholder information

A transfer of PROs by a US Holder will not give rise to a charge to UK tax on accrued but unpaid interest payments, unless the US Holder is an individual or other non-corporate taxpayer and at any time in the relevant year of assessment or accounting period carries on a trade, profession or vocation in the UK through a branch or agency to which the PROs are attributable.

Annual tax charges

Corporate US Holders of PROs may be subject to annual UK tax charges (or tax relief) by reference to fluctuations in exchange rates and in respect of profits, gains and losses arising from the PROs, but only if such corporate US Holders carry on a trade in the UK through a UK permanent establishment to which the PROs are attributable.

Inheritance tax

In relation to PROs held through Depository Trust Company (or any other clearing system), the UK inheritance tax position is not free from doubt in respect of a lifetime transfer, or death of, a US Holder who is not domiciled nor deemed to be domiciled in the UK for inheritance tax purposes; HM Revenue & Customs is known to consider that the situs of securities held in this manner is not necessarily determined by the place where the securities are registered. In appropriate circumstances, there may be a charge to UK inheritance tax as a result of a lifetime transfer at less than market value by, or on the death of, such US Holder.

Inheritance tax is not generally chargeable on gifts to individuals made more than seven years before the death of the donor. However, exemption from, or a reduction of, any such UK tax liability may be available under the Estate Tax Treaty (see below). US Holders should consult their professional advisers in relation to such potential liability. PROs beneficially owned by an individual, whose domicile is determined to be the United States for the purposes of the Estate Tax Treaty and who is not a national of the UK, will not be subject to UK inheritance tax on the individual's death or on a lifetime transfer of the PRO, except in certain cases where the PRO (i) is comprised in a settlement (unless, at the time of the settlement, the settlor was domiciled in the United States and was not a national of the UK); (ii) is part of the business property of a UK permanent establishment of an enterprise; or (iii) pertains to a UK fixed base of an individual used for the performance of independent personal services. The Estate Tax Treaty generally provides a credit against US federal estate or gift tax liability for the amount of any tax paid in the UK in a case where the PRO is subject to both UK inheritance tax and US federal estate or gift tax.

Stamp duty and SDRT

No stamp duty, SDRT or similar tax is imposed in the UK on the issue, transfer or redemption of the PROs.

Passive Foreign Investment Company (PFIC) considerations

In general, a foreign corporation will be a PFIC for any taxable year in which, after taking into account the income and assets of the corporation and certain subsidiaries pursuant to applicable 'look-through rules', either (i) at least 75% of its gross income is 'passive income' or (ii) at least 50% of the average quarterly value of its assets is attributable to assets which produce passive income or are held for the production of passive income. The company does not believe that it was a PFIC for its 2013 taxable year. Although interest income is generally passive income, a special rule allows banks to treat their banking business income as non-passive. To qualify for this rule, a bank must satisfy certain requirements regarding its licensing and activities.

The company's possible status as a PFIC is determined annually, however, and may be subject to change if the company fails to qualify under this special rule for any year in which a US Holder owns ordinary shares, ordinary ADSs, preference ADSs or PROs. If the company were to be treated as a PFIC for any taxable year during which a US Holder owned ordinary shares, ordinary ADSs, preference ADSs or PROs, the US Holder would generally be subject to adverse US federal income tax consequences and certain reporting obligations. Holders should consult their own tax advisers as to the potential application of the PFIC rules to the ownership and disposition of the company's ordinary shares, ordinary ADSs, preference ADSs or PROs.

Information reporting and backup withholding

Payments on, and proceeds from the sale of, ordinary shares, ordinary ADSs, preference ADSs or PROs that are made within the United States or through certain U.S.-related financial intermediaries may be subject to information reporting and backup withholding unless (i) the US Holder is an exempt recipient or (ii) in the case of backup withholding, the US Holder provides a correct taxpayer identification number and certifies that it is not subject to backup withholding. The amount of any backup withholding from a payment to a US Holder will be allowed as a credit against the US Holder's US federal income tax liability and may entitle it to a refund, provided that the required information is timely furnished to the Internal Revenue Service.

Foreign financial assets reporting

Certain US Holders who are individuals (and under proposed regulations, certain entities) may be required to report information relating to the company's securities, subject to certain exceptions (including an exception for securities held in accounts maintained by US financial institutions). US Holders are urged to consult their tax advisers regarding the application of these rules in the US Holders' particular circumstances.

Exchange controls

The company has been advised that there are currently no UK laws, decrees or regulations which would prevent the import or export of capital, including the availability of cash or cash equivalents for use by the Group, or the remittance of dividends, interest or other payments to non-UK resident holders of the company's securities.

There are no restrictions under the Articles of Association of the company or under UK law, as currently in effect, which limit the right of non-UK resident owners to hold or, when entitled to vote, freely to vote the company's securities.

Memorandum and Articles of Association

The company's Memorandum and Articles of Association as in effect at the date of this annual report are registered with the Registrar of Companies of Scotland. The Articles of Association were last amended on 30 May 2012. Copies can be obtained from Companies House in the UK or from the Group's website (rbs.com).

Incorporation and registration

The company was incorporated and registered in Scotland under the Companies Act 1948 as a limited company on 25 March 1968 under the name National and Commercial Banking Group Limited, and changed its name to The Royal Bank of Scotland Group Limited on 3 September 1979. On 10 March 1982 it was re-registered under the Companies Acts 1948 to 1980 as a public company with limited liability. The company is registered under Company No. SC45551.

Glossary of terms

Arrears - the aggregate of contractual payments due on a debt that have not been met by the borrower. A loan or other financial asset is said to be 'in arrears' when payments have not been made.

Asset-backed commercial paper (ABCP) - a form of asset-backed security generally issued by a commercial paper conduit.

Asset-backed securities (ABS) - securities that represent interests in specific portfolios of assets. They are issued by a structured entity following a securitisation. The underlying portfolios commonly comprise residential or commercial mortgages but can include any class of asset that yields predictable cash flows. Payments on the securities depend primarily on the cash flows generated by the assets in the underlying pool and other rights designed to assure timely payment, such as guarantees or other credit enhancements. Collateralised debt obligations, collateralised loan obligations, commercial mortgage backed securities and residential mortgage backed securities are all types of ABS.

Asset quality (AQ) band - probability of default banding for all counterparties on a scale of 1 to 10.

Assets under management - assets managed by the Group on behalf of clients.

Back-testing - statistical techniques that assess the performance of a model, and how that model would have performed had it been applied in the past.

Basel II - the capital adequacy framework issued by the Basel Committee on Banking Supervision in June 2006 in the form of the 'International Convergence of Capital Measurement and Capital Standards'.

Basel III - in December 2010, the Basel Committee on Banking Supervision issued final rules: 'Basel III: A global regulatory framework for more resilient banks and banking systems' and 'Basel III: International framework for liquidity risk measurement, standards and monitoring'.

Basis point - one hundredth of a per cent i.e. 0.01 per cent. 100 basis points is 1 per cent. Used when quoting movements in interest rates or yields on securities.

Bear steepener - a steepening of the yield curve caused by long-term rates increasing faster than short term rates.

BIPRU - the prudential sourcebook for banks, building societies and investment firms. The part of the Financial Conduct Authority's (FCA) Handbook that sets out detailed prudential requirements for the banks that they regulate.

Bull flattener - a flattening of the yield curve in which long term rates are decreasing faster than short term rates.

Buy-to-let mortgages - mortgages to customers for the purchase of residential property as a rental investment.

Capital requirements regulation (CRR) - see CRD IV.

Central counterparty (CCP) - an intermediary between a buyer and a seller (generally a clearing house).

Certificates of deposit (CDs) - bearer negotiable instruments acknowledging the receipt of a fixed term deposit at a specified interest rate.

Collateralised debt obligations (CDOs) - asset-backed securities for which the underlying asset portfolios are debt obligations: either bonds (collateralised bond obligations) or loans (collateralised loan obligations) or both. The credit exposure underlying synthetic CDOs derives from credit default swaps. The CDOs issued by an individual vehicle are usually divided in different tranches: senior tranches (rated AAA), mezzanine tranches (AA to BB), and equity tranches (unrated). Losses are borne first by the equity securities, next by the junior securities, and finally by the senior securities; junior tranches offer higher coupons (interest payments) to compensate for their increased risk.

Collateralised loan obligations (CLOs) - asset-backed securities for which the underlying asset portfolios are loans, often leveraged loans.

Collectively assessed loan impairment provisions - impairment loss provisions in respect of impaired loans, such as credit cards or personal loans, that are below individual assessment thresholds. Such provisions are established on a portfolio basis, taking account of the level of arrears, security, past loss experience, credit scores and defaults based on portfolio trends.

Commercial mortgage backed securities (CMBS) - asset-backed securities for which the underlying asset portfolios are loans secured on commercial real estate.

Commercial paper (CP) - unsecured obligations issued by a corporate or a bank directly or secured obligations (asset-backed CP), often issued through a commercial paper conduit, to fund working capital. Maturities typically range from two to 270 days. However, the depth and reliability of some CP markets means that issuers can repeatedly roll over CP issuance and effectively achieve longer term funding. CP is issued in a wide range of denominations and can be either discounted or interest-bearing.

Commercial paper conduit - a structured entity that issues commercial paper and uses the proceeds to purchase or fund a pool of assets. The commercial paper is secured on the assets and is redeemed either by further commercial paper issuance, repayment of assets or liquidity drawings.

Glossary of terms

Commercial real estate - freehold and leasehold properties used for business activities. Commercial real estate includes office buildings, industrial property, medical centres, hotels, retail stores, shopping centres, agricultural land and buildings, warehouses, garages etc.

Common Equity Tier 1 capital - the highest quality form of regulatory capital under Basel III comprising common shares issued and related share premium, retained earnings and other reserves excluding the cash flow hedging reserve, less specified regulatory adjustments.

Constant currency - reported results for the current reporting period are compared to results for comparative periods retranslated at exchange rates for the current period.

Contractual maturity - the date in the terms of a financial instrument on which the last payment or receipt under the contract is due for settlement.

Core Tier 1 capital - called-up share capital and eligible reserves plus equity non-controlling interests, less intangible assets and other regulatory deductions.

Core Tier 1 capital ratio - Core Tier 1 capital as a percentage of risk-weighted assets.

Cost:income ratio - operating expenses as a percentage of total income.

Counterparty credit risk - the risk that a counterparty defaults before the maturity of a derivative or sale and repurchase contract. In contrast to non-counterparty credit risk, the exposure to counterparty credit risk varies by reference to a market factor (e.g. interest rate, exchange rate, asset price).

Coverage ratio - impairment provisions as a percentage of impaired loans.

Covered bonds - debt securities backed by a portfolio of mortgages that are segregated from the issuer's other assets solely for the benefit of the holders of the covered bonds.

CRD IV - the European Union has implemented the Basel III capital proposals through the Capital Requirements Regulation (CRR) and the Capital Requirements Directive (CRD), collectively known as CRD IV. CRD IV was implemented on 1 January 2014. The European Banking Authority's technical standards are still to be finalised through adoption by the European Commission and implemented within the UK.

Credit default swap (CDS) - a contract where the protection seller receives premium or interest-related payments in return for contracting to make payments to the protection buyer upon a defined credit event in relation to a reference financial asset or portfolio of financial assets. Credit events usually include bankruptcy, payment default and rating downgrades.

Credit derivative product company (CDPC) - a structured entity that sells credit protection under credit default swaps or certain approved forms of insurance policies. Sometimes they can also buy credit protection. CDPCs are similar to monoline insurers. However, unlike monoline insurers, they are not regulated as insurers.

Credit derivatives - contractual agreements that provide protection against a credit event on one or more reference entities or financial assets. The nature of a credit event is established by the protection buyer and protection seller at the inception of a transaction, and such events include bankruptcy, insolvency or failure to meet payment obligations when due. The buyer of the credit derivative pays a periodic fee in return for a payment by the protection seller upon the occurrence, if any, of a credit event. Credit derivatives include credit default swaps, total return swaps and credit swap options.

Credit enhancements - techniques that improve the credit standing of financial obligations; generally those issued by a structured entity in a securitisation. External credit enhancements include financial guarantees and letters of credit from third-party providers. Internal enhancements include excess spread - the difference between the interest rate received on the underlying portfolio and the coupon on the issued securities; and over-collateralisation - on securitisation, the value of the underlying portfolio is greater than the securities issued.

Credit grade - a rating that represents an assessment of the creditworthiness of a customer. It is a point on a scale representing the probability of default of a customer.

Credit risk - the risk of financial loss due to the failure of a customer, or counterparty, to meet its obligation to settle outstanding amounts.

Credit risk mitigation - reducing the credit risk of an exposure by application of techniques such as netting, collateral, guarantees and credit derivatives.

Credit valuation adjustment (CVA) - the CVA is the difference between the risk-free value of a portfolio of trades and its market value, taking into account the counterparty's risk of default. It represents the market value of counterparty credit risk, or an estimate of the adjustment to fair value that a market participant would make to reflect the creditworthiness of its counterparty.

Currency swap - an arrangement in which two parties exchange specific principal amounts of different currencies at inception and subsequently interest payments on the principal amounts. Often, one party will pay a fixed rate of interest, while the other will pay a floating rate (though there are also fixed-fixed and floating-floating arrangements). At the maturity of the swap, the principal amounts are usually re-exchanged.

Customer accounts - money deposited with the Group by counterparties other than banks and classified as liabilities. They include demand, savings and time deposits; securities sold under repurchase agreements; and other short term deposits. Deposits received from banks are classified as deposits by banks.

Glossary of terms

Debit valuation adjustment (DVA) - an adjustment made by an entity to the valuation of OTC derivative liabilities to reflect within fair value the entity's own credit risk.

Debt securities - transferable instruments creating or acknowledging indebtedness. They include debentures, bonds, certificates of deposit, notes and commercial paper. The holder of a debt security is typically entitled to the payment of principal and interest, together with other contractual rights under the terms of the issue, such as the right to receive certain information. Debt securities are generally issued for a fixed term and redeemable by the issuer at the end of that term. Debt securities can be secured or unsecured.

Debt securities in issue - unsubordinated debt securities issued by the Group. They include commercial paper, certificates of deposit, bonds and medium-term notes.

Deferred tax asset - income taxes recoverable in future periods as a result of deductible temporary differences (temporary differences between the accounting and tax base of an asset or liability that will result in tax deductible amounts in future periods) and the carry-forward of tax losses and unused tax credits.

Deferred tax liability - income taxes payable in future periods as a result of taxable temporary differences (temporary differences between the accounting and tax base of an asset or liability that will result in taxable amounts in future periods).

Defined benefit obligation - the present value of expected future payments required to settle the obligations of a defined benefit plan resulting from employee service.

Defined benefit plan/scheme - pension or other post-retirement benefit plan other than a defined contribution plan.

Defined contribution plan/scheme - pension or other post-retirement benefit plan where the employer's obligation is limited to its contributions to the fund.

Deposits by banks - money deposited with the Group by banks and recorded as liabilities. They include money-market deposits, securities sold under repurchase agreements, federal funds purchased and other short term deposits. Deposits received from customers are recorded as customer accounts.

Derivative - a contract or agreement whose value changes with changes in an underlying index such as interest rates, foreign exchange rates, share prices or indices and which requires no initial investment or an initial investment that is smaller than would be required for other types of contracts with a similar response to market factors. The principal types of derivatives are: swaps, forwards, futures and options.

Discontinued operation - a component of the Group that either has been disposed of or is classified as held for sale. A discontinued operation is either: a separate major line of business or geographical area of operations or part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or a subsidiary acquired exclusively with a view to resale.

Economic capital - an internal measure of the capital required by the Group to support the risks to which it is exposed.

Economic profit - the difference between the return on shareholders funds and the cost of that capital. Economic profit is usually expressed as a percentage.

Effective interest rate method - the effective interest method is a method of calculating the amortised cost of a financial asset or financial liability (or group of financial assets or liabilities) and of allocating the interest income or interest expense over the expected life of the asset or liability. The effective interest rate is the rate that exactly discounts estimated future cash flows to the instrument's initial carrying amount. Calculation of the effective interest rate takes into account fees payable or receivable that are an integral part of the instrument's yield, premiums or discounts on acquisition or issue, early redemption fees and transaction costs. All contractual terms of a financial instrument are considered when estimating future cash flows.

Encumbrance - a interest in an asset held by another party. Encumbrance usually impacts the transferability of the asset and can restrict its free use until the encumbrance is removed.

Equity risk - the risk of changes in the market price of the equities or equity instruments arising from positions, either long or short, in equities or equity-based financial instruments.

Eurozone - the 17 European Union countries that have adopted the euro: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, The Netherlands, Portugal, Slovakia, Slovenia and Spain.

Expected loss (EL) - expected loss represents the anticipated loss on an exposure over one year. It is determined by multiplying probability of default, loss given default and exposure at default and can be calculated at individual, credit facility, customer or portfolio level.

Exposure - a claim, contingent claim or position which carries a risk of financial loss.

Exposure at default (EAD) - an estimate of the extent to which the bank will be exposed under a specific facility, in the event of the default of a counterparty.

FICO score - a credit score calculated using proprietary software developed by the Fair Isaac Corporation in the US from a consumer's credit profile. The scores range between 300 and 850 and are used in credit decisions made by banks and other providers of credit.

Financial Conduct Authority (FCA) - the statutory body responsible for conduct of business regulation and supervision of UK authorised firms from 1 April 2013. The FCA also has responsibility for the prudential regulation of firms that do not fall within the PRA's scope.

Glossary of terms

Financial Services Compensation Scheme (FSCS) - the UK's statutory fund of last resort for customers of authorised financial services firms. It pays compensation if a firm is unable to meet its obligations. The FSCS funds compensation for customers by raising management expenses levies and compensation levies on the financial services industry.

First/second lien - a lien is a charge such as a mortgage held by one party, over property owned by a second party, as security for payment of some debt, obligation, or duty owed by that second party. The holder of a first lien takes precedence over all other encumbrances on that property i.e. second and subsequent liens.

Forbearance - forbearance takes place when a concession is made on the contractual terms of a loan in response to a customer's financial difficulties.

Forward contract - a contract to buy (or sell) a specified amount of a physical or financial commodity, at an agreed price, at an agreed future date.

Fully loaded Basel III basis - capital ratios based on the rules that will apply at the end of the Basel III transition period.

Futures contract - a contract which provides for the future delivery (or acceptance of delivery) of some type of financial instrument or commodity under terms established at the outset. Futures differ from forward contracts in that they are traded on recognised exchanges and rarely result in actual delivery; most contracts are closed out prior to maturity by acquisition of an offsetting position.

G10 - the Group of Ten comprises the eleven industrial countries (Belgium, Canada, France, Germany, Italy, Japan, the Netherlands, Sweden, Switzerland, the United Kingdom and the United States) that have agreed to participate in the International Monetary Fund's (IMF's) General Arrangements to Borrow.

Government Sponsored Enterprises (GSEs) - a group of financial services corporations created by the US Congress. Their function is to improve the efficiency of capital markets and to overcome statutory and other market imperfections which otherwise prevent funds from moving easily from suppliers of funds to areas of high loan demand. They include the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association.

Gross yield - the interest rate earned on average interest-earning assets i.e. interest income divided by average interest-earning assets.

Haircut - a downward adjustment to collateral value to reflect its nature, any currency or maturity mismatches between a credit risk mitigant and the underlying exposure to which it is being applied.

Hedge funds - pooled investment vehicles that are not widely available to the public; their assets are managed by professional asset managers who participate in the performance of the fund.

Impaired loans - all loans for which an impairment provision has been established; for collectively assessed loans, impairment loss provisions are not allocated to individual loans and the entire portfolio is included in impaired loans.

Impairment allowance - see Loan impairment provisions.

Impairment losses - (a) for impaired financial assets measured at amortised cost, impairment losses - the difference between carrying value and the present value of estimated future cash flows discounted at the asset's original effective interest rate - are recognised in profit or loss and the carrying amount of the financial asset reduced by establishing a provision (allowance) (b) for impaired available-for-sale financial assets, the cumulative loss that had been recognised directly in equity is removed from equity and recognised in profit or loss as an impairment loss.

Individual liquidity guidance (ILG) - guidance from the PRA on a firm's required quantity of liquidity resources and funding profile.

Individually assessed loan impairment provisions - impairment loss provisions for individually significant impaired loans assessed on a case-by-case basis, taking into account the financial condition of the counterparty and any guarantor and the realisable value of any collateral held.

Interest rate swap - a contract under which two counterparties agree to exchange periodic interest payments on a predetermined monetary principal, the notional amount.

Interest spread - the difference between the gross yield and the interest rate paid on average interest-bearing liabilities.

Internal Capital Adequacy Assessment Process (ICAAP) - the Group's own assessment, as part of Basel II requirements, of its risks, how it intends to mitigate those risks and how much current and future capital is necessary having considered other mitigating factors.

Internal funding of trading business - the internal funding of the trading book comprises net banking book financial liabilities that fund financial assets in the Group's trading portfolios. Interest payable on these financial liabilities is charged to the trading book.

International Accounting Standards Board (IASB) - the independent standard-setting body of the IFRS Foundation. Its members are responsible for the development and publication of International Financial Reporting Standards (IFRSs) and for approving Interpretations of IFRS as developed by the IFRS Interpretations Committee.

International Swaps and Derivatives Association (ISDA) master agreement - a standardised contract developed by ISDA for bilateral derivatives transactions. The contract grants legal rights of set-off for derivative transactions with the same counterparty.

Investment grade - generally represents a risk profile similar to a rating of BBB-/Baa3 or better, as defined by independent rating agencies.

Key management - directors of RBSG and members of the Group Management Committee.

Latent loss provisions - loan impairment provisions held against impairments in the performing loan portfolio that have been incurred as a result of events occurring before the balance sheet date but which have not been identified as impaired at the balance sheet date.

Glossary of terms

Level 1 - level 1 fair value measurements are derived from quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 - level 2 fair value measurements use inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly.

Level 3 - level 3 fair value measurements use one or more unobservable inputs for the asset or liability.

Leverage ratio - a measure prescribed under Basel III. It is the ratio of tier 1 capital to total exposures. Total exposures include on-balance sheet items, off-balance sheet items and derivatives, and generally follow the accounting measure of exposure.

Leveraged finance - funding (leveraged finance) provided to a business resulting in an overall level of debt in relation to cash flow that exceeds that which would be considered usual for the business or for the industry in which it operates. Leveraged finance is commonly employed to achieve a specific, often temporary, objective: to make an acquisition, to effect a buy-out or to repurchase shares.

Liquidity and funding risk - the risk that the Group is unable to meet its financial liabilities when they fall due.

Liquidity coverage ratio (LCR) - the ratio of the stock of high quality liquid assets to expected net cash outflows over the following 30 days. High quality liquid assets should be unencumbered, liquid in markets during a time of stress and, ideally, central bank eligible.

Loan:deposit ratio - the ratio of loans and advances to customers net of provision for impairment losses and excluding reverse repurchase agreements to customer deposits excluding repurchase agreements.

Loan impairment provisions - loan impairment provisions are established to recognise incurred impairment losses on a portfolio of loans classified as loans and receivables and carried at amortised cost. It has three components: individually assessed loan impairment provisions, collectively assessed loan impairment provisions and latent loss provisions.

Loan-to-value ratio - the amount of a secured loan as a percentage of the appraised value of the security e.g. the outstanding amount of a mortgage loan as a percentage of the property's value.

London Interbank Offered Rate (LIBOR) - the benchmark interest rate at which banks can borrow funds from other banks in the London interbank market.

Loss given default (LGD) - an estimate of the amount that will not be recovered by the Group in the event of default, plus the cost of debt collection activities and the delay in cash recovery.

Market risk - the risk of loss arising from fluctuations in interest rates, credit spreads, foreign currency rates, equity prices, commodity prices and other risk-related factors such as market volatilities that may lead to a reduction in earnings, economic value or both.

Master netting agreement - an agreement between two counterparties that have multiple derivative contracts with each other that provides for the net settlement of all contracts through a single payment, in a single currency, in the event of default on, or termination of, any one contract.

Medium term notes (MTNs) - debt securities usually with a maturity of five to ten years, but the term may be less than one year or as long as 50 years. They can be issued on a fixed or floating coupon basis or with an exotic coupon; with a fixed maturity date (non-callable) or with embedded call or put options or early repayment triggers. MTNs are generally issued as senior unsecured debt.

Monoline insurers (monolines) - entities that specialise in providing credit protection against the notional and interest cash flows due to the holders of debt instruments in the event of default. This protection is typically in the form of derivatives such as credit default swaps.

Mortgage-backed securities - asset-backed securities for which the underlying asset portfolios are loans secured on property. See Residential mortgage backed securities and Commercial mortgage backed securities.

Mortgage servicing rights - the rights of a mortgage servicer to collect mortgage payments and forward them, after deducting a fee, to the mortgage lender.

Negative equity mortgages - mortgages where the value of the property mortgaged is less than the outstanding balance on the loan.

Net interest income - the difference between interest receivable on financial assets classified as loans and receivables or available-for-sale and interest payable on financial liabilities carried at amortised cost.

Net interest margin - net interest income as a percentage of average interest-earning assets.

Net stable funding ratio (NSFR) - the ratio of available stable funding to required stable funding over a one year time horizon, assuming a stressed scenario. Available stable funding includes items such as equity capital, preferred stock with a maturity of over one year and liabilities with an assessed maturity of over one year.

Non-performing loans - loans classified as Risk elements in lending and Potential problem loans. They have a 100% probability of default and have been assigned an AQ10 internal credit grade.

Operational risk - the risk of loss resulting from inadequate or failed processes, people, systems or from external events.

Glossary of terms

Option - an option is a contract that gives the holder the right but not the obligation to buy (or sell) a specified amount of the underlying physical or financial commodity, at a specific price, at an agreed date or over an agreed period. Options can be exchange-traded or traded over-the-counter.

Over-the-counter (OTC) derivatives - derivatives with tailored terms and conditions negotiated bilaterally, in contrast to exchange traded derivatives that have standardised terms and conditions.

Own credit adjustment (OCA) - the effect of the Group's own credit standing on the fair value of financial liabilities.

Past due - a financial asset such as a loan is past due when the counterparty has failed to make a payment when contractually due.

Pillar 1 - the part of Basel II that sets out the process by which regulatory capital requirements should be calculated for credit, market and operational risk.

Pillar 2 - the part of Basel II that sets out the process by which a bank should review its overall capital adequacy and the processes under which the supervisors evaluate how well financial institutions are assessing their risks and take appropriate actions in response to the assessments.

Pillar 3 - the part of Basel II that sets out the information banks must disclose about their risks, the amount of capital required to absorb them, and their approach to risk management. The aim is to strengthen market discipline.

Position risk requirement - a capital requirement applied to a position treated under BIPRU 7 (Market risk) as part of the calculation of the market risk capital requirement.

Potential future exposure - is a measure of counterparty risk/credit risk. It is calculated by evaluating existing trades done against the possible market prices in future during the lifetime of the transactions.

Potential problem loans (PPL) - loans for which an impairment event has taken place but no impairment loss is expected. This category is used for advances which are not past due 90 days or revolving credit facilities where identification as 90 days overdue is not feasible.

Private equity investments - equity investments in operating companies not quoted on a public exchange. Capital for private equity investment is raised from retail or institutional investors and used to fund investment strategies such as leveraged buyouts, venture capital, growth capital, distressed investments and mezzanine capital.

Probability of default (PD) - the likelihood that a customer will fail to make full and timely repayment of credit obligations over a one year time horizon.

Prudential Regulation Authority (PRA) - the statutory body responsible, from 1 April 2013, for the prudential supervision of banks, building societies, insurers and a small number of significant investment firms in the UK. The PRA is a subsidiary of the Bank of England.

Regular way purchase or sale - a purchase or sale of a financial asset under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

Regulatory capital - the amount of capital that the Group holds, determined in accordance with rules established by the PRA for the consolidated Group and by local regulators for individual Group companies.

Repurchase agreement (Repo) - see Sale and repurchase agreements.

Residential mortgage - a loan to purchase a residential property where the property forms collateral for the loan. The borrower gives the lender a lien against the property and the lender can foreclose on the property if the borrower does not repay the loan per the agreed terms. Also known as a home loan.

Residential mortgage backed securities (RMBS) - asset-backed securities for which the underlying asset portfolios are residential mortgages.

Retail loans - loans made to individuals rather than institutions. The loans may be for car purchases, home purchases, medical care, home repair, holidays and other consumer uses.

Return on equity - profit attributable to ordinary and B shareholders divided by average shareholders' equity as a percentage.

Reverse repurchase agreement (Reverse repo) - see Sale and repurchase agreements.

Risk appetite - an expression of the maximum level of risk that the Group is prepared to accept to deliver its business objectives.

Risk asset ratio (RAR) - total regulatory capital as a percentage of risk-weighted assets.

Risk elements in lending (REIL) - impaired loans and accruing loans which are contractually overdue 90 days or more as to principal or interest.

Glossary of terms

Risk-weighted assets (RWAs) - assets adjusted for their associated risks using weightings established in accordance with the Basel Capital Accord as implemented by the PRA. Certain assets are not weighted but deducted from capital.

Sale and repurchase agreements - in a sale and repurchase agreement one party, the seller, sells a financial asset to another party, the buyer, at the same time the seller agrees to reacquire and the buyer to resell the asset at a later date. From the seller's perspective such agreements are repurchase agreements (repos) and from the buyer's reverse repurchase agreements (reverse repos).

Securitisation - a process by which assets or cash flows are transformed into transferable securities. The underlying assets or cash flows are transferred by the originator or an intermediary, typically an investment bank, to a structured entity which issues securities to investors. Asset securitisations involve issuing debt securities (asset-backed securities) that are backed by the cash flows of income-generating assets (ranging from credit card receivables to residential mortgage loans).

Settlement balances - payables and receivables that result from purchases and sales of financial instruments recognised on trade date. Asset settlement balances are amounts owed to the Group in respect of sales and liability settlement balances are amounts owed by the Group in respect of purchases.

Sovereign exposures - exposures to governments, ministries, departments of governments and central banks.

Standardised approach - a method used to calculate credit risk capital requirements under Pillar 1 of Basel II. In this approach the risk weights used in the capital calculation are determined by regulators. For operational risk, capital requirements are determined by multiplying three years' historical gross income by a percentage determined by the regulator. The percentage ranges from 12 to 18%, depending on the type of underlying business being considered.

Standstill - is an agreement, usually for a specified period of time, not to enforce the Bank's rights as a result of a customer breaching the terms and conditions of their facilities. This is a concession to the customer. A standstill is most commonly used in a complex restructuring of a company's debts, where a group of creditors agree to delay enforcement action to give the company time to gather information and formulate a strategy with a view to establishing a formal restructuring.

Stress testing - a technique used to evaluate the potential effects on an institution's financial condition of an exceptional but plausible event and/or movement in a set of financial variables.

Stressed value-at-risk (SVaR) - a VaR measure using historical data from a one year period of stressed market conditions. For the purposes of calculating regulatory SVaR, a time horizon of ten trading days is assumed at a confidence level of 99%. (refer to Value-at-risk definition below).

Structured credit portfolio (SCP) - a portfolio of certain of the Group's illiquid assets - principally CDO super senior positions, negative basis trades and monoline exposures - held within Non-Core division.

Structured entity (SE) - an entity that has been designed such that voting or similar rights are not the dominant factor in deciding who controls the entity, for example when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. SEs are usually established for a specific, limited purpose, they do not carry out a business or trade and typically have no employees. They take a variety of legal forms - trusts, partnerships and companies - and fulfil many different functions.

Structured notes - securities that pay a return linked to the value or level of a specified asset or index. Structured notes can be linked to equities, interest rates, funds, commodities and foreign currency.

Subordinated liabilities - liabilities which, in the event of insolvency or liquidation of the issuer, are subordinated to the claims of depositors and other creditors of the issuer.

Super senior CDO - the most senior class of instrument issued by a CDO vehicle. They benefit from the subordination of all other instruments, including AAA rated securities, issued by the CDO vehicle.

Supervisory slotting approach - a method of calculating regulatory capital, specifically for lending exposures in project finance and income producing real estate, where the PD estimates do not meet the minimum IRB standards. Under this approach, the bank classifies exposures from 1 to 5, where 1 is strong and 5 is default. Specific risk-weights are assigned to each classification.

Tier 1 capital - Core Tier 1 capital plus other Tier 1 securities in issue, less material holdings in financial companies.

Tier 1 capital ratio - Tier 1 capital as a percentage of risk-weighted assets.

Tier 2 capital - qualifying subordinated debt and other Tier 2 securities in issue, eligible collective impairment allowances, unrealised available-for-sale equity gains and revaluation reserves less certain regulatory deductions.

Unaudited - financial information that has not been subjected to the audit procedures undertaken by the Group's auditors to enable them to express an opinion on the Group's financial statements.

Glossary of terms

US Federal Agencies - are independent bodies established by the US Government for specific purposes such as the management of natural resources, financial oversight or national security. A number of agencies, including, the Government National Mortgage Association, issue or guarantee publicly traded debt securities.

Value-at-risk (VaR) - a technique that produces estimates of the potential loss in the market value of a portfolio over a specified time period at a given confidence level.

Wholesale funding - wholesale funding comprises Deposits by banks, Debt securities in issue and Subordinated liabilities.

Write-down - a reduction in the carrying value of an asset to record a decline in its fair value or value in use.

Wrong-way risk - the risk of loss when the risk factors driving the exposure to a counterparty or customer are positively correlated with the creditworthiness of that counterparty i.e. the size of the exposure increases at the same time as the risk of the counterparty or customer being unable to meet that obligation, increases.

EDTF recommendations

The Enhanced Disclosure Taskforce (EDTF), established by the Financial Stability Board, published its report 'Enhancing the Risk Disclosures of Banks' in October 2012. The report suggests improvements to address the quality, comparability and transparency of risk disclosures in areas of risk governance, capital adequacy, liquidity and funding, credit risk and market risk.

The Group implemented the majority of the EDTF recommendations in its 2012 Annual Report and Accounts and Pillar 3 Report and the remainder in its 2013 reports.

The table below sets out the EDTF recommendations and the related locations in the 2013 Annual Report and Accounts and Pillar 3 Report.

Risk type	Recommendation	Page reference
		Report & Pillar 3 Accounts
General	1 Present all risk information together. Where this is not practicable, provide an index. 2 Risk terminology, risk measures and key parameter values used. 3 Top and emerging risks. 4 Key future regulatory ratios.	1, 174-364 557 548-556 ✓ 30, 179-181 195-202, 204 211, 213, 215
